2. INTRODUCTION

THE Osmania University has come into existence in response to a wide-spread demand in the Dominions for a type of higher education calculated to satisfy the intellectual and cultural aspirations of the people and having its foundations deep in their national consciousness. For over half a century higher education in the State was controlled by the Madras University. but the connection proved so unfructuous that enlightened public opinion in the State became averse to its continuance and proposals were mooted from time to time either to affiliate educational institutions in the State to another University or better still to have an entirely self-contained system of higher education. These proposals continued to be discussed for a long time without taking a definite shape until the accession of the present ruler of the State, whose reign has been the startingpoint of an era of unprecedented educational progress. Early in his reign an Educational Adviser was appointed to report on the improvements to be effected in the educational organization of the State and on his advice the whole system of Primary and Secondary education was overhauled, the number of schools was largely increased and all institutions were provided with better teachers and equipment. The question of higher education was then taken up and early in 1917 the Right Hon. Sir Akbar Hydari (Nawab Hydar Nawaz Jung Bahadur), then Secretary to His Exalted Highness' (lovernment in Educational Department, submitted a memorandum to His Exalted Highness in which after surveying the existing educational conditions and discussing the disadvantages of imparting knowledge through the medium of a foreign language he recommended that considering the peculiar needs and conditions of the State:-

> "we require a new University free from the evils inherent in the present system and calculated to undo its deplorable effects. The University so founded shall be based on the fundamental principles of education, and shall take into consideration the peculiar needs of the people and their national characteristics. It shall preserve all that is best in the present and ancient systems of education. It should be both an examining and a teaching body and in addition to this undertake to compile and translate books, using the Urdu language

both for the imparting of knowledge and the training of the intellect."

Sir A. Hydari the course of this memorandum, out the defects inherent in the present system of educaough the medium of a foreign language, such as the undue warranted strain on the students' memory, the time n mastering the intricacies of a foreign language at the of the subject-matter taught, the stifling of originality inability of the graduates to impart knowledge to their ountrymen in their mother-tongue and the unbridgeable is created between the educated classes and the mass of eral public. He also referred to the two possible ns that might be urged against the selection of Urdu as ium of instruction in the proposed University, firstly majority of the people spoke other languages and the absence of good books in Urdu. As to the first it nted out that although it was true that those whose tongue is Urdu are in a minority, yet Urdu is the cultural rial language of the State and of polite society, and is v spoken by those classes from which students proceedcollege course are drawn. The Rt. Hon. Sir Akbar Hydari second objection by stating that if a Bureau of comand translation were attached to the University, books I for College Classes could be produced in a short time. nion has proved to be well-founded as the Bureau of tion has, during this short period, produced almost all the equired as text-books for the Intermediate and the B.A. and is at present engaged in the translation of books on ledicine. Engineering and those required for M.A. & The capacity of Urdu as the vehicle for expressntific ideas is generally recognised. The well-known a, Mr. Vincent A. Smith, bears testimony to this fact in chapter of his History of India. While welcoming the ation of the Osmania University, he says:-

he Urdu language which resembles English in simplicity and flexibility of its syntax and in the extraordinary wealth of its vocabulary drawn from Western Hindi. Sanskrit, Persian. Arabic, English and other sources should be capable of expressing ideas on any subject, literary, philosophical and scientific."

Exalted Highness, whose deep and abiding interest in ancement of education is well known, was graciously to approve of the proposal and has ever since shown the interest in the progress of the movement, which but for his princely generosity and sympathetic guidance could not have made any headway. The words of his gracious Farman dated the 4th Rajab 1335 II. Khurdad 1326 F.—April 1917) are well worth reproduction:—

"I am pleased to express my approval of the views set forth in the Arzdasht and the memorandum submitted therewith, regarding the inauguration of a University in the State, in which the knowledge and culture of ancient and modern times may be blended so harmoniously as to remove the defects created by the present system of education and full advantage may be taken of all that is best in the ancient and modern systems of physical, intellectual, and spiritual culture. dition to its primary object of diffusing knowledge, it should aim at the moral training of the students and give an impetus to research in all scientific subjects. The fundamental principle in the working of the University should be that Urdu should form the medium of higher education but that a knowledge of English as a language should at the same time be deemed With this all students. vroslugamos for in view I am pleased to order that steps be taken for the inauguration on the lines laid down in the Arzdasht. of a University for the Dominions, to be called the Osmania University of Hyderabad in commemoration of my accession to the throne."

In pursuance of the august commands of His Exalted Highness, the Educational Department proceeded at once with the preliminary spade-work necessary for the launching of this great project. Representative Committees were formed to consider courses of studies for the Faculties of Arts and Theology of the proposed University, and the draft curricula prepared by these Committees were circulated widely in educational circles in England and in India with the result that the promoters of the University had the satisfaction of seeing that their conclusions were more or less approved of by eminent educational authorities.

The main features of these curricula are that in the Matriculation, the students can have a good grounding in the subjects which they will study at College. In the Intermediate Examination, a greater latitude has been given in the selection of subjects than in other Indian Universities, whilst at the same time the subjects have been so grouped as to enable a student to take up more or less cognate and allied subjects. This division of

ects into distinctive groups makes intensive study poss he B.A. Classes since besides English and Theology als which are compulsory, a student can take up only icular subject in which he can specialise and later carriarch work. It may also be noted that Theology or Mcompulsory for all under-graduates in the Faculties of Science.

The standard of compulsory English is nearly the sam ther Universities, which enables the alumni of the Osm versity to keep in touch with the currents of thought in lish-speaking world and prevents them from being conf ne publications of the University. They are also encourable staff to consult English books on various subjects the questions are set to them to criticise and to explain. I is taught only as a language, so that the students may be peak and write it with ease and accuracy and to appreciat is best in modern English Literature.

The first constructive work of the University was the es ment of a Bureau of Translation with a staff of e lified translators under the direction of a noted scholar The Bureau has been very successful in its work c ng the immense difficulties in the way, specially in the coi cientific terms for which expert committees are consta rork and have devised a terminology for a number of scie work attempted by the Bureau embraces the whole rang versity studies including History (Eastern and Weste losophy, Economics, Sociology, Mathematics (pure lied), Physics, Chemistry, Law, Botany, Zoology and Geo sineering, Pedagogics and Medicine. The books translate Bureau are printed at the University Press attached to The Dairat-ul-Maarif (Oriental Publication Bur ch publishes rare Arabic books not available in print ha tly been placed under the control of the University. rices rendered by this institution to the cause of Arabic le have been universally recognised not only in Islamic cour also by European Orientalists.

Under the Charter, the constitution of the University, v been framed to suit local conditions of official and p, differs in some respects from that of the older Indian Un es. Academic and administrative functions are veste inct bodies specially constituted for these purposes. s object the Faculties have been so constituted as to per demic functions, which in many Indian Universities are med by the Syndicate. The number of Fellows appothe Faculties is restricted, so that all members of the Se

do not necessarily belong to one or other of the Faculties, which consist mainly of the professorial staff who have a preponderating voice in academic matters. The Syndicate is on the other hand a business and not an academic Committee of the Senate. The Executive Government of the University including the general supervision and control over the colleges is vested in the Council, which is the highest governing body of the University and practically performs most of the functions of Government in British Indian Universities.

The Osmania University College was opened in August 1919. The enrolment in the various classes has been most encouraging and the College has now 1314 students on its rolls. The first Intermediate Examination was held in April 1921, and the first B. A. Examination in 1923. As there is more than one paper in every subject it has been found possible to have external examiners in all subjects, who are generally professors in other Universities. They have expressed satisfaction with the standard reached by the students. It may be noted that the University does not experience any difficulty in securing the services of highly qualified examiners from other Universities, as Urdu is a language widely known in every part of India specially in the North.

A staff of three Professors and ten Assistant Professors was originally sanctioned to meet the requirements of an Intermediate College, but in view of the opening of the B.A. and B.Sc. and subsequently the M.A., M.Sc., Ph.D. and LL.B. classes, a number of new appointments has been made and the sanctioned teaching staff of the Osmania University College now consists of the following:—

2	Senior Professors		Rs.	1000-50-1200

New buildings of the University are being constructed at Adikmet at about four miles from the city at an estimated cost of about 2.22 crores of rupees. As these buildings will take some time to be built, temporary buildings have been constructed at a cost of nearly ten lacs of rupees which are quite adequate for the present requirements of the University. The permanent Arts building which cost nearly 30 lacs of rupees is completed, and two commodious double-storied hostels are also ready.

The permanent Science buildings which will cost nearly 30 lacs of rupces are nearing completion.

The University is at present imparting instruction in the Faculties of Arts, Theology, Science, Medicine, Engineering, Law and Education and the total number of students is 2536.

The University is of the unitary type. There are four institutions at Hyderabad, Aurangabad, Warangal and Gulbarga which are allowed to prepare and present candidates for the Intermediate Examination of the University besides the Women's College which has Intermediate, B.A., B.Sc., M.A., M.Sc., and Dip.-in-Ed. classes. A College of Medicine was opened in July 1927, and an Engineering College and a College for the training of teachers in 1929.

The budget provision for the various Departments of the University for the year 1351 Fasli—(October 1941 to October 1942) is as follows:—

-,		Rs.
1.	University Office	 1,91,476
	University College	 8,48,745
3.	Medical ('ollege	 2,26,931
4.	Engineering College	 2,03,667
	Training College	 36,964
6.	College for Women	 $1,\!26,\!931$
7.	City Intermediate College	 69,413
8.	Aurangabad Intermediate College	 58,906
9.	Warangal Intermediate College	 36,402
	Gulbarga Intermediate College	 41,492
11.	Translation Bureau	 1,56,705
12.	University Press	 1,19,914
13.	Nizamiah Observatory	 45,259
	Total O.S. Rs	 21,62,006

Note.—British Rs. 100 are equal to O.S. Rs. 116-10-8.

There is no Provident Fund as all the posts are pensionabl from General Revenues. All servants of the University are entitled after 25 years' continuous and approved service to full pension which is one-half of the average monthly salary for the last three years of service.

BOARDS OF STUDIES.

(For 1351 and 1352)

(A. Faculty of Arts.)

1. English.

- 1. Prof. Hosain Ali Khan, B.A. (Oxon.), Bar.-at-Law.
- 2. Prof. F. J. A. Harding, B.A. Hons., D.E. (Oxon.).
- 3. Mr. Syed Mohd. Azam, M.A. (Cantab.), B.Sc. Hons. (London), F.C.S., E.E.
- 4. Prof. T. Virabhadrudu, M.A., L.T. (Madras).
- 5. Mr. M. S. Doraiswamy, M.A., L.T. (Madras), B.A. Hons. (Oxon.).
- 6. Mr. V. S. Krishnan, B.A. Hons. (Mad.), B.A. Hons. (Oxon.).

2. Arabic.

- 1. Dr. Abdul Haq, B.Litt., D.Phil. (Oxon.).
- 2. Dr. M. Nizamuddin, Ph.D. (Cantab.).
- 3. Moulvi Munazir Ahsan Gilani Sahib.
- 4. Dr. Zahid Ali, D.Phil (Oxon.).
- 5. Moulvi Abdullah Emadi Sahib.
- 6. Moulvi Syed Ibrahim Sahib.

3. Sanskrit.

- 1. Dr. Aryendra Sharma, M.A. (Alld.), D.Phil. (Munich).
- 2. Pandit Lukshmi Kant Shastri.
- 3. Mr A. Sita Ram Rao, M.A.
- 4. Mr. Abdus Sattar Subhani, B.A., L.T.
- 5. Mr. C. N. Joshi, M.A.
- 6. Mr. Vansidhar Shastri.

4. Persian.

- 1. Dr. M. Nizamuddin, Ph.D. (Cantab.),
- 2. Dr. Abdul Haq, B.Litt., D.Phil. (Oxon.).
- 3. Moulvi Abdul Hamid Khan Sahib, M.A.
- 4. Moulvi Abdullah Emadi Sahib.
- Dr. Qari Syed Kalimullah Husaini, M.A., LL.B. (Osmania), Ph.D. (London).
- 6. Mr. Ghulam Dastagir Rasheed, M.A. (Osmania).

5. Urdu.

- 1. Dr. Syed Mohiuddin Qadri Zore, M.A. (Osmania), Ph.D. (Lond.).
- 2. Dr. M. Nizamuddin, Ph.D. (Cantab.).
- 3. Dr. Khalifa Abdul Hakim, M.A., LL.B. (Punjab), Ph.D. (Heidelberg).
- 4. Dr. Syed Sajjad, M.A. (Alld.), Ph.D. (London).
- 5. Dr. Aryendra Sharma, M.A. (Alld.), D.Phil. (Munich).
- 6. Mr. Abdul Qadir Sarwari, M.A., LL.B. (Osmania).

6. Marathi.

- 1. Mr. R. M. Bhusari, M A. (Cal.), M.A. (Nagpur).
- 2. Mr. Narayan Rao Nandapurkar, M.A. (Bom.).
- 3. Mr. C. N. Joshi, M.A. (Bom.).
- 4. Dr. D. D. Shenderker, B.A. Hons. (Bom.), B.T. (Dacca), T.D., Ph.D. (London).
- 5. Mr. K. R. Bidarkar, M.A.
- 6. Mr. R. A. Kshirsagar, B.A.

7. Telugu.

- 1. Mr. R. Subba Rao.
- 2. Mr. Sooriya Prakash Rao.
- 3. Mr. Sita Ramayya, M.A. (Madras).
- 4. N. V. Shastri, M.A.
- 5. Mr. Ilandla Sita Ram Rao, M.Sc.
- Pandit Lakshmi Kant Shastri.

8. Kannada.

- 1. Mr. D. K. Bhimasena Rao, M.A.
- 2. Mr. A. Sitaram Rao, M.A.
- 3. Mr. H. V. Krishnaswamy.
- 4. Mr. G. A. Chandarvarkar, M.A.
- 5. Mr. T. R. Ram Rao, B.A.
- 6. Mr. Baqar Mohiuddin Mehkri, B.A., B.Com.

9. History.

- 1. Prof. Haroon Khan Sherwani, M.A. (Oxon.), Bar.-at-Law.
- 2. Mr. Ghulam Yazdani, M.A., F.R.A.S.B., O.B.E.
- 3. Mr. Muhammad Jamilur Rahman, M.A. (Punjab).
- 4. Dr. Ishwarnath Topa, Ph.D. (Freiberg).
- 5. Dr. Yusuf Husain Khan, D.Litt. (Paris).
- 6. Mr. Abdul Majeed Siddiqi, M.A. (Osmania).

10. Economics and Sociology.

- Dr. Anwar Iqbal Quraishi, M.A. (Punjab), M.Sc. (Lond.), Ph.D. (Dublin).
- 2. Dr. Jafar Hasan, Ph.D. (Heidelberg).
- 3. Mr. Qadir Husain Khan, M.A., Bar.-at-Law.
- 1. Mr. Mohd. Elias Burny, M.A., LL.B. (Alig.).
- 5. Mr. Habibur Rahman, M.A., LL.B. (Alig.), B.Sc. Hons. (London).
- i. Mr. Abdul Qadir, B.A. Hons. (Madras), B.Sc. Hons. (London)
- 7. Mr. Syed Fazlullah.

11. Philosophy.

- t. Dr. Khalifa Abdul Hakim, M.A., LL.B. (Punjab), Ph.D. (Heidelberg).
- Nawab Sir Amin Jung Bahadur, M.A., B.L. (Madras), L.L.D., F.R.A.S., K.C.I.E., C.S.I.
- 3. Moulvi Abdul Bari Sahib Nadvi.
- L. Dr. Mir Valiuddin, M.A. (Alig.), Ph.D. (London).
- 5. Mr. M. Salahuddin, M.A. (Dacca).

12. Mathematics.

- l. Prof. Qazi Mohamad Husain, M.A. (Punjab), B.A., LL.B. (Cantab.).
- 2. Mr. T. P. Bhaskaran, M.A., F.R.A.S.
- 3. Prof. Kishen Chand, M.A. (Cantab.).
- Mr. Syed Mohamad Azam, M.A. (Cantab.), B.Sc. Hons. (London), F.C.S., E.E.
- Dr. Raziuddin Siddiqui, M.A., (Cantab), Ph.D. (Leipzig), D.Sc. (Osm.).
- 5. Mr. V. N. Patwari, M.A. (Osmania).

Compulsory Theology.

- Nawab Dr. Nazir Yar Jung Bahadur, M.A. (Cantab.), LL.D., Bar.-at-Law.
- 2. Moulvi Manazir Ahsan Sahib Gilani.

5. THE ROYAL CHARTER.

Promulgated with His Exalted Highness' Firman dated the 16th Zilhijja 1336 Hijri (17th Aban 1327 F., 22nd September 1918) published in Gazette Extraordinary, Volume XLIX, No. 64 of the 30th Aban 1327 Fasli (5th October 1918).

Whereas the prosperity and well being of our devoted and logal subjects are the objects of our most carnest solicitude, and whereas these objects can be secured only when the existing organisation of education in our Dominions is freed to an appreciable extent from the control of outside Universities, and higher education is organised within the State, with reference to local needs and conditions: We are pleased to order:—

- 1. that a University called the Osmania University be established at Hyderabad on the first day of Muharram 1337 Hijri.
- 2. the object of the Osmania University is to provide higher education, in theology, morals, literature, philosophy, science history, medicine, law. agriculture and commerce, besides providing instruction in arts, industries and other useful branches of knowledge and promoting research in all of these subjects.
- 3. the chief characteristic of the Osmania University will be that instruction will be imparted in all branches of learning through the medium of the Urdu language while a study of the English language and literature will be compulsory.
 - 4. The University shall have power-
- (a) lo provide for instruction in all such branches of learning as University may decide and also for research, and for the advancement and dissemination of knowledge.
- (b) to grant to and confer degrees and other academic distinctions on persons who shall have pursued a prescribed course of study in, and passed the examinations held by the University.
- (c) to grant diplomas, certificates or other distinctions to persons who have pursued a course of study under conditions approved by the University.
- (d) to admit graduates of other Universities to degrees of the same or similar rank.
 - (e) to confer honorary degrees, or other distinctions.
- (f) to withdraw or cancel degrees, diplomas, certificates or other distinctions granted or conferred, and

- (g) to exercise all such other powers and to do all such other acts as may be required in order to further the objects of the University and to carry on its work.
- 5. The University shall be able and capable in law to take, purchase, and hold any property, movable or immovable, which may become vested in it for the purposes of the University by purchase, grant, testamentary disposition or otherwise, and shall be able and capable in law to grant, demise, alien or otherwise dispose of, all or any of the property, movable or immovable belonging to the University; and also to exercise such other powers and do other acts incidental or appertaining to a body corporate.
- 6. The University shall be able and capable to establish colleges on its initiative, or to exercise all of its powers with regard to colleges founded for it or transferred to its control, or to those to which it recognises as colleges, and all these shall be deemed to be its constituent colleges.
 - 7. The organization of the University will be as follows:-

Council
Senate

Syndicate

Faculties

Boards of Studies

- S. We shall be pleased to be the Patron of the University, and the other officers and executive bodies shall be as follows:--
 - (1) The Chancellor.—The Chancellor shall be the highest controlling authority of the University and may at any time direct an inspection and supervision of the University institutions, including buildings, laboratories and other appurtenances generally, and to direct the inspection of one or all of these for the purpose of seeing that the proceedings of the University are in conformity with this Charter and the rules framed thereunder.
 - The Chancellor may also by order in writing annul any proceedings which is not in his opinion in conformity with this Charter and the rules framed thereunder.
 - His Excellency the Minister shall be the ex-officio Chancellor of the University.

- (2) The Vice-Chancellor.—The Assistant Minister of Education or the officer charged with the administration of the University shall be the Vice-Chancellor of the University and he shall take rank in the University next to the Chancellor.
 - He shall exercise general supervision over the educational arrangements of the University, and it shall be his duty to see that the provisions of this Charter and the rules framed thereunder are faithfully observed.
 - If any emergency arises the Vice-Chancellor shall be empowered to pass such orders or to take such action as he deems necessary and intimate the fact to the officer who in the ordinary course would have dealt with the matter.
- (3) The Council.—The Executive Government of the University including the general superintendence and control over the Constituent Colleges shall be vested in the Council; provided that the Government may by rules framed in this behalf from time to time reserve to themselves such powers relating to the appointment, punishment, removal and leave of the officers as they may deem fit.
 - The Council shall consist of not less than nine and not more than eleven members excluding principals of Constituent Colleges and shall comprise:—
 - (i) His Excellency the Minister.
 - (i) The Assistant Minister. Education, or the Officer charged with the Administration of the University.
 - (iii) The Assistant Minister, Ecclesiastical Department.
 - (iv) The Assistant Minister of Finance.
 - (v) The Secretary to Government, Education Department.
 - (vi) The Director of Public Instruction.
 - (vii) The Principals of Constituent Colleges.
 - (viii) The remaining members appointed by the Government.
 - The Secretary to the Government, Education Depart ment will be the Secretary to the Council.

- (4) The Senate.—The Senate shall, subject to this Charter and the rules framed thereunder, have the entire charge of the organization of instruction in the Unversity and the Constituent Colleges, the curriculum, and the examination and discipline of students and the conferment of ordinary and honorary degrees.
 - The Senate shall consist of such number of members not less than forty and not more than seventy as may be fixed from time to time by the Chancellor. Such members shall be styled Fellows and shall hold office for a term of two years and their powers and duties shall be set forth in detail in the rules.
 - The first members of the Senate shall be appointed for that period by Government.
 - After the lapse of the said term of two years, the Senate shall be composed of-
- (a) The Vive-Chancellor and the other members of the Council mentioned in Section (3).
- (b) The University Professors.
- (c) Four members elected by the Senate, two from the list of registered graduates and two from members of the Faculties.
- (d) The remaining members nominated by the Chancellor provided that the election and nomination of persons as Fellows shall be so regulated as to secure in the Senate a majority of persons connected with or following the profession of education.
- (5) The Syndicate.— The Syndicate will be the business commiltee of the Senate and will consist of not less than 5 nor more than 7 members of the Senate, and its powers and duties shall be set forth in detail in the rules.
- (6) Faculties.—These will be academical Committees of the Senate, entrusted with the framing of curricula and arranging for examinations and other matters. These Committees will be appointed from time to time in accordance with rules framed hereafter, and for each branch of knowledge there will be a separate Faculty. The University shall include at present the Faculties of Arts and Theology.
 - Each Faculty shall be composed of not less than 12 nor more than 16 members of whom at least two in excess of half the number shall be from the Professors of the University.

- Each Faculty shall elect from among its members Dean.
- A Faculty shall have power to consider and report of any matter referred to it by the Senate or by the Council.
- (7) Boards of Studies.—There shall be a Board of Studi in Theology and for every branch of knowledge.
 - The members of the Boards shall be recommended by the Faculties to the Senate and on its recommendation appointed by the Council and shall consist of University Professors and other persons possessing specific modeledge of the subjects dealt with by the Boards which they are appointed.
 - The duties of the Boards shall be to recommend to t Faculties text-books for study and for translatic courses of study and examiners in their respective of partments, and generally to advise in all matter referred to them by the Council or by the Faculty which they belong.
- (8) Board of Audit.—This Board will be empowered audit all the accounts of the University and of property, etc... It shall be appointed every year the Senate and shall consist of three Fellows not ing members of the Council. The accounts of University shall also be audited on behalf of Gove ment every year, by an officer appointed for purpose by Government, the interval between earlier audit being not more than 15 months.
 - The Government auditor shall have access to all accounts and offices of the University.
- (9) Registrar.—The Registrar shall also be Secretary the Senate and Syndicate. The Registrar may a member of the Senate or Syndicate but shall not a member of the Council.
 - The Registrar shall be appointed by Government the recommendation of the Council but the first gistrar shall be appointed by Government.
- (10) Other persons and bodies in the rules in force.
- 9. The Council may, subject to the provisions of this Cha and the rules in force, appoint Committees consisting of Fell of the University and also, if the Council think fit, of perwho are not Fellows of the University, and may delegate to s

Committees such duties as they think fit, as regards administrative or other matters affecting the University or any particular Faculty or Department, or the management or supervision of any building or property of the University,

The Senate, the Faculties and the Boards of Studies, shall be similarly empowered to appoint such committees within their respective spheres.

- 10. The University shall, in the discharge of its functions, use a scal, the design of which has been approved by as.
- 11. Subject to the provisions of this Charter and the rules in force the Council may from time to time make any rules and regulations required for carrying out all or any of the purposes of this Charter.

The Council may from time to time make additional rules or amend or repeal the rules in force, but all new rules and additions to the rules and all amendments and repeals of the rules shall, before they come into effect, require the previous approval of the Government who will be empowered to pass suitable orders thereon.

The first rules shall be framed and enforced by Government.

- 12. The Senate shall have power to draft and propose to the Council rules to be made by the Council and it shall be the duty of the Council duly to consider the same.
- 13. All grants made by Government from time to time and alt sums paid or endowments made by private persons or local authorities, for the purposes of the University shall form a fund styled "the University Fund" which shall be at the disposal of the University to be employed for any of the purposes set forth in this Charter.
- 14. The Council shall have prepared and laid before the Senate every year, accounts of receipts and expenditure of the University. The budget after consideration by the Senate shall be submitted to Government and it shall be competent to Government to pass suitable orders on it.
- 15. The duties and powers of the University and its executive officers and bodies shall be set forth in further detail in the rules.

(By Order)
A. HYDARI,
SECRETARY TO GOVERNMENT,
Judicial, Police & General Departments.

- 1. The Vice-Chancellor shall have the power to c meetings of the Council and the Senate and to perform a acts as may be necessary to carry out or further the objects Royal Charter and the rules thereunder.
- 2. If an emergency arises which in the opinion of th Chancellor requires immediate action, the Vice-Chancello take such steps as he deems necessary and report the the authorised officer who, in ordinary course, would have with the matter.

3. In matters which are not touched upon in the Royal Charter or the Ruies and in which he considers a reference to Government necessary, the Vice-Chancellor may make such reference to Government on such matters.

CHAPTER III.

THE COUNCIL.

4 The nominated members of the Council shall hold office for a term of three years. Such memberships as fall vacant from time to time will be filled up by the Government. A member of the Council whose term has expired shall be eligible for re-nomination.

5. The Council shall submit to Government without delay

copies of the proceedings of the Senate.

6. The Council shall meet ordinarily once a month and at other times when convened by the Vice-Chancellor. The Vice-Chancellor or, in his absence, the senior member present, shall preside at the meetings.

7. Half the number of members shall constitute a quorum, fractions being counted as whole numbers. All questions shall

be decided by a majority of votes of the members present.

8. In accordance with the provisions of the Royal Charter and the Rules made in pursuance thereof, the Council shall, in addition to the powers vested in it, also exercise the following powers, viz:—

(a) To determine from time to time the number of professors, assistant professors, etc., and other members of the teaching staff and the office establishment of the University and its constituent colleges.

(b) In the case of appointments, within their power of disposal, to delegate, subject to the general control of the Council, the power of appointment to such authority or authorities as the Council may from time to time by general or special resolution direct.

(c) To organise and regulate the finances, accounts, investments, property, business matters, and all other administrative works of the University and for that purpose to appoint such agents as they may think fit.

(d) To invest any money belonging to the University including any unutilized income in stocks, funds, shares and securities or in the purchase of immovable property and to alter such investments from time to time.

(e) To transfer or accept transfer of any movable or immovable property on behalf of the University.

- (f) To provide buildings, lands, furniture and apparatus and other accessories needed for carrying on the work of the University.
- (g) To enter into, alter and cancel, contracts on behalf of the University.
- (h) To entertain, adjudicate upon and redress any grievances of the professors, the teaching staff, the graduates, the undergraduates and the University servants, who may for any reason feel aggrieved.
- (i) To maintain a register of donors to the University.
- (j) To draft rules as and when they see fit and submit the same to the Government for consideration and approval.

The following additional powers were delegated to the Council in accordance with His Exalted Highness the Nizam's Firman dated the 20th Rajab 1340 Hijri, 16th Ardibehisht 1331 F.—20th March 1922:—

- (1) To transfer any expenditure from one sub-head to another.
- (2) To sanction all kinds of leave to any officer, whose leave the Principal, the Registrar or the Curator is not authorised to sanction, and also to cancel the same.
- (3) To sanction amal-i-taynati from one office of the University to another.
- (4) To change the designation of any non-gazzetted appointment.
- (5) To sanction arrears of pay or travelling allowance due to an officer of the University for any period.
- (6) To depute officers of the University to places outside the Dominions to attend Scientific Conferences, to study the working of other Universities or to purchase stores or apparatus for the University or for any other purpose in the interests of the University.
- (7) To sanction the payment of full salary to the officiating officer, when the permanent incumbent avails of extraordinary leave.
- (8) To commute absence without leave into leave of any kind to which an officer is entitled under the Rules provided the period of absence does not exceed six months.
 - (9) To sanction furlough (rukhsat-i-khangi) to officers of the University up to a limit of three years for pur-

- pose of study irrespective of the length of their services.
- (10) To sanction holidays and vacations for the colleges and offices of the University or to close the colleges and offices during epidemics.
- (11) To sanction rates of remuneration for books translated on piece-work.
- (12) To sanction extension in the services of officers of the University up to a limit of 60 years.
- (13) To start a newly appointed officer on a salary above the minimum pay of the grade.
- (14) Notwithstanding anything to the contrary in Articles 113 and 117 of the Civil Service Regulations, the Council of the Osmania University will be competent to sanction allowances for plural appointments in the colleges or offices of the University subject to the general condition that the cost of these arrangements should on no account exceed the provision in the budget for the appointments.
- N.B.—If the Financial Member differs in any financial matter from the view taken by the majority the case shall be referred to Government.

CHAPTER IV.

1. THE SENATE.

- 9. In accordance with the provisions of Section 8 (1, 2, 3, 4, 5 and 6 of the Charter) dated 16th Zilhijja 1336 Hijri (22nd September 1918), the Chancellor, the Vice-Chancellor, the Secretary to Government, Education Department, the Director of Public Instruction, the Councillors, the Deans of the Faculties of Theology and Arts and the Fellows of the University, shall have seniority and precedence first, in the order above specified down to the Deans; and secondly, according to their official precedence in the case of ex-officio Fellows and thirdly, in the case of the remaining Fellows according to the sequence of their original appointments.
- 10. The election of members shall be subject to the approval of the Chancellor.
- 11. The Chancellor may, on the representation of two-thirds of the members of the Senate, cancel the appointment of any person as a Fellow of the University, and as soon as such cancellation is notified in the *Jarida*, the said person shall cease to be a Fellow. When a member is charged with gross misbehaviour

unfitting his office, the Senate will hear him or any other member nominated by him on his behalf before reporting the matter to the Chancellor.

- 12. Every Fellow elected and nominated under the Rules shall be eligible for re-election or nomination at the close of his term of office.
- 13. All casual vacancies among elected members shall be filled up by the body which elected the member who held the vacant membership.

2. POWERS OF THE SENATE

14. In accordance with the provisions of the Royal Charter and Rules made in pursuance thereof, the Senate shall among other powers also have the following powers:—

(a) To discuss and declare an opinion on any matter whatso-

ever relating to the University.

(b) To suggest to the Council the removal of any professor or teacher of the University or the appointment of

additional professors or other teachers.

(c) To formulate, modify or revise schemes for the organization of the Faculties of the University and to assign to such Faculties their respective subjects and also to report to the Council regarding the expediency of the abolition, amalgamation or sub-division of any Faculty.

(d) To institute and confer such degrees and grant such Diplomas, Licenses, Certificates, and other distinctions in respect of courses of study and examination

as may be prescribed in the Rules.

(v) To make rules regarding the academic apparel of graduates, holders of distinctions and officers of the Univer-

sity.

(f) To fix, subject to conditions made by the founder and accepted by the University rules and regulations and terms of competition for fellowships, scholarships and other prizes and to award the same.

(g) To report on any matter transferred or delegated to them by the Council.

(h) To promote research within the University and to call for reports on the subject from time to time.

(i) To maintain a Register of Graduates.

3. MEETINGS OF THE SENATE.

15. The Senate shall meet ordinarily once a year in the month of Amardad. If deemed necessary by the Vice-

Chancellor, meetings may be convened at other times also. A copy of the proceedings of such meetings must be sent to the Council.

- 16. The Vice-Chancellor shall convene a meeting of the Senate on the requisition of any six Fellows.
- 17. Twenty members shall constitute a quorum and all questions shall be decided by a majority of votes of the members present.
- 18. Any member of the Senate shall be empowered to bring forward a resolution dealing with any matter pertaining to the proceedings of the Faculties or of the Syndicate or with any question concerning the budget or otherwise connected with the affairs of the University. Such resolution, it carried, shall be forwarded to the Council and the Council shall inform the Senate in due course of the action taken. Should the Senate be not satisfied with or disapprove of the course of action adopted by the Council, it shall have power to make a representation to Government on the subject.
- 19. Such proposals and amendments only as are immediately connected with the Osmania University and are in accordance with the Royal Charter shall be entertained and debated in the Senate.

4. Convocation.

- 20. A convocation for conferring degrees shall be held on the fourth Monday in Azur or if that day happens to be a holiday, on the next working day or on such other graduation day as may be appointed by the Chancellor or Vice-Chancellor.
- 21. Persons entitled to degrees and desirous of being admitted must apply in writing 10 days previously to the Registrar who will communicate their names together with the necessary certificates to the respective Deans of Faculties for submission to the Senate on the next graduation day.
- 22. The Senate will, on the motion of the Dean of each Faculty or in his absence, the senior member of the Faculty respectively pass, the necessary graces in that behalf and the persons so approved shall be presented to the Chancellor or Vice-Chancellor successively, the graduates in the Faculty of Theology taking precedence of those in Arts.
- 23. In special cases and at the discretion of the Syndicate candidates who have passed the examinations may be permitted to take their degrees in absentia on payment of an extra fee of Rs. 10.

5. NOTICE AND PROCEDURE.

- Sixteen clear days before the day fixed for a meeting the Senate, the Registrar shall forward to each member of t Senate a statement of all business to be brought before t meeting and containing the full text of each resolution propos to be put before the Senate with the name of the proposer each, a written intimation of which has previously been ceived by the Registrar. The inclusion of a report of any co mittee of the Senate in the Agenda paper shall be held to equivalent to notice of a motion, for its adoption. writing of proposed amendments and the terms thereof a of motions for any change in the order of business as set for in the statement must be forwarded so as to reach the Registr five clear days before the meeting. The Registrar shall, two cle days before the meeting, forward to each member of the Sens a statement of all motions and amendments, and no motion amendment of which such previous notice has not been give shall be put to the meeting. The following motions may, ho ever, be proposed without a previous entry in the Agen naper:---
 - (a) A motion for dissolution, adjournment or suspensi of the sitting to pass to the next business on t Agenda paper.
 - (b) A request to the Council to reconsider a question; a direction to the Syndicate to review their decision.
 - (c) A motion remitting the matter under consideration the Syndicate or to a Faculty for report, or
 - (d) An amendment admitted by the Chairman as pure formal.

Order of Business.

- 25. The members shall, before they take their place, regis their attendance in a book placed for the purpose at the entrar of the place of meeting.
- 26. Fifteen minutes after the time prescribed for the me ing, the Chairman shall ascertain whether there are twen members present; if this number be not present, the meeti shall forthwith be adjourned to such a date as the Chairm may fix. Such adjournment shall be recorded by the Regists under the signature of the Chairman. In case of a meeti adjourned for want of quorum, no quorum will be required pass the adjournment.
- 27. At every meeting, unless the meeting, by special vo otherwise determine, the order of business shall be as follows

- (a) The election of the Chairman if such election forms part of the business.
- (b) The signing of the minutes of the previous meeting or the meeting under adjournment.
- (c) The election of any official of the University, if such election forms part of the business of the meeting.
- (d) Any motion for a change in the order of business.
- (c) Such business and motions of which notice has been given according to the rules in the order in which such business and motions are entered in the Agenda Paper, and also motions to be brought forward subject to the provisions of this Rule and Rule 24.

7. RULES OF DEBATE.

(1) Motions.

- 28. Every motion shall be affirmative in form and shall begin with the word "that."
- 29. Every motion shall be moved by the member in whose name it stands on the Agenda Paper; if he is absent or declines to move, it may be moved by any other member.
- 30. Every motion at a meeting must be seconded otherwise it shall drop. The seconder of a motion may reserve his speech.
- 31. When a motion has been seconded it shall be stated from the chair.
- 32. When a motion has thus been stated it may be discussed as a question to be resolved in the affirmative or as proposed to be changed by amendment.

When before or after debate no member rises to speak to the motion the chairman shall proceed to put the question to the vote in the manner hereinafter explained.

- 33. A substantive proposal once brought forward shall not be proposed a second time at the same meeting or at any adjournment thereof. A proposal substantially identical in part with one already disposed of at the same meeting or adjourned meeting, may be brought forward with the omission of such part.
- 34. Not more than one proposal and one amendment thereto shall be placed before the meeting at the same time. Each amendment shall be disposed of before the next is moved. All amendments which are not withdrawn under Rule 43, or which do not violate Rule 36, shall be debated and voted upon. In case no notice of amendment under Rule 24 has been given, the Senate shall proceed to consider and to vote upon the bare proposal.

(2) Amendments.

- 35. No amendment shall be proposed which would reduce the original proposal to its negative form.
- 36. No amendment shall be proposed which raises a question already disposed of by the meeting or is adverse to any resolution passed by it.
- 37. The order in which amendments to proposal are to be brought forward shall be determined by the chairman in view of their object and logical inter-relation.
- 38. An amendment, the substance of which has been disposed of in part, may be modified by its proposer so as to retain only the parts not so disposed of.
- 39. When an amendment has been moved and seconded, it shall be stated from the chair and then the debate may proceed on the original proposal and the amendment together; but if the questoin raised by the amendment is one on which a member has not yet spoken he may speak to that question though he had spoken to the original question or a previous amendment.
- 40. Every amendment shall be proposed in such form as may enable the modification of the original motion in any or all of the following ways:—
 - (1) by addition of words;
 - (2) by deletion of words;
 - (3) by substitution of words;

and the mover may state how exactly the motion or the part thereof affected would stand when so amended.

- 41. If any amendment is so carried it shall become part of the motion before the Senate and the motion shall be modified accordingly.
- 42. When all the amendments of which due notice has been given, have been considered, the original motion or original motions as amended in the course of debate shall be placed before the Senate and put to the vote without further discussion.

(3) Withdrawal of a Question.

43. No motion shall be withdrawn from the decision of the Senate without its unanimous consent. If the mover states his wish to withdraw a proposal or amendment and if no dissent is expressed during the interval allowed by the Chairman for the purpose, the Chairman shall declare that the question is withdrawn with the consent of the Senate.

(4) Resolution of the Senate into a Committee.

- 44. The Senate may, when it thinks fit, resolve itself into a Committee to consider any item which may be on the Agenda Paper. A motion for the resolution of a meeting into a Committee may be made by any member at any time—but not so as to interrupt a speech—without the notice required under Rule 24. Such motion, however, can only be placed before the Senate for consideration if the Chairman has permitted it. No speech shall be allowed in moving such motion. No such motion shall be considered unless fifteen members rise in support thereof. The motion having thus been duly seconded shall be put to the meeting without further discussion and shall only be carried if two-thirds of the members present vote in its favour.
- 45. When the Senate decides in this manner to resolve itself into a committee the Chairman shall be the same as for the meeting of the Senate and the quorum shall be the same as for the meeting of the Senate.

The manner in which the discussion of the matter under consideration shall be conducted shall be left to the discretion of the Chairman.

When in the opinion of the Chairman the matter has been sufficiently discussed the committee shall embody its conclusions in a report to be signed by the Chairman. The period during which the Senate is sitting in the committee shall be considered as a suspension of the sitting of the Senate and immediately the committee terminates, the Senate shall be again called to order by the Chairman and report of the Committee's deliberations presented to it by the Registrar. If a resolution passed by the Committee involves recommendations not covered by the original motion and the amendments to that motion on the Agenda of the meeting, they shall not be considered by the Senate until notice of these has been given as required under Rule 24, and the meeting of the Senate shall be adjourned to allow such notice being given. A motion made as a result of the deliberations of such a Committee may be presented to the Senate without previous consideration by the Syndicate.

(5) Adjournments, etc.

- 46. A proposal "that this meeting be now dissolved" may be moved at any time as a distinct question but not as an amendment nor so as to interrupt a speech. If the motion is carried the business before the meeting shall drop.
- 47. A proposal "that the meeting be now adjourned" to some specified time, may be moved at any time as distinct

question but not as an amendment nor so as to interrupt a speech The Chairman himself can however make such a proposal while a member is speaking. If such proposal be negatived, the debate shall be resumed. The same rule will apply to the meeting of the Senate Committee.

- 48. No amendment shall be moved to a proposal under last preceding Rule except one for substituting a different time for that to which it is proposed to adjourn the meeting.
- 49. A meeting renewed or continued after an adjournment is to be deemed one with that preceding the adjournment provided that if the meeting be adjourned to such date as to admit of the notice required under Rule 24, any amendments otherwise in order may be moved at any adjourned meeting if the notice so required is duly given.
- 50. The motion "that the meeting pass to the next business on the Agenda" may be made at any time as a distinct question but not as an amendment nor so as to interrupt a speech. If such a motion be carried the proposal under consideration and the amendments thereto shall not be further dealt with at the meeting.
- 51. No motion for the dissolution or for the adjournment of the meeting or for the suspension of the sitting or to pass to the next business, shall be made or spoken to during the debate by any member who has spoken in the debate. Any such motion shall take the place of any question that may be before the meeting and if not withdrawn must be disposed of before such question.
- 52. When a motion of the class contemplated in the last preceding Rule has been brought forward and negatived, no other motion of that class shall be again brought forward until after the lapse of what the Chairman shall deem a reasonable time, nor shall a debate be allowed on such second or subsequent motion brought forward during a debate on the same proposal alone or the same proposal or amendment discussed together.

(6) Miscellaneous.

- 53. On each proposal or proposals and amendment in debate a member may speak once in accordance with the provisions of Rules 39 and 51.
- 54. The member who is first up at the conclusion of a speech has the right to be heard. In cases of competition the Chairman shall decide.
- 55. The mover of an amendment or when there is no amendment the mover of the original resolution may reply upon the

debate before vote is taken; the mover of a motion for a dissolution or adjournment or for the suspension of the sitting or for the passing to the next business on the statement has, however, no right to reply.

- 56. No member shall speak to the question after the mover has entered on his reply.
- 57. The Chairman has the same right of moving or seconding a motion or amendment and of otherwise taking part in the debate as any other member. When the Chairman thus takes part in the debate he shall vacate the chair whilst he is addressing the meeting and the chair shall during such time be taken by the senior member present, not being the Chairman.

(7) Points of Order.

- 58. Any member may call the Chairman's attention to a point of order even whilst another member is addressing the meeting, but beyond stating the precise point of order raised he shall not make a speech. Such a call pronounced by the Chairman to be vexatious and any interruption or obstruction to the progress of the business before the Senate pronounced by the Chairman to be unseemly or unreasonable shall be deemed a breach of order.
- 59. The Chairman shall be the sole judge on any point of order and may call any member to order and if the member se called to order shall in speaking disregard such call, the Chairman may direct him to sit down and thereupon another member may speak. In the event of any contumacious disregard of a ruling or call to order by the Chairman he may request the member so offending to leave the meeting and on such requisition being made to a member by name, he shall be suspended from his functions as a member during the meeting and shall be bound immediately to withdraw.

(8) Voting.

- 60. On putting any question to the vote the Chairman shall call for an indication of the opinion of the Senate by a show of hands in the affirmative and negative and shall declare the result thereof according to his opinion.
- 61. Any six Fellows may demand a division except on a motion for which under Rules 24 and 44 previous notice is not required.
- 62. In every division only such members as are present at the putting of the question shall be entitled to vote. Voting papers will be supplied by the Registrar and every voting paper shall be returned with or without the vote.

63. When the Chairman announces the division to be clothe Fellows shall state in writing the number on each side, s the statement and hand it to the Chairman together with voting papers arranged in two separate bundles.

The Chairman shall then declare the result of the divis to the meeting and the result shall be recorded in the minute

- 64. If after a division five members present demand a count, the Chairman shall appoint two or more members to with the Fellows who shall report the fact to the Chairman, the latter shall thereupon declare the result which shall be clusive.
- 65. Pending the recount the Chairman may either sust the sitting or call for such business as may in his opinion most conveniently proceeded with. But on the disposal of business thus entered on, the regular order of subjects, if it been departed from, shall be resumed.

(9) Record of Proceedings.

- 66. A journal shall be kept by the Registrar contai a brief abstract of the proceedings of the Senate. The jou shall be submitted as soon as possible after each meeting to Chairman for his confirmation and signature.
- 67. Within three weeks after a meeting of the Senate Registrar shall, under the direction of the Syndicate, poprinted copy of the minutes of such meeting attested by Chairman to the address of each member.
- 68. If no exception is taken by a member who was pr at the meeting to the correctness of the minutes within ten of posting by the Registrar they shall be deemed to be corre
- 69. If any exception be taken within the time aforesaic attention of the Chairman shall be called to the portion of minutes objected to and he shall make such alterations may find to be necessary.

CHAPTER V.

THE SYNDICATE.

- 70. Two members of the Syndicate shall be nominat the Council and the rest elected by the Senate.
 - 71. Three members shall form a quorum.
- 72. The President of the Syndicate shall be nominat the Council from among the Syndics.
 - 73. It shall be the duty of the Syndicate:-

(a) To order examinations in conformity with the Rules and fix dates for holding them.

(b) To fix the fees, emoluments, travelling and other allow-

ances of Examiners and Moderators.

(c) To consider and make such reports or recommend such action as it deems fit on financial and business matters brought forward by the Members of the Senate and Faculties for consideration by the Senate.

(d) To prepare such forms and registers as are from time to

time prescribed by the Rules.

(e) To make all the necessary rerangements for the publication of the books, etc., brought out under the auspices of the University.

CHAPTER VI.

THE FACULTIES.

- 74. The Faculties shall be constituted every two years and ie members will be elected by the Senate. Six members will orm a quorum.
- 75. The Dean of a Faculty shall hold office for two years ill the next re-constitution of the Faculty. He shall preside at he meetings of the Faculty.

76. A Faculty shall have power:-

(a) To draft rules in regard to courses of study and examinations prescribed by the University and to lay such rules before the Senate in order that they may be brought before the Council for ratification.

(b) To remit any matter to a Board of Studies comprised within the Faculty for consideration and report.

(c) To consider any report or recommendation of any Board of Studies comprised within the Faculty.

(d) To hold meetings of the Faculty or a Committee of the Faculty along with any Faculty or a committee thereof for the discussion of any matter of common interest.

(e) To appoint Examiners and Moderators.

- (f) To determine finally the results of the examinations on the recommendations reported by a meeting of all Examiners for each examination.
- (g) To determine the award of stipends, scholarships medals, prizes and other rewards in conformity with the Rules and the conditions prescribed for their award.
- (h) To determine courses of study and lists of text-books to be prescribed or recommended for study or translation.

CHAPTER VII.

THE BOARDS OF STUDIES.

77. The following will be the Boards of studies:-

English Literature.

Compulsory Theology.

Arabic Literature.

Sanskrit Literature.

Persian Literature.

78 A member of a Board of Studies shall hold office for

two years and shall be eligible for reappointment.

79. No board shall consist of more than seven or less than three members. The head of the Department concerned will be an ex-officio member of the Board, and in addition to him, the Faculty may elect five members of the Board. The Senate may, if it thinks it necessary, elect a seventh. Three members will form a quorum.

80. Each Board shall elect its own Chairman.

81. Any Board may co-opt specialists who are not members of the board, but such member will not be entitled to vote.

82. Members of the Boards of Studies shall be solely responsible for seeing that there is nothing in any book prescribed for study which is calculated to wound the religious sentiments of any section of His Exalted Highness' subjects, no exception however being taken to minor differences of opinion which are inevitable. There shall be at least one Musalman on the Boards

conversant with the language and competent to express an opinion on the books from a religious and Islamic point of view. Rules for the guidance of the members of the Boards of studies shall be as follows:—

- 1. All books prescribed for study should be free from passages containing improper remarks concerning founders of religions or passages likely to cause offence to followers of any religion or prejudicial attacks on any religion.
- 2. Islamic religious books included in the curriculum should be entirely free of any teaching contrary to the established beliefs of Muslims.
- 3. But the following will not be held objectionable provided there is no unseemly attack on any religion:---
 - (a) In books of Literature.—

Verses in praise of wine, etc., showing a disregard of Sharial (فطامين رندانه) and poetic fancies

(تخیلات شاعر انه)

(b) In books of Philosophy.—
Questions of Philosophy.

(c) In books of History.—

The religious ideas of the followers of other religious or narratives of their achievements from a historical point of view.

.CHAPTER VIII.

FINANCE.

(1) The Board of Audit.

- 83. The Board shall meet ordina rily once every month and at other times when convened by the Vice-Chancellor.
- 84. The Board shall examine and audit the University accounts, the endowments and trust funds accounts, consider ways and means and the financial effects of any important measures in contemplation and make recommendations when necessary to the Senate on all matters relating to the finance of the University. It shall also make an annual report to the Senate on noteworthy points regarding the income and expenditure during the last preceding year. Copies of all reports and recommendations of the Board of Audit shall be sent to the Council by the Senate. The Members of the Board shall have access to all the accounts and other records of the University.

85. Members of the Board shall hold office until the next annual meeting of the Senatc. They shall be eligible for reappointment at the expiration of their term of office. All vacancies in the Board occurring in the course of the year shall be filled up by the Senate.

(2) Government Audit.

- 86. The accounts of the University shall be audited at least once in every year and at intervals of not more than fifteen months by auditors appointed by Government.
- 87. The auditors shall for the purposes of their office have access to all the accounts and other records of the University.
- 88. The accounts when audited shall be published together with the auditors' report in such form as may be prescribed by Government and a copy thereof shall be submitted to Government.

CHAPTER IX.

OFFICERS AND SERVANTS OF THE UNIVERSITY.

- 89. The Registrar will hold office during the pleasure of the Government but may be removed on the recommendation of a two-thirds majority of the members of the Council.
 - 90. It shall be the duty of the Registrar:-
 - (a) To be the custodian of the records, library, common seal and such other property of the University as the Council shall commit to his charge.
 - (b) To attend as far as possible all meetings of the Senate and the Syndicate and any committees appointed by the Senate and to keep minutes thereof.
 - (e) To conduct the official correspondence of the Senate and the Syndicate.
 - (d) To issue all notices concerning meetings of the Senate, Faculties, Syndicate, Boards of Studies, Boards of Examiners and any committees appointed by the Senate, the Faculties, or any of the Boards of Studies.
 - (e) To conduct all the administrative duties of the Translation Bureau.
 - (f) To perform such other duties as may from time to time be prescribed by the Council and generally to render such assistance as may be desired by the Council in the performance of its official duties.

- 91. The scale of establishment for the office of the University shall be fixed by the Council from time to time.
- 92. The Registrar shall have power to fine, suspend and grant leave to all non-gazetted servants of his own office and make appointments upto Rupees 125.

CHAPTER X.

EXAMINATIONS.

- 93. No one shall be permitted to enter the University in order to study for the Intermediate Examination unless he has passed the Matriculation Examination of the University or the School Leaving Certificate Examination or the Matriculation Examination of any other Indian or English University.
- 94. No one will be admitted to join the University to study for the B. A. and other degrees unless he has passed the Intermediate Examination of the University or any other Indian or English University.

(By order)

A. HYDARI,

SECRETARY TO GOVERNMENT,

Judicial, Police and General Departments.

7. SUPPLEMENTARY RULES.

I. ELECTION OF MEMBERS OF THE SYNDICATE

BY THE SENATE.*

The following procedure shall be adopted in the election of the members of the Syndicate by the Senate under Regulation 70.

- 1. The election shall take place at the annual meeting held in Amardad, or on such date as the Chancellor may appoint in this behalf.
- 2. Not less than ten days before the meeting, the names of members who are proposed by any Fellow for election as members of the Syndicate shall be submitted in writing to the Registrar, who shall circulate the names to the members of the Senate at least four days before the meeting.
- Each voter shall have only one vote for each vacancy and can give only one vote to any one candidate.
- The election shall take place at the meeting of the Senate upon the date so fixed, and the voting shall be by ballot.
- Those who obtain the highest number of votes shall be declared elected. In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Chancellor with whom the final selection shall rest.
- N. B .- The Chancellor or in his absence the Vice-Chancellor shall have the power to accept or reject an election, and in the latter case they shall be competent to cancel the election made and to order a fresh one

II. ELECTION OF MEMBERS OF THE FACULTIES BY THE

Senate.†

The following procedure shall be adopted in the election of the members of the Faculties by the Senate under Regulation 74.

The election shall take place at the annual meeting held in Amardad, or on such date as the Vice-Chancellor may appoint in this behalf.

1340 H., (5th Khurdad 1331 F.—9th April 1922).

† Received the assent of H.E.H.'s. Government on the 22nd Ardibehist 1333 F. (26th March 1924).

^{*} Received the assent of His Exalted Highness the Nizam on the 10th Shaban

- 2. The Syndicate shall, in the first instance, draw up a list of persons whom they recommend for appointment to the various Faculties. This list shall be circulated among the members of the Senate by the Registrar not less than sixteen clear days before the meeting. Any member of the Senate may then propose additional names for any of the Faculties, which must be sent to the Registrar nine clear days before the meeting. These names, together with the original list, shall be circulated among the members of the Senate five clear days before the meeting and no additional names shall be received.
- 3. At the meeting of the Senate, the entire list shall be voted on Faculty by Faculty, and every member shall be declared to be appointed who obtains votes from a majority of the members of the Senate voting for the Faculty under appointment. The voting shall be by ballot.

In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Vice-Chancellor with whom the final selection shall rest.

III. ELECTION OF TWO FELLOWS FROM THE MEMBERS OF THE FACULTIES.*

The following procedure shall be adopted in the election of two Fellows by the Senate from the members of the Faculties who are not already members of the Senate. One of these members shall be elected from the Faculty of Arts and the other from the Faculty of Theology.

- 1. Once in every year in the annual meeting of the Senate held in Amardad or on such date as the Chancellor may appoint in this behalf, there shall, it necessary, be an election to fill any vacancy among the two Fellows to be elected by the Senate from the members or the Faculties of Arts and Theology who are not already members of the Senate.
- 2. Intimation of the date fixed for election shall be sent to the members of the Senate at least twenty-five days in advance together with a list of the members of the Faculties who are not members of the Senate and each Fellow shall, on receipt of the notice, be entitled to propose the name of one person from the list for appointment as a Fellow. Such proposal must reach the Registrar fourteen clear days before the date fixed for election.

^{*} Received the assent of His Exalted Highness the Nizam on the 10th Shaban. 1340 H., (5th Khurdad, 1331 F.--9th April, 1921).

The Registrar shall cause a list of the nominees to be pr and forwarded to the members of the Senate five clear before the date fixed for ellection.

- 3. The election shall take place at the meeting of the Supon the date so fixed, and the voting shall be by ballot.
- 4. Those who obtain the highest number of votes shat declared elected. In the event of there being any tie bet two or more candidates necessitating further selection, names shall be reported to the Chancellor wih whom the selection shall rest.
 - N. B.—The Chancellor or in his absence the Vice-Chancellor shall ha power to accept or reject an election, and in the latter cas shall be competent to cancel the election mad and to order a one.

IV. ELECTION OF TWO FELLOWS FROM THE LIST OF REGISTERED GRADUATES.*

 - Answer.— I do promise.
 - Question 6.—(For the Faculty of Theology only).

 Do you solemnly and sincerely promideclare that to the utmost of your oppo

and ability, you will use your powers in the service of Islam as a true Muslim?

Answer.— I do promise.

- 10. The Chancellor or the Vice-Chancellor shall then say "Let the candidates be presented."
- 11. The candidates shall be presented in batches to the Chancellor or the Vice-Chancellor by the Deans of their respective Faculties, who shall say for each batch:—
 - "I present to you this (or these) candidate (or candidates)—
 read out names—and pray that he (or they) may be
 admitted to the degree of....."
- 12. When all the candidates for the same degree have been presented, the Chancellor or the Vice-Chancellor, in presenting the diplomas, shall say to the candidates who shall remain standing:—
- 13. When all the candidates have been presented, the Registrar shall lay the record of the degrees that have been conferred before the Chancellor or the Vice-Chancellor, who shall affix his signature thereto.
- 14. The Chancellor, the Vice-Chancellor, a Fellow of the University or a distinguished guest shall then address the candidates.
- 15. At the close of the address, the Chancellor, the Vice-Chancellor and the Fellows shall rise, and the Chancellor or the Vice-Chancellor shall say: "I declare this Convocation dissolved."
- 16. Then the Chancellor, the Vice-Chancellor and the Fellows shall retire in procession to the Meeting Room, the graduates standing.

VIII.—RULES FOR CONFERRING DEGREES BEFORE CONVOCATION.

The Registrar or Vice-Chancellor has been empowered by special legislation to confer the degrees on such graduates in the presence of the Principal and such members of the teaching staff as can be conveniently present after charging them to be of good

behaviour, etc., who proceed to the European Universithe Convocation, provided they have been recommend Faculties.

IX. Rules for conferring Honorary Degree

1. When the Vice-Chancellor and not less than tw the other members of the Council recommend that an Degree be conferred on any person on the ground th their opinion by reason of his eminent position and at a fit and proper person to receive such a degree and recommendation is supported by not less than two-thi Fellows present at a meeting of the Senate and is cor the Chancellor and by H.E.H. the Nizam on the recom of the State Executive Council, the Senate may confeperson the Honorary Degree so recommended without him to undergo any Examination.

Provided that in cases of urgency the Chancellor r the recommendation of the University Council only.

- 2. The Honorary Degrees which the University is ed to confer shall be as follows.—

 OF THE UNIVERSITY TO MEETINGS OF LEARNED BODIES:—
 - (1) In making selections preference will be given to those who read papers at Conferences to those who do not.
 - (2) Members of the Teaching Staff deputed to attend the meetings of the learned bodies shall be paid travelling and halting allowances according to the C.S.R.

- N.B.—In case of persons going to places out of India, recommendations re. T. A. etc. will be made with special reference to the country visited.
- (3) Delegation may be sent usually to the following Conferences, but it will be open to the University to decide, as to which Conferences Delegates should be sent in a particular year:—
 - (1) Indian Science Congress.
 - (2) Indian Philosophical Conference.
 - (3) All-India Oriental Conference.
 - (4) Indian Economic Conference.
 - (5) Indian Historical Record Commission.
 - (6) Indian Medical Research Workers' Conference.
 - (7) Inter-University Board.
- (4) Conferences should be given formal intimation of the names of the delegates sent by the University.
- (5) The Pro-Vice Chancellor may depute to any Conference one person from each teaching department of the University, but in case it is sought to depute more than one person from a teaching department, the permission of His Excellency the President should be obtained.
- (6) Members of the Teaching Staff are permitted to attend the meetings of Examiners' Committees or Academic Bodies of other Universities; but the period of their absence would be counted in the 15 days' casual leave which they, according to the Rules, are entitled to. If, however, they are not entitled to casual leave, the Pro-Vice-Chancellor may sanction extra casual leave for a period not exceeding seven days, provided no acting arrangement is made in their absence which would incur and expenditure. No travelling allowance will be paid to the members of the Staff referred to above.

XXI. UNIVERSITY EXTENSION LECTURES.

1. Lectures shall be arranged by a board, which will be constituted every two years, and for the present consists of the following with powers to co-opt:—

Pro-Vice-Chancellor.

Sccretary, Educational Department.

Principal, Medical College.

Principal, Engineering College.

Registrar, Osmania University.

Mr. Ghulam Yazdani, M.A., F.R.A.S.B., O.B.E.

Prof. Hosain Ali Khan, B.A. (Oxon), Bar-at-Law.

Prof. Haroon Khan Sherwani, M.A. (Oxon), Bar-at-Law.

Dr. Muzaffaruddin Qureshi, M.sc. (Punj.), Ph.D. (Berdin).

Dr. Abdul Haq, B..Litt., D.Phu. (Oxon).

Dr. M. Nizamuddin, PH.D. (Cantab).

Mr. R. Subba Rao.

Dr. A. Sharma, M.A. (Alld.), D.PHIL. (Munich).

2. Arrangements for delivering extension lectures shall be made in consultation with the Principals of the various Colleges for one extension lecture being delivered every academic year on each of the following subjects:—

Engineering, Medicine, Biology, Zoology, Geology, Physics, Chemistry, Mathematics including Astronomy, History, Urdu, Persian, Arabic, Philosophy, Law, Sanskrit, Telugu, Marathi, Kanarese.

- 3. Not more than 12 extension lectures shall be delivered annually during the last two weeks of each term. Written copies of the lectures, which will ordinarily be in Urdu, should he deposited with the Registrar, and published in book form at the discretion of the University so as to reach a wider audience.
- 4. Foregin scholars may be invited to deliver lectures on the recommendation of this Board. The lectures delivered shall be the property of the University and shall not be published without its permission. The lecturers shall be paid only

their honorarium sanctioned for the lectures and the University will not be responsible for the boarding, halting or oth charges.

XXII. Excursions and Instructional Tours.

- 1. Students on excursions and instructional tours shall paid the accual third class railway fares on concession rat whenever available by railway. The expenses for boarding a lodging should be borne by the students themselves, but in ear of emergency, the lodging expenses may be borne by the instructions to which they belong.
- 2. The gazetted members of the Staff accompanying t students should be paid second class single fare each way, b they may be persuaded to travel with the students in the thi class. No deductions should however be made from the travelli charges of these members of the Staff even when they travel third class in company with the students. They should be pa daily allowances according to the Civil Service Regulations.

Terms.

1st Term.

Professor

29th June to 18th September.

Recess:-

19th September to 20th September,

2nd Term.

21st September to 16th December.

Winter Vacations:-

17th December to 5th January.

3rd Term.

6th January to 7th April.

Summer Vacations :--

8th April to 28th June.

Fees.

Intermediate		$\mathbf{Rs}.$	60	per annum
B.A.	• •	$\mathbf{R}\mathbf{s}$.	80	do
M.A. or M.Sc.		Rs.	100	$\mathbf{d}\mathbf{o}$
LL. B.	• •	Rs.	80	do
Ph.D.		Rs.	120	\mathbf{do}

Residence.

The University aims at providing residential accommodation for its students. There are five Hostels which provide accommodation for about 500 students. These Hostels which are lighted with electricity and are provided with modern sanitary conveniences are now entirely full. In addition to the College fees, the boarders pay an inclusive charge of Rs. 19 per mensem which covers dining hall establishment, light, water and other charges. No charge is made for rent, medical assistance or for medicines. Students of all communities live amicably together as no Hostel is reserved for a particular community. Each Hostel is managed by a Warden.

Library, Museum, Laboratories, etc.

Librarian .. Yusufuddin Ahmad Siddiqi, B.A. (Osm.).

The University Library, which contains 22,245 English and 26,350 Oriental books, is being constantly augmented. There is a small Library attached to the Translation Bureau, containing 4,602 books. There are Seminar Labraries attached to each department of study. The Staff of the University has also access to the Government Asifia Library which is very rich in Arabic and Persian MSS., besides containing a large and valuable collection of State archives relating to the history of Central and Southern India known as the Daftar-i-Diwani and Daftar-i-Mal in the Finance Office.

The University College has well-equipped Physics, Chemistry, Botany and Zoology Laboratories.

Subjects taught.

English, Muslim Theology, Morals, Arabic, Persian, Sanskrit, French, German, Urdu, Marathi, Telugu, Kanarese, History (India; England, Islam, Ancient, Medieval and Modern Europe), Economics, Sociology, Mathematics, Physics, Chemistry, Biology, Geology, Logic, Philosophy and Law.

Provision for Research.

The University Library and Laboratories are well equipped and provide ample facilities for original work in many subjects such as, History, Philosophy, Persian, Arabic, Urdu, Telugu, Marathi, Kanarese, Sanskrit, Theology, Chemistry, Physics, Botany and Zoology. A candidate has to submit a thesis for his M.A. or M.Sc. degree. The degree of Ph.D. has been instituted in the Faculties of Arts, Science and Theology. Research Scholarships of the value of Rs. 50 per mensem are granted to deserving students, working for Ph.D. degree. Special Scholar-

ships are set apart for Research in Telugu, Marathi and Kanarese. The Research Journal of the Osmania University, issued once a year, publishes the original work carried out by members of the staff and the research students.

RESIDENCE.

A hostel is attached to the College for the convenience of the students.

Rules of Admission, Etc.

Candidates seeking admission to the College for the B.E. Degree are required:—-

- (a) To be not under 18 or above 22 years of age.
- (b) To produce a health certificate from a Gazetted Government Medical Officer of a rank not below that of a Civil Surgeon, to the effect that the candidate is fit for out-door work of the Public Works Department and that he has had small-pox or has been vaccinated.
- (c) To have passed the Intermediate Examination of a recognised University taking the following subjects:—
 - (i) Mathematics.
 - (ii) Physics.
 - (iii) Chemistry.
 - (iv) English.
- (d) To produce testimonial of good character.
- (e) To sign a declaration form that he will observe the regulations of the University in the College.
- (f) To possess satisfactory knowledge of the Urdu language.

The number of students admitted yearly is limited to 20.

Preference will be given to subjects of the Hyderabad State, residents of Berar being considered subjects of His Exalted Highness the Nizam. The final selection will be made by the Principal of the College on the general capabilities of the appli-

eants, who may, if necessary, hold a competitive examination for admission.

Applications should reach the Principal not later than 10th Amardad every year, on prescribed forms, which can be obtained from the Principal of the College.

After the commencement of the Session, students can only be idmitted on special grounds, with the sanction of the Principal out no student will be admitted after the last day of Shahrewar.

Attendance and Conduct.

Students are required to attend with regularity the courses for which they have entered. In cases of absence, a written notice should be sent at once to the Principal, accompanied by a medical certificate in cases of illness likely to be prolonged.

Students arriving late for a lecture or laboratory class will not be registered as having attended.

Students who have not attended regularly or who have absented themselves without the permission of the Principal from the Terminal or Sessional Examination of any class will not be entitled to the certificate of attendance at that class. (Such certificates of attendance are required to admit a student for the Examinations of the University).

Trees.

The fee for registration for admission shall be Rs. 5 which will in no circumstances be refunded.

A registration fee of Rs. 10 shall be charged by the University for all students migrating to this University from other Universities.

The tuition fee payable in advance by students while at the College shall be:—

Sessional rate ... Rs. 100.
Instalment rate (9) ... Rs. 12.

Students will have to provide their expenses for survey and other excursions.

A breakage deposit of Rs. 50 will have to be paid by each student at the time of joining the College each Session.

The cost of any articles broken or damaged by any student and of repairing any damage to property, will be deducted from his breakage deposit, the balance of which will be returned one month after the close of the Session. Students will also be held liable for damage beyond the amount of the deposit and may also be held jointly responsible for the damage which is not traceable to any one individual.

Students who are exempted from any subject or subjects in the Part I Examination will have to pay the full examination fee. All payments shall be made to the Registrar through the Principal, Engineering College.

A contribution of Rs. 12 per annum shall be made by each student to the College Athletic Club.

Every student must provide himself at his own cost with drawing instruments, drawing board, T. squares, etc. Surveying instruments will be supplied free of cost while at the College.

Lockers will be provided for the students in the drawing offices at a charge of Rs. 2 per Session. The locker key may be obtained on a deposit of Rs. 2 which will be refunded on return of the key.

Residence of students.

Students of the Engineering College desiring to live at any of the University Hostels should apply to the Pro-Vice-Chancellor, through the Principal, Engineering College.

Scholarships.

A limited number of scholarships will be offered every year to deservings students. Particulars of scholarships may be obtained from the Principal of the College.

Exemptions.

Graduates in Physics may be exempted from attending the classes in that subject, and graduates in Mathematics may be exempted from attending the 1st year classes in Mathematics, but in all cases they will have to satisfy the examiners in their respective examinations.

Examinations.

College examinations will be held at the end of each term in the subjects taught during that term.

13. TRAINING COLLEGE.

Principal.

Mr. Mohd. Sajjad Mirza, M.A. (Cantab.), C.T. (London).

Readers.

Mr. Malik Sardar Ali, B.A., B.T. (Psychology, Principles of Education and Child Education).

Mr. Mir Ahmad Ali Khan, M.A., M.Ed. (Leeds) Bar-at-Law, (History of Education, Comparative Education and Method of Teaching History).

Lecturer.

Dr. D. D. Shenderker, B.A., B.T. (Dacca), T.D., Ph.D. (London)
(School Organization, Educational Tests and
Teaching of Mathematics and Science.)

Part-time Lecturers.

Mr. Abdul Aziz, B.A. B.T., (Dacca), Mathematics).

Mr. Riazuddin Khan, B.A., B.T. (Alig.), (Geography).

Dr. A. Latif Sayeed, M.B., Ch.B. (School Hygiene).

Mr. Khwaja Yusufuddin, M.A., LL.B. (Alig.), T.D. (Leeds).

Mr. S. Fakhrul Hasan, B.A., B.T. (Alld.).

Mr. Samiullah, T.C. (Madras).

Mr. Abdul Qadir Beg, Drawing Advance. (Madras).

Tuilion fees.

M.Ed. ..Rs. 100|-Dip-Ed. ..Rs. 100|-

Inter. T.C. ..Rs. 75 in clusive of Examination fee.

T.C. ..Rs. 50|-

N.B:—No stipends are given to private candidates.

Residence.

A Hostel is attached to the College in which residence is compulsory, but the Principal at his discretion may grant exemption, in exceptional cases.

Hostels fees including board and lodging are:-

For vegetarians. . . Rs. 14|-p.m. For Non-vegetarians. . . Rs. 16|-p.m.

14. THE BUREAU OF TRANSLATION.

The Bureau of Translation which was opened in Aban 1326 F. with Maulvi Abdul Haq Saheb as Curator has so far taken in hand 530 books of which 307 have been published and the rest are either in the Press or under revision and translation. Books on various subjects required by post-graduate students have also been translated.

The Bureau has been recently reorganised. At present the staff of the Bureau consists of one Curator (500-1,000), 6 Translators (250-400). The Department of Medical Translations consists of one Supervisor (100]-allowance) and 3 Translators, one (350-600) and 2 (500]-) each. Besides the salaried staff a large number of works is being translated by outsiders on piece-work.

The following gentlemen are on the staff at present:-

Curator.

Mr. Muhammad Elyas Burny, M.A., LL.B. (Aligarh).

Supervisor of Medical Translations. Dr. Brij Mohan Lal, B.A., (Madras.), M.B.,B.S. (Bom.), M.Sc. (Lond.).

Translators:-

Philosophy.

Mr. Ehsan Ahmad, B.A.

Physics.

.. Mr. Murtanja Rao, m.sc., ll.b. (Osm.).

Chemistry.

.. Mr. Mir Asad Ali, m.sc. (Osmania).

Mathematics.

Mr. Mohd. Naziruddin, M.A. (Osm.).

Botany.

.. Mr. Mohd. Abdul Waheed, M.sc. (Osmania).

Zoology.

.. Mr. Mohd. Abdur Rahman Khan, M.sc. (Osm.).

Medicine.

Dr. Joseph Antony Mohammed Husain, M.B.B.S.

15. THE DAIRATUL MAARIF.

The Dairatul Maarif was founded by the late Nawab Imadul Mulk Bahadur (Syed Hussain Bilgrami, U.S.I.) and the late Mulla Abdul Qayum Saheb in 1295 F. for the publication of rare books in Arabic. It commenced its work in 1299 F. with a grant of Rs. 500, per mensem from His Exalted Highness' Government. Subsequently in 1329 F. an endowment of one lac of rupees was made over to the Institution and in 1331 F., His Exalted Highness was graciously pleased to sanction an additional grant of Rupees four lacs. The total endowment of Rupees five lacs and thirty thousand brings an annual income of Rs. 31,000.

On the sad demise of Nawab Imadul Mulk Bahadur on the 2nd Tir 1335 F., (24th Zikadah 1344 H.), the Institution was placed under the control of the University. The late Right Hon'ble Sir Akbar Hydari, Nawab Hydar Nawaz Jung Bahadur P. C., Kt., LL.D. then President Executive Council was the Chairman of the Executive Committee Dairtaul Maarif, with whom the management rested till Shahrewar 1350 F., and Nawab Dr. Mahdi Yar Jung Bahadur, Education and Finance Member, H. E. H. the Nizam's Government, was the Secretary. Right Hon'ble Sir Akbar Hydari to whose able guidance this Institution owes its prosperity, on his acceptance of the Membership of the Executive Council, Government of India, appointed Hon'ble Nawab Dr. Mahdi Yar Jung Bahadur, H. E. H. the Nizam's Finance and Education Member, as President of the Dairatul Maarif Executive Committee, who takes a keen interest in the affairs of the Daira, as he does in all literary and educational activities in the Hyderabad State.

The present Executive Committee consists of the following Hon. Members.

1. Hon'ble Nawab Dr. Mahdi Yar Jung Bahadur, Education Member, H.E.H. the Nizam's Government.

President

2. The Hon'ble Mr. Syed Abdul Azeez

Judicial & Ecclesiastical Member, H.E.H.

the Nizam's Government.

Vice-President

3. Mr. Syed Mohiuddin, B.A., Bar-at-Law, Secretary and Commissioner, Technical and Vocational Education & Additional Educational Secretary.

Secretary.

- 4. The Hon'ble Mr. Ghulam Mohammad, C.I.E. Finance Member, H.E.H. the Nizam's Government.
- 5. Nawab Dr. Nazir Yar Jung Bahadur, Ex-High Court Judge.

Member & Joint-Secretary.

6. Allama Mahmood Hasan Khan Saheb, Author of "Maujamul Musannafeen."

Member

- 7. Allama Abdullah Al Imadi, Ex Member Translation Bureau, Osmania University. Member.
- 8. Allama Manazir Ahsan Saheb Gilani, Chairman of the Department of Theology, Osmania University.

Member.

9. Allama Abdul Qadeer Siddiqi.

Member.

10. Mr. Hussain Abdul Munim, Accountant General, Sarf Khas Mubarak.

Member.

This Committee is helped by a liteary Committee which assists in selecting and obtaining books for publication etc. Staff consists of a Director and seven Arabic Scholars who edit the texts and carefully compare the different copies before final publication. They are helped in their literary works by the noted European Orientalist, Dr. F. Krenkow, who secures for the Institution copies of rare books in the British Museum and other European libraries besides correcting texts. Numerous rare and valuable books on History, Biography, Hadith (tradition), Taisir (commentary), Figh (canon law), Grammar, Logic, Philosophy, Science and Literature have been issued to the world from the press of the Dairatul Maarif which have earned even greater fame in Europe. America, Egypt and Syria than in India 105 publications of this Institution have been released and issued, many of which are in four, ten, and twelve volumes. During 1350 F. alone valuable publications of this Bureau worth more than B. G. Rs. 5,000 were given away as free presentations to various Institutions in India and abroad of which British Museum, Judia Office, School of Oriental Studies London, Anjuman Adabi, Kabul, Royal Asiatic Society, Calcutta and Bombay, may be mentioned.

Greater works are still under progress and it is expected hat their attractions will strongly appeal to the cultural and carned world.

The present Staff of the Dairatul Maarif consists of the collowing Ulamas:

1. Maulana Syed Hashim Nadvi, Director & Asst. Secretary.

Z.	Maulana	Mohammad Taha Nadvi,	Editor.
3.	Maulana	Hakeem Syed Ahmadullah Nadvi,	"
4.	Maulana	Shaikh Abdul Rahman Yamani,	"
5.	Maulana	Habib Abdullah Hazrami,	"
6.	Maulana	Syed Zainul Abedin Mausavi,	"
7.	Maulana	Mohammad Adil Quddusi,	"
8.	Maulana	Jamalul Lail Saheb Madani,	
9.	Maulana	Shaikh Ahmad Saheb Yamani,	"

16. THE NIZAMIAH OBSERVATORY.

General.—The history of the Observatory dates from the time the late Nawab Zafar Jung Bahadur presented to the Government two fairly large telescopes, which he had originally purchased for his private use during his sojourn in Europe. When the matter of the bequest was before the Government, Right Hon'ble Sir A. Hydari, Nawab Hydar Nawaz Jung Bahadur, P.C. Kt., LL.D., the then Financial Secretary, in a long note on the subject, referred to the importance of the gift and emphasised the unique opportunity that had been thus afforded for the establishment of an Observatory at Hyderabad, for the cultivation of the science of astronomy. This suggestion was adopted,, and on H.H. the Nizam graciously sanctioning the scheme, it was decided to establish a fully equipped Observatory with the two telescopes as a nucleus. Mr. Chatwood was appointed Director in 1908 and soon after his arrival in Hyderabad, he selected a suitable site for the Observatory and promptly started the construction of the necessary additional buildings for the accommodation of the instruments and of small workshop. The photographic equatorial was erected by the beginning of 1910 when the formal dedication of the Observatory took place. There was some delay in commencing regular work with this telescope as some of the parts had to be returned to England for necessary alterations and a suitable following telescope had to be constructed afresh. By the time Mr. Chatwood's term of office expired in March1914, he had made a commencement with regular astronomical observations and had also given an efficient training to a small staff of assistants. Mr. Pocock succeeded to the Directorship and vigorously pushed on the astronomical work that Observatory had undertaken, with the result that substantial progress was achieved in all branches under his direc-His death occurred in October 1918 and by that time two volumes of results were collected and published. ber 1919, the Observatory was transferred to the Osmania University and placed under the administrative control of the University Council.

Equipment.—The principal equipment of the Observatory consists of:—

- (1) An 8 inch photographic telescope with accessories.
- (2) A 15 inch visual telescope equatorially mounted (the erection of this intrument was carried on in 1922-23 under the supervision of the present Director).

- (3) A 2¾ inch Transit Instrument and a drum chronograph.
- (4) Three astronomical clocks and two chronometers.
- (5) A set of Electric Transmitting pendulums and dials to operate in connection with them.
- (6) Two Milneshaw horizontal Pendulum Seisnographs one of these mounted in an under ground chamber.
- (7) A Hale Spectrohelioscope.

Astronomical work.—At the time the Observatory was established, it was felt that whatever work is carried on at the institution should form part of a systematic plan and should possess considerable scientific value. Instead of diverting attention among a number of individual isolated researches, the policy of the Observatory had been to adopt a middle course, by carrying on, as a routine programme some outstanding piece of work, in which the co-operation of the institution would to some extent contribute to the general advancement of science at the same time without losing sight of the number of special investigations that arise having a bearing on the central subject. When the Observatory was ready to start on regular work it was recommended by the eminent astronomers, Sir David Gill, Prof. Turner and others, that this institution can advantageously cooperate in the great international undertaking entitled the "Carte du Ciel." As the Government was willing to accede to this recommendation, a section originally assigned to a South American Observatory, but neglected owing to some adverse' circumstances was allotted to the Nizamiah Observatory. region is now very nearly complete and the preliminary results of the whole section have been published.

With the Grubb Equatorial erected in 1923, a start has been made with the regular observation of a few variable stars, specially near their minima when observations with this telescope, on account of the larger light gathering power, are particularly valuable.

The Transit Instrument is employed for determining clock corrections systematically and when the necessary apparatus is acquired, it is proposed to control the time gun at Hyderabad by means of signals from the Observatory Standard Clock.

Daily records are obtained with the Seismograph since September 9, 1923. The results are forwarded to the International Seismological Association. Since 1929 September, daily observations of upper air conditions by means of pilot balloon flights have been included in the programme of work in co-operation with the India Meteorological Department. The observatory is also equipped as a first class Meteorological station.

Publications.—The Hyderabad Astrographic Catalogue, Vols. I to XI forms the most important among the publications of the Observatory. Several short papers, now numbering about 75 dealing with matters of technical interest have been published in various periodicals.

Library.—A small working library is in course of formation and contains at present about 1,200 volumes. A part consists of publications of other observatories received as exchanges.

Staff.—The establishment consists of three assistants and twelve computers, besides a clerk and a mechanic.

Rao Saheb T. P. Bhaskaran, M.A., F.R.A.S., F.N.I. is the present Director.

17—RULES, SUBJECTS, TEXT-BOOKS AND SYLLABUSES.

A-MATRICULATION EXAMINATION.

MATRICULATION EXAMINATION.

- 1. The Matriculation Examination shall be held once a year at Hyderabad, Aurangabad, Gulbarga, and Warangal at such time and on such dates as the Syndicate may prescribe.
 - 2. The Examination shall be open to:-
 - (i) All those who have satisfactorily prosecuted a regular course of study for this Examination at one or more High Schools recognised by the Osmania University. Such candidates shall be named pupil candidates.
 - (ii) All those who have studied privately either in the Dominions or outside for this Examination, provided that they shall not have attended any High School recognised by the University for not less than six months prior to the date of the Examination.
 - (iii) All those who have passed the Maulvi or the Munshi Examination of His Exalted Highness the Nizam's Government. Such students will have to appear in English only and in the case of those who have passed in the Munshi Examination, in Islamic Theology or Morals also, on passing in which subject or subjects they will be considered to have passed in the whole of the Examination.
 - (iv) All those who have passed the Maulvi Examination of Madrasai Nizamiah. These will appear in English only, and shall be admitted to the First Year class in Theology on passing in that subject.
- 3. No candidate shall be admitted to the Matriculation Examination unless he shall have completed the age of fifteen years by the 1st day of Shahrewar (July) of the year in which he applies for admission to the Examination.

- 4. Applications for admission to the Examination in the form prescribed must reach the Registrar not less than two months before the commencement of the Examination accompanied by a fee of Rs. 12 in the case of pupil candidates, Rs. 16 in the case of candidates referred to in rule 2 (ii) and Rs. 5 in the case of candidates referred to in Rule 2 (iii) and (iv).
- 5. Pupil candidates must submit the following certificates from the Head-master of the school where they last studied together with their applications for admission:—
 - (1) Certificate of attendance stating that the student has attended school in the Matriculation class for net less than 70 per cent. of the working days during the school year immediately preceding the examination.
 - The Syndicate may however condone the deficiency in attendance not exceeding 5 per cent. on special reasons especially ill health when the application is supported by a certificate of an authorised Medical Officer which can satisfy the Head Master.
 - (2) Certificate of good character and good conduct a school.
 - (3) Certificate of age in accordance with Rule 3.
 - (4) Certificate of progress in the subjects of study.
 - When a student has studied in two or more schools durin the school year immediately preceding the examination, his combined attendances in all schools attended by him during the period will be taken intaccount in determining his attendance.
- 6. Candidates referred to in Rule 2 (ii) must submit the following certificates from the Head-master of a Government High School recognised by the University:—
 - (1) Certificate stating that the student has passed a Te Examination held in the school to test the fitness candidates appearing from that school for the Maticulation Examination.
 - (2) Certificate of good character.
 - (3) Certificate of age in accordance with Rule 3.
- 7. Candidates referred to in Rule 2 (iii) and (iv) mu in addition to the original certificate showing the examinati

passed on the basis of which application is being made, submit the following certificates from the Head-Master of a Government High School recognised by this University.

- (i) Certificate stating that the candidate has passed a Test Examination in English and Theology, held in the school to test the fitness of candidates appearing from that school for the Matriculation Examination.
- (2) Certificate of good character.
- (3) Certificate of age in accordance with Rule 3.
- 8. Teachers from the recognized schools of the University will be exempted from passing a Test Examination provided they produce a certificate from the Divisional Inspector of schools stating that the candidate is eligible for admission to the Matriculation Examination and that he is expected to get through.
- 9. Candidates who have once been duly permitted to appear at this examination are entitled to appear at any subsequent Matriculation Examination as private candidates under Rule 2 (ii), (iii) and (iv).
- 10. On receipt of the application and the fee prescribed and the necessary certificates, the Registrar shall, at least a fortnight before the examination cause to be furnished to the candidate a receipt for the fee received, which will also serve as a ticket of admission to the examination hall to be produced by him when called for.
- 11. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the fee.
- 12. The Matriculation Examination shall be conducted by means of printed papers. Papers will be set and answered in Urdu with the following exceptions:—
 - 1. European Languages .. Ordinarily in English.
 - 2. Sanskrit, Prakrit or Pali.. In the language itself or in English or in Urdu.
 - 3. Modern Indian Vernacu- In the language itself or in lars.

 Urdu.

In the case of these exceptions, the Registrar will, six months before the date of the Examination, notify the language in which the paper will be set, and candidates will be expected to answer in that same language unless by a previous arrangement with the Registrar, they have been permitted to answer in any of the alternative languages above specified.

13. The Examinaion will be held in the following subjects:-

A. COMPULSORY.

1. English.

- 2. Urdu. (Questions on Grammar to be practical and of easy nature. Essays should be on the subjects of every day interest).
- 3. Elementary Mathematics or Arithmetic (for girls only.).
- 4. Elementary Science or Domestic Science (for girls only). (Girls taking Domestic Science should Arithmatīc)
- 5. Indian History and General Geography of the world.

6. Theology or Morals.

B. OPTIONAL

One of the following subjects:-

- 1. A Classical Language.
- 2. A Modern Language.

3. English History.

- 4. Algebra and Geometry†.
- 5. Commerce.

6. Biology.

7. History of Islam.

*C. SCHOOL SUBJECTS.

1. Drawing.

- 2. Physical Training.
- 3. Manual Training.
- N.B.—†Only those Candidates will be admitted to the Intermediate Mathematics Classes, who have taken Algebra and Geometry as their optional subjects.
 - *There will be no University examination in these subjects but the teaching will be compulsory.

167

A. COMPULSORY SUBJECTS.

(1) ENGLISH.

There will be two papers in English each of two and half hours' duration. The first paper (50 marks) will be on the detailed Texts and shall contain questions on Grammar and Idiom. The second paper (50 marks) will be as follows:—

	Marks
Composition and Translation from Urdu .	35
Non-Detailed Texts	 15

2. Urdu.

There will be two papers each of two hours' duration in this subject; the first paper (50 marks) will be on the pescribed texts and the second on Grammar (20 marks) and Composition (30 marks).

(3) ELEMENTARY MATHEMATICS:-

There will be two papers of two and half hours' duration each.

Panar T	$\left\{ \begin{array}{ll} \text{Arithmatic} & \dots \\ \text{Algebra} & \dots \end{array} \right.$	• •	30 marks.
raper 1.	Algebra	• •	20 "
., II.	Practical Geometry	••	30 "
99 III.	Mensuration	• •	20 "

or

Arithmatic ((for Girls))	 100	,,

(4) ELEMENTARY SCIENCE:-

There will be one paper of three hours' duration carrying 100 marks. The paper shall be divided into sections A (Physics) and B (Chemistry), 50 marks will be assigned to each section.

Candidates are expected to perform at least 10 experiments in a year and have a record of their practical work regularly initialled by the teacher in charge, but there shall be no examination in Practical Science.

or

Domestic Science (for girls)

There will be two papers each of 2 hours' duration carrying 50 marks each.

(5) HISTORY AND GEOGRAPHY.

Two papers each of two hours' duration will be set:-

1st Paper—History of India

.. 50 marks

2nd Paper—General Geography of the
World with fuller treatment
of India ... 50 marks

(6) THEOLOGY OR MORALS.

There will be one paper (100 marks) of three hours' duration in this subject.

Examination in Theology or Morals shall be regarded as qualifying examination and the marks gained by a candidate in these subjects shall not be included in the grand total of the marks: but no student can go up for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at that examination.

B. OPTIONALS.

- 1. A Classical Language:-
 - (a) Arabic, (b) Sanskrit, (c) Persian.

 \mathbf{or}

- 2. A Modern Language (Except Urdu):-
 - (a) Marathi, (b) Telugu (c) Kanarese.

In each of these languages except Arabic there will be two papers of two hours' duration. The first paper will be on the prescribed Texts (60 marks) and the second paper will be on Grammar and Translation carrying 40 marks.

In Arabic there will be two papers of two hours' duration and carrying 50 marks each. The first paper will be on the text books prescribed for Prose and Poetry. The second paper will be on Grammar, Translation and Non-detailed text. The Translation will be from Urdu into Arabic and Vice Versa. Fifteen marks will be allotted for Non-detailed text.

or

3. History of England:--

There will be one paper of three hours' duration earrying 100 marks:—

or

4. Algebra and Geometry:-

There will be one paper of three hours' duration carrying 100 marks:—

Algebra	• •	 4 0	marks.
Geometry	Practical	 20	,,
Geometry	Theoretical	 4 0	"

 \mathbf{or}

5. Commerce:—

There will be two papers each of two and half hours' duration carrying 50 marks each as detailed below:--

Paper I Elementary Book-keeping.
" II Commercial Practice.

 \mathbf{or}

6. Biology:-

There will be one paper of two parts of three hours' duration carrying 100 marks:-

Part I Elementary Biology

(Botany—25 marks and Zoology—25 marks) 50 marks.

Part II Elementary Human
Physiology and Hygiene 50 marks.

 \mathbf{or}

7. Islamic History.

There will be one paper of three hours' duration carrying 100 marks.

14. Sucessful candidates who obtain 60 per cent. of the aggregate marks shall be placed in the First Class.

The names of the successful candidates passing the examination in First Class shall be arranged in order of proficiency as determined by the total number of marks obtained. The Second and Third Classes shall be arranged in the serial order of their roll numbers.

- 15. For a pass in the Second Class candidates should secure 35 per cent. in English, 35 per cent. in the three subjects, 25 per cent. in the remaining two and an aggregate of 35 per cent.
- 16. For a pass in the Third Class a candidate should secure 30 per cent. in English, 30 per cent. in the three subjects, 25 per cent. in the remaining two and an aggregate of 30 per cent.

The pass percentage in Theology and Morals shall be 30 per cent.

The fraction of 5 or above in the marks gained in any subjects by the candidates will be counted as one mark.

17. Candidates passing the examination in 3rd class and wishing to secure a higher class will be allowed to appear at the

Examination; and if they fail to pass the Examination their failure will not effect their previous success.

18. If a candidate fails to pass in the examination, he may reappear at any subsequent examination or examinations in those subjects only in which he has failed to secure 30 per cent. marks. He will be exempted from appearing at the test examination and will be declared to have passed the examination under the compartment system if he secures 30 per cent. marks in each subject; but such a candidate will not be eligible for admission to the Inter: Examination.

Girl candidate passing under this system will, however, be eligible for admission to college till 1352 F.

- 19. Failed candidates taking the option of joining the school to complete the examination will have to satisfy all the rules of School such as attendance and passing the test examination etc.
- 20. A certificate signed by the Registrar shall be given to each successful candidate setting forth the date of examination, the subjects in which he was examined, the division in which he was placed, etc.
- 21. The Registrar shall maintain and publish for general information, a list of High Schools recognised by the University.

(The following is the list of recognised schools) :-

(a)	$\mathbf{H}_{\mathbf{IGH}}$	Schools	:
-----	-----------------------------	---------	---

- 1. Government City High School, Hyderabad-Dn.
- 2 Darul Uloom High School, Hyderabad-Dn.
- 3. Osmania High School, Warangal.
- Darush Shifa, Hyderabad. ---do---4.
- Chanchalguda, Hyderabad. -do-5.
- 6. Madrasa-i-Asafia, Malakpet, Hyderabad-Dn.
- 7. Anwarul Uloom, Nampalli, Hyderabad-Dn.

8. Chaderghat High School, Hyderabad Dn.

9. Osmania High School, Medak.

	Matriculation Examination).				
	1. Osmania Middle School, Shorapur.				

TEXT BOOKS.

1352 & 1353 F. (1943 & 1944).

Note 1.—The University Examination in English will be held in the course prescribed for the X Class only, and in other languages and in compulsory Theology in the course prescribed for the IX and X Classes. The candidates will be examined in the three years' course in the other subjects.

A. COMPULSORY.

I. ENGLISH.

IX Class.—

Detailed:

Deccan Reader Book II. (Edited by Messrs Spieght & Doraiswami)—Published by Oxford University Press.

Non-Detailed:—

A Wonder Book by Nathaniel Hawthorne edited by C. Kingsly Williams (Longman's Green & Co.)

X Class.—1352 & 1353 F.

Detailed:-

Deccan Reader Book III. (Edited by Messrs Speight & Doraiswami)—Published by Oxford University Press. Non-Detailed:—Ivanhoe (New Method Readers) published by Longman's Green & Co.

Note.—Principals of Colleges and Head-Masters of High Schools will please note that the Deccan Readers published by the Oxford University Press only shall be used by the students.

2. URDU.

Class IX and X:—

نصاب اردوبرائے جماعت نہم و دھم۔ مطبوعه انحبن ترقی اردو۔ صرف و نحو برائے جماعت فو تانیه مرتبه مولوی عبدالحق صاحب مطبوعه انحبن ترقی اردو۔

3. ELEMENTARY MATHEMATICS.

Arithmetic, Algebra, Geometry and Mensuration— The following book is recommended. For detailed syllabus see Appendix.

Book recommended:-

جدید ابتدائی ریاضی موافه مسٹر رتن لال و رادهکا پرشاد

4. SCIENCE.

The following books are recommended. For detailed syllabus see Appendix.

(1) Physics for Matriculation Students, 2 parts, (Osmania University Series).

- و، جدید نصاب طبعیات ،، مولفه سردارخان و فیض محمد صاحبان(2) سید عبدااو زاق تاحرکتب عابد روز حیدرآباد"
- جدید طبعیات مولفه سدرشن راج و رادهکایرشاد (3)
- (4) Chemistry for Matriculation Students, (Osmania University Series).
- وواسباق كيميا،، حصه اول٬ دوم وسوم مولفه خليل الرحمن صاحب(5)

5. INDIAN HISTORY AND GEOGRAPHY.

- (1) Syed Hashimi's Matriculation History of India, (Osmania University Series).
- (2) Marsden's Geography for Senior Classes (Osmania University Series) is recommended. For detailed syllabus in Geography see Appendix.

6. THEOLOGY OR MORALS.

A. Theology for Hanafi students.

جماعت نهم . رساله دینیات حصه نهم (شایع کرده محکمه نظامت تعلیات سرکارعالی)

جماعت دهم - رساله دینیات حصه دهم (شایع کرده محکمه نظامت تعلیات سر کارعالی)

B. Morals—(for Non-Hanafi and Non-Muslim students) Tareeq-i-Saadat, Parts 1 and 2 Translation of Youth's Noble Path by Zamin Ali Kanturi.

B. OPTIONALS.

(1) Classical Languages.

ARABIC.

حماعت بهم

- (۱) مجانی الادب ارباب پنجم تاقصهٔ وویحیلی بر مکی و سائله ،، از صفحه ۳۰ تا ۲۵.
- (۲) نظم الاناشيد و المحفوظات المدرسيه الحزو الثانى از صفحه ۳ تا ختم صفحه ۲۰ باستثناء (الف) وصف خزان اصوان (ب) اسماعيل باشا (ج) مينا(د) قصر انس الوجود (ه) تشيد العلم
 - (٣) طالعه سرسری ـ تاجر بغداد سلسله قصص الاطفال تالیف کامل کیلانی از صفحه ٦ تا ختم صفحه ٣٩
 - (٣) قواعد صرف و نحو ـ النحوالواضح (للدارس الابتدائيه) الجزء الثاني مكمل ـ

جاعت دهم

- (۱) شر. مجانی الادب از قصهٔ ویحیلی البر مکی و سائله ،، تا ختم باب هفتم از صفحه ۲٫ تا ۱۱۲ –

- (m) مطالعه سرسرى تاجر بغداد ازصفحه pm تا 22-
- (س) قواعد صرف و نحو النحو الواضح الله الا بتدائيه الحزء الثالث مكل.

نوٹ ہر دوجماعت نہم و دھم میں النحو الواضح کی بحثوں کو اردو میں سمجھانا اور تمر نیات کی مشق کر انا اساتذہ کافر یضہ ہوگا۔

* یه کتابین مندر جه ذیل پته سے مل سکتی هیں ــ

(1) "THE ARABIC LIBRARY & Co.,"

ORIENT HOTEL BUILDING,

Opposite Crawford Market,

Bombay.

(2) ABDUL SAMAD & SONS

Sayid Wada, Surat.

(b) SANSKRIT.

Class IX:

Prose:—Gadyavali, Part II, pages 110-145.

Poetry:—Padyavali, pages 11—22.

Grammar:—Dr. Bhandarkar's Book II up to the lesson on Perfect Tense.

Class X :--

Prose:—Hitopadesa, the whole of Suhrdbhida (Nirnaya Sagar Press, Bombay).

Poetry:—Padyavali 23—33.

Grammar:—Dr. Bhandarkar's Books I and II, the whole except the lesson on Aorist.

N.B.—Special attention to be paid to subject matter. Translation exercises should be carefully gone through. Conversational lessons should be given. Attempts should be made to develop the students' power of expression who should be made to narrate simple stories or describe simple objects in Sanskrit. The teaching should aim at inculcation of appreciation of the study of Sanskrit Literature and the culture embodied in it the minds of the students.

(c) Persian.

Class IX:-

در رفارسی، حصه دوم ، مر تبه ذاک شر محمد نظام الدین، مطبوعه اعظم استیم پر یس حیدر آباددکن ـ باستثناء صفحه و تا ۲۷ و ۹۳ تا ۲۵ قو اعد ـ فعل و متعلقات فعل د حرف و اقسام حرف ـ قو ائد و استعالات کا تفصیلی بیان اور تحلیل صرفی ـ

Class X:—

درر فارسی حصه سوم ، مر تبه ذاکر محمد نظام الدین مطبوعه اغظم استیم پر یس حیدرآباددکن. باستثناء صفحه ۲۵ تا ۸۹ و ۱۲ تا ۱۳۰ قو اعد میادیات علم نحو کنام اور اسکی قسمیں - مرکب غیر مفید و مفیدکی جمله قسمیں - اجر اء کنام ، تر تیب و مطابقت اجر اء کنام ، ترکیب نحوی نظم و نثرکی مشهور اقسام اورانکی تعریفات و شناخت -

2. MODERN LANGUAGES.

(a) MARATHI.

Class IX:—

- Prose:—(1) Vangmayamala Pushpa I by V. M. Joshi and N. M. Patwardhan. Pages 25 to 122. Publisher—Author Hingane Budruk, Poona 4.
 - (2) Gadya Madhuri by Prof. Banhatti lessons 2, 3, 4 and 6.
- Poetry:—Maharastra Rasawanti. Part II by Prof. Ranade. Pages 29 to 71.
- . Grammar:—Marathi Vyakarnachimula Tawen by G. H. Kelkar. Publisher—Bombay Book Depot. Chapters VI to X. Pages 76 to 220.
- Composition.—Nibandha Lekhan by V. V. Bhide, Narrative Essays.

Class X :--

- Prose.—(1) Vangmayamala Pushpa I by V. M. Joshi and N. M. Patwardhan. Pages 123 to 240. (Third Part).
 - (2) Gadyamadhuri by Prof. Banhatti Pages 35 to 72.
- Poetry.—Maharastra Rasawanti Part II by Prof. Ranade. Pages 1 to 28 and 88 to 104.

Grammar.—Marathi Vyakarnachimula Tawen by G. H. Kelkar. Publisher—Bombay Book Depot. Chapters XI to XIV.

Composition.—Nibandha Lekhan by V. V. Bhide, Reflective Essays.

(b) TELUGU.

Class IX and X:-

- Poetry.—Sahitya Mujusha, Part II. (Venkata Rama & Co. Secunderabad). Portions prescribed:—
 - 1. Tikkana: Agnata Charya 42 Verses.
 - 2. Manchana-Madhubinduvula Kalhat 10 verses.
 - 3. Potana-Sri Krishna Janmam, 37 verses.
 - 4. Sri Nadha-Hamsa Dutyam 31 verses.
 - 5. Ghattu Prabhu-Muchelopakhyanam, 38 verses.
 - 6. Subhashitamula—15 verses.
 - 7. R. Subba Rao—Agnipravesam 18 verses.
 - 8. Parvati Tapamu—30 verses.

- Prose:—1. Sahitya Manjusha, Part II—'The whole, Pages 80—207.
 - 2. Bhishma Charitra by M. Purushottam Sarmu.
 - 3. Benjamin Franklin Jivita Charitram by Pasumarti Srinivasa Rao, B.A. (Vijnana Chandrika Mandali, Bezwada).

Grammar:—Vyakarana Bodhini, published by Sundar Rama & Co., Tenali.

(c) KANARESE.

Class IX:—

Prose:—Namma Urina Rasikam by G. Ramaswamy Iyangar (First Half).

Poetry:-Bharata, Sabhaparva, Sandhis 9 & 10.

Grammar:—Sabdadarsa by B. Mallappa.

$Class\ X:$

Prose:—Namme Urina Rasikam (the whole) by G. Ramaswami Iyangar.

Poetry:—Bharata, Subhaparva Sandhis (11).

Grammar:—Sabdadarsa by B. Mallappa.

APPENDIX.

DETAILED SYLLABUSES.

(Compulsory)

- (1) Elementary Mathematics
- (a) Arithmelic.—The four rules applied to integers, vulgar fractions, the decimal fractions in particular. Indian and English money, weights, measures of length, area, volume, capacity and time; the metric system. Approximations, Contracted methods of multiplication of decimals. Simple forms of recurring decimals. Ratio and proportion and exchange. Percentage and its applications. Profit and loss. Simple Interest, and Compound Interest, (direct problems only, number of periods for calculation not to exceed 2) Averages, Square root.
- (b) Mensuration.—Elementary Mensuration of plane rectilinear figures (a knowledge of the use of field book not required); circles, surfaces and volumes of rectangular solids, right circular cylinder and cone (Frustum excluded); sphere.
- (c) Algebra.—Algebraic quantities and extension of 4 fundamental rules to them—formal proofs not required. Symbolic expression of the general results of Arithmetic. Calculation of the numercial values of expressions and formulae by substitution. Simple factors and formulae.

$$(a + b)^2 = a^2 + 2 ab + b^2$$

 $(a^2 - b^2) = (a + b) (a - b)$
 $(a + b)^3 = a^3 + 3 a^2b + 3 ab^2 + b^3$
 $a^3 - b^3 = (a - b) (a^2 + ab + b^2)$

Simple fractions with linear denominators. Linear equations involving one or two variables and problems relating thereto. Plotting Statistics; linear graphs.

(d) Practical Geometry:—Bisection of straight lines and angles, drawing perpendicular and parallels to a given straight line; construction of an angle equal to a given angle. Experimental deduction of the elementary properties of triangles and parallelograms. Simple cases of construction of triangles and quadrilaterals from given data. mentary properties of the circle-areas. chords, sectors and tangents. tion for finding the centre of a circle or an arc of a given circle. Construction of tangents to a circle and common tangent to two circles. Very simple cases of construction of circles from given data. Construction of a circle in or about a triangle. Division of a straight line into any number of equal parts or into parts in a given proportion.

(2) Elementary Science.

N.B.—The treatment of the subject-matter should be elementary and popular. Only Laboratory methods of preparation are expected. All quantitative relations and mathematical calculations are to be avoided.

(i) Physics.

(a) Preliminary:—Units, British and Metric, for measurements of length, area and volume. Measurement of time, unit of time, Rectilinnear translation of a rigid body, definition of velocity and accelaration. Laws of motion. Definition of momentum and force, gravitation, weight. Distinction

between mass and weight. British and C. G. S. units of mass and force. The balance. General properties of matter. Density and specific gravity. Simple machines in equilibrium; levers; the single pulley. Properties of fluids, Liquid pressure. Principle of Archimedes. Pressure of the atmosphere. Boyle's Law, Barometer (Cistern) and pumps (simple forms of air pump and water pump). The siphon.

- (b) Heat:—Effects of heat: expansion of solids, liquids and gases. Temperature, Thermometers. The expansion of water. Distinction between quantity of heat and temperature. Calorimetry. Melting point. Cold produced by evaporation. Vapour pressure. Influence of pressure on boiling point of liquids. Transmission of heat, conduction, convection and radiation.
- (c) Light:—Rectilinear propogation of light, reflection and refraction of light; refractive index. The formation of images by reflection. Graphic methods of determining the position and size of an image formed by reflection and refraction (applicable to plane and spherical surfaces). Deviation and dispersion produced by a prism (omit minimum deviation). Simple optical instruments; astronomical telescope, microscope, photographic camera and magic lantern.
- (d) Magnetism:—Magnets and magnetic substances. Induction methods of magnetization. Terrestrial magnetism. Declination and its determination.

(e) Electricity:—(i) Static Electricity:—Electrification by friction. Pith-ball electroscope. Conductors and non-conductors. (ii) Voltaic Electricity:—Production of electric current. Voltaic Cell. Local action and polarization. Daniell, Leclanche and Bichromate cells, Galvanoscope. Electrolysis (omit Faraday's Laws). Voltameter (Water) Electromagnets. Electric bell. Heating effects of the current (omit Joule's Law).

(ii) CHEMISTRY.

Elements, compounds and mixtures. Solutions (in water only); decantation, filtration, evaporation and distillation; saturated solution, crystallisation and water of crystallization; sublimation and precipita-The use of these processes in the preparation of pure substances. Examples of physical and chemical changes. Combination, and decomposition. study of air—its composition, burning and rusting. Acids, bases, and salts; neutralization. Types of chemical changes. Metals and Non-metals. The law of constant proportion. Preparation and properties of oxygen. Preparation and properties of hydrogen; oxidation and reduction. Study of water, natural waters, hard and soft waters, purification of drinking water, electrolysis of water. Preparation and properties of nitrogen, nitric acid and ammonia. Preparation and properties of a carbon di-Carbon. Combustion: structure of a candle flame, Sulphur and its properties. Preparation and properties of hydrogen sulphide, sulphur di-oxide and sulphur tri-oxide. Preparation and properties of sulphuric acid. Phosphorus and its properties. Matches. Natural forms of silica; glass. Preparation and properties of Chlorine and of Hydrochloric acid. Sodium, its occurrence and properties. Properties of sodium hydroxide; sodium chloride, sodium nitrate, sodium sulphate, sodium bicarbonate. Patossium, its occurrence and properties. Properties of Potassium hydroxide, potassium chloride, potassium chlorate and potassium nitrate. Preparation of soap. Calcium Carbonate; preparation and properties of calcium oxide and calcium hydroxide. Elementary ideas about lime, mortar, cement and bleeching powder.

Properties of Magnesium, magnisium sulphate and magnesium oxide. Copper, its occurrence and properties; preparation of copper sulphate.

Aluminium, its occurrence and properties; preparation and properties of aluminium sulphate and alum.

Mercury, its occurrence and properties. Properties of mercuric oxide, mercurous chloride and mercuric chloride.

Lead, its occurrence, and properties. Properties of litharge, red lead, lead carbonate and white lead.

Silver, its occurrence and properties. Preparation and properties of silver chloride and silver nitrate. Uses of silver salts in electroplating and photography.

Iron, its occurrence, properties and uses. Properties and uses of cast iron and steel. Preparation and properties of ferrous oxide, ferric oxide, magnetic oxide of iron and ferrous sulphate.

3. GEORGRAPHY.

General Geography of the World in outline, with special reference to the British Empire, together with India in fuller detail and the essentials of Physical Geography; Surface of the Earth; Volcanoes and Earthquakes; the Zones, Latitude and Longitude, Day and Night; the seasons; the Solar System: phases of the Moon; Waves, Tides and Currents.

Optionals.

1. Algebra and Geometry.

- (a) Algebra:—Generalised Arithmetic. Algebrical laws and principles and their application. Factors and Formulae. Identities. Functional notation. Remainder Theorem and its applications. Linear equations in one, two and three variables. Solution of Quadratic Equations in one variable. Solution of problems by means of such equations. H.C.F., L.C.M., fractions. Square root of simple rational integral functions. Theory of Indices. Graphs of linear and quadratic fractions, in one variable and their applications to the solution of equations and problems.
- (b) Geometry:—The course in Geometry will be both practical and theoretical. Practical geometry will include constructions given in Schedule 'A' together with easy extensions of them. Proofs of constructions will also be required. Theoretical Geometry will include theorems together with easy deductions from them. Any proof of a proposition which appears to form part of a systematic treatment of the subject will be accepted. In the proof of theorems hypothetical constructions will be allowed. Symbols and Algebraic notation may be freely used.

SCHEDULE "A"

Bisection of straight lines and angles.

Construction of (1) perpendiculars, (2) parallels to straight lines.

Construction of angle equal to a given angle.

Simple cases of the construction of triangles and quadrilaterals from given data.

Division of straight lines into a given number of equal parts, or in any given data.

Construction of a rectangle equal in area to a given triangle.

Construction of a triangle equal in area to a given rectilinear figure.

Simple cases of the construction of circles from given data.

Construction of tangents to a circle and common tangents to two circles.

Construction of a square equal in area to a rectangle and geometrical extraction of square roots of rational numbers.

Construction of regular figures of 3, 4, 6, or 8 sides, (1) in or about a given circle and (2) on a given straight line.

Construction of (1) a fourth proportional to three given straight lines, (2) a mean proportional to two given straight lines.

SCHEDULE "B"

Angles at a point.—If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If straight lines intersect, the vertically opposite angles are equal.

Parallel Straight Lines.—When a straight line cuts two other straight lines, if (1) a pair of alternate angles are equal, or (2) a pair of corresponding angles are equal, or (3) a pair of the interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel and the converse.

Triangles and Rectilinear Figures.

The sum of the angles of a triangle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the exterior angles so formed is equal to four right angles.

Two triangles are congruent.

- (1) If two sides of the one are equal to two sides of the other, each to each, and also the angles contained by those sides equal.
- (2) If the two angles of the one are equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

Two triangles are congruent if the three sides of the one are equal to the three sides of the other, each to each. Two right-angled triangles are congruent, if their hypotenuses are equal and one side of the one is equal to one side of the other.

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram and the diagonals bisect each other.

If the intercepts made by three or more parallel straight lines on any straight line that cuts them are equal then the corresponding intercepts upon any other straight line that cuts them are also equal.

Area.

Parallelgrams on the same base or on equal bases and of the same altitude are equal in area.

Triangles on the same base or on equal bases and of the same altitude are equal in area.

Equal triangles on the same base or on equal bases are of the same altitude.

The square on a side of a triangle is greater than, equal to, or less than the sum of the squares on the other two sides according as the angle contained by these sides is obtuse, right or acute. The difference in the cases of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

The Circle.

A straight line drawn from the centre of a circle to bisect a chord which is not a diameter is at right angles to the chord; and the converse.

In equal circles (or in the same circle):—

- (1) If two arcs subtend equal angles at the centre they are equal and the converse.
- (2) If two chords are equal, they cut off equa arcs; and the converse.

Equal chords of a circle are equidistant from th centre; and the converse.

The tangent at any point of a circle and the radius through that point are perpendicular to one ar other.

If two circles touch each other, the point of cortact lies on the straight line through their centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any poin on the remaining part of the circumference.

Angles in the same segment of a circle are equa and if the line joining two points subtends equa angles at two other points on the same side of it, th four points lie on the circumference of a circle.

The angle in a segment is greater than, equal to or less than a right angle according as the segment i less than, equal to or greater than a semicircle.

The opposite angles of any quadrilateral inscriked in a circle are supplementary; and the converse.

If a straight line touches a circle and from th point of contact a chord is drawn, the angles whic this chord makes with the tangent are equal to th angles in the alternate segments.

If two chords of a circle interest each other eithe inside or outside the circle, the rectangle containe

by the segments of the one is equal to the rectangle contained by the segments of the other.

Loci.—

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

The locus of the vertices of all triangles which have the same base and their vertical angles equal to a given angle is the arc of a segment of a circle.

Proportion:—Similar Triangles:—(Proofs applicable only to commensurable quantities will be accepted).

If a straight line is drawn parallel to one side of a triangle, the other two sides are divided proportionally; and the converse.

If two triangles are equiangular, their corresponding sides are proportional and the converse.

If two triangles have one angle of the one equal to one angle of the other, and the sides about these angles proportional, the triangles are similar.

The internal bisector of an angle of a triangle divides the opposite sides internally in the ratio of the sides containing the angle, and likewise the external bisector externally.

(2) COMMERCE

Elementary Book-keeping.

Double Entry—
Its meaning, principles and advantages. Waste book, Journal and Ledger. Journalising transactions of the following descriptions.

Cash and Credit sales and purchases, Cash receipts and payments, Petty Cash disbursements, Bank Account, Cheques received and drawn, endorsed, honoured and dishonoured, rent, salaries, trade expenses, interest, discount, commission, repairs, depreciation, bad debts, Bills of exchange, drawn, accepted, endorsed, honoured, dishourned, noted, renewed, and retired under discount, Government and other securities, house property, plant and machinery, furniture, drawings.

Provision for bad debts and discount; Suspense A|c Outstanding and Pre-payments.

Posting the journal entries into Ledger, drawing a Trial balance, Profit and Loss $\Lambda|c$ and Balance sheet.

English System—

Subsidiary books and their use. Three columns ash book, Purchase and sales of books, Purchase eturns and Sales Returns books, Bill receivable and alls payable, Books Journal. Posting the subsidiary tooks into Ledger and drawing the balance sheet.

Inland and foreign invoice and account sales Consignment A|c, Trading and Profit and Loss A|c Contract A|c. Partnership A|c of a simple nature

such as admission of partner and division of profits. Good will and its treatment on the admission of a partner.

Reserve and Reserve Fund.

Single entry system, its disadvantages. Method of finding profit under single entry, Statement of affairs.

Commercial Practices—

The essentials of successful business management:—

Executive ability, system of administration and office facilities.

Office Organisation—

Incoming correspondence, out-going correspondence, reference number, copying of correspondence for office reference, carbon copy, Press copy machine: folding letters and addressing envelopes. Enclosures. Late fee letters, Postage Box. Filling of correspondence:—Vertical filing, Alphabetical system and Numerical system Pigeonhole filing.—Flat file system. Clip, Box needle or spike, and arch file.

Indexing—

Alphabetical index. Vowel index, cross reference index.

Card index Drawers. Telephone and Telephone Register.

Duplicating Process—

Stencil copying, Rotary Duplicator.

Machines:—Calculating machine, Adding machine, Dictating machine.

Business Callers, Appointments.

Petty Cash Book.

Purchases and Sales-

Difference between an agreement and a contract Essential points in a contract of sale.

Documents used in Commercial Sales.—

Price list, Price current, Tenders, Orders, Indents, Contract notes, Delivery orders, Invoices, Account sales, Debit and Credit notes, Statements and Receipts.

Correspondence-

Private, business and official, Accuracy, Precision and politeness. Setting out a letter, address form of salutation, body of the letter and complimer tary close, signing the letter. Writing business letter of a simple nature such as enquiries, orders, despate of goods, remittances complaints, etc.

Telegrams—

Drafting telegrams—Economy and clearness.

Code words-cipher code.

Money-

Paper and metallic, Legal Tenders, Standard & Value. Methods of remitting money.

Banks and Banking—

Private Banks, Joint stock banks, Co-operativ Banks. Exchange Banks, Imperial Bank of India and Post Office Savings Banks, Business transacte by Banks.

Fixed deposit and current account. Advantage of a Banking account. How to open account with Bank, Paying slips, Pass Book.

Cheques-

Order and Bearer, Crossed cheques and Not Negotiable cheques. Endorsement. General and special presentment for payment. honour and dishonour; stopping payment.

Bills of Exchange—Inland and Foreign.

Drawing, accepting, honouring, dishonouring, noting, protesting and renewing. Advice slip. Currency of bill. Days of grace. Endorsement, Usance, Sola, Case of need. Promissory Note. Difference between Bill of Exchange and Promissory Note Allonge. I.O.U. Letter of Credit and Circular letter of Credit, Negotiable Instruments, Hundi. How money is transferred through a bill of Exchange. Merchantile Houses.

Sole Traders, Firms and Companies. Partnership, limited and unlimited, Partnership Deed. Active and dormant partners. Rights, duties and liabilities of a partner. Dissolution partnership.

Terms and abbreviations used in commerce.

Meaning of Home trade. Foreign trade, Balance of trade, Balance of account, volume of trade, Import and Export trade, Carrying trade and Retail trade. Bill of Landing.

Insurance-

Elementary principles of Life. Fire and Marine Insurance, with terms used in Insurance.

Foreign Exchange—

Par of Exchange, Course of Exchange. Monitary Standards of principal countries of the World.

3. BIOLOGY.

PART I.

ELEMENTARY BIOLOGY.

Life of animals based purely on the observation made on Frog: External parts and their wor internal parts and their work; digestive system; for and digestion. Circulatory system and blood, wor of blood and need for circulation. Lungs and breating. Kidneys and excretion. Nervous system: se sation and special senses. Bones and supports. Reproductive system and reproduction. (All these a to be treated in a very elementary manner).

Elementary knowledge of the classification animals—Illustrated mainly by the common locanimals.

Life of plants based mainly on the bean plant be dealt with in a very elementary way—Vario forms of plants: herbs, shrubs and trees; climbin plants, parasites; parts of the plant and their wor Leaves; manufacture of food, loss of water to a Stem carrying water and food, support of leav Root: collecting water and salts from the soil, hol ing the plants in position. Flower; pollination; fe tilization; fruits and seeds and their dispersal. T new plant in the seed; germination. (All these to treated in a very elementary manner.)

The value of plants and animals to man—For fuel, clothes, power, building material, medicin pleasures, scavenging of waste materials (dogs, jakals, crows, vultures, bacteria, fungi).

Animals and Plants that are harmful to man

(Treated in a very elementary manner).

- (1) That feed on man and animals: Ticks, lice, Fleas, bedbugs, mosquitoes, intestinal worms—(External features only).
- (2) That feed on plants: distruction of plants by insects (common examples). Elementary description only.
- (3) That cause diseases in man and animals—animal parasites (malarial parasite: hookworm) and bacteria (cholera, plague, small-pox, tuberculosis, rabies) (all these treated in a very elementary manner). Life-histories are not required, but only a very simple idea of the diseases is to be given.
- (4) That cause diseases in plants: Parasitic fungi (mildews smuts, rusts). Life-histories not required, but an idea of the damage done by these fungi to their hosts.
- (5) That carry diseases: insects (flies, fleas, mosquitoes); rats; (Simple names of such diseases, and not the life-histories of the animals).
- (6) That destroy property: rats; white-ants; beetles; bacteria and moulds in food; wood-rotting fungi. (very elementary knowledge of their habitat only).

Biology Demonstration.

The teaching of theory should be illustrated by experiments as far as possible, and demonstrations,

both macroscopic and microscopic, are to be considered essential part of the teachers' work. The course in Biology will not require any extensive expenditure or equipment and materials. Practically all material can be easily collected from the local fauna and flore No microscopic work is to be done individually by the pupils.

Demonstration of common representatives of th animal kingdom as obtained locally, and their sketch ing. Students should be encouraged to develop th taste of observation and to collect materials. The should also develop habits of making museum collections, their labelling, preservation, etc.

Collection and sketching of the common locaplant forms.

Study and sketching parts of a plant.

Observation of insects that feed on cultivate plants.

Collecting of fungus diseases of plants, especial of crop plants.

Examination of the breeding places of mosqu toes, flies and rats.

Books recommended for the guidance of the Teachers:—

Parsons—Everyday Science.

Potter—Biology by discovery.

T. J. Moon—Biology for beginners.

N.B.—Great stress should be laid on pure observations, field-work and biological excursion museum and herbarium studies.

A note on the teaching of Elementary Biology for the guidance of teachers—The course in Elementary Biology, including Human Physiology and Hygiene, is intended to awaken the general interest of young students and to give them an intelligent appreciation of everyday life around them. With this main object in view, the syllabus is mainly based on pure observations of a few animals and plants, and is of a very elementary character. The teacher should keep this basic principle in mind as laid down in the syllabus while presenting the different sections of the subjects, and emphasize the part these sciences play in modern life. In Biology the teacher should emphasize the life-functions of frog and man rather than details of structure. In plants, it is not the shapes and kinds of structure that should be emphasized, but the fact that the plant is a living organism. How animals and plants obtain their food, breathe, react to their surroundings and reproduce their kind rather than elaborate details of their structure is the most important thing.

Practically every item of the syllabus can be illustrated by a simple demonstration, and students should always be encouraged to learn the subject more from direct observation and experience of nature (viz., by making excursions and going about on the field) rather than by cramming notes and reading books alone. The teacher is recommended to prepare his material for demonstration carefully before he goes into the class.

ELEMENTARY HUMAN PHYSIOLOGY AND HYGIENE.

As a basis for the teaching of Hygiene there should be a preliminary simple treatment of the following topics in Elementary Human physiology:—

The human skeleton, the organs of digestion; the circulation of the blood; the nervous system; respiration; Excretion; Resproduction.

HYGIENE.

Precautions against diseases:—Infectious diseases (small-pox, measles). Colds and influenza. Tuber culosis. Enteric fever; dysentery. Diarrhoea, che

Air:—Composition of air, importance of pur air. Impurities of air. Diseases caused by impur air. Ventilation.

Water:—Composition of water. Quantity (water required. Sources of water-supply; spring deep wells, surface wells, rivers, tanks. How water is polluted. How to prevent pollution of water. Ho to purify water: boiling and filtering.

Food:—Composition of food. Composition good diet and its importance. Preservation of foo Cooking of food. Drinks and condiments.

Personal Hygiene:—Cleanliness of body, hai nails, teeth, etc.); clothing, exercise, importance temperance; spitting.

Precautions against diseases:—Infectious deases (small-pox), measles). Colds and influent Tuberculosis. Enteric fever; Dysentery. Diarrhocholera; plague, malaria, itch, leprosy, ophthaln (sore-eyes).

Books recommended for the guidance of Teachers.

Marie Stopes—Human Body.

T. Huxley—Elementary Physiology.

Lukis & Blackham—Tropical Hygiene (Thacl Spink & Co.)

4. DOMESTIC SCIENCE.

Class VIII—

THEORETICAL.

(A). Physiology—

A simple outline of the working of the body—

- The Skeleton System—
 Types and names of the chief bones.
 Classification of joints. Uses of the Skeleton.
- (2) The Muscular System—
 Voluntary and Involuntary Muscles.
- (3) The Circulatory System—

Structure and function of the heart, arteries, capillaries and veins. Composition and function of blood. Interchange of gases in the tissues and the lungs, distribution of nourishment and removal of waste from the tissues.

(B) Personal Hygiene—

- (1) Personal cleanliness, care of the skin, teeth, hair and nails. Action of soap.
- (2) Clothing, Cleanliness of clothing. Suitable materials for hot and cold climates. The evils of unhealthy clothing.
- (3) Importance for health of sufficient rest, sleep and daily exercise. The effects of sudden chilling of the skin.

First Aid-

(1) How to deal with—

Choking.

Hiccough.

Foreign bodies in the eyes, ears, nose and throat.

Suffocation and insensibility. Drownin and artificial respiration.

- (2) Poisons, e.g. Alcohol, Carbolic, Opiun Prussic Acid, Copper, Lead and Ptomain Their symptoms and treatment.
- (3) General rules for the treatment of sco pion and bee stings, dog and snake bites

(C) Housecraft—

(a) Accounts, Cheques and Receipts. How deal with Banks, Money and Parcels se by Post, V.P.P. Telegrams.

Laundry Work—

Water.—Sources of water supply. The conposition, uses and purification of water Uses and kinds of starch, blue and soar

PRACTICAL.

First Aid—

How to deal with Fractures. Bandages is cuts and wounds. Transport of the jured.

Housecraft-

Table appointment and serving of different meals according to Indian and English customs. Ware etiquette. Care of silver, brass, enamel were and furniture. Removal of estains from walls, floors and house-hold furniture.

Laundry Work—

Water as a cleanser in laundry work.

Care of laundry utensils. Action of hard and soft water.

Washing and finishing of white, coloured silk, artificial silk and woolen clothes.

Needle-work-

Pattern making by paper folding. These should be made in full size for magyar garments, knickers and pyjamas, kurtas.

Processes-

Revision of Seams—running, falling, Frensh—by hand and machine. Setting gathers into a band. Button holes.

Decoration—Decorative stichery. How it differs from embroidery padded initials.

Cookery-

Indian Cookery—

- (a) Bread—Phulkas, puri, samboosa.
- (b) Rice—Plain rice and Khitchery.
- (c) Kabads—Shami and Shikampur.

- (d) Curries—Keems, dalcha, meat cook ed with different vegetables an greens..
- (e) Chutneys—Dahi, till kachumar, Nauratan.
- (f) Murabbas—Mango, Naspati, Aprico tomato, apple and guava.
- (g) Preparation of a complete Nashta. Invalid Cookery—

Boiled and baked custard.

Porridge, Rice Dalia, Sago.

Invalid Khichree (Mung).

Egg preparations, light boiling, poaching Butter milk.

Chicken broth (Jars).

Gruel.

Barley gruel and barley water.

Jellies and Puddings.

English Cookery—

The buying and storing of various types (foodstuffs.

Their protection from decompositic caused by bacteria and moulds.

Puddings, fruit salads, simple biscuit an plain cakes.

Class IX.—

THEORETICAL.

(A) Physiology—

- (1) The Respiratory System: The Air passages, Mechanism of respiration. Structure and function of the lungs. Bad effects of mouth breathing.
- (2) The Extretory System: The origin of the waste products of the body. The excretory organs, structure and functions of the skin, kidneys and large intestines.

(B) Hygiene—

(1) Air: Its composition and properties. The need of air. The kind of air required. Inpurities of expired Air.

Impurities in the air of inhabited places. How impure air should be purified.

(2) Diseases: Simple facts concerning common infectious and contagious diseases chiefly with a view to preventing their spread. Ways in which diseases are carried, such as colds, influenza, plague, small pox, measles, cholera, malaria, tuberculosis, typhoid, hydrophobia and leprosy.

(C) Housecraft—

(1) Management and regulation of expenditure in proportion to income. Evils of the instalments system and advantages of cash payment.

- (2) Care of children. Feeding, clothing, bathing and regulation of habits.
- (3) Disinfectants and Insecticides for household pests such as fleas, flies, bugs, mosquitoes, cockroaches, silk fish.

 Disinfection during epidemics.

PRACTICAL.

House craft —

Making soap, Vim, Furniture polish, Flit.
Daily and Weekly cleaning of all rooms, sinks
and drains.

Laundry Work—

Preparation of simple reagents. Removal of simple stains.

Special care of lace, embroidery. Sample. Deying and Bleeching. How to wash infected clothing.

Needle-work—

Pattern making for petticoats, bodies, blouses. Sudhria, night dresses.

Processes-

Application of methods.

How Crossway pieces are used for binding, piping, facing and false hems.

Insertion of Gussets.

Making bound buttonholds. Hemstitching.
Care and cleaning of the sewing machine.

Mending-

Invisible mending.

Cookery-

Indian Cookery:

- (a) Bread—Parhatas and Chapaties. Mal Puri and Alooki Puri.
- (b) Rice—Bhagara Rice and vegetable pallao.
- (c) Kabab—Fish and Pasinda Kabab.
- (d) Curries—Kofta Curry mahi khalia, khurma, Dhai-ke-kari. Rice-ke-Kari.
- (e) Pickles—Lime, Mango, Tamarind, Orange, Karna, Fish and Fowl, Shaljum-ke-Achar.
- (f) (i) Sweets—Kheer, Potatoes, Sago, Rice, Falooda, Amrit phal and gulab jamun.
 - (ii) Halwa—Egg halwa, Rava and pumpkin and carrot halwa.

Invalid Cookery—

How to make a light diet.

Quantity and service.

How to prepare arrowroot, boiled fish, steamed chicken. Vegetables.

English Cookery—

Arrangements for Picnics, Tea-Parties. Quantities and cost.

Shortbread. Rich cake.

$Class\ X:$

THEORETICAL.

(A) Physiology—

The Digestive System.

Why digestion is necessary.

Process of digestion in the mouth, stomach and small intestine.

Absorption of food.

The nervous system.

The brain and spinal cord.

Motor and Sensory Nerves.

Reflex Action.

The Organs of the Senses.

(B) Hygiene—

Food—Why food is necessary. Constituents of foods. Common foods and their constituents with special reference to milk and eggs. Importance of a mixed and varied diet. Advantages and disadvantages of cooking food. Dangers of stale and dirty food. Methods of preserving food.

Water—Common Water—Plentiful supply essential for cleanliness and drinking. Common impurities. Filtering and boiling as methods of purification. Diseases caused by dirty water.

Sanitation—Importance of cleanliness of surroundings water carriage and dry system of sewage removal. Methods of disposal of house refuse in town and country.

(C) Housecraft—

- 1. Choice of a house, situation, aspect, ventilation, regulation of temperature, artificial lighting. Sub-soil and drainage. Arrangement of rooms. Proper location of kitchen and bathrooms.
- 2. Investiments. Post Office, Saving Bank, Annuities. Government Stock, Endowment Policies and Life Assurance, Cooperative Stores and Societies.
- 3. Management of Servants, Appointment, Dismissal. Testimonials.
- 4. Etiquette—Rules for visiting and entertaining. General rules of etiquette to be observed at places of entertainment. Rules for travelling and preparations for journeys.
- 5. Home Nursing—General control of the sick-room. Visiting the sick. How to receive the Doctor.

PRACTICAL.

Home Nursing—

Bed making and changing of sheets. Making of poultices. Fomentations. Arrangements and cleaning of the sick-room. Care of the sick-room. Sick-room utensils. Temperature charts. Bed-sores, their prevention and cure.

Needle-work-

Pattern making—

- (a) From direct measurement.
- (b) Taken from made up garments. Revision of other methods. Baby garments.

Processes-

- (1) Added pieces—openings.
- (2) The setting in of collars and sleeves.

Mending—

- (1) A hedge tear darn.
- (2) Application of rules for mending.

Decoration—

- (1) Simple shading.
- (2) Karchob work.
- (3) Hardanga work.

Materials—

The nature, suitability and hygienic value of materials.

Approximate prices, width and quantities.

Simple Home Furnishing—

The making of curtains, cushions, loose covers and very simple upholstery.

Cookery-

Indian Cookery—

- (a) Bread .. (1) Roghni Roti.
 - (2) Meethi Puri.
- (b) Rice .. (1) Fish.
 - (2) Mutton.
 - (3) Fowl.

- (c) Kabab .. Fowl and Shikh Kabab.
- (d) Curries.. (1) Fowl Curry.
 - (2) Fish Curry.
 - (3) Dupiaza.
 - (4) Bhagara Baigan.
 - (5) Kari Kabab.
 - (6) Kutt.
- (e) Halwas.. (1) Hub-ka-Halwa.
 - (2) Almond Halwa.
 - (3) Savian-ka-Muzaffir.
 - (4) Badam-ki-Jali.
- (f) Preparation of a complete Lunch and Dinner.

nglish Cookery—

- (1) Menus for various types of people, invalids and children. Prices and quantities.
 - (2) Cooking Processes—

Boiling.

Steaming.

Stewing.

Frying.

Baking.

Grilling.

- (3) Jams, Pickling and Preserving.
- (4) Sponge cakes, simple icing.
- (5) Preparation of various salads and simple dressings.
- (6) The using up of left over foods.

SCHOOL SUBJECTS.

(1) Drawing.

LASS VIII.

1st Term.

- 1. Drawing from flat (Free Hand).
- 2. Geometrical Drawing.
- 3. Memory Drawing.

2nd Term.

Iodel Drawing.

300ks Recommended:-

- 1. The teaching of Drawing by I. H. Morris.
- 2. Geometry by I. H. Morris. Problems 1 to 100.

CLASS IX.

1st Term.

- 1. Free-hand and Model Drawing, (alternate lessons) in more developed forms than the class VII Standard.
- 2. Geometrical Drawing.

2nd Term.

Foliage from nature flat Tinting Books Recommended.

- 1. Same as for Class VIII.
- 2. Same as for Class VIII. Problems 100 to 200.

CLASS X.

1st Term.

- 1. Free-hand Drawing in more developed forms than the Standard of Class IX.
- 2. Geometrical Drawing and Mechanical Measurement.

2nd Term.

Summing up and revision of subjects taught in the last term and in terms of Class VIII and IX.

Books Recommended.

- 1. The teaching of Drawing by I.H. Morris.
- 2. I. H. Morris Book of Geometry. 200-223 problems.
 - (2) Manual Training Wood-work.

CLASS VIII.

(a) Scientific Principles.—

(Educational advantages to Manual Training Principles of Projection.)

(b) Practical Principles.—

By demonstration (saws and sawing planes and planning, etc.)

(c) Practical work (A round ruler. A penholder. A hat rack. Key-board. A tiolet box. A picture frame, etc.)

CLASS IX.

(a) Scientific Principles.—

Growth and parts of prowing tree, Germination roots and leaves, their development and food supply Seasoning timber. Shrinkage of timber. Chemica structure of wood and products formed by chemica changes etc.

(b) Practical Principles.—

(Miscellaneous Tools, Grind stone and grinding Notes on various tools).

(c) Practical work.—

Levelling Rule. A simple Ink Stand. A letterack. A Towel roller. A Book-shelf (Key joint) tea tray, etc).

CLASS X.

(a) Scientific Principles.

- 1. Science in Manual Training. Matter. measument. Metric system. Density. Specigravity. Force and Work. Mechanical vices, levers, etc. etc.
- 2. Geography in Manual Training; trees, char teristics of various parts. Forestry and Manual Training Lesson, Climate, rainf rivers, coast line of Europe, forest area Asia, Europe and America particularly rests of India and Burma. Lessons principal trees and important timbers.

(c) Practical work.

A Stool, Teapoy. A Drawing board (Tongue and groove joints). A tea square. A book rest. A Common box with lid. A box for sporks, spoons and knives (Drawer dove-tail join a photo stand. A stationary cabinet, etc.)

Free-hand sketches of the new tools introduced at each stage and models attempted, with dimensioned scale, drawings showings or-thographic projections. Latterly occasional oblique drawings should also be attempted.

Books for Reference.

- 1. The Principles of Educational wood work by Beinns & Masdon.
- 2. The Principles of Educational wood work by W. A. Milton (Blackie).
- 3. Manual Instruction wood work by Pearson.
- 4. Sloyed—Three Upper Grammar grades by G. Laressan (Bostan Manual Training School).

(3) Physical Training.

1. Exercises of the Body:—

Marching and running exercises, short distance and long distance running practice. Relay races and Cross Country races. Racing and running exercises with increased standards.

Posture Exercises:—

Body exercises with thorough working out of the whole body. Corrective exercises. Light body bending. Body turning. Leaning rest exercises. In step exercises. Balancing and breathing exercises.

- 2. Performance activities:—
 - Jumps of all kinds, Short Putting, Pole vault, Hurdle races, etc.
- 3. Exercises for strength, courage and skill an apparatus. Horizontal bar. Rotation and knee grind from swinging to hanging position. Sitting rotation. Putting knees up to bar and turning around. Vaults. Struddling from stand and hanging position. Parallel Bar:—Vaults. Rolling from straddle to straddle, shoulder stand from sitting position Lying position, arm bending and stretching. Hand-stand.
- 4. Floor Exercises:—Tumbling and wrestling. Boxing.
- 5. Games:—Team games such as Hand-football, Free dodge ball and indigenous games such as "Bulchic" and "Loanpat". Gill Danda", Track ball, Hand ball, Foot-ball and Hockey.

B—INTERMEDIATE EXAMINATION.

INTERMEDIATE EXAMINATION

1353 and 1354 F. (1944 and 1945).

RULES AND SUBJECTS FOR EXAMINATION

- 1. The Intermediate Examination shall be held once a year in Hyderabad at such time and on such dates as the Syndicate may prescribe.
 - 2. The Examination shall be open to:-
 - (i) All Matriculated students of the Osmania University who have since Matriculation prosecuted for not less than two academic years a prescribed course of study at a college of the Osmania University.
 - (ii) All those students who have matriculated at any of the Indian Universities or obtained the High School Leaving Certificate or passed any other such examination as the University may from time to time consider equivalent, and who have been admitted as undergraduates of University, and have since matriculation prosecuted for not less than two academic years a prescribed course of study at a college of the Osmania University.
- N.B.—(a) Students who have obtained a High School Leaving Certificate of His Exalted Highness' Government can be admitted to a College of the Osmania University only at the discretion of the Principal.
- (b) Students who have obtained the certificates issued by the High School Leaving Certificate Board in the various Provinces of British India, will be admitted to the Osmania University in case they are eligible for admission to a University of the Province to which they belong and can satisfy the Principal as to their knowledge of Urdu.
 - (iii) Students who have satisfactorily prosecuted a regular course of study for the year immediately preceding the examination at a college of the Osmania University and who have been permitted under Regulation (3) below, to reckon a previous year of study at a college of any University recognized for the purpose by the University.

- 3. Any student may be admitted into the second year class of a college of the Osmania University provided he produces a certificate from the Principal of the college he was last attending, (affiliated to any of the Universities recognised by the University), stating that the first year at college has been duly kept by him according to regulations in force at the University from which he is migrating and that in the Principal's opinion he was fit for promotion to the second year class of that college.
- 4. No candidate from a college of the University will be permitted to present himself at the Intermediate Examination in any Science subject, for which a practical course is necessary under these rules, unless he shall produce a certificate from the Principal of such college to the effect that he has completed the required course in the college laboratories. In the case of candidates in Science subjects under Regulation 5 of these rules, evidence must be produced that the candidate has completed the required course at a laboratory approved of by the University.
- 5. Persons coming under the following descriptions though not belonging to a college of the University will be allowed to appear privately for this examination.—
 - (a) Inspecting Officers of the State Educational Department and whole-time teachers employed in educational institutions recognised by the University or by the Educational Department, provided they are certified by the Divisional Inspector of Schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
 - (b) Laboratory assistants serving in a college of the University provided that they produce from the Principal of the college in which they are employed, the certificate of laboratory work required from all Science candidates under regulation (4) and also a certificate from the same authority of continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
 - (c) Women Candidates.

Provided also that in all the above cases by the date of the examination, not less than two academic years shall have elapsed since the date of their passing the Matriculation Examination, or its equivalent.

Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the University College. They should therefore ascertain from the Registrar, before applying for permission, whether regular students of the University are taking up those subjects.

- 6. Candidates from the college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as private candidates to a subsequent examinaton, provided they do not change the subjects they had studied at college. In case they change any of their subjects they shall be required to put in tresh attendance in the college in the subjects they have changed.
- 7. The Examination fee for Arts and Science candidates will be Rs. 24 & 26 respectively. Applications of private candidates for admission to the examination, in the form prescribed, must reach the Registrar not less than two months before the examination, accompanied by the necessary fee.
- 8. In the case of college candidates, applications for admission and certificates of attendance in the prescribed form together with the necessary fee for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination:

In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination.

9. No student will be allowed to appear at the examiation unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination. If there is a practical Examination in a subject, he shall have to make up the same percentage of attendance separately in the practical course of lectures. The Syndicate may, however, condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially, ill-health when the application is supported by a certificate by an authorised medical officer which can satisfy the head of the institution.

A member of the U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Crops Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

10. Upon the reciept of the application and the fee prescribed and also the attendance and progress certificates in case

of candidates from colleges, the Registrar shall at least a week before the examination, cause to be furnished to the candidate a receipt for each fee received, which will also serve as a ticket of admission to the examination hall to be produced by the candidate in the hall, if called for.

A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the admission fee.

- 11. The Intermediate examination shall be conducted by means of printed papers. Papers will be set and answered in Urdu with the following exceptions:—
 - (1) European languages Ordinarily in English.
 - (2) Sanskrit, Prakrit or Pali In the language itself, or in Urdu or in English.
 - (3) Modern Indian Verna- In the language itself, culars or in Urdu.

In the case of these exceptions, the Registrar will, six months before the date of the examination, notify the language in which the paper will be set and candidates will be expected to answer in that language unless by a previous arrangement with the Registrar they have been permitted to answer in any of the alternative languages above specified.

- 12. (a) The subjects for examination shall be as follows:—
 - I. English.-
 - II. Any one of the following Groups:-
 - (1) Any two of the languages:-

Arabic, Persian, Sanskrit, Urdu, Marathi, Telugu, Kanarese

and one of the following:-

English History, Indian History, Islamic History, Economics, Sociology.

(2) English History, and European History (Ancient, Medieval or Modern) or Islamic History or Indian History and one of the following:—

Arabic, Persian, Urdu, Sanskrit, Marathi, Telugu, Kanarese, Economics, Sociology.

Two papers each of three hours' duration carrying 100 marks each will be set, which will include questions on historical geography:—

Paper I.—Up to the year 1526 A.D.

Paper II.—From 1526 to the present day.

(5) English History, Political and Constitutional, 1066 to the present day.

Two papers each of three hours' duration carrying 100 marks each will be set which will include questions on historical geography:—

Paper I.—1066 to 1485 (general knowledge of the development of the constitution up to 1066).

Paper II.—1485 to the present day.

(6) Ancient Europe (Greek History up to the Roman Conquest and Roman History up to 476 A.D.)

Two papers each of three hours' duration carrying 100 marks each will be set, which will include questions on historical geography:—

Paper I.—Greek History, up to 146 B.C.

Paper II.—Roman History, upto 476 A.D.

(7) Medieval Europe, 476-1453.

Two papers of three hours' duration and carrying 100 marks each will be set, which will include questions on historical geography:—

Paper I.-476 to 1096.

Paper II.—1096 to 1453.

(8) Modern Europe (1453 onwards).

Two papers of three hours' duration and carrying 100 marks each will be set, which will include questions on historical geography:—

Paper I.—1453 to 1789.

Paper II.—1789 to the present day.

(9) Economics.

There shall be two papers in Economics, each of three hours' duration and carrying 100 marks:—

Paper I.—General Economics.

Paper II.—Indian Economics.

(10) Sociology.

There shall be two papers in Sociology each of three hours' duration and carrying 100 marks:—

Paper I.—Theoretical Sociology.

Paper II.—Practical Sociology.

(11) Logic.—Deductive and Inductive.

There will be two papers in Logic each of three hours' duration and carrying 100 marks:—

Paper I.—Deductive Logic.

Paper II.—Inductive Logic.

(12) Psychology.

There will be two papers in Psychology, each of three hours' duration and carrying 100 marks:—

Paper I.—Problems and Methods of Psychology, Psychological Organism and Nervous System, Sensation, Perception, Discrimination and Association, Attention, aand Habit.

Paper II.—Rest of the subject.

(13) Domestic Science:-

There will be two papers in Domestic Science, each of three hours' duration:—

Paper I.—Bio-Chemistry and Dietetics. 75 Marks Paper II.—Household Thechnology, Laundry, applied chemistry and cookery. 75 Marks

There will also be a Practical examination of three hours' duration for which 50 marks will be assigned.

(14) Physics:-

There will be two papers in Physics each of three hours' duration.

Paper I.—General Properties of Matter, Heat and Sound. 75 Marks

Paper II.—Light, Electricity and Magnetism. 75 "

There will also be a Practical examination of three hours' duration for which 50 marks will be assigned.

(15) Chemistry:—

There will be two papers in Chemistry each of three hours' duration.

Paper I.—General Chemistry and Organic Chemistry. 75 Marks

Paper II.—Metals and Non-Metals.

There will also be a Practical examination of four hours' duration for which 50 marks will be assigned.

(16) Biology:-

Botany :---

Paper I.—Theoretical, of 2½hours' duration carrying 60 marks.

Paper II.—Practical, of 2 hours' duration carrying 40 marks.

Zoology:-

Paper I—Theoretical, of 2½ hours' duration carrying 60 marks.

Paper II.—Practical, of 2 hours' duration carrying 40 marks.

In order to secure a pass the candidate shall have to obtain 33 per cent. of the full marks in the subject and a minimum of 20 per cent. in each of the branches, viz., Botany and Zoology.

(17) Mathematics:-

There will be 3 papers in Mathematics each of three hours' duration and will be divided into two sections,

a certain minimum number of questions being compulsory from each section. Choice of questions to the extent of 40 per cent, may be allowed:—

(18) Geology:---

There will be two papers in Geology, each of three hours' duration:—

Paper I.—Physical Geology & Petrology 75 Marks

Paper II.—1. Palacontology—Elements of Indian Geology.

2. Stratigraphy and Geology of Hyderabad 75

There will also be a Practical Examination of three hours' duration for which the following marks will be assigned:—

- (a). Identification of Minerals and Ores by Physical Properties and Chemical tests. 20 Marks
- (b). Identification of rocks inhand specimen and Plutonic rocks under Microscopes. 20. "
- (c). Identification of the system and form of crystal models and their drawing. 10 "

III .- Theology or Morals :-

There will be one paper of three hours' duration carrying 100 marks in each of these subjects.

Examinations in Theology or Morals shall be regarded as qualifying Examinations and the marks gained by a candidate in the subjects shall not be included in the grand total of the marks; but no student can go up for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at the examination.

13. No candidate shall be declared to have passed the examination unless he obtains 33 per cent. of the full marks in each

subject. Should a candidate however, not obtain 33 per cent. of the full marks in one subject only, he shall be declared to have passed the examination, provided he secures not less than 30 per cent. in that subject and makes an aggregate of 40 per cent.

14. Those of the successful candidates who obtain 60 per cent. or more of aggregate marks will be placed in the First Class, those obtaining 45 per cent. or more but less than 60 per cent. in the Second Class and the rest in the Third Class.

The names of the successful candidates placed in the First Class shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others in the Second and Third classes shall be arranged in the serial order of their roll numbers.

- 15. A certificate signed by the Registrar shall be given to each successful candidate setting forth the date of the examination, the subject in which he was examined, and the class in which he was placed.
- 16. For the purpose of the Compartment System, the examination shall be divided into the following two groups:—
 - (1) English.
 - (2) Optional subjects.

A candidate passing in any one of these groups shall be exempted from appearing in that group at a subsequent examination, provided that he has secured not less than 35 per cent. of the marks in the aggregate and that in the group in which he fails he makes an aggregate of not less than 25 per cent. But the candidate who so fails to pass only in one group shall be allowed, if he so desires to appear for the whole of a subsequent examination.

The results of the candidates taking the option of appearing in the whole examination in a subsequent year, will be adjusted solely on the merits of the subsequent Examination.

Candidates who appear in subsequent Examination in the group in which they failed in the previous examination, will be required to secure 33 per cent. of the marks in each subject of the group.

No candidate shall be classed unless he has passed in the whole examination at one attempt.

TEXT-BOOKS.

ENGLISH.

- 1. Inorganic Chemistry by Holmyard (Osmania University Series).
- 2. A Class Book of Organic Chemistry by Cohen (Osmania University Series).
- 3. A course of Practical Chemistry to be compiled by Dr. Muzaffar-ud-din Qureshi.

For detailed Syllabus vide Appendix (g).

BIOLOGY.

The following books are recommended:-

- (A) Botany.
 - 1. Lowson and Sahni's Text-Book of Botany. (O.U.S.).
 - 2. Rangachariar's Practical Botany. (O.U.S.).
 - 3. Choudhurie : Intermediate Botany.
 - Charan Singh
 Jiwan Singh and
 Barcharan Das.: New Intermediate Botany, Part II.

- 5. Sethi, Kohley & Sawhne : New Intermediate Botany, Part I.
- 6. Sabhesan, M.S.: Intermediate Botany.

For detailed Syllabus vide Appendix (h-i).

- (B) Zoology.
- 3. Parker & Bhatia —An elementary Text-book of Zoology for Indian Students. (O. U. S.).
- 4. Borradaile —A Manual of Elementary Zoology. (O. U. S.).
- 5. T. J. Moon. —Biology for Beginners.
- 6. Bahl, K. N. —Pheretima. The Ind. Zool. (Memoirs Ser. I.).
- 7. Marshall. —The Frog. (Macmillan & Co., London). (O. U. S.).
- 8. Huxley —Lessons in Elementary Physiology. (Macmillan).
- 9. H. E. Walter. —Genetics. (Macmillan & Co., N. Y.).
- 10. L. Darwin. (Major) —What is Eugenics. (Watts & Co., London).
- 11. C. John —A Text-book of Zoology (for Intermediate and Medical Students).
- 12. Vishwa Nath —Zoology for Intermediate students.

For detailed Syllabus vide Appendix (h-ii).

MATHEMATICS.

Hall and Knight: Higher Algebra Part I (O.U.S.).

Loney's Trigonometry Part I (O.U.S.).

Plane Geometry for the Intermediate Classes (O.U.S.).

Hall and Stevens' School-Geometry Part VI (O.U.S.).

Geometrical Conics for the Intermediate Classes (O.U.S.).

Co-ordinate Geometry for the Intermediate Classes (O.U.S.).

Elements of the Calculus for the Intermediate Classes (O.U.S.).

For detailed Syllabus vide Appendix (i).

GEOLOGY.

The following books are recommended; detailed Syllabus is given in the appendix. (j).

- 1. Geology for Beginners by Watts.
- 2. Elements of Mineralogy by Rutley.
- 3. Minerals and Microscope by H. G. Smith.
- 4. Geology of India by Wadia.
- 5. A brief outline of the Geological History of Hyderabad with reference to its Mineral Resources by K. Mirza.

THEOLOGY OR MORALS.

- (A) Theology (for Hanafi students).
 - Rahmat-ul-lil-Alamin Part I (printed at Rose Bazar Press, Amritsar, (1916).
 - ترجمه پارهٔ عم 2.

(B) Morals (for Non-Hanafis and Non-Muslims)

For detailed Syllabus vide Appendix. (k).

شعبه دينيات

- () انگریزی و عربی -
- حسب نصاب امتحان انثر میڈیٹ شعبہ فنون ـ
 - () فقه و اصول فقه :__

دو پر چے تین تین گھنٹے کے ہونگے اور ہر ایك کے (۱۰۰) نشانات ہونگے ـ

(الف) فقه - ملتقى الابحركامل

فرائض - سراجی - بجذف مولی موالاة اور مولی العتاقه (ب) اصول فقه ـ اصول شاشی ـ

(٣) تفسير و حديث ـ

دو پر چے آین آین گھنٹے کے ہونگے ارر ہر ایك کے (۱۰۰) شاناتھونگے ۔ پر چہ حدیث کے نشانات کی تقسیم حسب ذیل ہوگی ہے۔

حدیث _ ه کشانات سیرة مبارك _ ه کشانات

(الف) تفسير ـ

قرآن شریف کی حسب ذیل سورتین پڑھی جائیں ہے۔

() سورة بقر (۲) سورهٔ نساء (۳) ازسورهٔ قاف تا آخر

(ب) حديث - كمتاب الدين

(س) عقائد معه مبادیات حکت

ایك پرچه (۱۰۰) نشانات نین گهنئے كا هوگا ـ

- (الف)* عقائد۔ اصول معالم الدين
 - (ب) منطق ـ مرقاة
- * (مولوی عبدالحق صاحب کی تفسیر حقانی عقائد الاسلام کے مطالعہ کی سفارش کی جاتی ہے)۔

نوٹ _گروپ و اری اغراض کے لئے امتحان حسب ذیل تین گروپوں میں تقسیم کیا جائیگا ـ بقیہ قواعد مطابق شعبہ فنون ـ

- (۱) انگریزی ـ
 - (٢) عربي -
- (٣) مضامين دينيات (تفسير حديث، وعقائد فقه)

ا متحان انٹر میڈیٹ شعبہ دینیات میں حسب ذیل طلبہ شریك موسکیں كئے: _

الف ۔ ا متحان میٹریکیولیشن شعبہ دینیا ت جا معہ عثمانیہ کے جملہ کامیاب طلبہ ۔

ب - جملے طلبہ جنہوں نے جامعہ عثمانیہ (شعبہ فنون) یا هند وستان کی کسی دوسری یونیورسٹی کا امتحان میٹریکیولیشن یا سرکارعالی کے امتحان ہائی اسکول لیونے ک سرٹیفکٹ یا کسی دوسرے ایسے امتحان میں زبان عربی کے ساتھہ کامیا بی حاصل کی ہو جس کو جامعہ عثمانیہ نے اپنے امتحان میٹریکیولیشن کے مساوی قرار دیا ہو اور جو بحیثیت انڈر گریجو یٹ شعبہ دینیات جامعہ میں داخل کرلئے گئے ہوں - اور جنہوں نے بعد کامیا بی امتحان میٹریکیولیشن کم از کم دو تعلیمی سال تک جامعہ عثمانیہ کے شعبہ دینیات میں نصاب مقر رہ تک بعد کی تعلیم پائی ہو۔

APPENDECIS.

DETAILED SYLLABUSES.

(a) ECONOMICS.

(1). Principles of Economics.

Introductory:-

The nature and significance of Economics. The relation of Economics to other Sciences. The meaning of Wealth and Utility. The conditions of Exchangeability. The main sub-divisions of the Science.

Consumption:-

Human wants and their characteristics. Neccessities. Comforts and Luxuries. The Law of Diminishing Utility. Elasticity of Demand. The distribution of Income between different Wants. The conception of Consumers' Surplus.

Production :---

The meaning of Production. The factors of Production. The Meaning and characteristics of the different Factors. Land and its Fertility. Intensive and Extensive cultivation. The Law of Diminishing Returns. Factors affecting the Value of Land.

Labour and its Efficiency; conditions affecting the Efficiency of Labour. The various kinds of Labour. Skilled and unskilled, Productive and unproductive, Physical and Mental. Mobility of Labour; Factors affecting Mobility. The Theory of Population.

The Importance of Capital. Fixed and Circulating Capital. Conditions affecting the accumulation of Capital. Method of the investment of Capital.

Organization of Production: Division of Labour; its advantages and disadvantages. Large Scale Production; its advantages and limitations. The use of Machinery and its consequences for the labourers. The Localisation of Industry; its causes and advantages. The Law of Substitution. The Law of Increasing Returns.

Exchange:—

The necessity of Exchange. The meaning of Market. The difference between Value and Price. How is price determined. Demand price and Supply price. Market price and normal price. The Equilibrium of Demand & Supply and the Equilibrium price. Prime and Supplementary costs. Joint and Composite Demand: Joint and Composite supply. Competition Vs. Monopoly. Kinds of Monopoly. Monopoly price.

Distribution :-

The Importance of Distribution. Rent, Wages, Interest and Profits. The Nature of Rent and how it is determined. Wages and how they are fixed. Real and Nominal Wages. Causes of variations in Wages. Net Advantages. The Nature of Interest. The Rate of Interest. Gross Interest and Net Interest. Risk bearing and Management. Lending and Borrowing as affected by fluctuation of prices. The charges for Depreciation. The Nature of profits. Gross and Net Profits.

(2). Indian Economics.

Introductory:—What is meant by Indian Economics? The relation between Indian Economics and Economic Principles. Importance of the study of Indian Economics. The natural resources of the Country. Main Geographical Features and their Economic Importance. Important Social Institutions and their bearing on the economic life of the people.

Agriculture:—The importance of Agriculture in India. The present position of agriculture. Various problems connected with agriculture; Rural indebtedness: its causes and extent, and the remedial measures adopted and proposed. The co-operative movement, its development and present position in India. Agriculture and Co-operation in Hyderabad.

Industries:—Indian Industries in the past and their present condition. Causes of the downfall of Indian Industries. The recent signs of industrial revival. The problems of fiscal policy. Free Trade, Protection

and Imperial Preference. The Labour Problems. Factory Legislation and Trade Unionism. The cottage Industries. Industries in Hyderabad.

Transport:—Roads, Railways and Shipping. A short history of Railway development and the present organisation of Railways. The condition of the Roads and the measure towards their improvement. Condition of water transport in India. The development and present organisation of railways in Hyderabad.

Trade:—Epansion of Trade in India: domestic and foreign. The present trade situation. Chief imports and exports.

Banking & Currency:-

The meaning and functions of Money. The characteristics of good money. The use of precious metals for monetary purposes, coinage, Standard and Token Money, Legal Tender and limited Legal Tenders. Paper Money. Convertable and inconvertable. Meaning of Credit. Bills of Exchange. Cheque. The meaning and functions of a Bank. The present Banking Systems of India.

The sources of Revenue and the main items of expenditure of the Government of India and the Hyderabad State.

(b—i) SOCIOLOGY.

Introductory:

Subject matter of the Science, its definition and interdependent relations with the Social Sciences. The meaning of Sociology. Its sub-divisions. The method of Sociology. The advantages of studying Sociology.

History:

A brief survey of the development of Sociology. Social Philosophy.

The Structure of Society:

Various conceptions and different kinds of Society. The meaning of Society.

The Basis of Society:

Family, Groups, Nationalities, Social Populations. Theory of Population. Over-population and Under population.

The Nature of Society:

Human Nature. The Individual and the Group Mind.

Social Processes:

Individual social processes (Influenced by factors like Climate, Resources, Environment, Occupation, etc.).

Socialization:

Imitation. Compulsion. Sympathy. Interest and Antagonism. Adaptation.

Individualization:

Differentiation. Opposition. Class struggle. Commercialization. Professionalization.

Social Conflict:

Conflict of interests. Exploitation.

Social Reconstruction:

Social Interactions. Crossfertilization of Culture.

(b—ii) APPLIED SOCIOLOGY.

Introductory:

General Sociology and Applied Sociology. The meaning and scope of Applied Sociology. Its relations to Science, Economics, and Ethics. Justification of Applied Sociology.

Wealth and Welfare:

The Meaning of Wealth and Welfare. Criterion of Welfare. Theories of Welfare (Bentham, Mill, Pigou).

Poverty and Pauperism:

Causes of Poverty. Its immediate remedies. Extent of Poverty. The Poverty Problem.

Vice and Crime:

Economical and Social Causes of Vice and Crime. Remedies of Vice and Crime.

Social Pathology:

Social decadence. Degeneration. Intemperance. The Abnormal.

Social Reform:

Paper I.

(c) LOGIC.

Definition, Scope and use of Logic. General relation of Logic to other Sciences. Its relation to Psychology. Immediate and Mediate knowledge. Reasoning in General, Matter and Form of Reasoning. Division of Logic into Formal and Material. Formal Logic: its aim and scope; its fundamental principles; identity, Contradiction, Excluded Middle, Sufficient Reasons. Axioms and Postulates.

Word Concept and Term. Use of names. Denotation and Connotation of Terms. Division and Definition. Description. Universe of Discourse. Various Divisions of Terms and their significance.

Judgment and Proposition. Theory of Predication and import of propositions. Distribution of Terms. Quantity, Quality and Modality. Diagramatic Representation of propositions. Simplification of propositions.

Inference: Immediate and Medicate, Deductive and Inductive.

Opposition of propositions with their practical application. Immediate Deductive Inference and its different forms.

Mediate Deductive Inference: Syllogism, its struture and conditions. The canons. Figures and their Rules. Moods Reduction. Hypothetical and Disjunctive and Mixed syllogism. Dilemma, suppressed syllogisms and Trains of Syllogism, Unity of syllogistic Inference. Practical Application of syllogism Funuctions and value of syllogism.

Fallacies in Deductive Reasoning.

Method perfect and imperfect, complete and incomplete, Scientific and Unscientific Induction. Enumerative Induction,

Analogy: nature of analogical reasoning and its use. Analogy and Induction.

Explanation and its limits. Scientific and Popular Explanation.

Probablity and its grounds. Chance and its elimination.

Definition and its limits and conditions. Classification: Natural and Artificial. Its conditions. Its relation to Definition and Division. Classification by Type, Errors in Definition. Division and Classification.

Fallacies in Inductive Reasoning. Relation of Deduction.to Induction. Amity of Inferential. Process Inductive and Deductive Sciences.

Books recommended.

- (1) Logic (Deductive and Inductive by E. Read.
- (2) An Introductory Logic by Creighton and Smart.

Paper II.

Material Logic. Knowledge, Reality and Truth. Different sources of Knowledge. Necessary Truth.

The postulates of Induction. uniformity of Nature and causaltion. Plurality of causes and intermixture of Effects. Composition of causes. Material grounds of Induction. Observation and Experiment and their use. The Experimental Methods; their use and application.

Discovery and Proof. Hypotheses. their use and conditions. Verification of Hypotheses. Theory and Fact. Deduction in Induction.

Science. Law of Nature. The World as unitary system. Generalization and the General Idea. Abstraction. Nature, place and use of the Inductive.

(d) PSYCHOLOGY.

PAPER. I.

1. General.—Definition, mind, consciousness, Behaviour.

Methods.—Introspection, Observation, Experiment.

The Branches of Psychology.

- 2. Mind and Body.—Elementary discussion of the Central Nervous system, and the Mind Body relation.
- 3. Attention.—Kinds of Attention. Conditions of Attention. Bodily Attitude in Attention.
 - Attention and Consciousness. Range and scope of Attention.
- 4. Analysis of Mental Phenomena.—Cognition, Affection.
- 5. Sensation.—The sense Organs; Classification of sensations. General attributes of sensation; more detailed study of Visual and Auditary Sensations.
- 6. Perception.—Sensation and Perception.
 - Apperception. Illusions. Hallucinetions.Perception of Space. Perception of Time.
- Movement and Action.—Reflex movement; Instructive action. Habit. The chief human instincts, modification of instincts.

PAPER II.

 Affection and Feeling.—Kinds of Feeling; Nature of Feeling; relation of Feeling to Cognition and Conation.

- 2 Emotion.—Nature of Emotion. relation to Instituncts bodily expression; James—Lang theory of Emotions. Moods and Sentiments.
- 3. Habit and Learning.—The nature of Habit; formation and fixation of habits. The unlearning of habits. Learning; effect of repitition; methods of learning and study. The curve of learning.
- 4. Images and Ideas.—Percepts and Images; types of Imagery; the Laws of Association.
- 5. Memory.—Retention; recognition; recollection. Memory Types. The training of memory.
- 6. Thought and Language.—Images and Ideas, Judgment; Reasoning; belief. Relation of thought and language.
- 7. Voluntary Action.—Deliberation and choice. Attention and Volition.
- 8. Personality.—Its psychological basis and development.
- 9. Abnormalities of Mental Life.—Sleep; dreams; hypnosis; insanity.

Books recommended.

- (1). Groundwork of Psychology by Stout and Thouless (University Tutorial Press).
- (2). General Psychology. Part I by Hunter, (University of Chicago Press).
- (3). Text Book of Psychology by William James.

(e) DOMESTIC SCIENCE.

1. A. Biochemistry:-

- (a). Chemical and Physical nature of proteins, fats and carbohydrates as are met with in food.
- (b). Metabolism of food.
- (c). Vitamins.
- (d). Chemical and Physical nature of animal tissues, (bones, muscles, blood, glands, etc.).
- (e). Chemical defence of the body against the action of poisonous substances.

B. Dietetics:-

- (a). Nutritive value of carbo-hydrates, proteins and fat of foods.
- (b). Vitamins and deficiency diseases.
- (c). Mineral salts in relation to food requirements.
- (d). Nutritive value of meat, fish, cereals, vegetables, pulses, milk and milk products.
- (e). Caloric value of foods.
- (f). Palanced diet for adults.

2. First Aid and Home Nursing Mothercraft:—

St. John's Amgulance Certificate.

3. House-hold Technology:-

A. House-hold-Management.—

- (a). A study of the home as a background for family life. The location of a home or apartment, house construction, kitchen planning, heating lighting and ventilation.
- (b). Selection, operation and care of Kitchen equipment. Selection and care of house furrishings.
- (c). Routine procedure in house-work. Time budgets and house-hold schedules with and without service and organisation of household data.

, , ,

B. Needle-Work:—

Practical and Theoretical.—

- (a). Making of garments on scientific basis (Drafting).
- (b). Colour, design, suitability and economical Practical and Theoretical.—

- (c). Each student is expected to make various personal garments in silk, cotton, and wool for adults and infants.
- (d). Embroidery Applique, Net, Richelieu, Cut, Old English work and design making.
- (e). Upholstery.

Students should be able to renovate and upholster a chair, neatly darn a carpet invisibly, cut-out and make covers for chairs, settees, divans, boxes, pouffs, humpties and window seats, etc.

C. Laundry and applied Chemistry:-

- (a). Examination and treatment of water for laundry purposes.
- (b). Water Softeners, soap powders.
- (c). Effect on common fibres of ordinary washing methods.
- (d). Removal of stains in detail.
- (e). Methods of washing silk, woolen and cotton goods, sorting, washing, bleving, starching, ironing and folding.

D. Cookery:—

Practical.—

- (a). Methods and Principles of refrigration.
- (b). Preparation, planning and service of various types of meals.
- (c). The theory and practice of table service.
- (d). Table decoration.
- (e). Discussions and demonstrations which relate to problems of quantity, cookery, service, marketing, food costs, and good care.

- (f). Preparation of special diet for:
 - (1). Constipation.
 - (2). Diabetes.
 - (3), Invalids.
 - (4). Pregnancy.
 - (5). Lactation.
 - (6). Children of varying ages.

Note:-

Dietetics should be combined and put into practice whereever necessary.

(g). Advanced Cookery, English and Indian.

(f) PHYSICS.

Dynamics.—The units of length and time. Displacements, speed, velocity, and uniform acceleration of particle moving in a straight line. Momentum. Newton's Laws of motion; the units of mass and force. Hick's ballistic balance. Motion of a particle in a straight line under the action of a force in that line and in a vertical plane under the action of gravity. Energy. work, power, and their units; simple illustrations of the conservations of energy from Dynamics.

Conditions of equilibrium of a body under three concurrent forces (the parallelogram and triangle of forces), and under parallel forces. Centre of gravity, simple machines. The balance and its sensibility.

The motion of a simple pendulum (studied experimentally). Deductions from the formula for the time of oscillation of a simple pendulum.

General properties of matter.—Extension, inertia, gravitation, divisibility, porosity elasticity, cohesion, duetility, malleability, brittleness; plasticity, viscosity. The three states of matter. Changes of state produced by heating and cooling.

Elasticity.—Its definition. Distinction between solids and fluids owing to difference in elasticity.

Hydrostatics.—Pressure at a point in a fluid; definition and illustration; transmissibility of pressure. Evalution of pressure at a point in heavy fluid at rest; its uniformity in all directions. Resultant thrust in simple cases. The principle of Archimedes, floating bodies, hydrometers. Applications to practical determination of density and specific gravity. The pressure of a gas and its determination; the barometer and its use in the measurement of atmospheric pressure. Beyle's Law, air pumps and water pumps.

Heat.—Temperature and its measurements; the construction and graduation of thermometers. The thermal expansion of solids, liquids and gases and their accurate determination; the air thermometer. Heat as a quantity; the unit of heat, specific heat and the more direct methods of calorimetry. Laws of fusion, evaporation and ebullition; latent heat. Vapour pressure and how it is measured. Saturated and unsaturated vapours. Conduction and convection of heat; definition of thermal conductivity. Radiation; absorption and reflection; Law of cooling. The dynamical equivalent of heat; the conservation of energy.

Light.—The rectilinear propagation of light, formation of shadows, images in pin-hole camera. The experimental facts and laws of reflection and refraction of light; simple geometrical deduction from these, applicable to small direct pencils incident on plane and spherical surfaces. The eye and ordinary defects of vision. Magnifying power. Applications to thin lenses. The telescope and the microscope. The disperison of light, the spectroscope. Radiation and absorption of spectra. Critical angle and total internal reflection. Determination of refractive indices.

Magnetism.—Properties of magnets; poles, laws of magnetic force, unit poles, lines of force; uniform magnetic fields and experimental methods of comparing them. The magnetic moment of a magnet. Comparison of magnetic moments. The earth's magnetic field; the compass. Magnetic induction. The magnetic properties of iron and steel.

Electricity.—Electrified bodies; electric quantity. Conductors and insulators. Distribution of electricity on conductors.

Induction. Laws of force between two small charged spherical conductors. Line of electrostatic force, the electric field. Electric force and electric potential. Difference of potential. Electric condensers and capacity. Dielectric constant.

The more common forms of voltaic cells and the actions that go on in the cells while producing a current. Polarization of cells and methods of preventing it. The action of currents on magnets; galvanometers depending on such action, including suspended coil type. Metallic (Linear) conductors and electrolytes; laws of electrolysis. Electromotive force. Ohm's Law; resistance and the simpler methods of determining it. Measurement of current and comparison of Electro Motive Forces. Distribution of energy in circuit by current and heating effects. Electromagnets.

Sound.—Simple vibratory motion. The production and propagation of sound; the velocity of sound in air and its determination; Nature of wave motion and sound waves. Frequency of vibration, pitch. Amplitude of vibration; loudness. Laws of vibration of strings and air columns. Interference of sound waves and beats.

Practical.

Length measurements by millimetre scale. Vernier micrometer gauge and spherometer.

Determination of areas and volumes by measurements of linear dimensions.

Verification of conditions of equilibrium of a body under coplaner forces.

Determination of the centre of gravity of a plate.

Verification of the law of a simple pendulum; determination of g.

The inclined plane; system of pulleys.

Use of balance, sensitive to .01 gram.

Determination of volumes by weighing water; determination of capacities of vessels.

Specific gravities of solids and liquids; use of hydrometer.

Determination of atmospheric pressure by taking reading of Fortin's Barometer and correcting for temperature.

Verification of Boyle's Law.

Determination of fixed points of thermometer.

Determination of co-efficient of expansion of a rod.

Determination of co-efficient of apparent expansion of a liquid.

Expansion of air at constant pressure.

Co-efficient of increase of pressure of air with tempreature at constant volume.

Curves of cooling; melting points.

Determination of specific heats of solids and liquids.

Latent heat of water and steam.

Determination of vapour pressure; boiling points.

Determination of the dew point by Regnault's and wet and dry bulb-hygrometers.

Comparison of thermal conductivities.

Radiation of heat from different surfaces.

Verification of the laws of reflexion of light.

Tracing the path of a ray of light through a block of glass and deduction of refractive index.

Focal lengths of concave and convex mirrors.

Focal lengths of convex and concave lenses.

Measurement of the refractive index of a liquid by measureing its apparent depth.

Measurement of the refractive index of a liquid by measuring the refractive index for sodium light.

Comparison of illuminating powers of different sources of light by the shadow and the grease spot Photometers.

Tracing the lines of force in a magnetic field by iron filings and also by means of a small compass.

Comparison of magnetic moments.

Comparison of strength of magnetic field by the method of vibration.

Study of the simple cell, the Daniel and Leclanche cells.

Absolute measurement of current (i) by tangent glavanometer (ii) by electrolysis.

Measurement of heat developed by current.

Measurement of resistance of wires.

Comparison of electromotive forces; the potentiometer.

Comparison of frequencies of tuning forks.

Verification of aws of transverse vibration of strings.

Determination of velocity of sound by resonance of air columns.

(g) CHEMISTRY.

THEORY

General and Physical: (Approximately 45 lectures).

Elementary and compound substances, symbols and formulae, mixtures, solutions, chemical action, laws of definite, multiple and reciprocal proportions. Equivalent weights, Dalton's Atomic Theory, atomic weight, valency, Boyl's Law, Charles's Law, Vapour pressure, diffusion. Combination of gases by volume, Avogadro's Hypothesis, vapour density, molecular weights, molecular formulæ and equation, calculations, Oxidation and reduction, combustion, and the structure of flame, catalysis, dissociation in gases, electrolysis, ionic theory treated in an elementary way, properties of acids, bases, and salts: outlines of the periodic classification; elementary ideas about the structure of an atom.

Inorganic: (Approximately 90 lectures).

Occurence, preparation, properties and important uses of the following elements:—

Oxygen, nitrogen, hydrogen, chlorine, bromine, iodine, carbon, sulphur, phosphorus, arsenic, sodium, potassium, copper, silver, calcium, magnesium, zinc, aluminium, tin, lead, and iron. Preparation, properties and important uses of the following compounds with the proofs of the composition of those underlined:

Water, hydrogen chloride, hydrogen bromide, hydrogen iodide, ozone, oxides of nitrogen, ammonia, nitrous acid, nitrie acid, carbon monoxide, carbon dioxide, coal gas, hydrogen sulphide, sulphur dioxide, sulphurous acid, sulphur trioxide, sulphurie acid, carbon disulphide, Phosphine, oxides of phosphorus, phosphoric acids, arsine, silica, silicates and glass.

Preparation, properties and important uses of the following compounds, together with a brief description of the methods of manufactures of those underlined:—

Chloride, hydroxide, peroxide, carbonate, bicarbonate, sulphate, thiosulphate, nitrate, nitrite, phosphate of sodium, borax: chloride, chlorate, bromide, iodide carbonate, nitrate, cyanide, permanganate and dichromate of potassium; ammonium chloride, ammonium carbonate, ammonium nitrate, ammonium sulphate; cupric oxide, cupric sulphate, cuprous chloride; (electroplating) silver nitrate, silver chloride, silver bromide, silver iodide (photography); oxide, hydroxide, carbonate, carbide, chloride, sulphate, phosphate of calcium, bleaching powder; oxide, carbonate, chloride, and sulphate of magnesium; oxide, chloride, and sulphate of zinc; mercurous chloride and oxide, mercuric chloride and oxide, chloride and sulphate of aluminium, alum: stannous chloride, stannic chloride, litharge, lead peroxide, red lead, white lead; oxides of iron, ferrous sulphate, ferric chloride, potassium ferrocyanide, potassium ferricvanide.

Organic: (Approximately 45 lectures).

Systematic study of the modes of occurrence, prepration, general properties and constitutional formulae of the follow-

ing together with a brief description of the methods of manufacture of those underlined:—

Mathane, ethane, petroleum, halogen derivatives of methane and ethane, methyl alcohol, ethyl alcohol, dimethly ether, diethyl ether, formaldehyde, acetaldhyde, acetone, formic acid, acetic acid, vinegar, acetyl chloride, acetic anhydride, acetamide, glycine, nitro-methane, methyl amines, ethylamine ethylene, acetylene, glycol, glycerol, fats, vegetable oils, soaps, oxalic acid, succinic acid, tartaric acid, citric acid, cane sugar, dextrose, laevulose, starch, cellulose, urea, uric acid, benzene, toluene, chlorobenzene, nitrobenzene, aniline, phenol, benzaldehyde, benzoic acid, salicylic acid.

PRACTICAL.

(Approximately 80 practicals).

Study of burners, fitting up of wash-bottle, simple manipulations, such as, decantation, filteration, distillation, sublimation and crystallisation; preparation and properties of crystals of a few inorganic salts, such as, mercuric iodide, (sodium chloride), copper sulphate, lead nitrate, etc., preparation and properties of hydrogen, oxygen, chlorine, ammonia, nitric oxide, suphur dioxide, carbon monoxide, carbon dioxide, preparation and properties of nitric acid, aqueous ethyl alcohol and acetic acid.

Use of chemical balance, estimation of the percentage composition of simple mixtures, estimation of loss of weight on heating, determination of water of crystallisation, determination of equivalent weight of magnesium, zinc, copper and tin.

Qualitative analysis of single salts, containing the following radicals:—

Silver, mercury, lead, copper, bismuth, cadmium arsenic, antimony, tin, iron, aluminium, chromium, nickle, cobalt, manganese, zinc. barium, strontium, calcium, magnesium, potassium, sodium, ammonium carbonate, bicarbonate, formate, acetate, oxalate, sulphate, sulphide, thiosulphate, sulphite, nitrite, nitrate, chloride. chlorate, bromide, iodide, phosphate, borate, (analysis of salts insoluble both in water and acids is excluded). Simple exercises in volumetric analysis, comprising (a) alkalimetry and acidimetry, (b) estimation of ferrous iron and oxalic acid by means of per manganate and (c) estimation of chlorine by means of silver nitrate solution.

(h) BIOLOGY.

(i) Botany:

The distinguishing features of living and non-living bodies.

The description and the minute structure of a vegetable cell.

Chemical and physical properties of protoplasm, direct and indirect division of a cell.

Description of the macroscopic and microscopic appearance of root, stem and leaf.

General description of flower, inflorescence and branching, fruits, seed and dispersal of seeds of the types studied. Transpiration, respiration and absorption in plants.

Reproduction in plants.

Elements of classification.

Description and practical knowledge of the structure, function and life-history of Yeast, Mucor, Spirogyra, Fern, Cycas, Maize, and Sunflower.

N.B.—Students are expected to keep a record of all practical work in a special Laboratory Note-book which will be liable to Examination by the University Examiners. The Laboratory Instructors should sign the result of each day's practical work.

(ii) Zoology.

Living and non-living matter. The distinctive properties of protoplasm and its chemical composition. A general conception of the structure and phenomena of the animal cell; direct and indirect cell division. The union of cells to form tissues, and the combination of tissues to form organs.

An elementary idea of the doctrine of Evolution with an explanation of the following terms: Variation, Heredity, Natural Selection, and Recapitulation theory.

Elements of Genetics:—Definations of Genetics and Eugenics. Elementary knowledge of the inheritance of acquired characters (with special reference to transmission of diseases; immunity and the effects of Drugs; parental influences).

Mendelism and its practical application. Definition of mutation. Pedigree, Breeding and Hybridization. Genes and elementary idea of the bearers of hereditary characters; Weismann's Germ--plasm theory. Determination of sex and sex-chromosomes (as illustrated by Drosophila). Bearing of heredity on evolution and disease. Application of Genetics and Eugenics to man.

A general classification of the animal kingdom with the characteristics of the principal phyla. The general characters of the Chordata.

Sexual and asexual methods of reproduction. The elementary facts of fertilization and segmentation of the ovum in frog. The formation of three primary germinal layers and their subsequent fate.

The frog as a type of higher animals. The elements of vertebrate histology illustrated from the frog. Elementary facts of Physiology. The outlines of the metamorphosis of frog.

Amoeba and Malarial parasite as types of Protozoa. Hydra as an example of the Metazoa. The principles of the Physiological division of labour and the correlated differentiation of structure.

Pheretima as an example of segmented animals. The significance of the three primary germ-layers and of the coelom.

The Cockroach as type of Arthopoda, Metamorphosis amongst insects as illustrated by the life-histories of the house-fly (Musca) and the common mosquito, and their economic importance.

General characters of Aves. An elementary knowledge of the anatomy of the Rabbit as a type of Mammalia.

Difference between the poisonous and the non-poisonous snakes.

Practical.

Candidates will be required to dissect, describe or examine microscopically the following types; Amoeba, Hydra, Pheretima, Cockroach, Frog (and its skeleton) and Rabbit, (and its skeleton).

A microscopical study of the chief animal tissues from prepared slides of epithelium, muscle, nerve, cartilage, bone, blood and other connective tissues, and also that of the kidney. liver, spinal cord, stomach, intestine, ovary and testis of frog.

They will be also required to submit the original sketch-books, initialled and dated by their teachers, determining the result of the examination.

(i) MATHEMATICS.

Algebra.

Ratio, proportion and variation.

Progressions, including the summation of squares and cubes of natural numbers.

Surds and elementary properties of imaginary quantities, including the cube roots of unity.

Solution and theory of Quardratic Equations. Quardratic Expressions. Easy equations solvable as quardratics, including easy simultaneous quadratic equations.

Permutations and combinations (easy treatment)

Binomial Theorem for positive integral index. Statement and application of the Binomial Theorem for negative and fractional indices, with elementary notions of convergence.

Logarithms of numbers.

Trigonometry.

Sexagesimal and circular units of angular measurement.

Trigonometrical ratios of any angle and simple relations connecting them.

Periods and graphs of trigonometrical functions. Graphical solution of simple trigonometrical equations.

Addition and subtraction formulæ. Logarithms of trigonometrical ratios, and the use of trigonometrical tables. Properties and solution of traingles with the use of tables.

Simple cases of heights and distances in two and three dimensions.

Radii of circumscribed, inscribed and escribed circles of a triangle.

Inverse circular functions (principal value).

Geometry-Plane.

The feet of the perpendiculars on the sides of a triangle from any point on the circumcircle are collinear.

The existence and simpler properties of the nine points circle.

If ABC be a triangle and AD a medium,

$$AB^2+AC^2=2(BD^2+AD^2).$$

If ABC be a triangle and AD the bisector of angle A, AB, AC=BD, DC+AD².

If ABC be a triangle and AD the perpendicular from A on the base and AE the diameter of the circumcircle, then AB.AC=AD.AE.

If ABCD be a quadrilateral inscribed in a circle,

$$AC.BD = AB.CD + BC.AD.$$

If two rectilinear figures are similar, they can be so placed that the lines joining their corresponding vertices are concurrent.

If two rectilinear figures are similar their corresponding sides and diagonals are proportional and their areas are proportional to the squares of corresponding sides.

Every straight line which passes through the extremeties of two parallel radii of two fixed circles passes through one or other of two fixed points.

If A, B, C, D be four points taken in order on a straight line, AB.CD + BC.AD + CA.BD = 0

Simple properties of cross ratios and harmonic section.

If a straight line be drawn from a given point to cut a given circle, the intersection of the tangents at the two points of section always lies on a fixed straight line.

If the polar of A passes through B, then the polar of B passes through A.

Determination of the locus of points from which the tangents drawn to two given circles are equal.

The radical axis of three circles taken in pairs are concurrent.

Construction of the radical axis of two given circles.

To draw a circle to touch a given circle (O), and also to touch a given straight line PQ at a given point A.

To draw a circle to pass through two given points A and B, and to touch a given straight line CD or a given circle (0).

To draw a circle to pass through a given point P and to touch two given straight lines AB, AC.

Ceva and Menelaus theorems about concurrency and collinearity, with simple applications.

Elementary maxima and minima (Geometrical treatment).

Geometry.—Solid.

Elementary properties of lines and planes.

Solid figures. Regular polyhedra.

Surfaces and volumes of parallelopipeds, prisms, pyramids, cylinders, cones and spheres.

Geometrical Conics.

Tracing of Parabola, Ellipse and Hyperbola from the definition.

Simple common properties of the conic sections:—

If a straight line cut a conic, whose focus is S, in points P and P¹— and the directrix in D, then SD will be equally inclined to SP and SP

The portion of tangent to a conic intercepted between its point of contact and a directrix, subtends a right angle at the corresponding focus.

Tangents at the extremeties of a focal chord of a conic intersect on the corresponding directrix.

If from any point T on the tangent at a point P of a conic TH be drawn perpendicular to the directrix and TK perpendicular to the focal distance SP, then the ratio SK: TH will be equal to the eccentricity.

To draw tangents to a conic from an external point.

The normal at P to a conic meets the transverse axis in G. then SG = e. SP.

Parabola.

Latus rectum is four times the focal distance.

$PN^2=4$ AS.AN

The tangents bisect the angle between the focal distance and the perpendicular on the directrix.

The tangents at the extremeties of a focal chord intersect at right angles on the directrix.

The subtangent is bisected at the vertex.

The subnormal is equal to half the latus rectum.

The locus of the foot of the perpendicular from the focus on any tangent is the tangent at the vertex.

The locus of the middle points of parallel chords is a straight line, parallel to the axis, passing through the point of contact of the tangent parallel to the chords. 275

Ellipse.

 $\begin{array}{c} \text{CS.CX} = \text{CA}^2 \\ \text{PN}^2 = \frac{\text{CB}^2}{\text{AN.A'N}} = \frac{\text{CA}^2}{\text{CA}^2} \\ \text{CB}^2 = \text{SA.SA'} \\ \text{SP} + \text{S}^1\text{P} = \text{AA}^1 \end{array}$

The curve is symmetrical with regard to the minor axis and has a second focus and a corresponding directrix.

The locus of middle points of parallel chords is a straight line passing through the centre and the points of contact of tangents parallel to these chords.

The tangent at any point makes equal angles with the focal distances of the point.

The locus of the feet of the perpendiculars from the foci on any tangent is the auxiliary circle.

Note-proofs with the help of projection will be accepted.

Hyperbola.

The difference of the focal distances of any point on a hyperbola is constant.

The tangent at any point makes equal angles with the focal distances of the point.

The locus of the feet of the perpendiculars from the foci on the tangents is the auxiliary circle.

Co-ordiante Geometry.

Rectangular axes only.

Meaning of a graph.

The equation of a straight line. Two straight lines, given by the general equation and the angle between them.

Circle—General equation.

Circle through three points, chord, tangent, intersection of a straight line and a circle, chord of contact, pole and polar and condition of tangency.

Equation of parabola, ellipse and hyperbola referred to principle axes.

Intersection of a straight line with a conic and condition of tangency. Tangent and normal. Very simple treatment required.

Calculus.

Idea of limit and continuity.

Differentiation of elementary algebraic, trigonometric, exponential and logarithmic functions and their simple combinations. Successive differentiation, excluding Leibnitz theorem.

Geometrical application to the tangent and normal properties of conics and other simple curves.

Integration as the inverse of differentiation. Integration of simple standard functions by simple substitution. Evaluation of definite integrals by substitution of limits.

(j) GEOLOGY.

An Elementary Course of Lectures on the following:—

Physical Geology:—

Definitions and sub-division of geology and its connection with other sciences.

Geological action of the atmosphere, running water, lake, springs, ice, ocean, plants and animals and their effect on earth's surface.

Igneous action, volcanoes, characters and products of eruption, varieties of cones and craters, distribution and origin of volcanoes.

Earth-quakes, their causes and geological effects.

Secular upheaval and subsidence.

Rocks comprising the earth's crust, division into igneous, sedimentary and metamorphic rocks, their general characters, texture, structure and mineral composition. Classification of igneous and sedimentary rocks.

Stratification; deformation of strata, dip and strike, outerop, folds, domes and basins, faults, outlier and inlier, unconformity. Igneous structures such as sill, faccolith, dyke, apophyses, batholith, roof pendents, cupola, stock and boss,

II. Stratigraphy and Palacontology:—

Standard stratigraphical division into groups and their representatives.

Fossils, preservation of organic remains, their occurrence and significance. Their value in determining the past history of the earth.

General characters of the principal fauna and flora of the Palaeozoic. Mesozoic and Cainozoic eras.

Elementary knowledge of Indian Geology with special reference to the Geology of Hyderabad.

III. Crystallography:—

Crystal: its definition and characteristics, and elements of symmetry. Division into six systems. Simple forms combinations description, indentification and drawing of simple crystals from models.

IV. Mineralogy:-

Definition of a mineral, physical properties of the mineralscleavage, fracture, hardness, colour, lusture, streak and specific gravity. Identification by physical properties of the more important rock-forming and economic minerals. Examination of the optical properties of the principal rock-forming minerals under the microscope.

V. Petrology.

Classification of rocks, identification of igneous, sedimentary and metamorphic rocks in hand specimens. Microscopic study of the plutonic rocks of simple types.

Practical - Work.

Determination of hardness, fusibility, and specific gravity of minerals. Determination of optical properties in thin sections of the principal rock-forming minerals; viz. quartz, felspars, muscovite, biotite, hornblende, augite olivine, garnet, and opaque iron ores.

Megascopic description of the distinctive characters of the principal types of igueous, sedimentary and metamorphic rocks. Microscopic examination of the simple types of plutonic rocks. Drawing of crystal models and indentification of their forms and system. Blow-pipe analysis of mineral and ore.

Excursions.

Excursion to places of geological interest under the immediate guidance of the professor. The aggregate time spent on the excursions shall not be less than seven days during the course.

Note.—

In the practical examination candidates must present their note-books containing the description of practical class-work and notes of field-work performed in the course of their studies, duly dated by the student and signed by the lecturer in charge.

(k) اخلاقات

يهلا حصه:

- 1- اخلاقیات کا دائرہ بحث اور اس کی قدر و قیمت ـ اخلاق انسان کے اغراض و مفاد کی تنظیم کی حیثیت سے ـ فرد اور جاعت ـ اخلاق فطری اور خاعت ـ اخلاق فطری اور ضروری ہے ـ فطری علوم کی اساس پر اخلاقیات کو ترقی دینے کا امکان ـ
- ہ۔ اخلاق کا سب سے پہلا سبق فطرت سے حاصل ہوتا ہے۔
 حیوانوں میں اخلاق جبلت ۔ ہر عضویہ اپنے ماحول کے
 مطابق بنتا ہے۔ زندگی کی کش مکش اور اس کا غلط تصور
 (نیٹشے کا نظریہ)۔ حیوانوں میں غول داری یا معاشرت و
 امداد یاھیی۔
- ۳۔ اخلاق کی ابتدا اور اس کی ترقی ۔ انسان دیں اخلاقی وجدان کا آغاز (ڈارون کا نظریه) ۔ شخصی اخلاق کی ابتداء ۔ احساس فرض ۔ اجتماعی اخلاق کی ابتدائی منازل ۔ وحشی اقوام کا اخلاقی تصور ۔ قدیم معاشرت کے عقلی اور تمدنی ترقی کے اسیاب ۔
- معاشر ہے کے حق میں فائدہ بخش رسم و رواج اور مہذب طریق زندگی کا قیام رواج یا دستور سے ضمیر کی سمت میں اور کروهی اخلاق سے شخصی اخلاق کی سمت میں ترقی بعض قدیم اتوام کی اخلاق ترقی کی مثالیں اخلاقی اور غیر اخلاق رواج کا فرق اخلاق کس سمت میں ترقی کر رہے اخلاق رواج کا اخلاق ترقی یقینی ہے؟

ضمیر ۔ انسان کی شعوری ترقی کی تاریخ ۔ ضمیر کی ابتدا 'ترقی اور اس کی قدر و قیمت ۔ کیا اخلاق کو ضمیر کی بنیاد پر قائم کیا جاسکتا ہے ؟ کیا محتلف قوموں کے احکام ضمیر میں یکسانیت ہے ؟ کیا ضمیر کے احکام سے ہر جگہ اتفاق کیا جاتا ہے ؟ بصیرت ۔

روا بی اخلاق کے خلاف کون سی قومیں کام کرتی رہیں۔ رسم رواج کے تا ریك اور روشن پہلو ۔ قدامت پر ستی اور انتہا پسندی۔ رواجی اخلاق کے خطر ہے ۔ جدید دور کے فکری اخلاق اور تانون ۔ مذہب اور تانون ۔ قانون کی پابندی۔ رواجی اخلاق ادر فکری اخلاق کا عام مقابلہ ۔

دو سراحصه:

۔ فعل صائب اور فعل غیر صائب۔ اس صواب کی ماہیت جس کی روسے افعال پر قدرو قیمت لگائی جاتی ہے۔ خیر و شر یا نیک وبد۔ کس قسم کا غیر صائب ہے۔

. فرض کے معنے ـ فرض اور سعادت و مسرت ـ انسان میں خود غرضی کیون نہو ـ کیا خواہشون پر قابو پانے ہر صور ت میں برا ہے ؟

سیرت اور اسکی نیکی - ارادہ ، اسکی قوت اور قدر و قیمت ـ اراد ہے کی آزادی کے معنے - ضمیر دوستی کے خطر ہے ـ تعریف اور مذمت ذمه داری ـ

شخصی مسائل اور ان کا حل ـ جبات اور ہیجان کی خامیـــاں شحصیاخلاق کے نصبالعینوں پر غور کر نے میںکن عناصر ہیے

- کام لیاجائے۔ ایسی توریت (Epicurian) کا قابلہ انتہائی احتیاط نیسندی سے ۔ نفس پرستی کی حرابیان ۔ نفس کشی کی خرابیان ۔
- اا۔ اجتماعی مسائل اور ان کا حل۔ مواخات یا بھائی چارہ۔ خود غرضی اور بےغرضی کیا اخوابی ہیجانات ہمیشہ درست ہوتے ہیں۔ انانیت اور اخو انیت ' ان میں کھان تك مطابقت ہے۔
- ار کیا اخلاق محض موضوعی اور اضافی چیز ہے ؟ کیا ہم فطرت کے مطابق زندگی کو ڈھالیں؟ مطابق زندگی کو ڈھالیں؟ لذت اور الم کیا ترقی و تکیل نفس یا تحقیق ذات آحری نمایت ہے؟
- ۳ ۔ اخلاقی ترقی ۔ تصویر کا تا ریك پهلو۔ تصویر کا روشن بہلو۔ اخلاقی اصلاح کے مسائل ۔ حکومت بہتر اخلاقی ماحول پید ا کرنے کیلئے کیا وسائل اختیارکر ہے؟

تيسراحصه:

- س ۔ وفاداری اور خیرخواہی ۔ اجتماعی روابط ہم پر کیا فرائض عائد کر تے ہیں ۔سچائی اور راستبازی ۔ سچائی کا معیارکس اعتبار سے یست ہے ۔
- ہ ۔ ترقی کے معیا ر اور شرائط۔ اجز ائے ترقی ۔ ذہنی ترقی ۔ اخلاق ترقی۔آزادی یا معاشری آزادی۔ مساوات۔
- ₁₇ سعادت حاصل کرنے کے طریقے ۔ قناعت ۔ ہوا و ہوس سے احتراز ـ سا د ، زندگی ۔ ضروریات زندگی کو مت پھیلانے سے احتراز ـ ضبط نفس ۔ پابندی فرائض ۔ تسلیم و رضا ـ حسن اور عجائیات فطرت کی قدر دانی ۔

ے معاشر ہے کی اصلاح ۔ ا مور ذیل کے متعلق حکومت کے فرائض :۔ فرائض :۔

امراض اور حفظان صحت ـ افلاس اور بےروزگاری ـ تجارتی خرابیاں ـ جرائم ـ زندگی کے معیا رکی پستی ـ جہالت و بے علمی ـ پیشون کا پست معیار ـ تہذیب و تمدن کا فقدان ـ

۱۸ - صنعت وحرفت اورکاروبار میں خودغرضی۔ ناجائز نفع اندوزی۔ عوام الناس ۔ آجر اور سرمایہ دارکوکیسے نقصان پہنچتا ہے ۔ آن خرابیون کی اصلاح کی صورتیں ۔ صنعتی ا نقلاب کے معاشری نتائج۔ شہریت ۔ وسیع پیمانےکی صنعت پر تنقید ۔

19 - معاشیاتی تقسیم - دولت اور انسان کی خوش حالی - دولت اور جا ئداد - تقسیم دولت پر تا بو رکھنے کے اصول - انتہا پسندانه انفرادیت - عمومی انفرادیت - اشتمالی مساوات ـ رقمی اقتدار اور تہذیب و شایستگی ـ

۲۰ - استحقاق ـ کیا هما ری موجوده تقسیم دولت اور ذرائع آمدنی صحیح بنیادوں پر قائم هیں ؟ موجوده عدم مساوات ' یه کس طرح استحقاق کا نتیجه هے ـ دولتمندوں کا نا جائز اسراف ـ عیش پسندی کی غلط صورتیں ـ عدم مساوات کے اسباب اور آن کو دور کرنے کے طریقہے ـ

C. B. A. EXAMINATION.

B. A. EXAMINATION.

1353 and 1354 F. (1944 and 1945).

RULES AND SUBJECTS FOR EXAMINATION.

- 1. The examination for the degree of Bachelor of Arts shall be held once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe.
 - 2. The examination shall be open to:
 - (1) All students who have satisfactorily completed a regular course of study in a college of the University for not less than two academic years after passing the Intermediate Examination of the Osmania University or an examination or test accepted by the University as equivalent thereto.
 - (2) Students who have satisfactorily prosecuted a regular course of study for the year immediately preceding the examination at a college of the Osmania University and have been permitted, under Regulation (3) below, to reckon a previous year of study since passing the Intermediate Examination or its equivalent at a college of a University recognised for the purpose by the University.
 - 3. Any student may be admitted to the final class of a college of the Osmania University, provided he produces a certificate from the Principal of the college (affiliated to any of the Universities recognised by the University) he was last attending, that the penultimate year of his degree course at college has been duly kept according to the regulations in force at the University from which he is migrating and that in the opinion of the Principal he was fit for promotion to the final class of that college.

- 4. Persons coming under the following descriptions, though not belonging to a college of the University will be allowed to appear privately for this examination:—
 - (a) Inspecting Officers of the State Educational Department and whole-time teachers employed in educational institutions recognised by the University or by the Educational Department, provided they are certified by the Divisional Inspector of schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.

(b) Women candidates.

Provided also that in the above cases, by the date of the examination, not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination or its equivalent.

- 5. Candidates from a College of the University, who have been allowed to appear at the examination once but have not been able to appear or have failed to pass, may be admitted as private candidates to a subsequent examination, provided they do not change the subjects they had studied at college. In case they change any of their subjects they shall be required to put in fresh attendance in the college in the subject or subjects they have changed.
- 6. Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the University College. They should, therefore, ascertain from the Registrar before applying for permission, whether regular students of the University are taking up those subjects.
 - 7. Application of private candidates for admission

to this examination, in the form prescribed must reach the Registrar not less than two months before the examination, accompanied by a fee of Rs. 32.

8. In the case of college candidates, applications for admission and certificates of attendance and progress in the prescribed form, together with a fee of Rs. 32 for each candidate, shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination.

9. No students will be allowed to appear at the examination, unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination. If there is a practical examination in a subject, he shall have to make up the same percentage of attendance separately in the practical course of lectures. The Syndicate may however condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially, ill-health when the application is supported by a certificate by an authorised Medical Officer, which can satisfy the Head of Institution.

A member of the U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Corps Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

10. Upon the receipt of the application and the fee prescribed, and also the attendance certificates in case of candidates from colleges, the Registrar shall at least a week before the examination, cause to be furnished to the candidate, a receipt for each fee received,

which will also serve as a ticket of admission to the examination hall, to be produced by the candidate in the hall, if called for.

A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the admission fee.

- 11. The examination shall be conducted by means of printed papers. Papers will be set and answered in Urdu with the following exceptions:—
 - (1) European Languages. Ordinarily in English.
 - (2) Sanskrit, Prakrit or In the language itself, Pali. or in English or in Urdu.
 - (3) Modern Indian Verna- In the language itself or in Urdu.
- N.B.—In the case of these exceptions, the Registrar will, six months before the date of the examination, notify the language in which the paper will be set, and candidates will be expected to answer in that language unless by a previous arrangement with the Registrar they have been permitted to answer in any of the alternative languages above specified.
- 12(a) The subjects for examination are as follows:—
 - I. English.
 - II. One of the following schools:-
 - (a) Languages.
 - (b) Mathematics.
 - (c) History.
 - (d) Economics.
 - (e) Philosophy.
 - (f) Domestic Science (for Girls only).

III. Theology or Morals.

12(b) The arrangement of papers and marks in different subjects shall be as follows:—

I. English—Four Papers:—

Paper 1.—Detailed Pr History of	ose Literature .	$\begin{bmatrix} 80 \\ 20 \end{bmatrix}$	100
Paper 2.—Detailed Po History of	etry Literature .	$\begin{bmatrix} 80 \\ 20 \end{bmatrix}$	100
Paper 3.—Essay Unseens		$\begin{bmatrix} 75 \\ 25 \end{bmatrix}$	100
Paper 4.—Non-Detaile Translation into Englis	ed Texts a from Urdu		

Questions on the History of Literature will be compulsory.

II. (a) Languages—any two of the following:—

- 1. Arabic.
- 2. Sanskrit.
- 3. Persian with Elementary Arabic.
- 4. Latin.
- 5. Greek.
- 6. Urdu with Hindi Bhasha.
- 7. Marathi.
- 8. Telugu.
- 9. Kanarese.
- 10. French.
- 11. German.

A knowledge of the history of the language and literature in the languages selected will be required.

There will be three papers in each of the two languages selected carrying 100 marks each.

The first paper in Arabic, Sanskrit, Persian and Marathi will be on Prose (75 marks) and History of Literature (25 marks): the second paper will be on Poetry (75 marks), and Rhetoric and Prosody (25 marks) and the third paper will be as follows:—

Arabic:—			
Translation from Aral		٠.	40
Translation from Urdu	ı into Arabic		40
Grammar	• •		20
		-	100
Sanskrit:—			100
Translation from Sans	krit into Urdı	ı	35
Translation from Urdi	ı into Sanskri	t	35
Grammar			30
DEDGEAR			100
Persian:—			
Translation from Urdi	ı into Persian		30
Composition		• •	40
Elementary Arabic, Te	xt and Gramm	ner.	30
		•	100
MARATHI:—			100
Composition	•		me
Precis-writing	• •	• •	$\begin{array}{c} 75 \\ 25 \end{array}$
I Tools Willing	• •	• •	
•			100
The distribution of par follows:—	pers in Uṛdu	will	be as
Paper 1—Prose History of	 Literature		$\begin{array}{c} 75 \\ 25 \end{array}$
			100

This paper will also contain a question on Preciswriting which will carry not less than 10 marks.

Paper 2.—Poetry	75
Rhetoric and Prosody	25
·	100
Paper 3.—Composition Translation from Bhasha into Urdu Translation from Urdu into Bhasha	70 12 18
	100

The distribution of papers in Telugu and Kanarese will be as follows:—

Paper 1.—Prose			50	7 700
\mathbf{Drama}			50 50	100
Paper 2.—Poetry			50)
Prosody and	Rheto	ric	25	}100
History of L		$_{ m ure}$	25	J
Paper 3.—Composition			75] 100
Precis writing	ng .		25) ***

The distribution of papers in Latin, Greek, French and German to be notified later on.

- (b) Mathematics.—6 Papers of three hours and carrying 100 marks each:—
 - (1) Theory of numbers, Algebra, Probablity and Statistics.
 - (2) Coordinate Geometry of two and three dimensions and pure Geometry.
 - (3) Calculus (Differential and Integral) and real variable.
 - (4) Complex variable and Differential Equations.
 - (5) Statics and Dynamics.

- (6) Hydrostatics, Spherical Trigonometry and Astronomy.
- (c) History.—6 Papers of three hours each:—

 Principal.

Paper 1.—General Historical Essay—100 marks.

Paper 2.—Indian History—100 marks.

One of the following periods:-

- (i) Ancient, up to 1206.
- (ii) Medieval, 1206 to 1765.
- (iii) Modern, 1765 onwards up to the present day.
- Paper 3.—General—100 marks, containing:—
 - A. History of the Deccan, covering the period of Indian History taken by the candidate.
 - B. Elements of the Cultural History of India with reference to the period of Indian History taken by the candidate.
 - C. Constitutional History of Modern India.

Paper 4.—One of the following—100 marks:—

- (i) Select period of Islamic History.
- (ii) Select period of European History.

(iii) English Constitutional History.

(iv) History of Indian Culture.

Subsidiary.

- Paper 5.—Political Science. (Theoretical and Comparative)—100 marks:—
 - (i) History of Politics ... 30 marks.
 - (ii) Politics (Comprising Political Theory and Comparative Government) ... 70 marks.
- Paper 6.—Economics or Sociology (Theoretical and Applied)—100 marks.

- 1. No student will be allowed to go up for his B.A. Examination in History unless he has taken Economics either in his Intermediate or B.A. Examinations.
- 2. A student will not be allowed to take the same subject which he selected in the Intermediate; in other words a student who took Sociology in the Intermediate shall take Economics, and those who had selected Economics shall take sociology.
- N.B.—Candidates will be expected to answer questions on Historical Geography.
- (d) Economics.—6 Papers of three hours and carrying 100 marks each:—
 - Paper 1.—Principles of Economics (including a brief description of the famous Schools of Economic Thought).
 - Paper 2.—Currency, Banking, Foreign Exchange and Public Finance.
 - Paper 3.—Economic History of England since the Industrial Revolution (1914).

\mathbf{Or}

Economics History of India from the death of Akbar to the end of the 19th Century.

- Paper 4.—Agricultural Economics and Co-operation
- Paper 5.—Political Science or Sociology.—
 Politics (Comprising Political Theory and Comparative Government.) Or Sociology.
- Paper 6.—Trade, Industry and Transport problems of India.
- (e) Риповорну.—6 Papers of three hours and carrying 100 marks each:—

General Philosophy.

- Paper 1.—Nature, Schools and Problems of Philosophy.
- Paper 2.—A brief sketch of the History of Philosophy together with a special study of an original work of any of the following Philosophers:—

 Descartes, Berkeley or David Hum.e.

Oriental Philosophy.

Paper 3.—Outlines of Islamic Philosophy, Kalam and Sufism.

Paper 4—Hindu Philosophy.

Psychology.

Paper 5.—Elements of Phychology with allied Physiology.

Ethics.

Paper 6.—A brief study of Theoretical and Practical Ethics.

(f) DOMESTIC SCIENCE

and:

(i) One language and, Islamic or Indian History

or

(ii) Two Histories, Politics and Economics:-

Domestic Science:

Paper 1.—Biochemistry etc:	 70
Paper 2.—Psychology etc:	 70
Practical.—one paper:	 60

and:

(i) Language and Indian History:	
3 papers in any one Language as de-\ tailed under the School of \ Languages. One paper in Indian or Islamic His-\	300
tory as detailed under papers (2) and (4) of the School of History.	100
	400
Or,	200
(ii) History, Politics and Economics.	
Two papers in any two Histories as detailed under papers 2 and 4 of the School of History.	200
One paper in Political Science as de- tailed under paper 5 of the School of History.	100
One paper in Economics as detailed \\ u n d e r paper 6 of the \\ School of History.	100
	400

III.—Theology or Morals (one paper).—100 marks.

N.B.—Examinations in Theology or Morals shall be regarded as qualifying examinations and the marks gained by a candidate in the subject shall not be included in the grand total of the marks: but no student can go up for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at that examination.

- 13. No candidate will be allowed to appear for the B.A. Examination unless he produces a certificate from the Head of the Department of English that he has written 20 essays during the course of two year's study. Failures who join the college will be required to write 10 essays. Students taking up History or Economics as their optional subjects will be required to write 25 and 20 essays and those candidates who join the college after failing in an Examination will be required to write 12 and 10 essays respectively.
- 14. In order to pass the Examination candidates will be required to secure 33 per cent. in each subject.-
 - a. Candidates taking *Languages* will have to secure at least 25 per cent. of marks separately in each of the two languages and 33 per cent. in the aggregate.
 - b. Candidates taking Mathematics will have to secure at least 25 per cent. of marks separately in the pure as well as in the applied Mathematics and 33 per cent. in the aggregate. Out of the six papers the first three papers will be regarded as Pure and the remaining three as Applied Mathematics.
 - c. Candidates taking *History* will have to secure 25 per cent. marks separately in the Principal as well as in the subsidiary subjects and 33 per cent. in the aggregate.
- 15. Those of the successful candidates who obtain 60 per cent. or more of the aggregate marks will be placed in the First Class, those obtaining 45 per cent. or more but less than 60 per cent. in the Second Class, and the others in the Third Class.

The names of successful candidates placed in the First Class, shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the Second and Third Classes shall be arranged in serial order of their roll numbers.

- 16. A certificate signed by the Chancellor shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 17. Any student who fails to pass the examination on account of his having failed to obtain 33 per cent. in English or in his selected subject, will be considered to have passed the whole examination, on his passing at a subsequent examination merely in the subject in which he has failed, provided that the marks gained by him in such subject in the previous examination do not fall short of 25 per cent. and provided that in that examination he has secured an aggregate total of 40 per cent.

TEXT-BOOKS.

I. ENGLISH.

I. Detailed Poetry:—

- (a) Shakespeare—Antony and Cleopatra.
- (b) Longer English Poems from Spenser to Noyel (Harrap's Modern English Series).

The following selections:—

(1) Milton-Lycidas.

- (2) Gray—Elegy Written in a Country Church yard.
- (3) Gray—The Bard.
- (4) Goldsmith—The Deserted Village.
- (5) Wordsworth—Lines composed a few mile above Tintern Abbey.
- (6) Tennyson—The Lotos—Eaters.
- (c) Golden Treasury of Songs and Lyrics: Boo Fifth edited by Laurence Binyon, with not by G.J.H. Fowler (English Classics for Indi Macmillan & Co.)

The following selections:-

No.

10. Home Thoughts from Abroad. R. Browning.

14. The Lake Isle of Innisfree. W. B. Yeats.

16. Nightingales ... R. Bridges.

17. Tears, idle tears ... Lord Tennyson.

21. The Lady of Shalott

	The Eagle		Lord Tennyson.
25.	War song of the Saracens	S	J. E. Flecker.
30.	Porphyria's Lover		R. Browning.
32.	Renouncement	•	A. Meynell.
33.	"We were not made for fuges of lies".	re-	M. E. Coleridge.
37.	The ways of love		E. B. Browning.
38.	The Oblation		A. C. Swinburne.
42.	Parting at morning		R. Browning.
44.	Heraclitus		W. Cory.
4 5.	To Virgil		Lord Tennyson.

- 9. Kashf-ul-Mahjub by Ali Hujweri.
- 10. Gulshan-i-Raz by Mahmud Shabistri.
- 11. Portions of Masnawi by Rumi.
- 12. Mantiq-ut-Tair-Fariduddin Attar.
- 13. Portions of Fasusul Hikm (Hadiqa Sanai).

 Ibn Arabi.

4th Paper.—Hindu Philosophy:—

Text-books for intensive reading:—

- 1. The six systems of Indian Philosophy. (Max Muller).
- 2. History of Indian Philosophy. (Das Gupta).
- 3. Indian Philosophy. (Radha Krishna).
- 4. Philosophy of the Upanishads. (Deussen).
- 5. History of the Creative Period of Indian Philosophy. (Ranade).
- 6. Sarva Darshana Samagraha. Cowell (Trubner's series).
- 7. Bhagvat Gita. (Telang).

Text--books recommended for study:—

- 1. Studies in early Indian Thought. (Stephen Dejai).
- 2. Systems of Vedantic Thought and Culture. (Mahandra Nath Sarkar).
- 3. Pantheism and its value for life. (Urguhart).
- 4. Positive Sciences of Ancient Hindus (Seal B.N.)
- 5. Indian Philosophy. (Dayies.)
- 6. Patanjalies Yoga System. (Woods).
- 7. Outlines of the Vedanta System. (Deussen.)
- 8. Hindu Realism. (Chatterji.)
- 9. The Sankhya System. (A. B. Keith.)
- 10. Indian Logic. (Keith).

Books to be consulted:—

- 1. The Thirteen Principal Upanishads. (Hume).
- 2. Sacred books of the East. (Max Muller). (Upanishads and Brahma Sutras).
- 3. Sankhya Pravachava Bhashya (Vijnana Bhikshu).
- 4. Sidhanta Muktavali. (Vatsayana).
- 5. Vedanta Oaribhasha.
- 6. Great Religious Teachers of the East (Alfred Martin).
- 7. Philosophy of Upanishads. (Radha Krishna).

5th Paper.—Psychology:—

Books recommended.

- 1. R. S. Woodworth.—Psychology:—A study of Mental Life. (Methuen) 10th Edition.
- 2. G. F. Stout.—A Manual of Psychology (University Tutorial Press) 5th Edition.
- 3. Bernard Hart.—Psychology of Insanity.
- 6th Paper.—A brief study of theoretical and practical Ethics:—

Books recommended:—

- 1. Ethics by Dewey and Tufts.
- 2. History of Ethics—Sidgwick.
- 3. History of Ethics-Rogers.
- 4. Parts of Plato's Republic that are still live issue for modern society.

For detailed syllabus vide appendix (d)

II(f) Domestic Science.

No book is prescribed for detailed syllabus vide appendix (e)

III. MUSLIM THEOLOGY OR MORALS.

(a) Theology (for Hanafi Students):—

1 - سورہ بقر- جوعنو انات مباحث کلامیہ کے لئے متعلق ہیں انکی حسب موقع تفصیل کی جائے۔ ۲ - برائے مطالعہ سر سری:

> دین و دانش ـ مولوی مجمود علی صاحب حکمت اسلامیه ـ مولوی عبدالقدیر صاحب

For detailed syllabus vide Appendix (f)

(b) Morals (for Non-Hanafis and Non-Muslims). No. book is prescribed.

For detailed syllabus Vide Appendix (g)

شمبه دينيات

APPENDECIS

Detailed Syllabuses

(a) Pure Mathematics.

Theory of Numbers:—

Prime and composite integers—divisibility of integers periodicity for given modulus—resolution into prime factors—expression of an integer as an integral factorial series—scales of arithmatical notation—perfect numbers—number of integers less than "N" and prime to "N"—Euler's Theorem—F Fermat's Theorem—Lagrange's Theorem.

Algebra:—Determinants—Systems of Linear. Equations—indeterminate equations—theory of equations including symmetric functions of the roots sturm's Theorem—Solutions of the cubic and the diquadrostic equations—Linear transformations—inequalities—continued fractions—interest and annuitics—simple tests of convergence of series—partial fractions Summation of series.

Coordinate Geometry of two dimentions:—Detailed study of the properties of the conic sections—the general equation of the second degree—Polar equations of conics—theory of plane curves, viz., tracing of curves, curvature, evolutes asymptotes)—Homogenous coordinates.

Coordinate Geometry of three dimensions:—Standard second degree equations—central sections and generators.

Pure Geometry i.e., Projective Geometry.—Cross ratios of ranges and pencils—projective properties and their application to conic sections—perspective—involution—inversion—reciprocation.

Calculus and Analysis (real variable):— Dedikinds theory of irrational numbers—limits—continuity—differentiation—Taylor's theorem and expansion in series—Riemann integral for a continuous

equations including functions of the roots function—rectification—quadrature—volumes and surfaces of solids of revolution—Geometrical and physical applications of the definite integral.

Functions of two variables:—limits—continuity—differentiation—Taylor's Theorems maxima and Minima—envolopes—the double integral and its applications.

Complex Variable:—Elementary functions of a complex variable—complex differentiation and integration—conformal representation (excluding Riemann's theorem); positive series—Ordinary tests of Convergence—absolute and uniform convergence of infinite series and infinite products (fundamental ideas only).

Differential equations:—Elementary methods of solutions for the first and second order ordinary differential equations—singular solution—linear equations with sonstant coefficients—homogeneous linear equations—Simultaneous equations—solution in series—approximate solution—Lagrange's partial differential equation of first order—equations of heat, sound, waves, and potential.

APPLIED MATHEMATICS.

Mechanics:—Resolution—Composition—Scalars and Voctors—Multiplication of vectors in two dimensions. Free motion of a particle in a straight line and on a plane—constrained motion of a particle in a st. line—resisted motion of a particle on a plane—motion of a system of particles in a plane—motion of a rigid body about an axis.

Equilibrium of forces in two and three dimensions—virtual work—graphical statics—laws of friction—equilibrium of chains and strings in two dimensions.

Centre of pressure—resultant pressure—equilibrium of floating bodies—Stability and meta-centre (Standard nearly the same as that of Lamb's Statics and Dynamics).

Astronomy:—Fundamental notions of spherical trigonometry—Explanation of the apparent motion of the celestial bodies—Celestial coordinates—astronomical instruments—the solar system—Kepler's Laws of planetary motion—equation of time—conversion of time—motion of the Moon and its phases—Eclipses of the Sun and the Moon—Astronomical dip, refraction, parallax, aberration, precession and nutation—latitude and longitude of a place—rotation of the Sun and the planets about their axes.

Surface of the Sub-Solar Corona and the prominances—Proper motions of the Stars—Star Cluster—galactic and extra-galactic nebulae—Star magnitudes.

Probability and Statistics:—The probability of an event—the probability of several independent events happening together—expectation—Probable value—Frequency distribution—histogram—arithmetic mean—Standard deviation—Probable error.

(b) HISTORY.

- (I) Paper 3.—(b) Elements of the Cultural History of India.
 - (i) Ancient up to 1206.

Introduction to Aryan Civilization.

Kautilya and his Socio-Political Philosophy.

Asoka. Originator of a new ideal for the Government: Preacher of new ethical values for the society and popular educator.

Earliest Budhist Art: Maurya and Sunga. Gupta Period: Drama and Art.

- Harsha—Cultural contacts between Islamic and Indian Culture. India's Social, Intellectual and Religious life in the 7th Century.
- (ii) Medieval Period 1206—1765.
 - Early Contacts between Islamic and Indian Culture.
 - Peaceful penetration of Islam in India and Muslim Colonies.
 - The rise of the Muslim power in India and its nature and significance.
 - Social movements and salient features of the fusion of cultures: Hindu and Islamic.
 - History of the Muslim Art—Architecture and Painting.
- (iii) Modern Period 1765 to the present day.
 - Rise of British Power in India and its effect on India.
 - Attempts at the Westernisation of India: The spread of Political Ideas and the introduction of Western Education.
 - Social movements and their significance.
 - The Growth and Development of Indian Nationalism.
- (2) Paper 4.—(4) History of Indian Culture.
 - Brief Outline of Pre-Aryan Civilisation.
 - Aryan Civilisation: Its Social, Political, Religious and Economic Aspects.
 - Age of Religious Struggle and its significance.

- Mauryan: Political and Social Ideas and Ideals.
- Origin of Indian Drama and the value of Gupta Art.
- Brief Survey of the religious and social conditions in India in the 7th Century.
- Intellectual and Religious Contacts between India and the Islamic Countries.
- Peaceful Penetration of Islam in India.
- The rise of the Muslim Political Power in India and its nature and significance.
- Social Movements and salient features of the fusion of cultures: Hindu and Islamic.
- Short History of the Muslim Art—Architecture and Painting.
- Contact of the Eastern and Western Civilisations.

(3) Paper 5.—Politics:—

- I. Scope of Political Science and its relation to other social sciences. The State and its relation to cognate organisations.
- II. The State—Origin, extent and organization forces. Sovereignty, Law, Rights, Liberty.
- 1II. Scope of Governmental Action—Industrialism: Socialism. Recent tendencies
 —Collectivism: Communism: Bolshevism: Totalitarianism. Growing Identity of Economics and Politics.
- IV. Governmental Organs—Doctrine of Separation of Powers. Kinds of Govern-

ments—The Aristotelian Divisions: Unitary State, Confederation, Federation, Constitution: Written and Unwritten.

V. Central Government—The Legislature and the Electorate: Direct Democracy: Party System. The Executive: Dictatorship: The Civil Service. The Judiciary.

VI. Local Government.

- B.—The whole course on Government will be based upon a comparison of various countries principally England, France, U.S.A., Canada and India.
 - VII. Imperial Government—Spheres of Influence, Protectorates: Colonies; Dominions; India.

VIII. International Law, Mandates.

) Paper 6.—General Economics:—

Introductory.—Subject matter of the Science 1 its definition. The divisions of the Science and ir inter-dependence. Definition of wealth, capi, land, labour, utility, value and price.

Land.—Qualities and characteristics. Its differse from capital. The law of diminishing returns. nd improvements. Land values and Economic ogress.

Labour—Distinctive qualities. Skilled and unlled labour. Productive and unproductive labour. te division of labour. Conditions of efficiency. obility of labour. The Law of population.

Capital.—Qualities, Conditions of accumulation.

Production.—The three agents and the extent to which they are needed. Production on a large and small scale. The Employer. Machinery. Principle of substitution: Localisation of industry. Law of increasing returns. Law of constant returns.

Consumption.—Wants. Interdependence with activities. Necessaries and Luxuries. Diminishing utility. Consumer's surplus. Elasticity of demand. Fashion and custom.

Exchange.—Definition and criteria of a market. Demand and supply. Marginal supply and demand. Prices. Equilibrium of demand and supply. Influence of time. Wholesale and retail prices. Dealers and Speculators.

Distribution.—Analysis of interest, profits, rent, and wages. Gross, and net interest. Normal rate of interest and the changes in it. Interest paid by agriculturists. The Classical Theory of rent. Its application to Indian conditions. Relation of rents to prices. Limitation of rents by Legislation. Real and nominal wages. Net advantages. Normal rate of wages. Changes in normal wages. Effect of a rise in wages. Earnings of specified occupations. Earnings of Management. The National dividend.

INDIAN ECONOMICS.

Introductory.—Natural environments and how they moulded economic life in India. Special features of Indian Sociology and its connection with Indian Economics.

Production.—Special features of the factors of production in India. The condition of agriculture and means of its improvement. Forest, Mines, Indian animals; their economic importance. Manufactures in India, causes of their decay, suggestions for improvement. The place of foreign capital in

the development of Indian industries. Large scale versus small scale production. The Industrial Revolution. Factory labour. The beginning of the Labour problem.

Distribution.—Theory of distribution and its applicability to Indian conditions. Rent, Agricultural rents and Mining rents. Wages, connection between prices and wages. Interest, Bank rates. The Money-lender. Need of credit. Co-operative credit.

Exchange.—Currency, history of rupee, paper currency system, gold exchange standard, gold standard reserve. Home charges, council bills and reserve council. Advantages and weakness of the Indian Monetary system. Rate of Exchange. The nature and causes of the difficulties experienced during and after the War. Banking. Short history of the growth of Banking in India. Various classes of banks and their business. The Imperial Bank of India.

Consumption.—The standard of life. Effects of Consumption on Porduction. The necessary reforms.

Taxation.—Principles of Taxation.—Direct and Indirect taxation. The Indian Financial System. The Budget and the Annual Financial Statement. lic loans.

The State and Economics.—The Land Revenue system, zamindari and raiyatwari tenures. Tenancy legislation. Famines—causes and effects, measures for prevention. The Co-operative movement in India: its benefits, its progress. Railways; history of their development; their present position and future prospects; the problem of State versus private railways; the bearing of railway policy on the indigenous

industries of the country. Irrigation; present condition; major and minor works; productive works; prospects of future development. The State in relation to industry. Free trade and Protection. India and Imperial preference. The effects of war on the various phases of economical life in India.

(c) ECONOMICS.

Paper 1.—Principles of Economics.

Introduction:—The Nature of Economic Phe nomena. The significance of Economic Science. General conditions of Economic activity. Methods of Economic analysis.

Wants and their satisfaction:—A general view of Consumption. Law of diminishing utility. Variation in the intensity of demand. Influences affecting demand. Distribution of means between gratification of different wants. The concept of consumer's surplus.

Production:—Fundamental conditions of the wealth of society. Agents of production and their classification. Land and natural resources. The number and quality of the people. Theory of population. Supply of labour and the Iron Law of Wages. The Nature of Capital. Direct and Indirect production. Business organisation. Specialization of labour and land. Large Scale Production. External and Internal Economics. The Laws of Increasing and Decreasing Returns.

Exchange:—Relation of Production and Exchange. The more important theories of value. Laws of supply and demand. Marginal utility and marginal cost. Value during long and short period; the concept of normal value. Joint and composite demand; Joint and composite supply. Value under Monopoly.

Distribution:—General theory of Distribution. Theories of Wages, Interest, Profit and Rent.

History of Economic Thoughts Λ brief view of the more important schools of Economists.

Paper 2.—Currency, Banking, Foreign exchange and Public Finance

The nature and functions of money. The value of money. The quantity theory of money. Currency System. the question of the Standard. Banks and their functions. Brief history of present position of Indian Currency and Banking. Theory of International values. Foreign Exchanges and equation of international indebtedness. India's Foreign Trade. Balance of trade and balance of account. Credit and Debit items in India's balance sheet. Examination of the "Drain" theory.

Currency and Banking in Hyderabad.

(b) Public Finance, Economic functions of States. Public expenditure. Source of public revenue. General principles of Taxation, kinds of taxes. General structure of Indian Public Finance. Financial relations between the Central and Provincial Governments. Central Finance. Heads of Revenue and expenditure. Central (general) Budget. Railway Budget. Financial arrangements under the Federation. Provincial Finance: Heads of Revenue and Expenditure. Local Finance: inadequate resources of local bodies: its causes and means of improvement. Public expenditure in general and its criticism. The question of the burden of taxation.

The Revenue and Expenditure of Hyderabad State.

Paper 3.—Economic History.

(a) Economic History of England, since the Industrial Revolution (1914).

Or

(b) Economic History of India from the death of Akbar to the end of the 19th Century.

The course will proceed on the following lines:—

- (1) England on the eve of, and during, the Industrial Revolution.
- (2) The Problems to which the revolution gave rise and their treatment, e.g., Trade Unionism, Factory Legislation, Poor Relief, Free Trade, Colonial Policy, etc.

Paper 4.—

Agricultural Economics and Co-operation.

(1) Economic problems of Agriculture in India. (Throughout this Course reference will also be made to the conditions in Hyderabad). Definition of Agriculture. Importance of Agriculture in Man's Economic Life. Special significance of Agriculture in Indian Economy. Present stage of Agriculture in India. Factors affecting Crop-production. Preservation of soil: the problem of soil erosion and of water-logging. Causes of the absence of the use of manures. Irrigation: the various methods of irrigation and their extent; the future of irrigation. The sub-division and fragmentation of agricultural land: the extent and causes of this evil and remedies for the future. Improvement of the quality of crops and the popularisation of improved varieties. The problem of Seed Protection of crops; internal and exdistribution. Motive power for agriculture. Importance of cattle in the agricultural economy of India and their present deplorable condition, its cause and

remedies. Better feeding and the breeding of better species. Diseases of cattle and veterinary arrangements. Breeding of cattle for Dairy purposes, present condition of Dairy industry, use of improved implements and machinery. The marketing of agricultural produce. The present defective methods of marketing and their injurious effect on the culti-Establishment of Regulated Markets. Finance of Agriculture: Problem of Rural indebtedness: its causes and cures. Legislation as a means of removing rural indebtedness. Land-tenures and their influence on agricultural prosperity. Land Revenue policy of Government, its bearing on the financial condition of the cultivators: The movement of Rural Reconstruction: its aims and method. Improving the social and intellectual as well as the economic environment of the villager.

(2) Co-operation in India:—What is co-operation? Co-operation and its alternatives. The objects of a Co-operative Society. Some outstanding achievements of the movements outside India; origin and development of Co-operation in India. Land marks in the history of Co-operation in India. Analysis of the present situation; the financial and administrative structure of the movement. Primary societies and their classification. The Central Banks, the Provincial Banks and the Unions. The All India Co-operative Institutes Association. Land Mortgage Banks, their present condition and future prospects; the law and practice of Co-operation. Co-operative bookkeeping; The origin, development and present posi-

tion of the movement in Hyderabad.

Paper 5. (i)—Politics—See History Paper 5. ap-

pendix—b (3)

Or

(ii) Sociology.

Introduction: Subject matter of Sociology, its definitions and interdependent relations with other social Sciences. The scope of Sociology, its sub-divisions. The method of Sociology, Advantages of studying Sociology.

Structure and basis of Sociology:—Various conceptions of, and different kinds of society. The meaning of Society. Individual and the family, Groups (the clan, the tribe, the race and the nation). Theory of population. Under-population and over-population. Solution of the population problems.

The Nature of Society: Human Nature. The individual and the group Mind.

Socialization: Social processes (Influenced by factors like climate, Resources, Environment, occupation) Socializing factors. Imitation, Sympathy, Vanity, Adaptation.

Individualization: Causes of differentiation, conflict of interest. Opposition, class-struggle. Commercialization. (Slavery and Serfdom). Subjection of Women. (Castes and Races).

Cocial Reconstruction: Social interactions. Cross fertilisation of culture. Interprovincialism and In-

History: Social Philosophy. Social Psychology. A brief survey of the development at Sociology.

Paper 6.—Trade, Industry and Transport Problem of India.

Industries and Trade: present position of Industries in India. Causes of the industrial downfall, Scope for the development of new Industries. India's Industrial resources. Means of bringing about Industrial Revival. Fiscal policy of India. The problem of Free-trade versus Protection. Discriminate protection and its guiding principles. Imperial Prefer-

ence: its objects and limitations. Technical & Vocational education. Stores purchases policy. Activities of the Provincial Department of Industries. Appearance of Labour Problems in India. Factory Legislation: its history and present position. Workmen's compensation. Trade Unionism: the condition of Transport: Railways, their recent history and present policy. Roads versus Railways. The condition of water transport. Problems of Indian shipping. Cottage Industries: their present condition and future prospects.

Trade of India: external and internal. The character and direction of India's sea-borne trade. Coastal and Inland trade. Principal trade centres of India. Commercial intelligence and trade organisation.

(d) Philosophy.

Paper 1: Problems of Philosophy.—

I. Introductory:—

Preliminary Definition.
Poetry and Philosophy.
Philosophy and Science.
Philosophy and Religion.
The Values and Difficulties of Philosophy.
Method in Philosophy.—

- (1) Rationalistic or Deductive (Descarates, Spinoza)
- (2) Scientific or Inductive—
 - (a) Experimental (pragmatists: James; Dewey.
 - (b) Analytic (Neo-Realists; Russell, Spaulding).
- (3) Romantic or Intuitive. (Mystics, Bergson).

II.. Cosmological Inquiries:

- (1) The Cosmos, Space, Time.
- (2) The Nature and Origin of Life Mechanism. Vitalism.
 - Emergent Evolution.
- (3) The Philosophy of Evolution.
- (4) Is the World Purposive.
- (5) The Problem of God.
- (6) The Problem of Evil—Pessimism.

III. Ontological Inquiries:

- (1) Monism:
 - (1) Materialism
 - (2) Spiritualism or Idealism:
 - (a) Platonic Idealism.
 - (b) Subjective Idealism.

 - (c) Idealism of Leibnitz.
 (d) Panpsychism.
 (e) Voluntaristic Idealism.
 - (f) Idealism of Kant.
 - (g) Absolute Idealism.
 - (h) Personalism.
 - (3) Daulism.
 - (3) Pluralism.

IV. Epistimological Inquiries:

- (1) The sources of knowledge.
 - (a) Rationalism.—
 - (i) Metaphysical Rationalism (Plato-Hegel).
 - (ii) Mathematical Rationalism (Descartes-Spinazo).
 - (iii) Formalistic Rationalism (Kant).

- (b) Empericism.
- (2) The Validity of Knowledge—as seen from the standpoint of Realism and Idealism.
- (3) The Criteria of Knowledge.—
 - (a) The Correspondence Theory of Truth.

(b) The Coherence Theory of Truth.

- (c) The Utility Theory of Truth or Pragnatism.
- (d) The Interpretation Theory of Truth.
- (e) The Communal Character of Truth.

Paper 2: History of Philosophy.

Introduction:

History of Philosophy.

Science, Philosophy and Religion.

General Classification:-

(a) The 3 general periods of the History of Philosophy.

(b) The comparative length of the 3 general

periods.

(c) The real differences of the 3 general periods.

II Greek Philosophy.

The Cosmological Period: The philosophy of Nature.

- 1. Origin and development of Early Greek Thought.
- 2. Problem of substance. Thales

Anaximander Anaximenes.

3. Problem of Number ...Pythagoras and his School.

Pythagorean Number

-Theory.

4. Problem of Change .. Heraclitus. School of Elea

..Theology (Zenophanes).

Ontology (Parmeni-

des).

Dialectics (Zeno and Melissus).

5. Explanation of Change . Solution of the Riddle.

Empedocles. Anaxagiras. Atomists.

The Anthropholgical Period: The Philosophy of Man.

6. Age of the Sophists.

Greek Enlightenment.

Sophists.

Significance of Sophistry.

The Philosophy of the Sophists—

- (a) The Relativism of Protagoras.
- (b) Nihilism of Gorgias.
- 7. Socrates: Problem of Truth.
 Socratic Method.
 Ethics.
- 8. The Semi-Socratics.—The Cynics.
 The Cyrenaics
 The Megarics.

The Systematic Period.

9. Plato—Plato and his Problem.
The Theory of Knowledge.
Dialectics or the Theory of Ideas
Physics or the Theory of Existence

(a). The Doctrine of the World.

(b) The Doctrine of Human Soul.

Ethics.

Politics.

View upon Art.

Plato's Historical Position.

10. Aristotle: Ariostotle's Problem.

Philosophy and Science.

Logic

Metaphysics

Physics or the Philosophy of Nature.

Ethics.

Politics.

Aesthetics or the Theory of Art.

The Hellenic-Roman Period.

- 11. The General Character of Post—Aristotelian Philosophy.
- 12. The Stocis,

Logic

Physics.

Ethics.

13. The Epicureans.

Physics.

Ethics.

14. The Sceptics

Pyrrho.

The New Academy.

Later Scepticism

- 15. Transition to Neo-Platonism
- 16. The Neo-Platonists.

Theology.

Three Slages of Being.

Human Soul.

Mysticism.

CLOSE OF SCHOOL AT ATHENS.

Modern Philosophy.

17. Introduction: The Beginning of Modern Philosophy.

Rationalism.

18. Rene Descartes:—

- (a) The Preparation for Philosophy: Universal Doubt.
- (b) The Implication of Doubt: My Own existence.
- (c) The inference from my own existence: The existence of God.
 - Ontological Argument for the existence of God.
- (d) The Inference from the existence of God: The existence of corporeal bodies of finite selves.
- (e) Descartes' summary of his teaching: The Substance Doctrine.
 - One absolutely independent substance, God. created substances of two sorts, minds and bodies.

19. Baruch Spinoza:

- (a) Universai substance—God
- (b) Attributes of God.
- (c) Doctrine of Modes.
 (d) Theory of Knowledge.
- (e) Ethics and Politics.

20. Gottfried Wilhelm Leibnitz:

- (a) Place in Philosophy.
- (b) Mataphysics: The Monadology.(c) Theology: The Best of Possible Worlds.
- (d) Epistemology: All Knowledge is Innate.

Empiricism.

21. John Locke:—

(a) The Problem. Origin of Knowledge.

- (c) Nature and Validity of Knowledge.
- (d) Limits of Knowledge.

22. George Berkeley:

- (a) Doctrine of the Reality of the Immediately known: Myself and my ideas.
- (b) Negative Doctrine: The Disproof of the existence of Matter.
- (c) Positive Doctrine of Inferred Reality:
 - (i) God.
 - (ii) Created spirits.
 - (iii) The World of Nature.

23. David Hume:

- (1) The Foundation Principles of Hume's Metaphysics.—
 - (a) The derivation of idea from impression.
 - (b) The Doctrine of Causality.
 - (1) The conception of causality as a customary, not a necessary connection.
 - (2) The conception of power as a determination of the mind.
- (2) Hume's Doctrine of Self.

Hume's Teaching about God.

24. Immanuel Kant:

- (1) Problem of Kant.
- (2) Problem of Knowledge.
- (3) Theory of Sense-Perception (Transcendental Aesthetics).
- (4) Theory of the Understanding (Transcendental Analytic).

- (5) Validity of Judgments.
- (6) The Doctrine of the Real Self as unknown.
- (8) The Doctrine of God as Unknown.
- (9) Practical use of Reason and Moral Theology.
- (10) Ethics.

فلسفة اسلام : Paper 3

فلسفه اور اسلام میں فرق اور تعلق ـ فلسفه اسلام کے چار شعبیے (الف) کلام (ب) مشائیت (ج) تصوف (د) خالص اسلامی فلسفه یا فلسفهٔ قرآن ـ

(الف) علم كلام

کلام کی وجهہ تسمیہ ۔ اس کی پیدائش ۔ اعتزال کی ابتداء ۔ معتزلہ کا اپنے کو ا ہل عدل و توحید کہنا ۔ اعتزال کے خاص خاص مسائل (۱) ذات وصفات (۲) جبر و قدر (۳) رویت بادی (سم) خلق قرآن (۵) کفایت عقل یعنی خدا اور خیر کے علم کے لئے عقل کا کا فی ہونا ۔

ر جال اعترال ـ واصل ابن عطاء ـ ابوالهذيل ـ نظام ـ معمر ابن عباد کے مختصر حالات و خیالات ـ

اشعریت ۔ اسکے بانی امام ابوالحسن اشعری کے مختصر حالات و خیالات ۔ اشاعرہ کے خاص خاص مسائل اور معتر لدسے ان کے اختلافات (۱) ذات و صفات کی عینیت اور غیریت (۲) جبرو قدر کے مسئلہ میں کسب کا نظریه (۳) اثبات رویت باری تعالی (س) قرآن غیر مخلوق ہے (۰) عقل ناکافی اور نقل کی تابع ہے۔ اشعریت کی تکیل امام باقلانی اور پہر امام غزالی کے ہاتھوں ۔

(ب) مشائيت

عربی مصنفین فلسفه و فلاسفه کی خاص اصطلاح سے کیا مراد لیتے ہیں ۔ یونان کا فلسفه مسلمانوں میں کب اور کس راہ سے پہنچا۔ اس کے متعلق مسلمانون میں کیا غلط فہمیان اور غلط مبحث پیدا ہوا۔ مشائیت کی اصطلاح کا خاص مفہوم ۔ اس میں اور اشراقیت میں فرق ۔

ا کندی ـ یہ عرب کا پہلا اور آخری فلسفی ہے۔یہ فلسفی سے زیادہ مترجم فلسفہ ہے ـ اس کے دل میں یونان اور یونا نیوں کی عظمت ـ اس پر معتمزله کا اثر ـ جان اسکو ٹس ایر بجنا سے اسکی معاصرت اور عقل و نقل کے تعلق میں دونون کا توافق ـ اس کا خاص اثر نفسیات و طبعیات پر اور ان میں اسکے خیالات کا خلاصه ـ

۲- فا را بی - معلم ثانی کا لقب - ارسطو کے فلسفہ سے متبعلق اس کے کارنامون کی اہمیت - اسکی تصنیفات ـ ارسطو و فلاطون کی تطبیق و توفیق اور پہر دونوں کی قرآ ن سے تطبیق کا نظریه ـ ارسطوکی اخلاقیات پر اسکی توجه 'اس کا نظریه سیاست ـ نظریه تعلیل اور اوسی سے اثبات خدا ـ نظریه روح و نفس ـ منطق کی اهمیت ـ اسکو صرف آلی علم نه قرار دینا بلکه فلسفه کی مستقل شاخ قرار دینا اور اسی پر ما بعد الطبیعیات کو مبنی نہیرا نا ـ اس کی اشراقیت ـ حقائق اشیا یا اعیان کے علم کی نفی اور اس میں کانٹ کی پیشروی ـ حقائق اشیا یا اعیان کے علم کی نفی اور اس میں کانٹ کی پیشروی ـ سے ابن سینا ـ اسکے عتصر حالات ـ تصنیفات ـ اسکے اور فار ابی کے تعلق کا ارسطو اور افلا ظون کے تعلق سے مقابله و مواذ نه ـ منطق میں قیاس کے سا تھه استقرا کے مباحث ـ کلیات کا وچود دی تعریف و تحدید کی دختی ـ الهیات کا موضوع و مباحث وجود کی تعریف و تحدید کی

نفی ـ وا جب و ممکن کی تقسیم ـ اعراض و جوا هرکی تقسیم ـ حقیقت جسم ممکنات سے واجب الوجودکا استنباط واستدلال ـ خداکی تو جیه و قدرت کا یه تصورکه " الواحدلایصدر منهالاالواحد ،، ـ هیولی و صورت کے مباحث ـ نفس و روح ـ نفس نباتی ـ نفس حیوانی اور نفس ناطقه ان کے علمی و عملی قوی ا -

اور ابن رشد کاشمار اکا بر مغربی فلاسفه میں۔ دیگر مغربی فلسفه کی تقسیم اور ابن رشدکاشمار اکا بر مغربی فلاسفه میں۔ دیگر مغربی فلاسفه میں ابن سینا و ابن رشد ابن باجه و ابن طفیل سے اس کا مقابله و مواز نه ۔ ابن سینا و ابن رشد میں فرق و تعلق ۔ ارسطو کے عقلی فلسفه کے متعلق اس کا غیر فلسفیانه غلو۔ خصوصاً اس کی منطق کے ناقابل هو نے کا دعوی۔ نظریه تعلیل و انکار معجز ات ۔ انفر ادی روح کی فنا ئیت ۔ عقل و نقل یا فلسفه و مذ هب میں تعلق ۔ حسن و قبیح یا خیر و شرکی عقلیت ۔ یا فلسفه و مذ هب میں تعلق ۔ حسن و قبیح یا خیر و شرکی عقلیت ۔ امام غز الی سے اسکی غیر معمولی مخالفت ۔ یورپ میں اسکی غیر معمولی مغالفت ۔ یورپ میں اسکی غیر معمولی مقبولیت اور اسکے اسبا ب ۔ خصوصاً موجود ہ یورپی میں حیرت انگیز معمولی مقبولیت اور اسکے اسبا ب ۔ خصوصاً موجود ہ یورپی دھنیت کے ساتہ ہ حریت نسوان وغیر ہ کے مسائل میں حیرت انگیز کشا به ۔

(ج) تصوف

ا - اصطلاح تصوف کی اصل و تحقیق - تصوف کا فلسفه اور خصوصاً فلسفه اشراقیت و فسلا طونیت سے مقابله و موازنه . اسلامی تصوف کی بنیاد ـ کتاب وسنت ـ صوفیانه زندگی اور رهبانیت ـ عملی و نظری تصوف کا منشا ، و مفهوم ـ نظری یا فلسفیا نه تصوف ـ مسلما نون میں ابتداء نظریات تصوف میں

عشق و محبت - اصل و وحد ة الوجود پر بحث - توحید ذات ـ توحید مصفات و توحید افعال کی تفریق و تفصیل ـ وحد ة الوجود کے قائل هو نے کے با و جود محققین صوفیا نے خالق و محلوق عبد و معبودکی قرآنی تعلیمات غیریت کوکس طرح محفوظ دکھا ہے ـ

(Contd.)

Paper 4: Indian Philosophy:—

- 1. The Philosophical implications of Vedic religion.
 - (a) The sense of the one in the many.
 - (b) The question of monotheism and Pantheism.
 - (c) Cosmology.
- 2. Philosophy of the Upanishads.
 - (a) Concepts of Atman and Brahman.
 - (b) Law of Karma.
 - (c) Ethics and theory of knowledge in the Upanishads.
 - (d) Beginnings of Sankhya, Yogo and other systems.
 - (e) Idealism and Realism.
- 3. Early systems of Religious Philosophy. Gita—its doctrines.
- 4. Systems of Philosophy—Darshanas.
 - (a) Charvaka.
 - (b) Buddhistic systems.
 - 1. Doctrine of Truth and Error.
 - 2. Theory of Being, Dialectic.
 - 3. Ethical disciplines.
 - 4. Philosophical standpoints.
 - (c) The Nyaya—Vaisheshika.
 - 1. Epistemology and Logic.
 - 2. Theory of Reality.
 - 3. Theory of Causation.

- 4. The automatic theory—Arambha Vada.
- 5. Psychology.
- 6. The proof of existence of Soul and God.
- 7. Apaverga and its means.
- (d) Sankhya—Yoga.
 - 1. Classification and analysis of the Pramanas.
 - 2. Theory of Reality, Evolution and Involution.

Pursha and Prakriti.

- 3. Sat Karya Vada.
- 4. Psychology—Parinama Veda.
 - 5. Practical philosophy.
 - 6. The Individual and the World.
 - 7. The question of Idealism or Realism.
 - 8. The concept of Ishwara.
- (e) Purva Mimansa.
 - 1. The Doctrine of Atman.
 - 2. Realism and Conceptualism.
 - 3. Different views of Mukti.
- (f) Uttra Mimansa (Advaita).
 - 1. Theory of knowledge, logic and dialecties.
 - 2. Brahma—Maya and Avidya.
 - 3. Theories of Creation—Viverta and Parinama.
 - 4. Ethical standard—Self Realisation, Nishkama Karma.

- 5. Steps of Realisation.
- 6. Mukti.
- 7. Saguna Brahma and Nirguna Brahma.
- 8. Other Development.
 - (a) Vishistadvaita.
 - (b) Dvaita.
 - (c) Shudhadvaita, etc.

Paper 5: Psychology:-

- I. The subject—matter.—The problem, scope and methods of Psychology; the relation of psychology to Physiology, Social Science, Logic and Ethics.
- II. The structure and functions of the Nervous system. The Body-Mind Problem, Psychological Hypothesis.
- III. Sensation.—The sense organs. Elementary Sensations; Blends and Patterns. Stimulus. General Characteristics of sensations. Cutaneous, Kinaesthetic, Gustatory and Olfactory sensations. Auditory and visual sensations.
- IV. Attention.—The Motor Response in attending. The shifting of Attention. What attracts attention. Sustained Attention and Distraction. Effort in attention. Selectivity of Attention and conditions determining selection. Span of attention. Attention and perception.
 - V. Perception.—Fundamental characteristics of perception. Figure and Ground. The Span of Apprehension. Signs and Meanings

- in perception. Perception of space, Change and Movement. Illusions.
- VI. Imagination.—The Image and the Percept.
 The play of Imagination. Empathy. Daydreams- Dreams. The enjoyment of Imaginative Art. The Psychilogy of inventive
 production.
- VII. Learning.—Various forms of Learning. The Conditioned Reflex. The Establishment of a Conditioned Reflex. Effect of distracting stimuli. Is all learning simply conditioning? Animal and Human Learning.
- VIII. Memory.—How we memorize and remember. Improvement of Memory. The immediate Memory span. The Learning curve. The process of Memorizing. Intentional Learning and unintentional Learning. Retention. Recall and Recognition. Memory Images. Image Types. Eidetic Images.

Hallucinations. Synaesthesia.

- IX. Thinking.—Characteristics of Thinking. Free Association and Controlled Association, Reasoning Inference and the relation of thought to language. Concepts and their development.
 - X. Feeling and Emotion.—The relation of Feeling to Activity, Emotion. The relation of Instinct to Emotion. Emotion and its organic accompaniments.
- XI. Activity.—Stimulus and Response. Motivation. Reflex action. Playful activity. Purposive activity. Dependable motives or

instincts. Instinct and Intelligence. Conflict of Motives, the State of Indecision, the process of Decision. Will.

- XII. Personality.—The development of Personality. Factors in Personality. Personality. Types. Integration and Disintegration of Personality. The Unconcious.
- XIII. Practical Applications of Psychology.—Intelligence Tests. Maladjustment and Psychotheray. Industrial Psychology.

Paper 6: ETHICS .:-

(Theoretical).

Scope and Method of Ethics

Ethics a Normative Science

Determination of the concept of the good.

The Psychological basis of conduct and normal judgements

Inslinct, Emotion, sentiment, Volition

The Relativity of moral judgement

The search for the absolute judgements

Main Ethical Theories.

- (a) Hedonism (b) Rudaemonism (c) Utilitarianism
 - (d) Self realisation (e) Evilutionary ethics
 - (f) Ethics of duty (g) Intuitionism.

Applied.

Rights and Duties and their Correlation Rights of the Individual Rights of Society and the State Social Justice Equlitarian Society

Totalitarian Society

Cioperation and competition

Function if the State

Nationalism and Internationalism

War and Peace

The Institution of property
The institution of marriage
The purpos of Punishment

• (e) Domestic Science.

Home Economics.

- I. Home Management. II. Home Technology.
 - 1. Bio-Chemistry.
- 1. Mothercraft.
- 2. Dietetics and Food Bacteriology.
 - 2. Bacteriology, Sanitation Science and Hygiene.

- 3. Problems of Adjust- 3. Interior Decoration. ment in family and home.
 - 4. Purchasing of
 House-hold equip-
- 4. Textile. Laundry Bleaching and Dyeing.
- House-hold equipments.
- 5. Technology of Cookery.
- 5. Psychology. Mainly Child Psychology.
- 6. House-hold and Social Economics.
- 7. Physiology and Hygiene.

I. HOME MANAGEMENT:-

1. Bio-Chemistry:—

- (a) Chemical and physical nature of such proteins, fats and carbohydrates, fats and mineral matter as are met with in food.
- (b) Metabolism of food.
- (c) Vitamins.
- (d) Chemical and physical nature of animal tissues, bones, muscles, blood and glands.
- -(e) Enzymes of the body and their action.
 - (f) Chemical and physical nature of animal secretions such as milk.
 - (g) Inorganic salts of the body.
- (h) Chemistry of Urine, perspiration, digestion, blood, respiration.
- (i) Chemical defence of the body, against the action of poisonous substances.
- (j) The fundamental principles and practice gravimetric and volum-metric analysis as used in good chemistry.

- (k) Determination of moisture, portein fat, sugar, and ash in common food materials.
- (m) Detection of food preservatives and adulterations.
- 2. Milk—The separation of sonstituents. Determination of specific gravity of total solids of Ash of portein and lactose and of fat by (a) Babcock
 - (b) the Werner Schmidt method.
- 3. Butter—Determination of water, fat, curd, and ash.
- 4. Cereals—Microscopical examination of starches. Determination of gluten and curds fibre in flour.
- 5. Yeast—Its action as a raising agent and its action in the operation of fermented beverages Preparation and analysis of vinegar.
- 6. Baking Powder—Their general qualitative examination, determination of carbon dioxode and starch.
- 7. Beverage—Non-Fermented.
- 2. Dietetics and Food Bacterioligy:—

Nutritive value of carbohydrates, proteins and fats of food.

Vitamins and deficiency diseases.

Mineral salts in relation to food requirements.

Caloric value of foods.

Nutritive table of meats, fish, careal foods and oils.

Vegetable and pulses, milk and milk products.

Diet for children of varying ages.

A balanced diet for adults.

Diets for pregnancy and lactation, constipation, diabetes. Invaild diets.

Food deterioration. Preservation and storage of foods stuffs.

The normal and pathological becteriology of milk, butter and cheese. The essentials of an adequate diet based upon the nutritive properties of food materials.

Application of these facts in the light of physiology made to the feeding of the individual throughout infancy, childhood, adolescence, adult life and old age.

Problems of Adjustment in family and home:—

The Theory of principles of Book-keeping. Cash Accounts. Budgetting. Saving Banks. Issuing of Cheques. Investments.

Textile (Fibres and Fabrics). Laundry and Applied Chemistry:—

The Structure, chemical composition and properties of the chief textile fibres and their utility according to composition and weave.

The testing and analysis of fibres and fabrics.

Properties and nature of textile. (Reference to Boston).

Bleeching and dyeing by commercial and indigenous dye stuff.

Chemistry of Stain removers and bleechers.

Chemistry and nature of dyeing process.

Classification of dye stuff.

Dry cleaning, disinfection of linen.

Latest equipment of laundries.

Modern labour saving devices.

5. Technology of Cookery:—

- (a) Principles and methods of cookery based on dietetic principles underlying principles of the Cookery of different foods and calculation of the cost of foods prepared.
- (b) Standarized methods of cookery on the basis of the composition of foods.

Special consideration given to the preparation of attractive dishes, with special reference to the place in the menu, stress being laid on choice, appearance, texture food value and cost of meals. Advanced and special preparation. Receipts to be given and the finding of the caloric value of the dishes prepared.

III. Home Technology:-

(1) Mothercraft. St. John's Ambulance Certificate.

Definition and scope. Enumeration of sections covered by other parts of course. Standards of living. Habits. Happy motherhood. Habits physical, mental spiritual aesthetic. Birth, the infant, the toddler, the older child, normal development and care. Care of the sick child. Child psychology. The importance of the father in the family. Social relationships.

(2) Bacteriology—Sanitation and Hygiene:—

The nature, structure and functions of bacteria, the sterlization of media and apparatus, the fundamental principles of immunity. The fundamental principles and their application to disease, preparation as they relate to water supply, milk sup-

ply, general food supply, the disposal of waste, sewage and garbage, ventilation, lighting, heating and housing.

- (3) Interior Decoration—Appreciation of colour and design.
 - House planning, room arrangement, lighting, making of plans, model rooms and furniture to scale.
 - Application of the history of furniture to present day circumstances.
 - Acquaintance of period decoration in tapestries, furniture, pewter ware, glass and China. Cutting out and making of pictures. Laying of tables and period decoration.
 - Discuss and study intelligently the relative merits, of distemper - paint - enamel wallpaper - panelling.
 - The cost and durability and importance of spray painting and latest modern devices.
 - The use of coluor and study of illustration of merchandise and visits to an art museum for the purpose of studying textiles furniture of the various countries. ceramics (pertaining to the manufacture of porcelain and earthen ware).

(4) Purchasing of Household equipment:—

Requirement for activities related to labour saving house efficiencies - cookers - independent boilers. Utensils for providing and storing of food for the family and different preparations of food - decoration meal service.

- Equipment for activities related to clothing work materials tables for cutting out and other sewing and embroidery machines.
- Equipment for activities related to home laundry laundry tubs ironing boards iron (various) peggys wash-boards boilers.
- Equipment for study of home management cabinets chairs settees tables divans takhts dressers masnad gaotakia cushion.
- Equipment for care and guidance of health and home care of the sick- medicine cabinets containing bandage and emergency supplied medicines bed rest and bed side table blocks for raising ordinary beds in illness bed-linen weighing scales bed pulleys and cage.

(5) Household and Social Economics:—

- (a) An outline of the economics and industrial history of India. The influence of economic and industrial conditions on the home.
- (b) The factors influencing the price of commodities demand price supply price wages rent capital and its remuneration Modern industrial problems especially such as concern women and children.
- (c) The state and the individual. Social responsibility with reference to the infant, the child, the adult. Problems of infantile mortality. Public health education-crime mental defective destitution and employment.

Definition and scope of civics. Its relation to other sciences. Evolution of civic ideas. The historical development of the Indian Civilization and the Civic ideas. Citizenship with reference to family, village, town, district, province, country and the empire.

Forms of states and Governments. Functions of Government, Constitution. The Indian Administration. Reform Movements and formation of Associations. Social Economics.

(6) Psychology—Pschology as a science. Methods of Psychology. The General structure of the nervous system and its influ-Phenomena of menence on mental life. tal life. Mental Hygiene. The difficult The problems of adolescence. child. Simple abnormal psychology. Individual difference due to race heredity, environ ment, maturity. Sex. Intelligence tests. The super-normal child. The backward The ways of learning - habit forming, remembering and forgetting - fatigue and boredom.

(7) Physiology and Hygiene.—

- (i) Physiology:—
- (1) Structural principles.
- (2) Biochemical principles.

The elementary constituents of protoplasmthe proximate constituents. (a) the lipoides,

- (b) the carbo-hydrates, (c). Proteins the Phenomenuous of Organic Synthesis.
- (3) Biophysical Principles.

The energy of molecules in solution - the properties of colloids - the passage of water and solu-

tes through membranes - the electrical changes in living tissues - catalytic and enzyme action.

(4) Muscle:—

Structure - excitation - mechanical changes during contraction - chemical composition and changes during activity - electrical changes - plain muscle and other contractile tissues.

(5) Nerve:—

Structure - excitation - mechanical changes during contraction - nerve impulses - excitability - polarization phenomena - nature of nerve impulse.

- (6) The Autonomic Nervous System.
- (7) The Central Nervous System.

General features—structures of nerve cellsdegeneration and regeneration - synopses - reflexaction - chief tracts - general sensation - voluntary movements. The different parts of the central nervous system, speech.

- (8) Special Senses.—
 - (a) Eye—Structure of eye ball-nourishment and properties of eye the optical system of the eye refraction.
 - (b) Ear—Sound structure of auditory apparatus phenomena of hearing.
 - (c) Sensation of smell and taste.
- (9) Nutrition.

Metabolism - starvation - significance of foodstuffs - Vitamins - normal diet of man.

(10) Psychology of Digestion.

Digestion in Mouth - stomach - intestines - deglutation - Movements of stomach and intestine-digestive juices.

- (11) Absorption of Foodstuffs.
- (12) Intermediate Metabolism.
- (13) The blood.

Quantity and composition - cells - the coagulation of blood.

- (14) Physiology of the Heart.
- (15) Blood vessels and circulations.

Structure of blood vessels. Elementary hydrodynamics of the circulation - blood pressure - circulation through arteries - capillaries and veins - nervous control of blood vessels - pulmonary - hepatic and cerebral circulation.

- (16) The Spleen.
- (17) Lymph Tissues fluid cerebro-spinal fluid.
- (18) Respiration.

Respiratory organs - respiratory movements - composition of gases.

(19) Renal Excretory System.

Composition of urine - secretion of urine - Physiology of maturation.

- (20) The skin and body temperature.
- (21) The Endocrine Organs.
- (22) The Reproductive System.

7. Physiology and Hygiene—(contd.).

(ii) Hygiene:—

Water—Sources, purification, storage, distribution, water-borne diseases. Food and Dietetics—Constituents. Vitamins, relation to health, milk and diary-far-

ming.

Air, Meteorology and Climate.—

Disposal of Sewage—Scavenging, Conservancy, privis, latrines, pail-system, water-carriage system. Disposal - Trenching. incineration, Biological Treatment.

Housing.—

Lighting - Ventilation.

Personal Hygiene.—

Schools.—

Medical inspection of—'

Children-Welfare Centres—

Maternal and Infancy mortality, Birth control and Eugenics.

Preventable Diseases.

Animal parasites and insect carriers. Hospitals. Rural Hygiene and Fairs.

Occupational Diseases and Offensive trades.

Burial.

Vital Statistics.

D. B. Sc. EXAMINATION.

B. Sc. EXAMINATION.

1353—1354 F. (1944—1945)

Rules and subjects for Examination.

- 1. The examination for the degree of Bachelor of Science shall be held once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe.
 - 2. The examination shall be open to:—
- (a) All students who have satisfactorily completed a regular course of study in a College of the University for not less than two academic years after passing the Intermediate Examination of the Osmania University or an examination or test accepted by the University as equivalent thereto, with Physics and Chemistry as their optional subjects.
- (b) Students who have satisfactorily prosecuted a regular course of study for the year immediately preceding the examination at a College of the Osmania University and who have been permitted under Regulation (3) below to reckon a previous year of study since passing the Intermediate Examination or its equivalent at a College of a University recognized for the purpose by the University.
- 3. Any student may be admitted to the final class of a College of the Osmania University provided he produces a certificate from the Principal of the College (affiliated to any of the Universities recognized by the University) he was last attending that the penultimate year of his degree course at College has been duly kept according to the regulations in force at the University from which he is migrating and that in the Principal's opinion he was fit for promotion to the final class of that College.

- 4. A candidate who has passed the B.Sc. Examination with a particular subject as his subsidiary shall be permitted to reappear for the B.Sc. Examination with the same subject as main provided that he has undergone the course of study prescribed for the subject (both theoretical and practical) by attending the University for a period of not less than one year. He shall be exempted from re-examination in the subsidiary subjects concerned.
- 5. Laboratory Assistants serving in a College of the University will be allowed to appear privately for this examination provided that they produce from the Principal of the College, in which they are or have been employed, the certificate of Laboratory work required under Regulation 15 and also a certificate from the same authority of continuous and approved service for not less than three years previous to the date of their application for permission to appear at that examination. It is also necessary that by the date of the Examination not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination or its equivalent.
- 6. Candidates from a college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as *private* candidates to a subsequent-examination, provided that they do not change the subjects they had studied at College. In case they change any of their subjects they shall be required to put in fresh attendance in the College in the subject or subjects they have changed.

Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the University College. They should, therefore, ascertain, from the Registrar before applying for permission, whether regular students of the University are taking up those subjects.

- 7. Applications of private candidates in the form prescribed must reach the Registrar not less than two months before the examination accompanied by a fee of Rs. 36.
- 8. In the case of College candidates application for admission and certificates of attendance and progress in the form prescribed together with a fee of Rs. 36 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examinations.

9. No student will be allowed to appear at the examination, unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination. He shall have to make up the same percentage of attendance separately in the practical course of lectures. The Syndicate may, however, condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially, ill-health when the application is supported by a certificate by an authorised Medical Officer, which can satisfy the Head of the Institution.

A member of the U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Corps Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

- 4. A candidate who has passed the B.Sc. Examination with a particular subject as his subsidiary shall be permitted to reappear for the B.Sc. Examination with the same subject as main provided that he has undergone the course of study prescribed for the subject (both theoretical and practical) by attending the University for a period of not less than one year. He shall be exempted from re-examination in the subsidiary subjects concerned.
- 5. Laboratory Assistants serving in a College of the University will be allowed to appear privately for this examination provided that they produce from the Principal of the College, in which they are or have been employed, the certificate of Laboratory work required under Regulation 15 and also a certificate from the same authority of continuous and approved service for not less than three years previous to the date of their application for permission to appear at that examination. It is also necessary that by the date of the Examination not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination or its equivalent.
- 6. Candidates from a college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as private candidates to a subsequent examination, provided that they do not change the subjects they had studied at College. In case they change any of their subjects they shall be required to put in fresh attendance in the College in the subject or subjects they have changed.

Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the University College. They should, therefore, ascertain, from the Registrar before applying for permission, whether regular students of the University are taking up those subjects.

- 7. Applications of private candidates in the form prescribed must reach the Registrar not less than two months before the examination accompanied by a fee of Rs. 36.
 - 8. In the case of College candidates application for admission and certificates of attendance and progress in the form prescribed together with a fee of Rs. 36 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examinations.

9. No student will be allowed to appear at the examination, unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination. He shall have to make up the same percentage of attendance separately in the practical course of lectures. The Syndicate may, however, condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially, ill-health when the application is supported by a certificate by an authorised Medical Officer, which can satisfy the Head of the Institution.

A member of the U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Corps Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

III—Theology or Morals (one paper)

100

Examination in Theology or Morals shall be regarded as qualifying Examinations and the marks gained by a candidate in the subjects shall not be included in the grand total of the marks; but no student can go for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at that examination.

All the papers detailed above will be of three hours' duration.

- 15. No candidate will be allowed to appear for the B.Sc. Examination unless he produces from the Head of the Department of English that he has written 20 essays during the course of two years' study. Failures who join the college will be required to write 10 essays.
- 16. No candidate from a college of the University will be permitted to present himself at the B.Sc. Examination in any Science subject for which a practical course is necessary under these rules unless he produces a certificate from the Principal of such college to the effect that he has completed the required course in the college laboratories. In the case of private candidates appearing under Regulation 4 evidence must be produced that the candidate has completed the required course in a laboratory approved of by the University.

- 17. No candidate shall be declared to have passed the B.Sc. Examination unless he obtains 33 per cent. marks in the subject. In the main subjects in which practical test is necessary, the required percentage shall be 33 per cent. in the theoretical part of the examination as well as in the practical test. In subsidiary subjects, the pass percentage will be 33 per cent. on the whole including theoretical as well as practical test.
- 18. Those of the successful candidates who obtain 60 per cent. or more of the aggregate marks will be placed in the first class, those obtaining 45 per cent. or more but less than 60 per cent. in the second class, and the others in the third class.

The names of successful candidates placed in the first class, shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the second and third classes shall be arranged in serial order of their roll numbers.

- 19. A certificate signed by the Chancellor shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 20. Any student who fails to pass the examination on account of his having failed to obtain 33 per cent. in English or in his selected subject, will be considered to have passed the whole examination, on his passing at a subsequent examination merely in the subject in which he has failed, provided that the marks gained by him in such subject in the previous examination do not fall short of 25 per cent. and provided in that examination he has secured an aggregate total of 40 per cent.

Text-Books.

I. ENGLISH.

Non-Detailed Texts:—

- (a) The Mayor of Casterbridge by Thomas Hardy. (Macmillan—Cottage Library Editon).
- (b) Strife by Galsworthy (Duckworth-Nelson & Co.).
- (c) Everyday Life in Ancient Greece and Rome by C. E. Robinson and Everyday Life in Rome by H. A. Treble & K. M. King (In one Volume—Oxford University Press).

II. OPTIONALS.

a(i) Physics (Main).

The following books are recommended:—

- (1) Richardson's Sound.
- (2) Saha & Srivastava's Junior Heat.
- (3) Hutchinson's Electricity and Magnetism in 2 volumes.
- (4) Houston's Treatise on Light. Portion dealing with Geometrical Optics only).
- (5) Worsnop and Flints' Practical Physics.

- (6) The book on "Physical Optics" compiled by Mr. M. A. Rahman Khan (Osmania University Series).
- (7) Properties of Matter, (خواص ماده) compiled by Messrs. Syed Md. Ali Khan and Syed Abdur Rahman.

For detailed syllabus vide appendix-a(i).

a(ii) Physics (Subsidiary).

(1) Duncan and Starling's Text-book of Physics (Osmania University Series).

(2) Allen and Moore's Practical Physics. (Osmania University Series).

For detailed syllabus vide appendix-a(ii).

b(i) CHEMISTRY (MAIN').

1. Inorganic Chemistry by Partington. (Osmania University Series).

2. Systematic Inorganic Chemistry by Caven and Lander. (Osmania University Series).

- 3. Introduction to Physical Chemistry by Walker. (Osmania University Series).
- 4. Outline of Chemistry by Fenton. (O.U.S.).
- 5. Organic Chemistry by Perkin and Kipping. (O.U.S.).
- 6. Practical Organic Chemistry by Cohen. (O. U.S.).
- 7. Systematic Qualitative Analysis by Caven. (O.U.S.).
- 8. Quantitative Analysis and Inorganic preparation by Caven. (O.U.S.).
- (9) A class book of Physical Chemistry by Lowry and Sugdon.
- (10) Outlines of Industrial Chemistry by Thorpe. For detailed syllaubs vide appendix—b(i)

b(ii) Chemistry (Subsidiary).

(1) Inorganic Chemistry by Alexander (O.U.S.) Smith, Parts I & II.

(2) Theoretical Organic Chemistry by Cohen.

(3) Text-book of Physical Chemistry by Firth.

(4) Intermediate Chemistry by Lowry and Cavell.

(5) Practical Chemistry by Bruce and Harper.

For detailed syllabus vide appendix—b(ii).

C. MATHEMATICS.

The following books are recommended:—

Pure Mathematics.

1. Higher Algebra by Hall and Knight. (O.U.S.).

2. Plane Trigonometry by Loney, Part II. (O.U.S.).

3. Co-ordinate Geometry by Grace and Rosenberg. (O.U.S.).

4. An Elementary Treatise on the Calculus by Gibson. (O.U.S.).

5. Chapters on Differential Equations from Edward's Integral Salculus. (O.U.S.).

Applied Mathematics.

- 1. Elements of Statics by Loney.
- 2. Elements of Dynamics by Loney.
- Elements of Hydrostatics by Loney.
 Elements of Astronomy by Loney.

For detailed syllabus vide appendix—c(i-ii).

d(i) BOTANY (MAIN).

$Books\ recommended:$

- Raber, C.—Principles of Physiology.
 Maximov.—Text-book of Plant Physiology.
- 3. Pool, J.—Flowers and Flowering Plants.
- 4. Small.—Text-book of Botany.
- 5. Swingle.—Text-book of Systematic Botany.
- 6. Caver, S.—Practical Botany.
- 7. Coulter, Barnes and Cowles.—Text-book of Botony, 3 Volumes.
- 8. Lock.—Variation, Heredity and Evolution.
- 9. Scott.—Structural Botany. Vols. I &II.
- 10. Strasburger.—Text-Book of Botany.
- 11. Strasburger and Hillhouse.—Practical Botany.
- 12. Green.—Vegetable Physiology.13. Dendy.—Outlines of Evolutionary Biology.
- 14. Punnett.—Mendelism.
- 15. Green, T.R.—Manual of Botany, Vols. I &II.
- 16. Bower.—Botany of the Living Plant.
- 17. Haberlandt.—Physiological Plant Anatomy.

For detailed syllabus vide appendix—d(i).

d(ii) Botany (Subsidiary).

$Books\ recommended:$

- 1. Coulter Barnes and Cowles.—Text-book of Botany Vols. 1, 2, and 3.
- 2. Lowson and Sahni.—Text-book of Botany. (Indian Edition).
- 3. Strasburger.—Text-book of Botany.
- 4. Scott.—Structural Botany.
- 5. Dendy.—Outlines of Evolutionary Biology.

For detailed syllabus vide appendix—d(ii).

e(i) ZOOLOGY (MAIN).

Books recommended:—

- 1. Shipley & MacBride.—Zoology. (An Elem tary Text-book).
- 2. Parker & Haswell.—Text-book of Zoology, Value I & II.
- 3. Hourne, G. C.—An Introduction to the Study the Comparative Anatomy of A mals, Vols. I and II (Messrs. Bell & Sons, Ltd. London).
- 4. Parker & Bhatia.—Text-book of Zoology Indian Students.
- 5. Borradaile.—The Animal and its Environme
 - 6. Kingsley or Wiedersheim.—Comparative Atomy of Vertebrates.
 - 7. Dendy.—Elements of Evolutionary Biology.
 - 8. Marshall.—The Frog.
 - 9. Marshall & Hurst.—Practical Zoology.
 - 10. The Indian Zoological Memoirs.
- 11. L. A. Adams.—Introduction to Vertebrates.
- 12. Aute Richards.—Outline of Comparative E bryology.
- 13. J. Smith.—The Primitive Animals.
- 14. Goodrich.—Living Organisms (An account their Origin and Evolution).
- -15. MacBride.—An Introduction to the Study Heredity.
 - 16. Jenkinson.—Vertebrate Embryology.
 - 17. Lankester.—Extinct Animals.
 - 18. Gadow.—Wanderings of Animals.
 - 19. Jordan & Kellogg.—Evolution and animal li

20. Doncaster.—Cytology.

21. Heilprin.—The Distribution of Animals.

For detailed syllabus vide appendix—e(i).

e(ii) Zoology (Subsidiary).

Books recommended:—

Parker and Haswell . . Text-book of Zoology, Vols. I and II.

Borradaile ... Manual of Zoology.

Marshall .. The Frog.

Parker and Bhatia ... Text-book of Zoology for Indian students.

Thomson .. Outlines of Zoology.

Marshall and Hurst ... Practical Zoology.

The Indian Zoological Memoirs.

For detailed syllabus vide appendix—e(ii).

f. GEOLOGY (SUBSIDIARY).

$Books\ suggested:$ —

Text-book of Geology Longwell Knof and Flint. Part I (Physical).

Text-book of Geology . . Lake and Rastall.

Mineralogy (Revised.. Dana. edition).

Petrology .. Harker.

Minerals and Micros Smith.

Geology of India .. Wadia.

Geological and Topogra- Dwarry House phical Maps.

Aid to Practical Geology.. G. Gole.

Mineralogy (Revised Dana & Ford. Edition).

On Palaeontology lectures to be given by the Professor according to the requirements.

For detailed Syllabus vide appendix (f).

g. Domestic Science (Subsidiary).

No book is prescribed.

For detailed Syllabus vide appendix—(g).

III. THEOLOGY OR MORALS.

(a) Theology (for Hanafi students):—

(۲) برائے مطالعہ سرسری ۔ دین دانش (مولوی مجمود علی صاحب) حکت اسلامیہ (مولوی عبدالقدیر ضاحب)

For detailed syllabus vide appendix—(h).

(b) Morals (for non-Hanafis and non-Muslims).

No book is prescribed.

For detailed syllabus vide appendix—(i).

APPENDECIS

Detailed Syllabuses

II Optionals:—

a(i) Physics (Main).

Theory—The course includes a more extended study of the matter included in the Intermediate Course and in addition the following:—

General Physics and Properties of matter.

Uniform motion in a circle. The Hodograph. Simple Harmonic Motion. Composition of Simple Harmonic Motions. Angular Velocity and Angular Accelerations.

Angular Momentum. Moments of Inertia in simple cases.

Gravitation. The Compound Pendulum and accounts of experiments to find the mean density of the Earth.

Elasticity. Hooke's Law. Compressibility of gases (at high and low pressure) and liquids. Compressibility and Rigidity of Solids. The Elastic Limits. Strain due to simple longitudinal pull. Young's Modulus and its expression in terms of "k" and "n".

Bending in one plane, of bars of simple and uniform cross sectional area. Simple twisting of wires of circular cross sectional area by couple in plane at right angles to length. Torsional rigidity. Application to Torsion Balance and shafts. The Bifilar Suspension.

Capillary phenomena and general theory of Surface Tension.

Diffusion of Liquids and Gases. Osmosis. Viscosity. The elements of Kinetic Theory and its application to explain the simple gas laws. Van der Waal's Equation. Modern methods of producing high Vacua and of measuring pressure.

Heat.—The methods of calorimetry and thermometry. Vapour pressures. Critical temperature. Conduction and diffusion of heat and the determination of constants. Radiation and Absorption. Laws of Cooling. Methods of measuring radiation. Stefan's Law. Laws of Thermodynamics and their simple applications. Entropy.

Light.—Velocity of Light. Photometry. Combination of two or more thin lenses. Thick lenses. Achromatism in lens system. The Telescope and the Microscope. Direct vision Spectroscope. Rainbow.

The Wave theory. Simple Interference Phenomena. Huygen's Principle. Explanations of Rectilinear propagation. Reflection and Refraction of light. Action of mirrors, prisms, and lenses reviewed from this stand point.

Simple Diffraction Phenomena. Diffraction Gratings and determination of wave lengths. Spectrum analysis. Line and Band Spectra. Elementary knowledge of Bohr's theory of Hydrogen Spectrum. Doppler's Principle. Double Refraction and Polarisation of light. Rotatory Polarisation, Simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Magnetic Moment and Intensity of Magnetization. Magnetic potential and equipotential lines and surfaces. Interaction of two short magnets. Determination of field strength.

Magnetic Shell. Its potential energy in a magnetic field. Magnetic induction in magnetic substances.

Magnetic Permeability and Susceptibility. Outline of the theory of magnetism.

The magnetic field of the Earth. The magnetic elements and their variations. The Compass and its corrections.

Electricity.—Electric Capacity. Dielectric constant. Distribution of Electricity on the surface of Conductors. Total Normal Inducton. Gauss's theorem. Value of electric forces in simple cases of distribution. Electric images. The mechanical force on charged conductors. Energy of electrified system. Electrometers and their use.

Tubes of induction and lines of force. Stresses in tubes and pressure at right angles to them.

Wheatstone's Bridge. Specific Resistance. Resistance Thermometer. Conductivity of Electrolytes. Ionisation. Migration of Ions. Accumulators. Standard cells. The potentiometer system of measurements. Thermo-electricity. Application of thermodynamics. Peltier and Thomson's Effects. Thermo-electric diagrams. Electromagnetic induction. Induction coils. Energy of circuit carrying current when placed in a magnetic field. Mechanical force on conductors carrying a current. Moving coil instruments. Theory of Ballistic Galvanometers. Lenz's Law. Determination of Current, Resistance, E.M.F. and Capacity in absolute measure. Elements of alternating current theory. The oscillatory discharge of a condenser.

The elementary theory of the continuous current dynamo and motor. General principles of the application of electricity to lighting. Power transmission. Telegraphy and Telephony.

Elements of wireless telegraphy and telephony, with the theory of the thremionics. The discharge of electricity through gases. X-Rays and radioactive phenomena.

Sound—The transmission of energy through material media by wave motion. Speed of propagation of waves of permanent type. Forced and free vibrations. Resonance. Nature of musical sound. Pitch scales. Reflection and refraction of sound. The vibration of strings, bars, plates and gas columns. Organ pipes. Interference phenomena. Analysis of sound. Sensitive flames. Sound ranging. Measurement of wave length, velocity and pitch.

Practical Course.—Candidates will be required to possess general acquaintance with the phenomena and to make Physical measurements dealing with these phenomena.

a(ii) Physics (Subsidiary).

The course will be of somewhat lower standard than that in which Physics is taken as a main subject and the syllabus will be the following:—

General Physics and Properties of Matter .-

Uniform motion in a circle. The Simple Harmonic Motion. Composition of Simple Harmonic Motions. Angular Velocity and Angular Accelerations.

Angular mometum. Moments of Interia in simple cases.

Gravitation. Elasticity. Hooke's Law. Compressibility of gases (at high and low pressure). Young's Modulus. Torsion balance.

Capillary phenomena and surface Tension.

Diffusion of liquids and gases. Osmosis. Viscosity. The elements of Kinetic theory and its application to explain the simple gas laws. Van der Waal's Equation. Method of producing high vacua. Macleod Gauge. Resultant pressure and Centre of Pressure in simple cases.

Heat.—The methods of calorimetry and thermometry. Vapour pressures. Critical temperature. Conduction and diffusion of heat and the determination of constants. Radiation and Absorption. Laws of Cooling. Methods of measuring Radiation. Laws of Themodynamics and their simple applications.

Light.—Velocity of Light. Photometry. Achromatism in lens systems. The Telescope and the Microscope. Direct vision Spectroscope.

The Wave Theory. Simple Interference Phenomena. Huygen's Principle. Explanation of Reflection and Refraction of light. Action of mirrors, prisms, and lenses reviewed from this stand point.

Simple Diffraction Phenomena. Diffraction Gratings and determinations of wave lengths. Spectrum analysis. Line and Band spectra. Elementary knowledge of Bohr's theory of Hydrogen Spectrum. Doppler's Principle. Double refraction and polarisation of light. Rotatory polarisation. Simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Magnetic Moment and Intensity of Magnetization. Magnetic potential. Determination of field strength.

Magnetic Shell. Magnetic induction in magnetic subtances. Outline of the Theory of Magnetism.

The magnetic field of the Earth. The magnetic elements and their variations.

Electricity.—Electric Capacity. Dielectric constant. Lines of force, Coulomb's Law. Quadrant Electrometer.

Wheatstone's bridge. Specific resistance. Resistance thermometers. Conductivity of electrolytes. Ionisation. Migration of Ions. Accumulators. Standard cells. The potentiometer system of measurements. Thermo-electricity and Themo-couples. Peltier and Thomson's effects. Electromagnetic Induction. Induction coils. Energy of circuit carrying current when placed in a magnetic field. Mechanical force on conductors carrying a current. Moving coil instruments. Ballistic galvanometers. Lenz's Law. Determination of Current, Resistance, and E. M. F. and Capacity in absolute measure.

Elementary theory of the Direct Current Dynamo and Motor.

The discharge of electricity through gases. Cathode rays, Hertzian waves and X-rays.

Thermionic valve.

Sound.—The transmission of energy through material media by wave motion. Speed of propagation of waves of permanent type. Forced and free vibrations. Resonance. Nature of musical sound. Pitch scales. Quality. The vibration of strings, and gas columns. Measurements of wave length, velocity and pitch.

Practical Course.—Candidates will be required to possess general acquaintance with the phenomena

and to make physical measurements dealing with these phenomena.

PRACTICAL WORKS FOR SUBSIDIARY PHYSICS.

Properties of Matter.

(1) Young's Modulus by stretching of wire.

(2) Surface Tension of liquid by rise in a capillary tube and by Drop Method.

(3) Vicosity of a liquid by flow through a capillary tube.

Heat.

(4) Coefficient of Expansion of a liquid by Weight Thermometer.

(5) Constant Volume and Constant Pressure Gas Thermometers.

(6) Melting point of solid.

(7) Specific Heat of solids and liquids with Radiation Correction.

(8) Co-efficient of Thermal Conductivity of:-(a) Good conductors (Searle's method)(b) Bad conductors (Lees' method)

(9) Mechanical Equivalent of Heat.

Sound.

- (10) Determination of Frequencies of tuning forks with a sonometer.
- (11) Velocity of Sound by Kundt's tube.
- (12) Melde's experiments.

Light.

(13) Refractive Index of a liquid and a solid by means of a Spectrometer.

(14) Focal lengths of mirrors and thin lenses using an Optical Bench.

(15) Wave length of monochromatic light by Diffraction Grating.

(16) Photometry.

Magnetism.

- (17) Determination of 'M' and 'H'.
- (18) Determination of Magnetic Dip.

Electricity.

- (19) Measurement of Current by Tangent Galvanometer.
- (20) Measurement of Specific Resistances of wire:—
 - (a) by Metre Bridge.
 - (b) by Post Office Box.
- (21) Measurement of Internal Resistance of a cell by Potentiometer.
- (22) Measurement of current by Potentiometer.
- (23) Comparison of E. M. F.'s by Potentiometer.
- (24) Measurement of Temperature Co-efficient of resistance of coil.
- (25) Determination of Electro-Chemical Equivalents of H and Copper.
- (26) Determination of the Mechanical Equivalent of Heat by Joule's Calorimeter.
- (27) Measurements of Temperature by Thermo-Electric Couple.
- (28) Comparisn of Capacities by Ballistic Galvanometer (Direct Deflection Method).

b (i) CHEMISTRY (MAIN).

Theoretical.

General and Physical—(Approximately 90 lectures)

N.B. Emphasis will be laid on the application of physico-chemical principles to industry.

- 1. Periodic classification of the elements, Radioactive properties of matter. Modern conception of the structure of the atom. Electronic theory of Valency treated in an elementary way.
- 2. Kinetic theory of gases. Important deductions from the theory. Van der Waal's equation.
- 3. Physical properties of liquids such as density, refractivity and optical activity and their relation to chemical constitution, treated in a general way.
- 4. Properties of solids, melting point and specific heat. Structure of crystals treated in a general way.
- 5. Solution of gases, liquids and solids in liquids. Henry's Law. Dalton's law of Partial pressures. Distillation of mixtures. Partition law.
- 6. Phase rule and its application to systems: Water; sulphur; potassium chloride water; lead-silver.
- 7. Thermo-chemical changes. Heats of reaction, formation, combination and solution, Hess's law First and Second Law of Thermodynamics.
- 8. Osmotic pressure. Van't Hoff's theory of dilute solutions, lowering of the vapour pressure, elevation of the boiling point, and depression of the freezing point of a solvent. Determination of the molecular weight of a dissolved substance.
- 9. Law of mass action. Its historical account, mathematical representation and application to homogeneous equilibria. Le-Chatalier's principle and its application to chemical equilibria.

- 10. Velocity of reactions in homogeneous systems Uni-and bi-molecular reactions. Determination of the order of reaction. Catalysis in homogeneous and heterogeneous systems.
- 11. Ionic-theory. Migration of ions. Transport numbers. Specific equivalent and molar conductivity. Mobilities of ions. Absolute velocity of ions
- 12. Ostwald's dilution law: Ionisation of water Application of ionic theory to hydrolysis of salts and analytical Chemistry. Strengths of acids and bases Solubility product and its applications to qualitative analysis. Neutralisation. Buffer solutions. Indicators and their action. Determination of PH values by means of indicators and buffer solutions.
- 13. Classification of colloids. General Methods of their preparation and purification. General properties of lyophillic and lyophobic colloids. Application of colloids to every-day life and Industry treated in an elementary way.

Inorganic:—(Approximately 90 lectures)

- 1. A study of the periodic classification of the elements.
- 2. The occurrence, preparation, properties and uses of the following elements and their chief compounds, outlines of manufacturing methods of those in italics:—

He, Ne. A Li, Na, K, Rh, Cs, Cu, Ag, Au, Be, Mg, Ca, Sr, Ba, Zn, Cd, Hg, Ra, B, Al, Tl C, Si, Zr, Sn, Pb, N, P, As, Sb, Bi, O, S, Se, Te, Cr. Mo, W, U, F, Cl, Br, I, Mn. Fe, Co, Ni, Pt,

- 3. Manufacture of sulphuric acid, nitric acid, sodium carbonate, calcium cyanamide, calcium nitrate, sodium nitrate, ammonium sulphate, cement, glass, matches, bleaching powder, white lead.
- 4. The reactions involved in the separation of basic radicals.

ORGANIC: (Approximately 90 lectures)

Modes of occurrence, preparation, properties and constitutional formulæ of the following together with a brief description of the methods of manufacture of those underlined:—

The Aliphatic compounds—Paraffins:—Methane, ethane, propane, butane, pentane, Isomerism.

Petroleum industry, separation of important fractions and their uses, Cracking, Flash point.

Halogen derivatives of the paraffins: methyl and ethyl halides, methylene chloride, ethylene and ethylidine chlorides, *chlorform*, *iodoform*, carbon tetrachloride.

Saturated monohydric alcohols: *Methyl* and *ethyl alcohols*, theories of fermentation, manufacture of beer, wines and spirits, Industrial alcohol, fusel oil, methylated spirit, alcoholometry, propyl and butyl alcohols.

Ethers: Methyl and ethyl ethers. Methylated ether, simple and mixed ethers, Metamerism. Aldehydes and ketones: Formaldehyde, acetaldehlyde,

chloral, chloralhydrate, acetone, simple and mixed ketones, polymerisation and condensation.

Fatty acids:—Formic acid. acetic acid, mono, di and trichlor-acetic acids, manufacture of vinegar, propionic, butyric and valeric acids, oils, fats and waxes, Iodine value, saponification value. Manufacture of soaps, "Stearine" candles, Butter and butter substitutes.

Acid chlorides, anhydrides and amides:—Acetyl chloride, acetic anhydride, mixed anhydrides, formamide, acetamide.

Esters: Ethyl formate, ethyl acetate, ethyl nitrite, ethyl nitrate, amyl nitrite, ethyl hydrogen sulphate and diethyl sulphate.

Nitroparaffins: Nitromethane, nitroethane, Primary, secondary and tertiary nitroparaffins. Distinction between nitroparaffins and alkyl nitrites.

Amines: Methyl, dimethyl and trimethyl amines, ethylamine, Quaternary ammonium compounds.

Cyanogen compounds.—Cyanogen, hydrocyanic acid, methyl and ethyl cyanides and isocyanids, cyanogen chloride, cyanuric chloride, cyanic and cyanuric acids.

Sulphur compounds:—mythyl and ethyl mercaptans, ethyl sulphide, mustard gas, ethyl disulphide, ethyl sulphonic acid.

Alkyl compounds of phosphorus, Arsenic and silicon; methyl, dimtthyl and tri-methyl phosphines and arsines, Cacodyl, cacodyl oxide and chloride, Tetramethyl and tetraethyl silicon.

Alkyl compounds of zine and magnesium, and their synthetic uses.

Unsaturated compounds:—ethylene, acetylene, allyl iodide, allyl alcohol, acrolein, acrylic acid, oleic acid, linoleic acid, linseed oil and its use in paints and varnishes, Hydrogenation of fats and oils.

Polyhydric alcohols:—Ethylene Glycol., Glycerol, Nitroglycerine and its use in explosives.

Carbohydrates:—Glucose, fructose, galactose, mannose, saccharose, lactose, maltose, starch, dextrin, cellulose and its important industrial uses.

Dibasic acids and their derivatives:—Carbonic, Oxalic, malonic, succinic, glutaric and adipic acids. Urea and uric acid, oxamide, malonic ester and its synthetic uses. Fumaric and maleic acids.

Hydroxy, amino and ketonic acids: Glycollic acid, Lactic malic and tartaric acids, Stereoisomerism. Glycine. Pyruvic and acetoacetic acids, acetoacetic ester and its synthetic uses, citric acid.

Aromatic compounds:-

Hydrocarbons: Distillation of coal tar, Benzene, toluene, xylenes, mesitylene.

Halogen derivatives of hydrcarbons:—chloro, bromo and iodo benzenes, dichlorobenzenes, chlorotoluences, benzyl chloride, benzal chloride and benzotrichloride.

Nitro and cyano compounds:—Nitro benzene, m-dinitro-benzene, nitrotoluenes, trinitrotoluene, phenyl and benzyl cyanides.

Amino Compounds and amines:—Amiline, methylaniline and dimethylaniline, acetanilide, nitranilines, chloranilines, toluidines, phenylene diamines. Benzylamine.

Diazo compounds:—Diazo reaction and its synthetic applications, diazobenzene chloride, nitrate and sulphate.

Azo Compounds: Azobenzene, hydrazobenzene, phenyl-hydrazine, methyl orange. Bismark brown.

Sulphonic acids:—Benzene sulphonic acid and its chloride, sulphonation. Phenols:—Mono, di and trihydroxy benzenes, cresols, nitro and amino phenols, picric acid.

Alcohols, aldehydes, ketones and quinones.—Benzyl alcohol, benzaldehyde, cinnamic aldehyde, salicylaldehyde, acetophenone, benzophenone, benzoquinone.

Acids: Benzoic acid, toluic acids, anthranilic, salicylic, gallic, tannic, phenyl acetic, mandelic and cinnamic acids. Phthalic acids.

Napthalene and its mono nitro, amine and hydroxy derivatives, Indigo.

Anthracene, anthraquinone, alizarin.

Heterocyclic compounds and Alkaloids.—Pyrrole, pyridine, quinoline, quinine, cinchonine.

Practical (Approximately 140 practicals).

1. Analysis of mixtures of salts, containing not more than four radicals.

- 2. Technical analysis of one are found in India, preferably in the Dominions, and one alloy.
- 3. Gravimetric estimation of Copper, iron, aluminium, calcium, magnesium, Sulphate, chloride, carbonate.
- 4. Volumetric analysis, comprising (a) titration of acids, alkalis and alkaline carbonates, (b) estimation of iron with permenganate and bichromate, (c) estimation involving the use of standard iodine and thiosulphate solutions, and (d) titrations involving precipitation.
- 5. Estimation of available chlorine in bleaching powder.
- 6. Estimation of available oxygen in pyrolusite.
- 7. Preparation of the following organic compounds. Chloroform, Ethyl bromide, Ether, Icdoform, Ethyl acetate, Oxalic acid, Nitrobenzene, Aniline, Phenol, Benzoic acid.
- 8. Preparation of some typical industrial products such as Sulphuric acid, caustic soda, bleaching powder, white lead, vinegar, soap, glycerine varnish, toilet powder, toilet cream, tooth paste, scent, hair oil, ink, essential oils from local material and a few pharmaceutical products in the form of extracts, tinctures, syrups, pills, tablets, and powder.

The preparation of the following pharmaceutical products is recommended:—

- (1) Alcohol dehydratum, test of purity.
- (2) Aqua Cinnamoni.
- (3) Extracts: Nux-vomica liquidum, chemical assay for Strychnine.

- (4) Syrups Ferri phosphatis cum suinine et strychnine (Easton's Syrup), chemical assay for iron, quinine and Strychnine.
- (5) Tincture Digitalis (percolation method)
- (6) Tincture gentianae composita (maceration method)
- (7) Unguentum Zinci oxide.
- (8) Siedlitz powder.
- (9) Pulula Ferri Carbonatis, Sugar coating.
- (10) Tablets—Aspirin and caffeine.
- (11) Spiritus Ammonia Aromat.
- (12) Spiritus Aetheris Nitrosi.

b(ii) CHEMISTRY (Subsidiary)

THEORETICAL.

General and Physical. (Approximately 45 lectures)

Laws of Chemical combination; Atomic theory; valency.

The simple Gas Laws; Molecular weight of gases; Dissociation of Gases.

Solution of gases, liquids and solids in liquids; Henry's Law, Dalton's Law of partial pressure: Distillation of mixtures; partition Law.

Osmotic pressure, Vant Hoff's theory of dilute solutions. Lowering of the vapur pressure; elevation of the boiling Point and depression of the freezing Point of a Solvent, Molecular weight of dissolved substances.

Law of mass action and its application to homogeneous systems.

Le Chatelier's Principle.

Velocity of reactions, Uni-, bi-and trimolecular reactions. Catalysis, treated in an elementary way.

Electrolysis, Faraday's Laws; theory of electrolytic dissociation; Specific, equivalent and molecular conductivity; migration of ions; transport numbers.

Thermochemical Changes; Hess's Law; heat of reaction, heat of formation, heat of cimbustion and heat of solution.

Radioactive property of matter. Modern conception of the structure of the atom, treated in an elementary way.

Inorganic:—(Approximately 45 lectures)

- 1. The Periodic Classification of the elements.
- 2. The occurrence, preparation, properties and uses of the following elements and their chief compounds.

H, Na, K, Cu, Ag, Au, Mg, Ca, Sr, Ba, Zn, Hg, B, Al, C, Si, Sn, Pb; N, P, As, Sb, Bi; O, S; Cl, Br, I, Mn, Fe, He, A.

Organic (Approximately 45 lectures)

Aliphatic:—Modes of occurence, preparation, properties and constitutional formulae of:—

Methane, ethane, their corresponding mono-halogen derivatives and their corresponding alcohols, aldehydes, fatty acids, and amines. Chloroform, idoform, acetone, acetyl chloride, acetamide, Dimethyl and di-ethyl ethers. Ethylacetate,

ethylhydrogen-sulphate, di-ethyl-sulphate, ethylaceto-acetate. Glycerol, Oxalic, succinic, and citric acids. Tartaric and lactic acids. Glucose, fructose (elementary ideas about their constitution), saccharose, starch and cellulose.

Isomerism:—Structural isomerism of paraffins and alcohols containing up to 5 carbon atoms. Alkyl nitrites and nitro-paraffins. Stereo-isomerism of lactic and tartaric acids.

Aromatic:—Benzene, and its mono-derivatives, viz., chloro, nitro, amino, hydroxy, and sulphonic derivatives. The diazo-reaction and its more important applications. Toluene, chloro-teluenes, nitro-toluenes, Benzyl alcohol, Benz-aldehyde, benzoic acid. Naphthalene.

PRACTICAL.

Qualitative analysis of inorganic substances, coning not more than two radicals.

Volumetric estimation of alkalis and acids, Estimation of Iron with permanganate. Use of standard iodine and thio-sulphate solutions. Use of standard silver mitrate and chloride solutions.

c(i) MATHEMATICS (MAIN SUBJECT).

Pure Mathematics.

Algebra:—Determinants—Systems of Linear.

equations—indeterminate equations—theory of equations including Symmetric functions of the roots sturm's Theorem—Solutions of the cubic and the biquadratic equations—linear transformations—inequalities—continued fractions—interest and annuities—simple tests of convergence of series—partial fractions Summation of series.

Coordinate Geometry of two dimensions:—Detailed study of the properties of the conic sections—the general equation of the second degree—Polar equations of conics—theory of plane curves, viz. tracing of curves, curvature, evolutes asymptotes)—Homogenous coardinates.

Coordinate Geometry of three dimensions:—Standard second degree equations—central sections and generators.

Colculus and Analysis (real variable):—Dedikinds theory of irrational numbers—limits—continuity—differentiation—Taylor's theorem and expansion in series—Riemann integral for a continuous function—rectification—quadrature—volumes and surfaces of solids of revolution—Geometrical and physical applications of the definite integral.

Functions of two variables:—limits—continuity—differentiation—Taylor's Theorems Maxima and Minima—envelopes—the double integral and its applications.

Complex Variable:—Elementary functions of a complex variable—complex differentiation and integration—conformal representation (excluding Riemann's theorem); positive series—Ordinary tests of Convergence—absolute and uniform convergence of infinite series and infinite products (fundamental ideas only).

Differential equations:—Elementary methods of solutions for the first and second order ordinary differential equations—singular solution—linear equations with constant coefficients—homogeneous linear equations—Simultaneous equations—solution in series—approximate solution—Lagrange's partial differential equation of first order—equations of heat, sound, waves, and potential.

Applied Mathematics.

Mechanics:—Resolution—Composition—Scalars and Voctors—Multiplication of vectors in two dimensions. Free motion of a particle in a straight line and on a plane—constrained motion of a particle in a st. line—resisted motion of a particle on a plane—motion of a system of particles in a plane—Motion of a rigid body about an axis.

Equilibrium of forces in two and three dimensions—virtual work—graphical statics—laws of friction—equilibrium of chains and strings in two dimensions.

Centre of pressure—resultant pressure—equilibrium of floating bodies—stability and meta-centre (Standard nearly the same as that of Lamb's Statics and Dynamics).

Astronomy:—Fundamental notions of spherical trinonometry—Explanation of the apparent motion of the celestial bodies—Celestial coordinate—astronomical instruments—the solar system—Kepler's Laws of planetary motion—equation of time—conversion of time—motion of the Moon and its phases—Eclipses of the Sun and the Moon—Astronomical dip, refraction, parallax, abberation, precession and nutation—latitude and longitude of a place—rotation of the Sun and the planets about their axes:.

Surface of the Sub-Solar Coronae and the prominances—Proper motions of the Stars—Star Cluster—Galactic and extra-galactic nebulae—Star magnitudes.

Probability and Statistics:—The probability of an event—the probability of several independent events happening together—expectation—Probable value—Frequency distribution—histogram—arithmetic mean—Standard deviation—Probable error.

c(ii) Mathematics (Subsidiary).

Algebra.—Simple tests of convergency of series. Exponential and Logarithmic Series. Simple cases of Summation of series. Determinants and their application in solving linear simultaneous equations and in elemination. Cardan's Solution of the Cubic.

Trigonometry.—De Moivre's Theorem and easy deductions therefrom. Hyperbolic Functions. Simple cases of Summation of Series.

Analytical Geometry of Two Dimensions.—

Cartesian and Polar Co-ordinates, Simple transformation of axes. Straight line, Circle, Parabola, Ellipse and Hyperbola. Tracing of curves given by the general second degree equation.

Differential and Integral Calculus.—Continuity of functions, differentiation (standard form), Successive differentiation. Mean value theorem, Taylor's and Maclaurins Theorems. Expansions, Indeterminate forms, Partial differentiation. Maxima and Minima of functions of a single variable. Points of inflexion, Curvature.

General methods of integration, standard forms, elementary reduction formulæ involving trigonometrical functions, definite integrals, rectification, quadrature, volumes and surfaces of solids of revolution, approximate evaluation of definite integrals, (Simpson's Rule).

Simple applications of the Calculus to physical examples. Elementary treatment of double and triple integrals. Centre of gravity and moment of Inertia.

Differential equations.—Equations of the first order, standard forms, lienar equations with constant co-efficients. Simple cases of particular integral.

Statics.—Composition and resolution of Coplaner forces, parallel forces. General conditions of equilibrium of a body under coplanar forces. Centre of gravity, work, simple examples of friction, machines.

Dynamics.—Uniform and accelerated motion in a straight line, Laws of motion, Impulse, Kinetic and Potential energy; Conservation of energy and Momentum. Projectiles. Direct impact of elastic bodies. Normal acceleration and its applications. Simple Harmonic Motion. Simple Pendulum. Units and Dimensions.

d(i) Botany (Main).

- 1. External Morphology.—The detailed morphology of the root, shoot, and reproductive organs, (including fruits and seeds), floral mechanisms and seed dispersal.
- 2. Histology:—The structure of the cell, the cell-contents, their micro-chemical reactions, cell-division (karyokinetic and other methods of division. The origin and growth of tissues, and their distribution; the secondary tissues of the flowering plants.
- 3. Systematic:—Principles of Classification. The Morphology, Physiology and Life-histories of the following groups and types:—-
- (a) Cryptogams;—Bacteria, Cyanophyceae (Oscillaria, Nostoc, Gleocapsa); Diatomaceae; Chlrophyceae (Chlamydomonas, Pandorina, Eudorina, Volvox, Pleurococcus, Ulothrix, Oedogonium, Coleochaete, Cladophora, Vaucheria, Spirogyra, Zygnema, Desmids; Characeae, (Chara, Nitella); Phaeophyceae (Ectocarpus, Fucus, Dictyota), Rhodophyceae (Callithamnion, Batrachospermum Polysiphonia; Myxomycetes (General characters only); Phycomycetes (Phytophthora, Pilobus, Pythium, Mucor); As-

comycetes (Yeast, Eurotium, Penicillium, Claviceps); Basidiomycetes (Ustilago, Puccinia, Agaricus, Polyporus), Lichens (General characters only) Hepaticae (Riccia, Marchantia, Anthoceros); Musci (Funaria, Polytrichum); Filicineae (Ophioglossum, Gleichenia), Nephrolepis, Marsilia, Isoetales (Isoetes); Equisetales (Equisetum) Lycopodiales Selaginella and Lycopodium).

(b) Pharerogams:—Cycadaceae (Cycas; Coniferae (Pinus); Gramineae Araceae, Palmae, Liliaceae, Amaryllidaceae, Scitaminaceae, Orchidaceae, Magnoliaceae, Anonaceae, Nymphaeaceae, Papaveraceae, Cruicferae, Capparidaceae, Portulacaceae, Malvaceae, Sterculiaceae, Tiliaceae, Rutaceae, Meliaceae, Ampelideae, Sapindaceae, Anacardiaceae, Leguminoceae, Combretaceae, Myrtaceae, Cucurbitaceae, Umbelliferae, Rubiaceae, Compositae, Sapotaceae, Ebenaceae, Apocynaceae, Asclepiadaceae, Boraginaceae, Convolvulaceae, Solanaceae, Scrophulariaceae, Bignoniaceae, Acanthaceae, Verbenaceae, Labiatae, Loranthaceae, Urticaceae and Euphorbiaceae.

Note.—The representatives of the above families to be taken as far as possible from the Deccan Flora, some knowledge of plants of economic importance will be expected.

4. Physiology:—Turgidity and Tension of tissues, Nutrition, the food of plants and its absorption, Osmosis, Root-Pressure, Conduction of food, Transpiration, Photo-Synthesis; Digestion and transference of the food products of assimilation; Storage of food, the nutrition of parasites, saprophytes and insectivorous plants, Respiration, Enzymes and the digestion of reserve food, Growth, the effects of external influ-

ence on growth; Movements, Protoplasmic movements, Imbibition movements, Heliotropism, Geotropism, Chaemotropism, Contact stimuli and their effects.

- 5. *Ecology*:—The reaction of plants to their environments as illustrated by Aquatic plants, Hygrophytes, Mesophytes, and Xerophytes.
- 6. Evolution:—Variation, Heredity and Evolution.

Practical.

The practical examination shall include:—

- (a) Examination and description of plants or parts of plants.
- (b) Examination and description of microscopic specimens.
- (c) Identification of specimens.
- (d) The making of sections of plant parts for microscopic examination.
- (e) A knowledge of micro-technique including fixing, staining and section-cutting.
- (f) A practical knowledge of simple physiological experiments.
- (g) At least ten permanent mounts must be prepared.

The students are expected to keep a complete record of laboratory work in a special note-book, which should be signed periodically by a member of the staff.

d(ii) Botany (Subsidiary).

1. External Morphology:—The detailed morphology of the root, shoot, and reproductive organs (including fruits and seeds) and their dispersal.

- 2. *Histology*:—The structure of the cell, the cell-contents and their micro-chemical reactions, cell-division (Karyokinetic and other methods of division). The origin and growth of tissues and their distribution and secondary tissues.
- 3. Systematic:—Principles of classification. The morphology, physiology and Life-histories of the following groups and types:—

Cryptogams:—Bacteria; Cyanophyceae (Nostoc); Chlorophyceae (Chlamydomonas; Volvox; Oedogonium, and Spirogyra); Phaeophyceae (Fucus); Phycomycetes (Mucor); Ascomycetes (Yeast and Claviceps); Basidiomycetes (Puccinia graminis and Agaricus); Hepaticae (Marchantia); Musci (Funaria); Filicineae (Pteris and Marsilia); Equisetum; Selaginella.

Phanerogams:—Cycadaceae (Cycas); Coniferae (Pinus); Gramineae; Palmae; Liliaceae; Anonaceae; Papaveraceae; Cruciferae; Malvaceae; Anacardiaceae; Leguminosae; Myrtaceae; Passifloraceae; Cucurbitaceae; Compositae; Apocynaceae; Asclepiadaceae; Solanaceae; Labiatae; Urticaceae; and Euphorbiaceae.

- 4. Physiology:—Turgidity and tension of tissues; Nutrition—the food of plants and its absorption; Osmosis, Root-pressure, Conduction of food; Transpiration; Photosynthesis; Digestion and transference of the food products of assimilation; storage of food; Nutrition of parasites, saprophytes, and insectivorous plants; Respiration; reserve food; Growth-movements; Protoplasmic movements; Imbibition movements, Helilotropism, Geotropism, Chaemotropism, Contact stimuli and their effects.
- 5. Ecology:—The reaction of plants to their environments as illustrated by Aquatic plants, Hygrophytes, Mesophytes and Xerophytes.

- 6. Evolution:—Variation, Heredity and Evolution.
- N.B.—Physiology and Ecology to be treated in an elementary way.

Practical.

The Practical Examination shall include:-

- (a) Examination and description of plants or parts of plants.
- (b) Examination and description of microscopic slides.
- (c) Identifications of specimens.
- (d) A knowledge of section-cutting and microtechnique including fixing and staining.
- (e) A practical knowledge of simple physiological experiments.

Candidates should keep a complete record of Laboratory work in a special note-book.

e(i) Zoology (Main)

Paper I.—The general principles of Biology treated in an elementary manner, including the theory of Evolution, with elementary notions of Variation, Heredity and Adaptation (e.g. Commensalism, Parasitism and Symbiosis). Recapitulation hypothesis. The structure and phenomena of the animal cell, and the classification and characteristics of the common

forms of animal tissues. Sexual and Asexual modes of reproduction; Spermatogenesis; Oogenesis; Parthenogenesis; Alternation of generations, and Metamorphosis. General principles of Classification. The Elementary knowledge of the principles of Geological and Geographical distribution of animals. Evolution of horse and elephant. Archaeoptervx.

The outlines of the embryology of Amphioxus, the frog, chick and rabbit. Amnion and Allantois, Placentation.

An elementary knowledge of the histology and physiology of the various organs of the animal body as illustrated by Frog and Rabbit.

Paper II.—The structure, habits, and development of the following types of Non-chordata as illustrated by:

Protozoa—Amoeba; Monocystis; Malarial parasite; Paramoecium; Polystomella; Trypanosoma.

Porifera—Sycon.

Coelenterata—Hydra; Obelia; Aurelia; a simple coral (Fungia).

Platyhelminthes—Liver-fluke; Taenia.

Nemathelminthes—Ascaris.

Annelida—Pheretima (Earthworm); Nereis; Leech.

Echinodermata—Star-fish and a sea-urchin (general characters of the latter only).

Arthropoda-Prawn; Daphnia and Cyclops (general characters only); Cockroach; Anopheles: . House-fly (Musca); Scorpion; and a Centipede (Scolopendra-External characters and mouth-parts.) Mollusca—Fresh-water mussel (Unio) and Ap-

ple-snail (Pila).

Paper III.—The principal characteristics, structure, and habits of the following types of Chordata as illustrated by:—

ACRANIA:-

(a) Hemichordata—Balanoglossus.

(b) Urochordata—Ciona or any other Ascidian from the Indian seas (Rhabdocynthia).

(c) Cephalochordata—Branchiostoma (Amphioxus).

CRANIATA:-

- Cyclostomata—Petromyzon and Hag-fish (general characters only).
- Pisces—Carcharias or Scoliodon (The shark of the Indian seas); Ganoidei (General characters, with typical examples); "Murrel" or "Rohu"; Dipnoi (general characters only).
- Amphibia—The Frog (Rana tigrina). General characters of Urodela and Gymnophiona, with typical examples.
- Reptilia—Calotes or any other lizard. General characters of Lacertilia, Ophidia, Rhynchocephalia, Chelonia and Crocodilia, (with typical examples.)
- Aves—Columba. Distinctions between Ratitae and Carinatae with typical examples.
- Mammalia—The general characters of Prototheria and Metatheria as illustrated by Echidna and Kangaroo respectively. Rabbit. General Characters of the various orders of subclass Eutheria with typical examples.

Practical Examination.

Candidates will be required to show a knowledge of simple microscopic technique and to examine, dissect, or describe the following:—

Amoeba; Monocystis; Malarial parasites; Paramœcium; Polystomella; Sycon; Hydra; Obelia; Aurelia; Fungia; Liver-fluke; Taenia; Ascaris; Pheretima; Nereis; Leech; Star-fish; and Sea Urchin (external characters); Prawn; Daphnia and Cyclops; Cockroach: Anopheles and Musca (mouth parts and external characters); Scorpion and Scolopendra (external characters only); Fresh-water mussel; Pila. Balanoglossus and Amphioxus (general characters); Ciona or Rhabdocynthia, Petromyzon and Hag-fish (external characters only); Carcharias (or Scoliodon); Lung-fishes (external characters only); Murrel; Frog; Lizard; Pigeon (skeleton of fowl may be substituted); four types of birds' skulls; Rabbit (or Squirrel); dog's skull may be substituted; and Echidna (limbs and limb-girdles only). Frogs' blood film preparation.

Museum study of the principal representative types of the Animal Kingdom.

Laboratory.—sketch-books containing complete record of bonafide work, as certified by the teacher, must be produced at the practical examination.

N.B.—Out of the marks alloted for the practicals
10 percent marks will be reserved for the
practical records.

Total marks 130 for the two practical papers, each having 65 marks.

e(ii) Zoology (Subsidiary).

The examination shall comprise two theory papers and a practical test, having 70 and 60 marks respectively for each paper.

Elementary knowledge of the Animal cell; Asexual and Sexual modes of Reproduction; Parthenogenesis; Alternation of generations, and Metamorphosis. The elementary facts of Evolution, Heredity and Variation.

The elementary knowledge of the Principles of Classification, and those of Geological and Geographical Distribution of Animals. Elementary knowledge of the various kinds of tissues, and of the internal structure and functions of the various organs in Frog.

The structure, habits and development of the following types of Non-Chordata:

Protozoa—Amoeba; Monocystis; Paramœcium; Malarial parasite.

Porifera—Sycon.

Coelenterata—Hydra and Obelia.

Platyhelminthes-Liver-fluke and Taenia.

Nemathelminthes—Ascaris.

Annelida—Pheretima (Earthworm); and Leech.

Arthropoda—Prawn; Cockroach; Anopheles; Musca and Scorpion (general characters only).

Mollusca—Fresh-water mussel (Unio).

The structure, habits and principal characteristics of the following types of Chordata:

Hemichordata—Balanoglossus.
Urochordata—Ciona or any other
Ascidian from the Indian
Seas.

Cephalochordata—Branchiostoma. (Amphioxus).

Cyslostomata—Petromyzon. Pisces—Dogfish (Scoliodon).

General characters of each group and external characters of the types only.

Amphibia—The Frog.

Reptilia—General characters of the class.

Aves-Columba.

Mammalia—General characters of the class. Rabbit. Outlines of the Embryology of Frog and Chick.

Practical Examination

Candidates will be required to show a knowledge of the simple methods of microscopic technique, and to examine, dissect or describe the following:

Amoeba; Paramecium; Monocystis; Hydra; Obelia; Liver-fluke; Taenia; Ascaris;

Pheretima (Earthworm); Leach; Prawn; Cockroach; Fresh-Water mussel; Scoliodon; Frog.

Pigeon (Skeleton of Gallus may be substituted); Rabbit or Squirrel (Skull of Canis may be substituted).

Museum study of some of the principal representative types of the Animal Kingdom.

Candidates must produce their practical records duly signed by the teacher at the time of the examination.

f. Geology (Subsidiary).

I. Physical Geology:—

General view of the earth—the earth as a member of solar system; larger features of the earth. Rocks the primary documents of the Geology; the scope and method of Geology. Rock weathering and its part in erosion; decomposition and disintegration of rocks. Influence of topography and rock-composition; product of weathering. Soil types determined by climate.

Running Water:—Origin and significance of streams fluvial processes and their application to stream valley. The fluvial cycle in humid, semi arid and arid regions. Source, extent and movements of sub-surface water. Origin, climate control, and life history of lakes and their indirect functions. Swamps and their economic value Glaciers and glaciation. Erosion and deposition by wind and sea. Volcanoes and Volcanism, fuma-roles and hot springs. Nature and origin of earth-quakes. Seismograph and interpretation of seismograms. Geological effects of earthquake.

Characteristic features and mode of occurance of igneous, sedimentary and metamorphic rocks. Deformation of the earth's crust. Inclination of stratas; dip and strike, all kinds of Folds, Anticline and syncline. Joints in stratified, igneous and metamorphic rocks and their practical importance. The general features and different kinds of faults and their surface expression. Common features of unconformity and its relation to earth-history.

Origin and history of mountain system. Landforms Mineral resources and their relation to Geology. Ore deposits and their classification.

II. Palaeontology and Stratigraphy:—

Fossils; their definition, occurance and significance Evolution of important forms and superposition; condition and place of fossil occurance.

Classification, distribution and range of leading fossils, Geological record and its imperfections.

Geology of Crystalline, and metamorphic rocks of India. The Gondwana system. The Deccan traps and tertiary deposits. Geology of Indian peninsula.

III. Crystallography and Mineralogy:—

Laws of Crystallography; form and symmetry; systems of notation. Classification of crystals into six systems and thirty-two types. Twinning axis and twinning planes. Use of contact Goneometer.

Mineralogy:-

Definition of minerals, their determination by physical properties and chemical tests. Examination of the optical properties of important Rock-forming minerals in thin sections. Characteristic minerals of Geological interests or commercial value; their properties, mode of occurance and uses.

IV. Petrology:—

Principal divisions of rocks; igneous, sedimentary and metamorphic; their origin, mode of occurance, composition, structure and texture. Megascopic and microscopic examination of the common types of rocks.

Practicals:-

Interpretation and drawing of simple geological maps and sections. Identification of minerals by physical properties and chemical tests. Identification of more common rocks by megascopic and microscopic examinations. Drawing of crystals and identification of their form and system.

Excursions:—

Excursions to any place of geological interest under the immediate guidance of the professor. The aggregate time spent on the excursions shall not be less than ten days during the course.

Note:—In the practical examination candidates must present their note-books containing the description of practical class-work and field work performed in the course of their studies duly dated by the student and signed by the teacher.

g. Domestic Science (Subsidiary).

Home Economics.

- II. Home Technology. 1. Home Management.
 - 1. Bio-Chemistry.
 - 2. Dietetics and Food Bacteriology.
 - 3. Problems of Adjustment in family and home.
 - 4. Textile. Laundry Bleeching and Dyeing.
 - 5. Technology of Cooke- 5. Psychology. Mainly ry.

- - 1. Mothercraft.
 - 2. Bacteriology, Sanitation Science and Hygiene.
 - 3. Interior Decoration.
 - 4. Purchasing of House-hold equipments.
 - Child Psychology.
 - 6. House-hold and Social Economics.
 - 7. Physiology and Hygiene.

1. Home Management:—

1. Bio-Chemistry:—

- (a). Chemical and physical nature of such proteins, fats and carbohydrates, fats and mineral matter as are met with in food.
- (b). Metabolism of food.
- (c). Vitamins.
- (d). Chemical and physical nature of animal tissues, bones, muscles, blood and glands.

- (e). Enzymes of the body and their action.
- (f). Chemical and physical nature of animal secretions such as milk.
- (g). Inorganic salts of the body.
- (h). Chemistry of Urine, perspiration, digestion, blood, respiration.
- (i). Chemical defence of the body, against the action of poisonous substances.
- (j). The fundamental principles and practice gravimetric and volum-metric analysis as used in good chemistry.
- (k). Determination of moisture, protein fat, sugar, ash in common food materials.
- (m). Detection of food preservatives and adulterations.
- 2. Milk—The separation of constituents. Determination of specific gravity of total solids of Ash of protein and lactose and of fat by (a) Babcock (b) The Werner Schmidt method.
- 3. Butler—Determination of water, fat, and curd, ash.
- 4. Cereals—Microscopical examination of starches. Determination of gluten and cruds fibre in flour.
- 5. Yeast—Its action as a raising agent and its action in the operation of fermented beverages. Preparation and analysis of vinegar.
- 6. Baking Powder—Their general qualitative examination determination of carbon dioxide and starch.
- 7. Beverage—Non-Fermented.

2. Dieletics and Food Bacteriology:—

Nutritive value of carbohydrates, proteins and fats of food.

Vitamins and deficiency diseases.

Mineral salts in relation to food requirements.

Caloric value of foods.

Nutritive table meats and fish, cereal foods, oils.

Vegetable and pulses, milk and milk products.

Diet for children of varying ages.

A balanced diet for adults.

Diets for pregnancy and lactation, constipation, diabetes. Invalid diets.

Food deterioration. Preservation and storage of food stuffs.

The normal and pathological bacteriology of milk, butter and cheese. The essentials of an adequate diet based upon the nutritive properties of food materials.

Application of these facts in the light of physiology made to the feeding of the individual throughout infancy, child hood, adolescence, adult life and old age.

3. Problems of Adjustment in family and home:—

The Theory of principles of Book-keeping. Cash Accounts. Budgetting. Saving Banks. Issuing of Cheques. Investments.

4. Textile (Fibres and Fabrics). Laundry and Applied Chemistry:—

The Structure, chemical composition and properties of the chief textile fibres and their utility according to composition and weave.

The testing and analysis of fibres and fabrics.

Properties and nature of textile. (Reference to Boston).

Bleeching and dyeing by commercial and indigenous dye stuff.

Chemistry of Stain removers and bleechers.

Chemistry and nature of dyeing process.

Classification of dye stuff.

Dry cleaning, disinfection of linen.

Latest equipment of laundries.

Modern labour saving devices.

5. Technology of Cookery:-

- (a). Principles and methods of cookery based on dietetic principles underlying principles of the Cookery of different foods and calculation of the cost of foods prepared.
- (b). Standarized methods of cookery on the basis of the composition of foods.
- Special consideration given to the preparation of attractive dishes, with special reference to the place in the menu, stress being laid on choice, appearance, texture food value and cost of meals. Advanced and special preparation. Receipts to be given and the finding of the caloric value of the dishes prepared.

III. Home Technology:—

(1). Mothercraft. St. Jonn's Ambulance Certificate.

Definition and scope. Enumeration of sections covered by other parts of course. Standards of living. Habits. Happy

motherhood. Habits physical, mental spiritual aesthetic. Birth, the infant, the toddler, the older child, normal development and care. Care of the sick child. Child psychology. The importance of the father in the family. Social relationships.

(2). Bacteriology—Sanitation and Hygiene:—

The nature, structure and functions of bacteria, the sterlization of media and apparatus, the fundamental principles of immunity. The fundamental principles and their application to disease, preparation as they relate to water supply, milk supply, general food supply the disposal of waste, sewage and garbage, ventilation, lighting, heating and housing.

(3). Interior Decoration—Appreciation of colour and design.

House planning, room arrangement, lighting, making of plans, model rooms and furniture to scale.

Application of the history of furniture to present day circumstances.

Acquaintance of period decoration in tapestries, furniture pewter ware, glass and China. Cutting out and making of pictures. Laying of tables and period decoration.

Discuss and study intelligently the relatives merits, of distemper - paint - eramel wall - paper - panelling.

The cost and durability, the importance spray painting and latest modern devices.

The use of colour and study of illustration of merchandise and visits to an art museum for the purpose of studying textiles - furniture of the various countries. ceramics (pertaining to the manufacture of porcelain and the earthen ware.)

(4). Purchasing of Household equipment:-

Requirement for activities related to labour saving house efficiencies - cookers - independent boilers. Utensils for providing and storing of food for the family and different preparations of food - decoration meal service.

Equipment for activities related to clothing - work materials - tables for cutting out and other sewing and embroidery machines.

Equipment for activities related to home laundry - laundry tubs - ironing boards - iron (various) peggys wash-boards - boilers.

Equipment for study of home management - cabinets - chairs settees - tables - divans - takhts - dressers - masnad - gaotakia - cushion.

Equipment for care and guidance of health and home care of the sick - medicine cabinets containing bandage and emergency supplied medicines - bed rest and bed side table - blocks for raising ordinary beds in illness - bed-linen - weighing scales bed pulleys and cage.

- (5). Household and Social Economics:-
- (a). An outline of the economics and industrial history of India. The influence of economic and idustrial conditions on the home.
- (b). The factors influencing the price of commodities demand price supply price wages rent capital and its remuneration Modern industrial problems especially such as concern women and children.
- (c). The state and the individual. Social responsibility with reference to the infant, the child, the adult. Problems of infantile mortality. Public health education crime mental defective destitution and employment.
- Definition and scope of civics. Its relation to other sciences. Evolution of civic ideas. The historical development of the Indian Civilization and the Civic ideas. Citizenship with reference to family, village, town, district, province, country and the empire.
- Forms of status and Governments. Functions of Government, Constitution. The Indian Administration. Reform Movements and formation of Associations. Social Economics.
- (6). Psychology—Psychology as a science. Methods of Psychology. The General structure of the nervous system and its influence on mental life. Phenomena of men-

tal life. Mental Hygiene. The difficult child. The problems of adolescence. Simple abnormal psychology. Individual difference due to race heredity, enviroment, maturity. Sex. Intelligence tests. The super-normal child. The backward child. The ways of learning - habit forming, remembering and forgetting - fatigue and boredom.

(7). Physiology and Hygiene.—

- (i). Physiology:—
- (1). Structural principles.
- (2) Hiochemical principles.

The elementary constituents of protoplasm - the proximate constituents. (a) the lipoides,

- (b) the carbo-hydrates, (c). Proteins the Phenomens of Organic Synthesis.
- (3). Biophysical Principles.

The energy of nolecules in solution - the properties of colloids - the passage of water and solutes through membranes - the electrical changes in living tissues - catalytic and enzyme action.

(4). Muscle:—

Structure - excitation - mechanical changes during contraction - chemical composition and changes during activity-electrical changes - plain muscle and other contractile tissues.

(5). Nerve:—

Structure - excitation - mechanical changes during contraction - nerve impulses - excitabili-

ty - polarization phenomena - nature of nerve impulse.

- (6). The Autonomic Nervous System.
- (7). The Central Nervous System.

General features—structures of nerve cellsdegeneration and regeneration - synopses - reflex action - chief tracts - general sensation - voluntary movements. The different parts of the central nervous system, speech.

- (8). Special Senses.—
 - (a). Eye—Structure of eye ball nourishment and properties of eye the optical system of the eye refraction.
 - (b). Ear—Sound structure of auditory apparatus phenomena of hearing.
 - (c). Sensation of smell and taste.
- (9). Nutrition.

Metabolism - starvation - significance of food - stuffs - Vitamins - normal diet of man.

(10). Psychology of Digestion.

Digestion in mouth - stomach - intestines - deglutation - Movements of stomach and intestine -digestive juices.

- (11). Absorption of Foodstuffs.
- (12). Intermediate Metabolism.
- (13). The blood.

Quantity and composition - cells - the coagulation of blood.

- (14). Physiology of the Heart.
- (15). Blood vessels and circulations.

Structure of blood vessels. Elementary hydrodynamics of the circulation - blood pressure - circulation through arteries - capillaries and veins - nervous control of blood vessels - pulmonary - hepatic and cerebral circulation.

- (16). The Spleen.
- (17). Lymph Tissues fluid Cerebro-spinal fluid.
- (18). Respiration.

Respiratory organs - respiratory movements - composition of gases.

(19). Renal Excretory System.

Composition of urine - secretion of urine - Physiology of maturation.

- (20). The skin and body temperature.
- (21). The Endocrine Organs.
- (22). The Reproductive System.
- 7. Physiology and Hygiene—(contd).
- (ii). Hygiene:-

Water—Sources, purification, storage, distribution, water-borne diseases.

Food and Dietetics—Constituents, Vitamins, relation to health, milk and dairy-farming.

Air, Meteorology and Climate.—

Disposal of Sewage—Scavenging, Conservancy, privis, latrines, pail-system, watercarriage, system. Disposal - Trenching, incineration, Biological Treatment.

Housing.—

Lighting - Ventilation.

Personal Hygiene.—

Schools.—

Medical inspection of-

Children-Welfare Centres—

Maternal and Infancy morality, Birth control and Eugenics.

Preventable Diseases.—

Animal parasites and insect carriers. Hospitals. Rural Hygiene and Fairs.

Occupational Diseases and Offensive trades. *Burial*.

Vital Statistics.

E. M. A. & M. Sc. EXAMINATIONS.

M. A. EXAMINATION.

1353 and 1354 F. (1944 and 1945).

- 1. An examination for the degree of Master of Arts shall be held annually in Hyderabad at such time and on such dates as may be prescribed by the Syndicate.
- 2. The M. A. Examination shall be conducted by means of printed papers and *viva voce* when necessary. Papers will be set and answered in Urdu unless otherwise notified.
- 3. The examination shall be open only to Bachelors of Arts and Bachelors of Science of the Osmania University or Bachelors of Arts or Bachelors of Science of a recognised University who have passed the B.A., or B.Sc. Examination not less than two academic years previously and have since then prosecuted a regular course of study for not less than two academic years in a constituent college of the Osmania University.

No candidate shall be allowed to put in regular attendance or to appear at the M.A. and LL.B. Examination at one and the same time.

4. No student will be allowed to appear at the examination unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination. The Syndicate may, however, condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially ill-health when the application is supported by a certificate by an authorised Medical Officer, which can satisfy the Head of the Institution.

A member of the U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Corps Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

- Note—(1) Only those candidates will be allowed to take up Mathematics for their M.A. Examination who have graduated with Mathematics as their main subject.
- (2) Lady candidates shall be allowed to appear privately in the examination in Arabic, Persian and Urdu only.
 - (3) M.A. Examination in Theology shall be open only to Bachelors of Theology of this University.

- 5. Whole time teachers employed in the Educational Institutions recognised by the University will be allowed to appear privately at the M. A. Examination provided they are certified by the Divisional Inspector of Schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
- 6. A candidate for admission to the M. A. Examination must forward his application to the Registrar five weeks before the examination accompanied by a fee of Rs. 60. Every candidate shall produce a certificate in the form hereinafter prescribed to the effect that he has prosecuted a regular course of study for the examination.
- 7. The examination shall be held for the present in the following subjects:—

1. English. 5. Urdu. 9. History.

2. Arabic. 6. Marathi. 10. Economics.

3. Sanskrit. 7. Telugu. 11. Philosophy.

4. Persian. 8. Kannada. 12. Mathematics.

In Arabic, Persian, Urdu, History, Economics, and Philosophy there will be two Examinations—Previous and Final—and the candidates will be examined at the end of each year.

(1) ENGLISH.—

There shall be 8 papers of 100 marks each and a viva voce:-

1st Paper:—Part (1) The development of the English Language from early to modern times.

- 4. Ethics and Political Philosophy.
- 5. Psychology.

$Final\ Examination:$

A Thesis of not less than 10,000 words on any subject of Philosophy previously approved of by the Board of Studies.

150 Marks.

Viva Voce 50 marks

(12) MATHEMATICS.

In 1353 F. and 1354 F. Old Syllabus will be followed. From 1353 Fasti, the examinations will be held according to this new syllabus, and the division of papers will be as follows:-

Compulsory Papers:-

There will be five Compulsory papers of 100 marks each.

- (1). Algebra and Geometry.
- (2). Theory of functions of real and complex variables including elliptic functions.
- (8) Theory of series and products. differential equations and calculus of variations.
- (4). Mechanics.
- (5). Potential theory with applications,

Ontional Papers.

There will be four optional papers, of one hundred marks each, from two subjects of one of the following groups:--

(a.) Pure Mathematics and (b). Applied Mathematics.

Various subjects under these two main groups would be decided from time to time according to the availability of teachers. The following subjects for optional papers may be considered to begin with—

(a). Pure Mathematics .--

(1). Theory of numbers, (2). Modern Algebraic theories, (3). Theory of probability, (4). Differential Geometry, (5). Projective Geometry, (6). Theory of functions of real variable, (7). Theory of differential equations, (8) Calculus of variations, (9). Theory of functions of a Complex variable, (10). Theory of Eiliptic functions, (11). Theory of series, (12). Integral and functional equations and (13). Theory of Statistics.

(b). Applied Mathematics:-

(1). Analytical dynamics, (2). Hydro dynamics, (3). Aerodynamics, (4). Theory of Elasticity, (5). Electrodynamics, (6). Theory of Relativity, (7). Quantum Mechanics. (8). Theory of Optics, (9). Spherical Trigonometry and Spherical Astronomy, (10). Combination of observations. (11). Celestial mechanics, (12). Astrodynamics with reference to the motion of three bodies and (13). Cosmology and Cosmogony.

8. In order to pass the Examination, a candidate must obtain 40 per cent. of the marks in the aggregate., but in Marathi 40 per cent. marks in Principal as well as in the Subsidiary subjects will be required. No minimum pass marks shall be required in each paper, but if in any paper a candidate obtains less than one-fifth of the marks allotted, those marks shall not be included in his aggregate. Successful candidates obtaining not less than 65 per cent. of the total marks shall be placed in the First Class, those obtaining less than 65 per cent. but not less than 50 per cent. in the Second Class and the rest in the Third Class.

The results of the Previous Examination will only be declared and will not be classified. The marks obtained by the candidates at the Previous Examination will be added to the marks gained by them at the Final Examination and the rank secured by them will be determined accordingly.

N.B. For I (English) Vide Page 3 N.B., (3).

- 9. A candidate who fails to pass or to present himself for the examination for whatever reason shall not be entitled to claim a refund of the fee, but he may be admitted without further attendance at lectures to any subsequent examination on the payment of a like fee.
- 10. Candidates passing the M. A. Examination shall not be allowed to appear again at this Examination.
- 11. Each successful candidate at the Final Examination shall receive a certificate signed by the Chancellor setting forth the subject in which he was examined, and the class in which he was placed.

M. Sc. EXAMINATION.

1. An Examination for the degree of Master of Science shall be held annually in Hyderabad at such time and on such dates as may be prescribed by the Syndicate.

- 2. The M. Sc., Examination shall be conducted by means of printed papers and *viva voce* when necessary. Papers will be set and answered in Urdu unless otherwise notified.
- 3. The Examination shall be open only to Bachelors of Arts and Bachelors of Science of the Osmania University or Bachelors of Arts or Bachelors of Science of a recognised University who have passed B. A., or B.Sc., Examination not less than two academic years previously and have since then prosecuted a regular course of study for not less than two academic years in a constituent college of the Osmania University.
- 4. The subject which a student studies for the examination must be one in which he has passed the B.A. or B.Sc. Examination at the Osmania University as a main subject or an Examination recognised as equivalent thereto by the Faculty of Science.
- 5. No students will be allowed to appear at the examination, unless he has put in 70 per cent. attendance in each of the subjects of his course for the examination; he shall have to make up the same percentage of attendance separately in the practical course of lectures. The Syndicate may, however, condone the deficiency in attendance not exceeding 5 per cent. on special reasons, especially, ill-health when the application is supported by a certificate by an authorised Medial Officer, which can satisfy the Head of the Institution.

A member of the U. T. C. shall be permitted to count as attendance the periods spent on duty with the University Training Corps Camps.

Students attending Inter-University Tournaments or Debates will be entitled to the same privilege.

- 6. A candidate for admission to the M. Sc. Previous or Final Examinations must forward his application to the Registrar five weeks before the examination accompanied by a fee of Rs. 35. Every candidate shall produce a certificate in the form hereinafter prescribed to the effect that he has prosecuted a regular course of study for the examination.
- 7. The examination shall be held for the present in the following subjects:—

١

- 1. Chemistry.
- 2. Physics.
- 3. Zoology.
- 4. Botany.

(1) CHEMISTRY.

Previous Examination:—The examination shall consist of two parts (Previous and Final) held at the end of each year. No candidate shall be allowed to appear in the Final examination unless he has passed the previous examination.

In order to pass the examination, a candidate must obtain 40 per cent. of the marks in the aggregate. No minimum pass marks shall be required in each paper, but if in any paper a candidate obtains less than one fifth of the marks allotted, these marks shall not be included in his aggregate. 10 Marks will be set apart for the record of the practical work and technical preparation in each practical.

The examination shall consist of the following papers:-

				Marks
1st P	aper-	-Inorganic Chemistry.	••	103
2nd	,,	Organic Chemistry.	c	100
3rd	,,	Physical Chemistry.	• •	100
4th	,,	Inorganic Practical		100
$5 ext{th}$,,	Organic Practical		100
$6 \mathrm{th}$	"	Physico-Chemical Practical.		100
			Tota	al600

Final Examination:—In the second or final year, the student shall choose either Organic Chemistry or Physical Chemistry as his special subject and attend advanced lectures and conduct research work in that subject with the help of his Professor. At the end of the year, he shall be required to submit the results of his research in the form of a Thesis.

In addition to a Viva Voce Examination on the subject of his Thesis, he shall appear in a written examination consisting of

one paper	of	four	hour's	duration.	The	marks	will	be	as	fol-
lows:										

lows:

(d) Photo-Electricity and Television.	
4th Paper—Practical Examination in Electricity 100	

Total ..500

The Theoretical papers will be of 3 and the Practical of 4 hours' duration.

(3) ZOOLOGY.—

Previous Examination:-

The Examination shall be held at the end of the 1st year which will consist of the following papers:—

Theoretical—Non-Chordata:

There shall be three theoretical papers, each of three hours' duration and carrying 100 marks:—

Paper I—The structure, bionomics, development, and distribution of the following groups:—

Protozoa; Porifera; Mesozoa; Coelenterata; Platyhelmia; Nemertinea; Nemathelmia; Chaetognatha; Rotifera; Phoronidea; Sipunculoidea.

Paper II—The structure, bionomics, development and distribution of the following groups:—

Polyzoa; Brachiopoda; Annelida; Echinodermata; Arthropoda; and Mollusca.

Paper 1II—Essays on one or more of a number of subjects pertaining to Non-Chordata.

Practical—Non-Chordata:

There shall be two practical papers, each of four hours' duration and each carrying 100 marks. Candidates will be required to show a detailed knowledge of the microscopic technique and to examine, dissect or describe the animals and skeletons

prescribed. In addition to these specimens mentioned above candidates are expected to study as many other types as could be available from time to time. Candidates must produce at their practical examination their bonafide preparations (at least 50 permanent slides) and sketch-books containing a complete record of the laboratory work signed and certified by the Professor for which 10 marks will be reserved for each practical paper.

Final Examination:-

In the 2nd year or the Final Examination candidates will be allowed to take up one of the following *Group courses* subject to the approval of the Professor of Zoology:—

(A) Chordata and General Biology Group:-

Theoretical:-

There will be three theoretical papers, each of three hours' duration and carrying 1.00 marks:—

Paper I—The comparative Anatomy, Embryology, and
Distribution in time and space of the
following:—

Hemichordata; Cephalochordata; Urochordata; Cyclostomata; Pisces; and Amphibia.

Paper II—The comparative Anatomy, Embryology and Distribution in time and space of the following:—

Reptilia; Aves and Mammalia.

Paper III—The General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.

Practical:—Chordata Group:

There will be two practical papers, each of 4 hours' duration and carrying 100 marks.

- (a) Acrania.
- (b) Craniata and Microtomy.
- N.B. 10 % marks will be reserved for the practical records.

or (B) Thesis Group:-

There will be two theoretical and one practical paper carrying 100 marks each and a thesis including viva voce carrying 200 marks.

- Paper I—Based on the special subject-matter of the thesis and allied topics.
- Paper II—The General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.
- Paper III—Practical, on the subject matter of the thesis (including Practical records and Microtomy), and Thesis including Vica-Voce.
- N.B.-10 per cent. of marks are reserved for the practical records.

or (C) Special Group:-

An intensive study of a special group:

- (1) Pisces, or
- (2) Reptila, or
- (3) Insecta.

Theoretical:-

There will be three theoretical papers, each of three hours' duration and carrying 100 marks:—

- Paper I—Based on the local fauna of Hyderabad with reference to the special group selected by the candidate.
- Paper II-A general paper based on the special group.
- Paper III—The General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.

Practical:

There will be two papers of 4 hours' duration and each carrying 100 marks.

N.B.—Candidates will be expected to acquaint themselves with the current literature pertaining to the special group or the thesis selected by them.

The study of one of the Special groups mentioned above should be made with special reference to the practical aspect of the local fauna of Hyderabad (Deccan), and must be dealt with, as far as possible, from the standpoint of its economic importance.

A fairly good practical knowledge of the special group selected by the candidate is to be required, including a record of all the preparations and mounts, technique and fundamentals of research methods, together with an account of the identification of entire specimens belonging to the local fauna as well as to any other special type concerning the particular study. Microtomy (simple section-cutting methods). 10 per cent. marks will be reserved for the practical records.

(4) BOTANY.

Previous:-

The courses for Previous and Final may alternate from year to year.

(Cryptogams and Gymnosperms.)

There shall be three Theoretical and two Practical papers carrying 100 marks each, the Theoretical paper will be of 3 hours' and the Practical of 4 hours' duration.

Paper I.—Thallophyta:—

- (a) Flagellata, Bacteria, Diatoms.
- (b) Cyanophyceae, Chlorphyceae, Phaeophyceae, Rhodophyceae.
- (c) (i) Phycomycetes.—
 - (a) Oomycetes.
 - (b) Zygomycetes.
 - (ii) Eumycetes.—
 - (a) Ascomycetes.
 - (b) Basidiomycetes.

Paper II.—Bryophyta and Pteridophyta:—

- (a) Bryophyta.---
 - (i) Hepaticeae.
 - (ii) Musci.

(b) Pteridophyta.

Paper III.—Gymnosperms and General Histology.

Paper IV.—Practical—Thallophyta and Bryophyta.

Paper V.—Practical—Pteridophyta and Gymnosperms.

N.B.—Candiates will be expected to produce at least 50 permanent preparations and a complete record of their practical work.

(COURSE.-A.)

There shall be three Theoretical and two Practical papers carrying 100 marks each. The Theoretical paper will be of 3 hours' and the practical of 4 hours' duration.

Final:—

Paper I.—General Biology:— Variation, Heredity, Evolution and Mendelism.

Paper II.—Angiosperms:—

The systematic morphology, affinities and geographical distribution of the Angiosperms, with special reference to the Indian Flora.

Paper III.—Physiology and Ecology:—

The general principles of plant Physiology and Ecology.

Paper IV.—Practical—Systematic (Angiosperms).
Paper V.—Practical —Physiology and Microtomy.

N.B.—Candidates will be required to show a good knowledge of microscopic and microtome technique, to examine and describe the plants and families given on page 92 to produce at least 50 permanent preparations and a complete record of their practical work.

(COURSE-B).

With special group and thesis.—

The special group and the problem for the thesis shall be chosen subject to the approval of the Head of the Department of Botany.

*Special Groups-

- (i) Systematic—Angiosperms.
- (ii) Ecology.
- (iii) Anatomy of Angiosperms.

Candidates will be expected to acquaint themselves with the current literature pertaining to the special group and the subject of the thesis selected by them.

*To start with the above three groups are kept; addition will be made later.

The study of the special group should be made with reference to the local flora of Hyderabad, and must be dealt with, as far as possible, from the stand point of its economic and medicinal importance.

In the case of candidates offering thesis there will be two papers and a practical test (including viva voce) as follows:—

Marks.

Paper I.—One of the Special groups—A theoretical paper based on the special group. ...100

The practical examination on the subject of the thesis will carry 100 marks only.

Practical Examination:—A fairly good practical knowledge of the special group, that of the subject of the thesis and Microtomy, (Simple section—cutting methods) is required.

7. In order to pass the Examination, a candidate must obtain 40 per cent. of the marks in the aggregate. No minimum pass marks shall be required in each paper, but that candidates should pass separately in the Theoretical and Practical portions of the Examination, and if in any paper a candidate obtains less than 25 per cent. of the marks allotted, he will be deemed to have failed. Successful candidates obtaining not less than 65 per cent. of the total marks shall be placed in the First Class, those obtaining less than 65 per cent. but not less than 50 per cent. in the Second Class and the rest in the Third Class.

The results of the Previous Examination will only be declared and will not be classified. The marks obtained by the candidates at the Previous Examination will be added to the marks gained by them at the Final Examination and the rank secured by them will be determined accordingly.

8. A candidate who fails to pass or to present himself for the examination for whatever reason shall not be entitled to claim a refund of the fee.

- 9. Candidates passing the M. Sc. Examination shall not be allowed to appear again at this Examination.
- 10. Each successful Candidate at the Final Examination shall receive a certificate signed by the Chancellor setting forth the subject in which he was examined, and the Class in which he was placed.

M. A. EXAMINATION.

1353-1354 F. (1944-1945)

TEXT-BOOKS.

1. ENGLISH.

Paper I.—Chaucer and the History of the English Language.

Part I. Language—The development of the English Language from early to modern times.

The following books are recommended:-

Bradley: The Making of English.

Pearsall Smith: The English Language.

Bernard Groom: A Short History of English Words. Greenough & Kittredge: Words and their ways in Eng-

lish Speech.

Part II .- Chaucer: The Prologue to the Canterbury Tales.

Books for Reading.

Chaucer: The Nonnes Prestes Tale.

N.B.—Candidates must attempt at least 2 questions from each part.

Paper II.—Shakespeare and the Elizabethan Drama.

Texts for Special Study:—

Shakespeare:

As You Like It.
Richard III.
Hamlet.
A Winter's Tale.

Marlowe: Dr. Faustus.

Webster; The Duchess of Malfi.

Jonson: The Alchemist.

N.B.—In addition to the prescribed plays candidates will be expected to show a general knowledge of the other plays of Shakespeare and an acquaintance with the progress of Shakespearean Criticism.

Books for Reading.

Elizabethan Plays edited by Hazelton Spencer (Macmillan). The following plays:-

Marlowe: The Jew of Malta, Edward II.

Lyly: Endymion.

Greene: Friar Bacon and Friar Bungay.

Kvd: The Spanish Tragedy.

Jonson: Every Man in his Humour. Dekker: The Shoemaker's Holiday. Beaumont and Fletcher: Philaster.

Paper III.—Spenser to Milton.

Texts for Special Study:-

The Faerie Queene: Book I

Prothalamion..
Epithalamion. Spenser:

Paradise Lost: Books I and II. Samson Agonistes. Milton:

Bacon: Essays: 1-10.

Sidney: Apologie for Poetrie.

Books for Reading.

Spenser: The Shepheardes Calendar.

Shakespeare: Sonnets.

Lyly: Euphues.—The Anatomy of Wit. Nashe: The Unfortunate Traveller.

Milton: Areopagitica.

Thomas Browne: Religio Medici.

W. T. Young: Poetry of the Age of Shakespeare.

Herrick: Selections in Ward's English Poets, Vol. II.

H. J. C. Grierson: Metaphysical Lyrics & Poems.

Paper IV.—Dryden to Johnson.

Texts for Special Study:-

Absalom and Achitophel Part I. Dryden:

Preface to the Fables.

Pope:

The Epistle to Arbuthnot. The Rape of the Lock.

Thomson Collins Goldsmith

Selections in Ward's English Poets Vol. III.

Addison: Selected Essays edited by Lobban.

Johnson:

The Vanity of Human Wishes.

Preface to Shakespeare.

Swift: The Battle of the Books.

Books for Reading.

Dryden:

Essay of Dramatick Poesie. All for Love.

Sheridan: The Rivals.

Johnson: Six Lives edited by Matthew Arnold.

Fielding: Tom Jones.

Gibbon:-The Age of the Antonines (from the Decline and Fall of the Roman Empire) (Macmillan).

Burke: Selected Speeches edited by F. G. Selby (Macmillan).

Boswell: A Shorter Boswell edited by John Bailey (Nelson).

Horace Walpole: Selected Letters (Everymans).

Congreve: The Way of the World. Goldsmith: She Stoops to Conquer.

Paper V.—The Age of Wordsworth.

Texts for Special Study:—

Wordsworth:

(Lines Composed above Tintern Abbey. Ode on Intimations of Immortality.

Influence of Natural Objects.

Laodamia.

The Rime of the Ancient Mariner.

Literary Criticism edited by J. W. Mac-Coleridge: kaill (O.U.P.).

Ode to a Nightingle, Ode on a Grecian Urn.

Keats:

Ode to Autumn. Eve of St Agnes.

Adonais, Ode to A Skylark.

Shelley:

Ode to the West Wind, the Cloud.

Byron: The Vision of Judgement. Childe Harold: Canto IV.

Lamb: Essays of Elia: 1st Series.

Books for Reading.

Burns: Selections in Ward's English Poets Vol. Blake: III.

Scott: Selections in Ward's English Poets, Vol. IV.

De Quincey: Literary Criticism edited by Darbishire (O.U.P.).

Jane Austen: Pride and Prejudice.

Scott: Kenilworth.

Lockhart: Life of Scott (Abridged) (Macmillan.).

Hazlitt: Table Talk.

Paper VI.—Victorian Literature.

Texts for Special Study:—

Tennyson: In Memoriam.

Matthew Arnold: The Scholar Gypsy, Thyrsis.

—Do— : Essays in Criticism: Second Series.

Robert Browning: Rabbi Ben Ezra, A Grammarian's Funeral, Pippa Passes.

Swinburne: Atalanta in Calydon.

Carlyle: Essay on Burns. Ruskin: Unto this last.

Books for Reading.

The Oxford Book of Victorian Verse (O.U.P.).

R. L. Stevenson: Selected Essays edited by H. G. Rawlinson (O.U.P.).

Newman: The Idea of a University.

Dickens: The Pickwick Papers. Thackeray: Henry Esmond. Charlotte Bronte: Jane Eyre.

Anthony Trollope: Barchester Towers.

George Meredith: The Ordeal of Richard Feverel. Macaulay: History of England, Chapter III.

Morley: Selected Essays edited by G. H. Rawlinson. (Mac-

millan).

Paper VII.—Contemporary Literature.

Texts for Special Study:-

Francis Thompson: The Hound of Heaven.

Robert Bridges: Shorter Poems (Books I—V)from Poetical Works of Robert Bridges (O.U.P.).

William Watson: Lachrymae Musarum.

Longer Modern: Verse edited by Edward A. Parker, (O.U.P.).

G. B. Shaw: St Joan.

G. K. Chesterton: Heretics (Methuen). John Galsworthy: The Silver Box. Max Beerbohm: And Even Now.

Books for reading.

Samuel Butler: Erewhon.

Thomas Hardy: Tess of the D'Urbervilles. Arnold Bennett: The Old Wives' Tale.

H. G. Wells: Kipps.

John Galsworthy: The Forsyte Saga. Lytton Strachey: Queen Victoria. My Best Story (Faber and Faber).

An Anthology of Modern Verse chosen by A Methuen. Modern Poetry: 1922-34 edited by Maurice Wollman (Mac-

millan).

Twentieth Century Critical Essays (World's classics)

(O.U.P.).

(Harrap).

G. B. Shaw: Man and Superman.

Paper VIII.—Essay on a Literary subject.

N.B.—Subjects will include the Literary and Social History of England, the Principles of Criticism and literary forms.

Findlay Shirras: The Science of Public Finance, Vols. I and II.

H. L. Dey: Indian Tariff Problems.

Industrial Labour in India (I. L. O. Studies and Report Series).

S. A. Husain - Agricultural marketing in Northern India.

Reports:-

Wedgwood Committee Report.

Report of the Hilton Young Commission, 1926.

Do Ackworth Committee.

Do Indian Fiscal Commission.

Report of the Indian Taxation Enquiry Committee.

Do Royal Commission on Indian Agriculture.

Do Central Banking Enquiry Committee.

Do Royal Commission on Labour in India.

Do Road Rail Committee, 1933, (Commonly called the Mitchell (Committee).

Do Reserve Bank on Agricultural Credit.

Do Hyderabad Banking Enquiry Committee. Govt of India's Reports on Marketing.

Paper II.

Essay. On any subject covered by the entire M. A. syllabus.

(11) PHILOSOPHY:-

(Previous)

- I Paper—Oriental Philosophy, Indian or Islamic (for Indian Philosophy books will be prescribed later. For recommended books on Islamic Philosophy & books of reference Vide Detailed Syllabus).
- II Paper—Our Special Philosophy free among the Western Thinkers.
- III. Paper—Metaphysics with special reference to contemporary thought.

Books recommended.

- 1. Mary White Calkins: Persistent Problems of Philosophy.
- 2. Ralph Barton Perry: Present Philosophical Tendencies.
- 3. Bernard Basanquet: The Meeting of Extremes in Modern Philosophy.
- 4. Bernard Russell: An Outline of Philosophy.
- 5. C. E. M. Joad: Modern Philosophy.
- 6. W. P. Montague: The ways of Knowing.
- 7. J. A. Leighton: Man and the Cosmos (An Introduction to Metaphysics).
- 8. Bergson: Creative Evolution.
- 9, Bergson: Introduction to Metaphysics.

IV. Paper-Essay-

- V. and VI. Paper-Two of the following:-
 - 1. Logic & Epistemology. (Books will be prescribed later).
 - 2. Aestheties:—

2. AESTHETICS

Book to be closely followed.

1. Poetics

- Aristotle.
- 2. The Principles of Aesthetics. By De Witt H. Parker.
- 3. Poetry and Religion, Santayana.
- 4. The Theory of Beauty E. I. Carritt.
- 5. The Sense of Beauty C. Sanatayana.
- 6. Hegels lectures on Aesthetics.
- 7. Portions of Schopenhauer's The world as will and Idea' dealing with Aesthetics.

General Study.

- 1. What is Art. Tolstoy.
- 2. Letters on the Aesthetic education of man. F. Schiller.
- 3. Lectures on Art, Ruskin.
- 4. Philosophy of values, H. Hunserberg. Munsterbery.
- 5. A defence of Poetry, Shelley.
- 6. Aesthetics, J. Sully and G. C. Robertson.
- 7. History of Aesthetics, Bosanquet.

3. PHILOSOPHY OF RELIGION.

Books to be followed closely.

1. The Philosophy of Religion

Hoffding.

2. The Philosophy of Religion

G. Galloway.

3. Introduction to the Philosophy

John Caird.

of Religion.

4. The Varieties of religion experience.

W. James.

Books for General Study.

1. The faith of a Moralist (Crif-	
ford Lectures) Vol. I & II.	Taylor
2. The Religious Consciousness	J. B. Pratt
3. The Religious Attitude	Woodburn
4. Life Divins .	Eri Aurobinde 2 vols
5. Sources of Religious Insight	J. Royce
6. The Idea of God	Pringle Pattison
7. A psychological study of re-	
ligion	X. H. Leube

4. Ethics and Political Philosophy

Books to be closely followed.

Ethics The theory of Cool and Fril	Dewey and tufts
The theory of Good and Evil 2 vols.	Rashdall
Nicomachean Ethics	Aristotlc
The Republic	Plato
Pincipia Ethica	Noore
Prelegomena	T. H. Green
Political Thought from Spacer to To-day	Barker
Principles of Political obligation	Green
Ethical Studies	Bradley
Philosophical Theory of the State	Bosanquet

Books for General Study.

Grammar of Politics .	Laski
Development of Political Ideas.	Hearnshaw
Introduction to Modern Political	
Theory	Joad
The Social Contract	Roussean

Ethics Nicholai Hartman

Origin and development of moral ideas.

History of European Morals

Westermarck Lecky,

5. Psychology.

Books recommended.

1. W. James. Principles of Psychology.

2. W. MacDougall Energies of Men.

3. R. S. Woodworth Contemporary schools of Psychology.

4. Gardiner Murphy Psychology A Biefer Course.

5. Gardiner Murphy Historical Introduction to Psychology Parts I and II.

(12) MATHEMATICES.—

For detailed syllabus, vide Appendix, page 529 & 540.

ایم - اے

قوا عد شرکت امتحان و کامیابی و غیره حسب قواعد ایم ـ امے (شعبه فنون) امتحان مندر جه ذیل مضامین میں ہوگا ـ () فقه

امتحان ابتدائى

كتاب الطهارة ،كتاب الصلوة ،

برچه اول ـ هدايه مع العنايه

کتاب الزکواۃ ،کتاب الحج ، کتاب الوقف مطالعہ کے لئے فتح القدیر اوربد ائع صنائع ملك العلماء كى سفارشكيجاتى ہے۔

سر سری مطالعہ کے لئے فو ائد بھیہ' و الحو ا ہر ا لمضیہ' سیر ہ النعمان کی سفار ش کی جاتی پرچه دوم اصول فقه مسلم الثبوت ـ
پرچه سوم ـ تاریخ فقه اسلامی
تا ریخ التشریع الاسلامی
للخضری و ـ النافع الکبیر مقدمه
جامع صغیر ـ

رچه چهارم خلا فیات بدایة المحتهد باستثناء ان ابواب

امتحان آخرى

مرچه اول ـ اصول شرائع اتحاف الابصار واليمائر، حجة الله البالغداز مبحث سابع تا فصل في عدة من الا مور المشكلة من التقليدو اختلاف المذ 1 هب، موافقات شاطى باب الكتاب جسراب الاجتهاد الى آخر الكتاب.

کے جو ہدایہ پر چہ اول میں آچکے ھیں ۔

سرسرى مطالعه كالمترتذكوة اعظم الأشباء و النظائر ابن نجيم مع شر ح حموی کی سفا ر شکیٰ حاتی ہے۔

سرسری مطالعه کے لئے تذکر ہ اعظم اور ہوا فقیات کے غیر درسی ابواب کی سف رش کی حاتی ہے۔

> پرچه دوم . فتوی نویسی و فیصله نگار ی مقاله (۲۰۰ نشانات)

مقاله يروفيسركي نگراني ميں لكها جائے گا جو بچے اس صفحور <u>سے</u> کم نه هوگا۔ مضمون کے لئے یر وفیسرمتعلقه کی سفارش کی بناءیر محلس نصاب شعبهٔ دینیات سے منظوری۔اصلکرنی ہوگی۔

مقا لہ کے ممتحن طالب علم کا زبانی امتحان بھی لیں کے تا کہ ان کو اس امرکا پتہ چلےکہ طا لبعلم نے اپنے مقالہ کے لئے اصل مصادر کا استعال کیا ہے۔

(۲) تفسیر

امتحان ابتدايي

ىرچە اول ـ قرآن محيد ا د يى حیثیت سے کشاف سورہ يقر ه -

یرچه دوم -قرآن ربط آیات و سوره کی حیثیت سے اور اقسام قرآن ' نظام لقرآن فی تاویل

القرآن بالقرآن للفراهي، سورهٔ ذاریات بتب تس، مر سلات ، کوثر ، امعان فی اقسام القرآن ـ

یر چه سوم ـ قر آن فقهی حیثیت سے ۔ احکام القر آن ابن عربی سورهٔ بقره ، نساء ، مائد ه ' انعام _

یر چدچهارم-مباحث متعلقه قرآن ورسم الخط تاریخ قرآن و ارض القرآن و تاریخ تفسیر۔ اتقال ۱۳ و ۲۹ و ۳۸ و ۳۸ و ۰۸ و ۲۸ و ارشاد الحران في رسم خط القرآن ' تاریخ

سر سری مطالعه کے لئے روح المعانى سورة بقرةكي سفارش کی جاتی ھے۔

سر سری مطالعہ کے لئے تیصبر الرحمن مهائمي، سيق الغايات تهانوی، تبیان ابن تیم کی سفارش کیجاتی ہے۔

سرسری مطالعہ کے لئے احکام القرآن رازىء تقسيرات احمديه ملا جیون کی سفار شکی جاتی ھے ـ

سرسری مطالعہ کے لئے تاریخ صحف سماو یه چود هری نواب علی، جغر افيهِ كتاب مقدس سعيد المنصور البيروتي، تاريخ عرب تديم، الوسي، نو فل ، عما دى ـ

القرآن رحمانی ،تاریخ ار ض القرآن سلمان ندوی .

امتحال آخرى

پرچهٔ اول -تفسیرالقرآن سرسری مطالعه کے لئےدر منٹور، بالا حادیث المعتبرہ 'تفسیر ابن جریر طبری کی سفارش کی ابن کثیر منزل چهارم ، پنجم - جاتی ہے ـ

سر سری مطالعہ کے [•] لئے تفسیر القرآن مفتیعبدہ تفسیرکبیروحقانی کی سفا ر ش کی جاتی <u>ہے</u> ۔

پرچه دوم ـ قرآن کلامی حیثیت

سے غرائب القرآب

نیشا پوری سورهٔ آل عمران

واعراف ویونس ـ

مقاله پر و فیسرکی نگر انی میں لکھا جائے گا جو پچاس صفحوں سے کم نه ہوگا۔ مضمون کے لئے پر و فیسر متعلقہ کی سفا رش کی بناء پر مجلس نصا ب شعبۂ دینیات سے منظوری حاصل کرنی ہوگی۔

مقا لہ کے ممتحن طالب علم کا زبانی امتحان بھی لیں کے تاکہ انکو اس ا مرکا پتہ چاہےکہ طالب علم نے اپنے مقا لہ کیلئے اصل مصادرکا استعال کیا ہے۔

(٣) حديث

امتحان ابتدئى

پرچهٔ اول ـ احادیث جامعه معه سرسری مطالعه کے لئے شروح تراجم ابواب کاری شریف بخاری ، وشروح تراجم ابواب

نصف اول۔

پرچهٔ دوم ـ احادیث السنن والا حکام ابوداود شریف ـ

پرچه سوم-اصول و علل حدیث و مشکلات الحدیث مقدمهٔ ابن صلاح' مقدمه فتح الباری فصل چهارم

پرچهٔ چهارم تاریخ حدیث و فن رجال، مقدمه فتح الباری از اول تا اختتام فصل سوم، تاریخ فنون الحدیث للخولی۔

امتحان آخری پرچهٔ اول - بخاری شریف نصف آخر پرچهٔ دوم - مسلم شریف کامل مقــاله (۲۰۰ نشانات)

مقالہ پرو فیسرکی نگر آنی میں لکھا جائے گا جو پچاس صفحوں سے کمنہ ہوگا۔ مضمون کے لئے پرو فیسر متعلقہ کی سفارش کی بناء پر مجلس نصاب شعبۂ دینیات سے منظوری حاصل کرنی ہوگی۔

مقاله کے ممتحن طالب علم کا زبانی امتحان بھی لیں کے تاکہ ان کو اس امرکا پتہ چلے کہ طالب علم نے اپنے مقاله کیا ہے۔ کیلئے اصلی مصادر کا استعال کیا ہے۔

شاہ ولی اللہ صاحب و شیخ الهند کی سفارش کی جاتی ہے۔ سر سری مطالعہ کے لئے عون المعبود و بذل المجھود کی سفارش کی جاتی ہے۔

سرسری مطالعہ کے لئے علل اپن ابی حاتم ، تو جیہ النظر ' المعتصر من المختصر کی سفار ش کی جاتی ہے۔

مقدمه سبرة البی شبلی نعانی خطبات مدراس سید سلمان ندوی کی سفارش کی جاتی ہے۔

(٣) كلام وعقائد

امتحان ابتدائي

پرچه اول ـ شرح مواتف (امور عامه) پرچه دوم ـ الهیات از شرح مقاصد پرچه سوم ـ سمعیات از شرح مقاصد پرچه چهارم ـ تصوف نظری امتحان آخری

پرچه اول (۱) مذاهب عالم (بطورخاص عیسائی مذهب،
بده مذهب، سناتن دهرم، برهو سما ج آریه مذهب،
سکهه مذهب، پارسی مذهبکا مطالعه)
(ب) مذهب کے متعلق جدید نظریات

برچه دوم تاریخ علم کلام به تفریق فرقه هامے اسلام

مقالہ پروفیسر کی نگر آئی میں لکھا جائیگا جو پچاس صفحوں سے کم نہ ہوگا ۔ مضمون کے لئے پروفیسر متعلقہ کی سفارش کی بناء پر محلس نصاب شعبہ دینیات سے منظوری حاصل کرنی ہوگی ۔

مقالہ کے ممتحن طالب علم کا زبانی امتحاب بھی لیں کے تاکہ انکو اس امرکا بتہ چلے کہ طالب علم نے اپنے مقالہ کے لئے اصل مصادرکا استعال کیا ہے۔

كتب مقرره

M. Sc. Examination

(1) CHEMISTRY:—

Previous Examination.

PAPER I INORGANIC CHEMISTRY.

Books recommended for Study and reference:—

- 1. A Text-book of Inorganic Chemistry by Fritz Ephraim.
- 2. A Treatise on General Industrial Chemistry by Molinari. Inorganic Volume.
- 3. Industrial Chemistry by Martin. Inorganic Section.
- 4. Rare earths by Browning.
- 5. Inorganic Chemistry A survey of Modern development by Morgan.
- 6. New ideas in Inorganic Chemistry by Werner.
- 7. Modern aspects of Inorganic Chemistry by Emeleus and Anderson.
- 8. Analytical Chemistry by Treadwell and Hall, 2 Vols.

- 9. Quantitative Chemical Analysis by Cumming and Key.
- 10. Volumetric analysis by Fowles.
- 11. Technical analysis of ores and metallurgical products by F. C. Hills.
- 12. Gas analysis by Dennis.
- 13. Preparation of pure Inorganic Compounds by Archibald.
- 14. Semi-micro qualitative analysis by Arthur and Smith
- 15. Laboratory Mannual of Electro-Chemistry by Muller.
- 16. Recent advances in Analytical Chemistry by Mitchell.

PAPER II ORGANIC CHEMISTRY.

Books recommended for Study and reference:-

- 1. Organic Chemistry by J. Schmidt.
- 2. Advanced Organic Chemistry by Cohen, 3 Vols.
- 3. Organic Chemistry by Richter.
- 4. Organic Chemistry by Bernthsen.
- Systematic Organic Chemistry by Cumming, Hopper and Wheeler.
- 6. Recent Advances in Organic Chemistry by Stewart.
- 7. Modern Theories of Organic Chemistry by Watson.
- 8. Organic Chemistry by Gilman, 2 Vols.
- 9. Chemical Technology and Analysis of Oils. Fats and Waxes by Lewkowitsch, 3 Vols.
- 10. Vegetable Fats and Oils by Jamieson.
- 11. Chemistry of Plant Products by Hass and Hill.
- 12. Chemical Synthesis by Hapworth.
- Natural and Synthetic Colouring matters by Perkin and Everest.
- 14. Handbook of Organic Analysis by Clarke.
- 15. Carbon Compounds by Weston.
- 16. Practical Organic Chemistry by Sudborough and James.
- 17. Practical Organic Chemistry by Cohen.
- 18. Practical methods of Organic Chemistry by Gatterman.

PAPER III PHYSICAL CHEMISTRY.

Books recommended for Study and reference:-

- 1. Physical Chemistry by Macdougall.
- 2. Physical Chemistry by Eggert.
- 3. A text book of Physical Chemistry by Newton Friend Vols I & II.
- 4. Theoretical Chemistry by Nernst.
- 5. Tretise on Physical Chemistry edited by H. S. Taylor Vols. I & II.
- 6. Electronic theory of valency by Sidgwick.
- 7. Recent advances in Physical Chemistry by Glasstone.
- 8. Recent advances in General Chemistry by Glasstone.
- 9. Colloids by Taylor.
- 10. Colloids by Hatscheck.
- 11. A short history of Chemistry by Partington.
- 12. History of Chemistry by Thorpe, 2 Vols.
- 13. Practical Physical Chemistry by Findlay.
- 14. Experimental Physical Chemistry by Daniels, Mathews and Williams.
- 15. Physico-chemical methods by Reilley and Rae.

Final Examination.

INORGANIC CHEMISTRY.

Books recommended for Study and reference:-

In addition to the books recommended for M. Sc. previous, the following are also recommended:—

- 1. A Comprehensive treatise on Inorganic and Theoretical Chemistry by Mellor.
- A Text-book of Inorganic Chemistry edited by Newton Friend.
- 3. Radio-activity by Hevesey and Paneth.
- 4. Recent advances in Physical and Inorganic Chemistry by Stewart.
- 5. Recent advances in General Chemistry by Glasstone.

Original papers and annual reports on the progress of Chemistry.

ORGANIC CHEMISTRY.

Books recommended for Study and reference:-

- 1. Organic Chemistry by J. Schmidt.
- 2. Advanced Organic Chemistry by Cohen, 3 Vols.
- 3. Systematic Organic Chemistry by Cumming, Hopper and Wheeler.
- 4. Recent Advances in Organic Chemistry by Stewart.
- 5. Modern Theories of Organic Chemistry by Watson.
- 6. Physical Aspects of Organic Chemistry by Waters.
- 7. Organic Chemistry by Gilman, 2 Vols.
- 8. Simpler Natural Bases by Barger.
- 9. Chemistry of Plant Products by Hass and Hill.
- 10. Original papers and annual reports on the progress of Chemistry.

OR PHYSICAL CEMISTRY.

Books recommended for Study and reference:-

- 1. Photo-processes in Gareons and liquid systems by Griffith and McKeown.
- 2. Photo-chemical processes by G. B. Kistiakowcky.
- 3. Allgemeine Photochemic by Plotnikow.
- 4. Photo-chemie by Berthoad.
- 5. Grundlagen der Photochemie by Bonhoeffer and Harteck.
- 6. Molekul structur by Stuart.
- 7. Relation between chemical constitution and Physical properties by Smiles.
- 8. Spectroscopy by Baly.
- 9. The Co-valent link in Chemistry by Sidgwick.
- 10. Raman spectra and chemical constitution by
- 11. Polar molecules by Debye.
- 12. Di-electric constant and Molecular structure by Smyth
- 13. Magnetism and Matter by Stoner.

- 14. Magneto-chemie by W. Klemm.
- 15. Recent advances in Physical Chemistry by Glasstone.
- 16. Transactions of the Faraday Society, Reports on the progress of Chemistry and other Journals.

(2) PHYSICS:—

No Text-books are prescribed; but the following books are suggested as indicative of the scope of the subjects required for study. Candidates are required to study the original papers and to remain in touch with modern developments in Physics:—

General Physics:-

Haas: Theoretical Physics.

Poynting and Thomson: Properties of Matter.

Jeans: Dynamical Theory of Gases.

Barton: Analytical Mechanics.

Newman and Searle: Properties of Matter.

Sound:-

Barton: Sound.
Rayleigh: Sound.
Richardson: Sound.

Wood: Text-book of Sound.

Heat:-

Preston: Theory of Heat. Saha: Treatise on Heat.

Roberts: Heat and Thermodynamics.

Shilling and Partington: Specific Heat of Gases.

Planck: Thermodynamics.

Optics:-

Preston: Theory of Light.

Drude: Optics.

Wood: Physical Optics.

Baily: Spectroscopy.

Magnetism and Electricity:—

Pohl: Electricity and Magnetism. Pidduck: Treatise on Electricity.

Jeans: Mathematical Theory of Electricity and Magne-

tism.

Starling: Electricity and Magnetism.

Stoner: Magnetism and Atomic Structure.

Abraham: Classical Theory of Electricity and Magne-

tism, translated by J. Dougall.

Modern Electricity:-

Wilson: Modern Physics.

Andrade: Structure of the Atom.

Crowther: Ions, Electrons and lonising Radiations.

J. J. Thomson: Conduction of Electricity through Gases
Rutherford: Radiations from Radio-active substances.

Aston: Isotopes.

Sommerfeld: Atomic Structure and Spectral lines

Richardson: Electronic theory of Matter. Bragg: X-Rays and Crystal Structure.

Compton: X-Rays. De Broglie: X-Rays.

Watson: Text-book of Practical Physics.

Worsnop and Flint: Advanced Practical Physics for students.

(3) ZOOLOGY:-

Books*, journals* and periodicals* recommended for reading or reference in connection with the M. Sc. Examination in Zoology:—

(A) Comparative Anatomy of Vertebrata and Invertebrata.

Parker and Haswell: Text Book of Zoology, Vols. 1 & 2. Kingsley, or Wiedersheim and Parker: Comparative Anatomy of Vertebrates. Lankester: Treatise on Zoology. (Series)

Cambridge: Natural History Series.

Sedgwick: Student's Text-Book of Zoology, 3 Vols.

Goodrich: Structure and Development of Vertebrates.

De Beer: Vertebrate Zoology.

The Indian Zoological Memoirs and the L. M. B. C.

Memoirs.

(B) General Biology and Evolution.—

Darwin: The Origin of Species.

Wiesmann: The Evolution Theory.

Lock: Variation, Heredity and Evolution.

Smith, J.: The Primitive Animals.

Locy: Biology and its Makers.

Poulton: Essays on Evolution.

Keeble: Plant-Animals.

Willey: Convergence in Evolution.

Borradaile: The Animal and its Environment.

Watson: Evolution.

Osborn: From Greeks to Darwin.

Osborn: Origin and Evolution of Life.

Jordan and Kellogg: Evolution and Animal Life.

Driesch: History and Theory of Vitalism.

Kellogg: Darwinism to-day. Lull: Organic Evolution.

Russell: Form and Function.

Lloyd Morgan: Instinct and Experience.

Gaskell: On the Origin of Vertebrates.

Darwin: Descent of Man.

Dendy: The Biological Foundations of Society.

Goodrich: The Evolution of Living Organisms.

Canningham: Hormones and Heredity.

Pearson: The Chances of Death and Other Studies in Evolution. Vols. 1 & 2.

Chambers: Vestiges of Creation.

Herbert: The First Principles of Evolution.

Wallace: Darwinism.

(C) Heredity, Genetics, Mendelism, Sex, etc:-

Thomson: Heredity.

MacBride: Introduction to the Study of Heredity.

Doncaster: Heredity in the Light of Recent Research.

Doncaster: The Determination of Sex.

Kerr and Agar: Lectures on Sex and Heredity.

Loeb: Artificial Parthenogenesis.

Morgan: Heredity and Sex. Thomson and Geddes: Sex.

Punnett: Mendelism.

Darbishire: Breeding and Mendelian Discovery.

Castle, Coulter and Davenport: Heredity and Eugenics.

Lillie: Problems of Fertilisation.

Newman: The Biology of Twins.

(D) Cytology and Embryology:—

Agar: Cytology.

Wilson: The Cell in Development and Inheritance.

Doncaster: Cytology.

Kellicott: Outlines of Chordate Development

MacBride: Embryology-Vol. 1.

Graham Kerr: Embryology-Vol. 2.

Asseton, Hill and Wilson: Embryology-Vo. 3.

Jenkinson: Vertebrate Embryology.

Lillie: Development of Chick.

Morgan: Regeneration.

Marshall: Vertebrate Embryology.

(E) Distribution.—

Heilprin: The Distribution of Animals.

Beddard: Zoogeography.

Lankester: Extinct Animals.

Wallace: The Geographical Distribution of Animals.

Vols. 1 and 2.

Wallace: Island Life.

Gadow: The Wanderings of Animals.

(F) Microtechnique:-

Gatenby and Cowdry—Bolles Lee's Microtomist's Vade—Mecum.

*Candidates are expected to be familiar with the current journals and periodicals which will be suggested by the Professor from time to time; he will also advise them as to which books, journals, or portions thereof are to be read.

(4) BOTANY:-

Books, Journals and Periodicals recommended for reading or reference.

Systematic:-

Engler: Das Pflanzenreich.

Engler and Prantl: Die Naturlichen Pflanzen familier.

Cooke: Flora of the Bombay Presidency.

Hooker: Flora of British India.

Roxburgh: Flora Indica.

Duthie: Flora of the Upper Gangetic Plain.

Partridge: Forest Flora of Hyderabad.

Kirtikar: Indian Medicinal Plants.

Brandis: Indian Trees.

Watt: The Commercial Products of India.

Rendle: Classification of Flowering Plants, Vols. I & T.

General:--

Strasburger: Text-Book of Botany.

Campbell: University Text-Book of Botany.

Bower: Origin of a Land Flora. Scott: Studies in Fossil Botany. Seward: Fossil Plants.

Darwin: Forms of Flowers.

Coulter and Chamberlain: Morphology of Gymnosperms

and Angiosperms.

Coulter Barnes and Cowles: Text-Book of Botany, Vols. I. II and III.

Willis: Flowering Plants and Ferns

Haberlandt: Physiological Plant Anatomy.

Seward, A. C.: Plant Life through the ages (Camb: Univ: Press, 1334).

Algae :--

West: Algae. Vol. I.

West and Fritsch: British Fresh water Algae.

Fungi:--

Gaumann and Dodge: Comparative morphology of Fungi.

Gwynne-Vaughan, H: Fungi, Ascomycetes, etc.

Stevens: Fungi and Plant Disease.

Butler: Fungi and Disease in Plants.

De Bary: Comparative Morphology of the Fungi, etc.

Gwynne—Vaughan and Barnes: Fungi.

Bryophyta:--

Campbell: Mosses and Ferns.

Cavers: Inter-relationships of the Bryophyta.

Kashyap: Liverworts of the Western Himalayas and the Punjab Plain, Parts I and II.

Pteridophyta:---

Christ: Die Farnkrauter der Erde Die geographie der Farne.

Bower: The Ferns.

Blatter and Almeida: The Ferns of Bombay.

Gymnosperms:-

Pearson: Gnetales (Camb. Univ. Press).

Coulter and Chamberlain: Morphology of Gymnosperms.

Chamberlain: The Living Cycads.

Plant Physiology and Ecology:-

Stiles: Photosynthesis.

Bose: Physiology of Photosynthesis.

Bose: Physiology of Ascent of Sap.

Bose: Nervous Mechanism of Plants.

Dixon: Transpiration and the Ascent of Sap.

Kostychev: Plant Respiration.

Barton Wright: Recent Advances in Plant Physiology.

Miller: Plant Physiology.

Raber: Plant Physiology.

Palladin: Plant Physiology.

Schimper: Plant Geography.

Warming: Ecology of Plants.

General Biology and Cytology:-

Dendy: Outlines of Evolutionary Biology. Bateson: Mendel's Principles of Heredity.

Thomson: Heredity. Punnet: Mendelism.

Darwin: Origin of Species.

Wallace: Darwinism.

Weismann: The Evolution Theory. Coulter & Coulter: Plant Genetics.

Sharp: Cytology.

For Practical:—

Chamberlain: Methods in Plant Histology.

Strasburger: Practical Botany.

Bower: Practical Botany.

Darwin & Acton: Practical Physiology of Plants.

Detmer & Moore: Plant Physiology.

Journals and Periodicals:-

"Important Journals and periodicals may be recommended from time to time by the Professor."

APPENDIX

Detailed Syllabus.

M. A. Examination

1. TELUGU.

1st Paper:—History of Telugu Language, Philology and Grammar.

Science of Language in general. Telugu Alphabet. Sounds. Comparison with Sanskrit and other Dravidian ones. Words. Pure Telugu words. Sanskrit words, their adaptation in Telugu. The script, its evolution. Philology as a science. Comparative phililogy of Dravidian languages. Caldwell's theory and later expositions.

The Dravidian base. Sanskritic analogy. Caldwell's theory and later expositions.

2nd Paper:—History of Telugu Literature. Criticism. Prosody & Poetics.

History of Telugu Poets. The main Literary principles and standards. Appreciation and status of poetry in literature. Reddy's principles of poetry and subsequent writers on the subject. Folk songs and Ballads.

The Theory of Poetry. Its Sanskritic origin. Rhetoric. Theory of Rasa and Dhwani. The Concept of Rase as exhibited in Modern Literature. Prosody. Indegenous Types and Metres— Dwipada. Kanda, Sisa and others. Sanskrit meters. The differences in their original and Telugu forms.

The changed outlook. Revolt against conventions in Language and Literature. Study of English Literature, its effect. The Revival of Song and Popular metre forms.

Concept of Love in Modern writers, New Metres.

3rd Paper:—History of Telugu People.

Telugu Literature as a faithful reflection of Andhra genius and Culture. A knowledge of their social history, customs & manners. The Andhras of Upanishadic Ramayana ages. Maghadha Empire. Their Patronage of Prakrit. Chalukyas, their love for Telugu. Kakatiyas, Telugu writers in Sanskrit. Religious Tinge (Saivism). Reddi & Velama Kingdoms.

Viziaya Nagar. The departure in literary form. External influences on culture and civilization. Their effect on Literature.

The Nayaks of South India. The Women writers, Emergence of Drama and Stage. Song Literature.

The English Education. Its vital *impact*. The National and Socio-religious movements and their influence on Telugu Renaissance.

4th Paper:-Poetry, Classical.

The Trinity of Telugu Literature. Their work, Evolution in the method of Translation from Sanskrit. Srinatha and his school of Poets. Prabhandha writers. Double *Entendre*. Dwipada and Satake writers.

5th Paper:—Poetry, Modern, and Drama.

Drama. Works, translated from Sanskrit, English and Bengalee. A knowledge of Dramaturgy. Types of indegenous Drama—Yakshagana, Veedhi Nataka etc.

6th Paper:-Prose.

Prose in Telugu Classical works, Descriptive and Narrative. All-prose works.

Classical Prose of Chinnaya Suri and his School. The Language of Village recods and story telling. The Prose of Commentaries and Literary controversies. Essay. Veerasalingam. Biography, Novel & Drama. Short-Story.

7th Papers—Essay.

8th Paper:—Special Author.

His date and Works. Their nature and place in Literature. Contemporary Poets. A knowledge of their works. The History of the times, social condidtions and culture.

A detailed study of literary and linguistic features of one of his prominent works. A critical review and Estimate of the Poet.

2. ECONOMICS.

(Previous) Examination.

Paper I—Advanced Principles of Economics.

The students will be expected to show a thorough critical knowledge of the Economic theories of the classical Economists especially Marshall and Pigou and the approach to Modern Economics in the field of Production, Distribution, Exchange and Consumption.

- Some preliminary observations about Economics.
 The substance of Economics. The scope and method of Economics.
 Controversies about the scope and method of Economics.
 Economic generalization or laws.
- Wants and their satisfactions. Wants in relation to activities.
 Gradation of consumer's demand. The elasticity of wants. Choice between different uses of the same thing. Immediate and deferred uses. Value and utility.
- 3. The Agents of Production.

 The fertility of land. The tendency of diminishing raturn. The growth of Population. The health and strength of the population. Industrial Training. The growth of wealth. Industrial organisation. Division of labour. The influence of machinery. The concentration of specialized industries in particular location. Production on a large scale. Business management. Co-relation of the tendencies of increasing and diminishing returns.
- 4. General relation of demand and supply.

 Supply and value. Markets. Temporary equilibrium of demand and supply. Equilibrium of normal demand and supply. The investment and the distribution of resources. Equilibrium of normal demand and supply with reference to long and short term. Joint and composite demand. Joint and composite supply. Prime and total cost in relation to joint products. Marginal cost in relation to values.

Equilibrium of normal demand and supply. The Theory of changes in normal demand and supply in relation to the doctrine of maximum satisfaction. The theory of monopolies.

- 5. The distribution of National Income.

 Preliminary survey of distribution. Earnings of
 Labour. Interest and Capital. Profit of Capital and
 businesss power. Rent of land. General law of distribution.
- A critical examination of the theories of Interest, Wages, Rent and Profit.

Paper II—History of Economic Thought.

The students will be expected to show a thorough critical knowledge of the history of Economic doctrines from the earliest time to the present day.

- 1. Economic thought before the Science of Economics.
- 2. The dawn of Modern Economic Thought and the evolutions of Economics as a Science. Mercantilism and Kameralism. The Physiocrats and the revolution in the social Philosophy. Adam Smith and his immediate predecessors. The followers of Smith Bentham, Malthus, Ricordo. Carey and the American School. Bastiat and the French optimists. Senior, Say, Rau and other chief expositors in Germany and France.
- 3. The opponents and the leading critics of the classical school—(a) Individualistic critics, (b) Nationalistic critics and (c) Socialistic Critics.
- 4. John Stuart Mill.
- 5. The opponents and the leading critics. Critics of the philosophical and ethical system. The rise of scientific socialism. The critics of the scope and method.
- 6. The Historical School and its contribution to the Economic Science, The Austrian School and the development of the theory of value.
- 7. General account and criticism of the recent leading schools and Economists.

Paper. III - Sociology.

1. Theoretical Sociology:

- 1. The Origin of Societies and Social Progress.
 - (a) Primitive Societies, Institutions.
 - (b) The stages of Social Progress.
 - (c) The effect of geographical discoveries, scientific achievement, industrial progress, and political ideas on society.
- 2. Society and Environment.
 - (a) Relation between physical environment and social conditions, e.g. the influence of Soil, Mineral Resources, Climate.
 - (b) The incluence of historical and religious factors on Social progress.
 - (c) Characteristics and basic principles of Rural and Urban Sociology.
- 3. The Foundations of Society.
 - (a) The Individual and Social behaviour.

The formation of the Human mind.

The Individual Mind.

The collective Mind.

Family, Tribe, Caste, Class, Race, Nation.

The Behaviour of Crowds (Theories of G. Lebon). Fashious and Customs.

Folkways (Theories of Summer).

- 4. History of Sociological Thought.
 - (1) A brief survey of Sociological Thought, in the ancient and Medieval eras.
 - (b) Important Theories and Principles of Modern Sociologists from Comte and Spencer to Pareto and Hobhouse

II. Applied and Indian Sociology.

1. Introduction.

- (a) The Meaning of Applied Sociology and Indian Sociology.
- (b) The Relation of Applied Sociology to Economics, Politics, Science and Ethics.
- (c) The influence of Applied Sociology on Social Politics.

2. Wealth and Welfare:

- (a) The meaning of Wealth and Welfare.
- (b) The criterion of Wealth and Welfare.

Theories of Welfare. Standard of Living and Comfort.

The Wealth and Poverty of India.

3. Social Pathology:

- (i) Poverty and Pauperism.
 - (a) The extent of Poverty.
 - (b) Principles of Relief.
 - (c) Private poverty and unorganised charity, charitable institutions and organised charity.
 - (d) The need of State Supervision & Social Legislation.

(ii) Vice and Crime.

(a) The Meaning of Vice and Crime. Extent of Vice and Crime. Prison system. The treatment of the abnormal. Need of Reformatories. The Drink & Drug Evil in India. The temperance Movement. Theories of social Justice.

4. Social Reconstruction:

- (a) The standard of Living.
- (b) The standard of Comfort.
- (c) The Problems of population and Modern Theories.
- (d) Principles of Social Legislations.

- (e) Principles of Social Reform.
- (f) Educational Sociology and Social Reforms.

5. Indian Social Institutions:

- (a) The Caste System. Its different Aspect and effects; economic racial, political religious and social. The joint Family system. The Depressed classes. Merits and Defects of Indian Social Institutions. The Position of Women. Purdah. Child Marriage. Widow Re-marriage. Divorce. Polygamy. Devadasi.
- (b) Islamic Influence on Indian Institutions. The Influence of Indian Institutions on Mohammadans. The effects of British and Western Thought on Indian Society.

Or Paper III-Politics.

History of later Political Theories from 1500 to the present day.

The scope of this paper should be the same as for M.A. (Previous) History Paper II.

Or Paper III-Economic History.

The course will deal with the main problems of agricultural, industrial and commercial development of (a) Germany and U. S. A. since 1815 and (b) Japan since 1868.

1. Introductory: General features of the economic development in the 19th Century.

The progress of industrialisation in the above countries. The principal changes in the development of agriculture, transport and foreign trade. The tariff policies of Government. The development of banking and currency. The financial crises. Trade. Labour Movement. Co-operation. Social Policy of the Governments.

Paper IV-

Monetary Problems, Cerntral Banking and International Trade (Currency and Banking)

- Recent discussions of the Nature and functions of money; mainly the theories of Prof. Cassel, Knapp and Prof. Mises.
- 2. The value of money; recent discussions of the problem:
 Quantity theory as formulated by Fisher and Keynes:
 Its merits and drawbacks. The application of marginal utility theory to money.
- 3. The social effects of rising and falling prices.
- 4. The problem of the rate of interest; the relationship between interest and prices; the market rate and the Natural or Equilibrium rate; the power of the banks to regulate prices.
- 5. Analysis of the modern theories of the Trade cycle; A short account of the theories of Hawtrey, Keynes, Mises and Heyek.
- 5. The problem of the Gold standard, working of the pre-war Gold standard; changes in the functioning of the Post-War Gold standard; causes and consequences of the breakdown of the gold standard in the case of Great Britain.
- 7. A comparative study of the Central Banks of the leading countries; England, France, Germany and the U.S.A.

Inconvertible paper currencies.

The balance of payments; exchanges under gold standard,

International Trade.

The theory of the comparative cost. Supply and demand in International Trade. International Trade and general equilibrium.

Trade policy; free trade and protection; dumping, cartels, monopolies and export bounties. Quota system. Commercial treaties.

(Final) Examination.

Paper I-Advanced Indian Economic Problems.

There is no set syllabus for this paper. The student will be expected to show a thorough critical knowledge of the modern Indian Economic Problems in the field of Agriculture, Traue, Commerce, Industry, Labour, Banking, Currency and Finance. The treatment should be original and critical.

Paper II-Essay.

An essay of three hours relating to a problem covered by the entire M.A. Syllabus.

PHILOSOPHY.

Previous.

فلسفه اسلام

بی ۔ اے مین فلسفہ اسلام کے جو چار شعبے داخل ہیں ایم ۔ اے میں ان میں سے کسی ایك کو تفصیلی و تخصیصی مطالعه کے ائے لینا ہوگا یعنی یا (۱) علم کلام (۲) یا فلسفۂ مشائیہ و اشراقیه (۳) یا تصوف (۷) یا فلسفۂ قرآن ۔

علم كلام

اسلام میں ابتد آئی اختلا فات کی نوعیت نقلی تھی نہ کہ عقلی۔
اس کے اسباب کہ قرون اُولی اور دور صحابہ میں عقلی چون و چرا
اور اختلا فات کیوں نہیں رونما ہو ئے۔ کلا می مباحث کا
آغاز۔ اس کی دوقسمیں عقلی و نقلی ۔ عقلی کلام کب اورکیسے پیدا
ہوا۔ اہم اسلامی فرقسے ۔ میکڈ انلڈ کا دعوی کہ مسلما نوں کے مشہور
ہتر فرقوں میں تم از کم ستر شیعہ میں ہیں ۔ شیعیت کا عقلیت یا اعتزال
کا فلسفہ سے خاص تعلق ۔

مسئلهٔ حدوث و قدم عالم - ابطال قدم و اثبات و جود باری مباحث ذات و صفات - و جود الله عین ذات الله هے - ذات الله مغائر سائر مو جود ات هے - زمان و مکان و جهت سے منزه هے - کنه ذات کا علم ناممکن هے - اتصاف ذات بالحوادث کی نفی - صفات و جود یه و سلبیه - تشبیه و تنزیه - تو حید و نفی اتحاد و حلول - بحث استوا و و جه ید و غیره - مسئله رویت باری - بحث کلام مضمی و لفظی - افعال الله - دوام فاعلیت باری تعالے - خلق افعال - مسئله و ضلق افعال کسب عبد -

اثبات نبوت ـ قرآن و اعجاز قرآن ـ معجزه و سحر وکر امت ـ عصمت انبیا ـ ختم نبوت ـ جن و ملا ئکه ـ شیطان ـ حسن و قبح ا ور اس کا عقلی یا غیر عقلی هو نا ـ حقیقت ایمان ـ ایمان میں نقص و زیادت ـ ایمان ا ور اعمال ـ مباحث معاد ـ ثواب و عقاب ـ توبه ا ور عفو و مغفرت ـ جنت و نا ر ـ مسئله ا ما مت ـ مسائل نفس و جسم ـ ا بطال تنا سخ ـ

تصو ف

۱۔ تصوف وسریت مین فرق و تعلق ۔ مغربی مصنفین و
 مستشر قین کا دو نون میں خلط مبحث ۔ خالص اسلامی تصوف ۔
 بیرونی اثرات خصوصاً نوفلاطونیت کے ۔

۲ موفیانه زندگی ـ اس کی خصوصیات ـ اسلام میں ان خصوصیات کی اصل ـ غیر اسلامی صوفیانه زندگی سے اصولا اسکا فرق ـ ریاضت ورہبانیت (ترك دنیا) كا اسلامی وغیر اسلامی مفہوم ـ

س صوفیانه نظر یهٔ علم - محققین صوفیا ئے اسلام اپنے مسائل وتعلیمات کی بنیادکس ذریعهٔ علم پررکہتے ہیں۔ اور دیگر سریه کا مدارکس ذریعهٔ علم پر ہے ۔ وحی اور الہام (یا کشف و وجدان) مین فرق ۔ اہل مغرب وحی اسلامی کا تصور نه سمجہه سکنے کی وجه سے اسکو بھی بالعموم کشف و وجدان ہی کی ایک صورت یا ایک درجه قرار دیتے ہیں ۔

م - صوفیانه نظر یهٔ توحید - قرآنی توحید - صوفیانه وحدت الوجود کادیگر مذاهب و فلاسفه کے وحدۃ الوجود سے د قابله و د و از نه شہود شید خ ابن عربی کی وحدۃ الوجود - حضرت مجدد کی وحدت شہود شاہ ولی الله کی دونوں میں تطبیق - صوفیانه وحدۃ الوجود کا کتاب مسنت میں ماخذ - عینیت محضه یا او تاریت و عیرہ کی انسانی الوهیت سے اس کا بعد - تجدد امثال -

ه - عشق و محبت - تصوف میں اس پر زور - اسکو بیرونی اثرات یا نو فلاطونیت سے ماخوذ قرار دینےکی علطی ـ کتاب و سنت میں اسکی اصل و تعلیم ـ

۳ - وصال یا قرب - اسلامی تصوف میں اس کا مفہوم قرآن میں اسکی اصل - حلول واتحاد کی نفی - قرب فرائض و قرب نو افل -

ے۔ با طنیت پسندی ۔ قر آن وحدیث دیں اسکی اصل ۔ شریعت وطریقت میں فرق و تعلق ۔ جا ہل صوفیہ کی اس باب میں ضلالت و اضلال ۔

۸- جنت طلبی کے بجائے خدا طلبی۔ اسکا مفہوم و مدعا۔ قرآن و حدیث کی خالص اسلامی تعلیات میں دونوں کا مرتبه و مقام۔
۹- رجال تصوف - ذوالنون مصری . جنید بغدادی ۔
ابن منصور حلاج - بایز یدبسطامی - حارث محاسبی ۔ امام غزالی ۔
علاء الدوله سمنانی - ابن عربی . مولانا روم - مجدد الف ثانی مولانا جامی ۔
شیہ جیلانی ۔ شاہ ولی الله ۔

كتب تصوف

رَسَالَهُ قَشَيْرِيهِ ـ كَتَابِ اللَّعِ ـ لُواتِّعِ جَامِي ـ نفحات الانس جامي ـ مثنوي ـ فتوح الغيب ـ فصوص الحـكم ومقد مه فصوص از مبارك على ـ انسان كامل ـ مكتو بات حضرت مجدد ـ مكتو بات شيخ منيرى ـ اكسال الشيم ـ علم الكتاب خو اجه مير در د. كشف المحجوب ـ عوارف المعارف سهر ور دى ـ فو ائد الفو اد محبوب الهي ـ التكشف في التصوف مولانا تها نوى ـ عبقات حضرت شهيد ـ

فلسفه قرآ ن

ا*س کے دو اجزا ہونگے* (۱) •تن قرآن اور (۲) مسائل قرآ ن (۱) •تن قرآن میں صرف سورۂ بقرہ د اخ<u>ل ہے</u>۔

﴿٢﴾ مسائل قرآن

1 - قرآن کا خاص نظم و اسلوب - عام ا نسانی کلام سے اس کا فرق - قرآن کی سرزمین - قرآن کی قوم - قرآن کی پیش کرنے والی شخصیت - اس میں اور فلاسفه کی شخصیتوں میں فرق - قرآن اور فلسفه میں فرق - خود قرآن و فلسفه میں فرق و تعلق -

۲ مسئلۂ علم (قرآنی علمیات) مذہب کی بنیاد غیب پر۔
علم غیب کی غیر اللہ سے نفی۔ انسان کے لئے علم کی راہ وحی و تنزیل۔
علم وحی یا علم تنزیل کی حقیقت۔ اس میں اور علوم عقلیہ و کشفیہ
میں فرق۔

۳- ایمان وکفر ـ انکی لغوی واصطلاحی تحقیق ـ انکا امور غیبیه سے تعلق ـ اوران امورغیبیه کا انسانی فطرت و حیات سے تعلق ـ ایمانی علم کا استدلال وکشفی علم سے مقا بله وموازنه ـ ایما ن وعمل کا تعلق ـ عمل بلا ایمان اور ایمان بلاعمل ـ

سم مسئله تخلیق ـ (قرآنی کونیات و وجودیات) خالق یا الله کا قرآنی تصور اور اسکی ذات وصفات ـ خصوصاً صفت ربو بیت '' الله خالق کل شئی '' کے تحت شی کی حقیقت سے بحث اور شی و مشیت کا اشتقاقی تعلق ـ تخلیق کی نوعیت و ماهیت ـ خالق و مخلوق یا حادث و قدیم کا ربط ـ ووایی الله شك فاطر السمو ا والارض، کے تحت وجود الله کی غیر مشکو ك دلیل اور فاطر و خالق کا فرق ـ

ه- قرآنی توحید توحیدا له نه که توحید الله . مفهوم الله اور الله و رب کا ربط و لزوم کربوبیت و استعانت ـ شرائه کے معنے اور اقسام ـ قرآنی توحید هی قرآنی اخلا قیات سیا سیات وغیره تمام تعلیمات اسلام کی اساس ہے ـ توحیداله کے انسانی حیات پر انقلابی اثرات _

٦- مسئلهٔ رساات بـ رسالت كى ترآنى ظريه علم سے تعليل و توجيه "لايظهر على غيبه احد الالمن ارتضى من رسول" ـ رسالت و بشريت ميں فرق و تعلق ـ رسول اور عام مفكرين و مصلحين ميں فرق ـ رسول كى شناخت ـ رسول اور نبى ميں فرق و تعلق ـ تعليم انبيا كى وحدت ـ ختم نبوت ـ

ے۔ خلافتآدم (قرآنی اخلاقیات) الله اور خلیفة الله کے تعلقکی ' نفخت نیه من روحی ''کے تحت توجیه و تشریح ۔ انسان کی عبدیت اور اس کا مقصد تخلیق ۔ اس مقصدکی تکمیل کے لئے رب کی حاجت اور اس سے عبد کا تعلق ۔ خیر و شر۔ تقدیر و تدبیر ۔ جبرواختیار۔ ملائکہ اور شیطان ۔

۸- موت اور آخرت بـ موت كى حقیقت رجوع الى الله .
 آخرت كى غایت و نوعیت كا يوم الدین يوم الفصل و يوم الحساب وغيره سے تعین ـ فطرت انسانى كے مطالبات كى تكمیل كا آخرت كے

بغیر عدم امکان - جزا وسزا - جنت وجهنم - الله تعالیکی رویت و رضا اور اس سے محرومی -

9 - قرآنی سیاسیات ب انسان پر انسان کے حکم و امرکی نفی جو خالق ہے و ہی آمر۔ لازما انسان کے حق قانون سا زی کی نفی قرآنی حاکم یا خلیفه و امام کی حیثیت ۔ اسکے نصب و عزل کا مسئله اس کے اختیا رات اور اسکی اطاعت ۔ اسکی ذات میں شخصیت و جمهوریت کا امتزاج ۔ شوری کی نوعیت اور وسعت . رعا یا کی حریت اور اسکے حدود ۔ حکومت میں رعا یا کی مدا خات اور آواز۔ عدل و مساوات ۔

Metaphysics with special Refence to Contemporary Philosophy.

Candidates will be expected—(1) to have a general knowledge of History of Philosophy as covered by the syllabus in History of Philosophy for the B. A. Degree Examination.

- (2) to make a critical study of the Philosophical systems of Kant, Fichte, Schelling Schopenhauer and Hegel as presented e.g. in Calken's persistent Problems of Philosophy.
- (3) to have a general knowledge of the following currents of contemporary thought:
- (1). Idealism.
- (2). Realism. Neo-Realism and Critical Realism.
- (3). Pragmatism.
- (4). Bergson's Philosophy.

Aesthetics.

The definition of Art.

- 1. The Intrmsic Value of Art.
- 2. Art as an expression of value.
- 3. The analysis of the Aesthetic Experience. Art as the expension of experience and the enlargement of the self.
- 4. The Aesthetics of Music.
- 5. " Poetry & Prose Literature.
- 6. " Painting.
- 7. " Sculpture.
- 8. " Architecture.
- 9. Art and Science.
- 10. Art and Nature.
- 11. Art and Morality (The Problem of Evil in sex).
- 12. The Problem of the Tragic.
- 13. "Pathetic.
- 14. The sublime and the Beautiful.
- 15. The Comic.

- 16. Art and Religion.
- 17. The Metaphysical basis of aesthetical experience.

Philosophy of Religion.

- The nature of Religion:
 Epistomological treatment.

 Psychological treatment.
 Sociological treatment.
- 2. Religious attitudes as mainly axiological Relief in the conservation of Values.
- 3. God and the absolute: Theism. Polytheism, Pantheism.
- 4. Proofs of the existence of God.
- 5. The non intellectual or ultra rational basis of religious faith:—Revelation, Intuition.
- 6. The problems of Immanence and transcendence Imanation and creation.
- 7. God and Personality.
- 8. The Problem of the Individual.
- 9. The Problem of Evil.
- 10. The Freedom of the Will and the Moral problems.
- 11. Time and Eternity.
- 12. Immortality.
- 13. Personal and institutional religion.
- 14. The variety and validity of religious experience.

Ethics and Political Philosophy.

A deeper and more advanced study of the syllabus in Ethics for the B.A., with special emphasis on the following topics:—

- 1. The Basis of Morals in modern paychology with special reference to Feud Adler and Jung.
- 2. The deermination of the concept of the Good.
- 3. The Relation of the Good to the True and the Beautiful.
- 4. How Morality leads to Metaphysics and religion.
- 5. The Ethics of Idealism.

6. The moral significance of the institutions of Prosperty, Family and the State.

Political Philosophy.

The origins of Society and the State.
The Social Contract.
The origions of Sovereignty.
System of Government:—
Monarchy, Aristocracy, Democracy Facism, Communisum.
The Problems of War and Peace.
Nationalism and Internationalism.

Syllabus of Psychology.

Evolution of Pilitical institutions.

The role of Psychology as a science, Methods of Psychology.

Facts of Mental Life—Sensation, Image, perception, attention, Imagination, Association, Memory and Recognition, Thought, Feeling and Emotion.

Conation. The concept of Phychic Elements—their moods of combination.

The general structure of the nervous system—structure of the nervous system—structure and function of the sense organs. cerebral localization. The different bodily organs and their influence upon the mental life.

Historical development of the fundamental concepts The stand-points of Psychology. Self-Consiousness. The Unconscius and the sub-conscious. Psychic cansality Mental Activity. The relation between body and mind.

Comparative and Abnormal Psychology. Criteria of Mind and Intelligence. Types of animal behaviour. Learning process. Course of Mental development.

Psychic determinism. Methods of investigation. The unconscious and Repression. The sexual Instinct and Perversions. Hypnotism. Dream. Psyhopthology of every day life. Neuroses, Psychoneuroses and Psychoses.

4. (MATHEMATICS).

1. Algebra:—Theory of numbers - theory of determinations - theory of matrices - quadratic and bilinear forms - theory of groups - theory of probability - theory of equations - inequalities.

(Standard as in Bocher, Chrystal, Weber).

- 2. (a). Coordinate Geometry:—Generators Confocals General second degree equation in three dimensions.
 - (b). Differential Geometry:—Curves in space Curvilinear co-ordinates on a surface developable surfaces curvature of a surface geodesics ruled and minimal surfaces. (Standard as in Sommerville, Weatherburn, Eisenhart).
- 3. Functions of Real Variables:—Theory of irrationals theory of sets of points limiting points discontinuities Riemann integral measure Lebesque integral improper integrals Beta and Gamma functions functions of several variables curvilinear, integrals, series (uniform convergence and summability). (Standard as in Goursat, de Valle Pousson, Pierpoint and Townsend).
- 4. Differential Equations:—Existence theorems for ordinary differential equations Integrating factors singular solutions second order equations solution in series Legendre, Bessel and Lame functions Hypergeometric series variation of parameters simultaneous equations total equation Largrange's equation general partial differential equation of the first order Monge Ampere equation equations of mathematical physics elements of the calculus of variations. (Standard as in Goursat, Forsythe, Webster and Bateman).
- 5. Complex Variable, Elliptic Functions.—Analytic functions-analytic continuation singularities theory of residues Contour integration Conformal representation integral functions elementary Weirstrassian and Jacobian elliptic functions. (Standard as in Titchmarsh, Goursat, Borel, Whittaker and Watson).
- 6. Mechanics:—Forces in three dimensions screws and wrenches Equilibrium of strings motion of a rigid body in a plane motion of a rigid body in three dimensions (excluding the theory of the top) Hamilton's variation principle Lagrange's Equations Canonical equations intregration of canonical equations. (Standard as in Ramsay, Routh, Whittaker).
- Potential Theory: Potential in a plane and in three dimensions various boundary value problems applications to gravitation electrodynamic and hydromechanic method of solving problems. (Standard as in Kellog, Jeans, Ramsay).

M. Sc. EXAMINATION

1. Chemistry

(Previous Examination)

Inorganic Chemistry:-

Theory:-- (Approximately fifty lectures).

Study of the following elements and their chief compounds:—

Inert gases, Se, Y, Ce. Hf, Th, metals of the pt-group. Elementary ideas on allotropy, valency.

Technology of H₂O—varieties, purification for potable and industrial purposes.

Metallurgy of Fe, Cu, Pb, Zn, Al.

Manufacture of Cl₂ bleaching powder and bleaching liquors; H₂ So₄, HNO₃alkalies, porcelain; artificial fertilizers - nitrates, ammonium sulphate, superphosphate of lime; fuel gases, producer gas, water gas, semi-water gas, regenerative and recuperative systems.

Practical:—(Approximately fifty practicals).

Qualitative semi-micro analysis of mixtures containing not more than two basic and two acidic radiclals.

Analysis of simple alloys, minerals and commercial products, Silver coin, solder, German silver, dolomite, iron pyrites, superphosphate of lime and cement.

Gas analysis—estimation of CO, CO, O2

Water analysis—Total solids, NH_3 , organic matter, chloride, hardness.

Estimation of calorific value of coal by Bomb calorimeter.

Preparation—KMnO₄ from pyrolusite, K₂ Cr₂O₇ from chrome-iron stone, superphosphate of lime from bones, brass-plating.

ORGANIC CHEMISTRY.

THEORY:-

Oils, fats and waxes:—Occurrence, classification, methods of expression and extraction, refining, identification and

chemical composition, Hydrogenation of oils, methods of hydrolysing oils and fats. Soaps. Application of oils in printing inks and varnishes. Butter substitutes.

Carbohydrates:—Classification and nomenclature. General methods of synthesis of monosaccharides and their reactions.

Configuration of glucose and fructose and of the glucosides Salicin and Indican. Mutarotation. Starches. Cellulosesand their chemical composition. Paper manufacture. Artificial Silk industry:

Polymethylenes:—General methods of preparation and properties. Baeyer's strain theory.

Mono and dicyclic terpenes and camphors:—Limonene, Dipentene, Terpineol, Terpin, Menthol, Menthone, pinene, Camphor.

Heterocyclic compounds:—Pyrrole, Furane, Thiophene, Pyridine, Quinoline, Isoquinoline.

Alkaloids:—Piperine, Coniine, Nicotine, Atropine, Cocaine. Colour Chemistry:—Azo dyes, Triphenylmethane and Roseaniline dyestuffs. Relationship between colour and constitution. General principles of dyeing.

Amino-acids and their derivatives:—Physiological importance. Synthesis of mono and di-amino-acids. Properties and constitution. Action of yeast and moulds on amino-acids. Distinction between L, B and Y-amino-acids. Glycine, Sarcosine, Betaine, Alanine, Leucine, Isoleucine, Ornithine, Arginine, Lysine, Histidine.

Polypeptides:—Physiological significance. Methods of synthesis and properties.

Proteins:—Physiological significance and importance as food-stuffs. Physico-chemical and chemical properties Classification. Decomposition products.

Stereochemistry of Carbon and Nitrogen. Geometrical Isomerism. Tautomerism.

Applications of the Electronic Theory of G. N. Lewis to a few organic reactions such as Esterification, Hydrolysis, and Isomeric changes.

Practical:—(Approximately forty practicals).

Identification of simple organic compounds and mixtures. Estimation of Carbon, Hydrogen, Nitrogen, Halogens and Sulphur, by ordinary or micro methods. Estimation of Hydroxyl, Methoxyl and Amino groups by ordinary or micro methods.

Determination of saponification, iodine and acid values of oils and fats.

Estimation of free Alkali and acids in soap.

Estimation of sugars by Pavy's solution.

Extractions with Soxhlets' apparatus.

Preparation of about ten organic compounds, by laboratory methods, from amongst the following:—

Acetyl chloride, Benzoyl chloride, Acetamide, Benzal-dehyde, Cinnamic aldehyde, Cinnamic acid, Salicylal-dehyde, Salicylic acid, Acetophenone, Benzophenone, Benzhydrol, Benzoin, Benzil, Triphenylchloromethane; Ethylbenzene, Bromobenzene, Ethyl benzoate, Ethylaceto-acetic ester, Ethylmalonic ester, and Ethylmalonic acid, Phenylhydrazin hydrochloride, m - Dinitrobenzene, m - and p - Nitranilines, Sulphanilic acid, m - Nitro-benzoic acid, o and o - Nitrophenols, o - Cresol, Anisole, o - Naphthol acetate, Methyl orange, Fluorescein, Eosin, Qunioline.

Preparation by semi-scale methods, of a few typical industrial products such as the following:—

Citral from lemon-grass oil, Geraniol from palm-rose oil, Eugenol from oil of cloves and Vanillin from Eugenol, Coumarin, Acetanilide, Acetyl-salicylic acid (aspirin), Phynolphthalein, Formaldehyde, Paraldehyde, Veronal, Antipyrine, Saccharin, Caffeine and Procaine.

PHYSICAL CHEMISTRY.

THEORY:—(Approximately forty lectures).

- N.B.—Emphasis will be laid on the application of physicochemical principles to industry and the historical development of the subject.
 - 1. Radioactive disintegration. Cathode rays, positive ray analysis, Isotopes, Atomic number. Rutherford-Bohr-Somerfeld theory of atomic structure. Electronic theory of valency.
 - 2. Heat capacity, surface tension and viscosity of liquids. Association of liquids. Heat capacity of solids. X-rays and crystal structure.

- 3. Relation of physical properties such as parachor, refractivity, absorption spectrum and Raman spectrum to chemical constitution.
- 4. Laws of thermodynamics. Gibbs-Helm holtz equation. Equation of Calusius. Relation between the molecular elevation of the boiling point and the latent heat of evaporation. Relation between the molecular depression of the freezing point and the latent heat of fusion. Free energy of a chemical change or chemical affinity and its measurement. Nernst's heat-theorem.
- Phase Rule and its application to binary liquid mixtures, alloys and hydrated salts. Fractional distillation and steam distillation. Distribution Law.
- 6. Chemical equilibrium. Derivation of the law of Mass action. Vant Hoff's Isotherm. Effect of temperature and pressure on chemical equilibrium. Reaction Isochore.
- 7. Velocity of chemical actions. Complex reactions. Reaction velocity and temperature. Theory of molecular activation. Energy of activation. Catalysis and adsorption.
- 8. Electrical Conductivity of acqueons non-aqueous solutions. Behaviour of strong electrolytes. Theory of complete ionisation, treated in a simple way.
 - Application of conductivity measurements in analytical chemistry.
- 9. Equilibria involving weak electrolytes. Hydrolysis of salts. Theory of indicators.
- 10. Electrode potentials. Electro-motive-force of a galvanic cell, concentration cells. Theory of the Hydrogen and the quinhydrone electrode. Determination of Hydrogen ion concentration and the solubility of sparingly soluble salts by E. M. F. measurements. Electrometric titrarions. Electro-metric detrmination of activity coefficient and transport numbers.
- 11. Polarisation. Decomposition voltages. Over-voltage. Storage batteries.
- 12. Physical properties of colloids. Ultra-microscope. Brownian movement. Determination of Avogadro's Number. Electric charge on colloidal particles. Co-agulation of Colloids, Protective action of Colloids. Adsorption.

13. Laws of photo-chemistry. Study of a few typical photo-chemical reactions. Photo-sensitisation.

Practical:—(Approximately forty practicals).

Physico-chemical experiments on the following subjects:-

(In selecting exercises special attention will be paid to the bio-chemical and industrial aspects of physical chemistry.)

- 1. Density of liquids.
- 2. Vapour density.
- 3. Molecular weight by the boiling point method.
- 4. Molecular weight by the freezing point method.
- 5. Solubility of liquids in liquids.
- 6. Solubility of solids in liquids.
- 7. Viscosity of liquids and solutions.
- 8. Surface tension of liquids and solutions.
- 9. Velocity of reactions.
- 10. Partition Co-efficient.
- 11. Heat of combustion and neutralisation and solutions.
- 12. Transition temperature.
- 13. Adsorption.
- 14. Polarimetry.
- 15. Refractive indices of liquids and solutions.
- 16. Identification of elements from their emission spectra.
- 17. Absorption spectra of solutions.
- 18. Electrical conductivity of solutions.
- 19. E. M. F. measurements.
- 20. Hydrogen ion concentration or PH value.
- 21. Electro-metric titrations.
- 22. Preparation and purification of typical colloids.
- 23. Electric charge, coagulation and protective action of colloids.
- 24. Comparison of radio-active properties of different substances.

(FINAL EXAMINATION.)

INORGANIC CHEMISTRY:-

Theory:-

Per-acids and their salts-preparation, properties, constitution and uses of the per-acids and per-salts of S, C, B, N, P, and Cr. Rare-earths - history of discovery, sources, separation, proties and uses.

Ceramics - brief history, classification, raw materials, bodies, furnaces, pyrometry, glazes, enamel, firing.

Electro-Chemical industries - electric furnaces, manufacture of NaCl; electrolysis of fused salsts of Al, Mg; fixation of N.

Intermetallic compounds - alloys, classification, methods of deter-CaC₂' 'SiC, graphite, CS₂, CaCN₂ ferro-alloys; electrolysis of mination, study of typical binary systems.

Complex salts- - formation, stability, determination of the composition, the coordination theory, Chelate groups, arrangements of co-ordinated groups in space.

Recent investigations - new elements, D, D₂O, compounds of inert gases, artificial radioactive substances, hydrides, carbides, nitrides and carbonyls. of metals.

ORGANIC CHEMISTRY.

THEORY:-

- Alkaloids:—Papaverine, Narcotine, Morphine, Codine and Thebaine. Uric acid, Purine, Caffeine, Theobromine, Theophylline.
- Synthetic drugs:—Salvarson, Atoxyl, Veronal, Atebrine, Antipyrine, Phenacetin.
- The Chemistry of Indigo:—Indole; Occurrence, synthesis and properties, relationship to indigo and porteins. Indoxyl, Oxindole and Isatin. Indigo (natural and synthetic).
- Free Radicals:—Discovery of Triphenylmethyl, theories advanced to elucidate its constitution. Preparation and properties of Triarylmethyls, free alkyl radicals, bivalent and quadrivalent nitrogen.

Terpenes and Camphors:—In addition to those laid down for M. Sc. previous examination the following:—

Monocyclic terpenes and camphors:—Terpinolene, Terpinenes, Sylvestrene, Phellandrenes, Cincol, Pulegone and Carvone.

Dicyclic terpenes and camphors:—Borneol, Camphane, Bornylene, Camphene, Fenchenes and Fenchyl alcohols.

Olifinic Terpenes and their Oxy-genated derivatives:—Isoprene, Citronellal, Methyl heptenone, Geranic acid, Rhodinal, Citral.

The Chemistry of Rubber:—Historical, natural and synthetic rubbers and their chemical composition. Properties. Distillation products.

PHYSICAL CHEMISTRY

THEORY:-

Photo-Chemistry:—Nature of radiant energy. General laws of the emission and absorption of radiation. Theory of the emission and absorption of radiation by atoms and molecules. Pre-dissociation spectra. Fluorescence. Resonance radiation. Phosphorescence. Chemiluminescence. Grotthus—Draper law. Einstein's law of Photo-Chemical equivalence. Quantun yield. Photo-Chemical technique. Photo-Chemical equilibrium. Photo-chemical kinetics. Actinometry. Detailed study of important Photo-chemical reaction and their mechanism. Influence of wavelength, light intensity, temperature and other factors on quantum yield. Photo-sensitisation. Photo-chemical catalysis and inhibition. Photo-chemical after-effects. Role of Chlorophyll in Photo-synthesis.

MOLECULAR STRUCTURE:-

Absorption spectra, Raman spectra. Di-pole moment and Magnetism in relation to Molecular structure and chemical constitution.

2. PHYSICS.

(PREVIOUS EXAMINATION)

In addition to what is included in the B.Ss. Course a detailed study of the following:—.

Paper I.—General Physics and Sound.

Gravitation: Elasticity; Theory of Surface Tension Phenomena: Viscosity of Liquids, Gases and Vapours; Compressibility of Liquids; Kinetic Theory of Gases and its application; Vibration of Strings, Membranes, Plates and Bars; Forced Vibrations; Combinational Tones; Resonance; Reflection and Refraction of Sound Waves; Supersonic Waves.

Paper II.—Optics (Geometrical and Physical).

Mirrors, System of lenses; Chromatic and Spherical Aberrations; Interference; Diffraction; Dispersion; Double Refraction of Crystals: Polarisation; Elements of Spectrography: Line Spectra; Series Spectra; Band Spectra; Bohr's Theory of Spectra; Elementary knowledge of Electro and Magneto-Optics.

Paper III .- Heat (Including Thermodynamics).

Thermometry; Measurement of High and Low Temperatures, Equations of State; Specific Heats at high and low Temperatures; Vapour pressure of Metals; Conductivity; Laws of Radiation; Radiation Pressure; Thermodynamical Formulae and applications; Entropy; Nernst Heat Theorem.

Paper IV.—Practical work in Properties of Matter, Heat

. and Sound.

- 1. Young's Modulus by Koenig's Method.
- 2. Young's Modulus of a Spiral Spring by Wilberforce Inertia Bar.
- 3. Young's Modulus of a glass plate by interference Method.
- 4. Determination of Poisson's Ratio.
- 5. Modulus of Rigidity of a spiral Spring by Wilberforce Intertia Bar.
- 6. Torsional Hysteresis for a wire.
- Temperature co-efficient of Rigidity and Young's Modulus.
- 8. Surface Tension of liquids by Jager's Method.
- 9. Surface Tension of liquids by Ferguson's Method.

- 10. Surface Tension Balance for liquids at different concentrations and temperatures.
- 11. Viscosity of liquids at different temperatures by flow through a capillary tube (with kinetic energy correction).
- 12. Viscosity of liquids by Rotating Cylinder Method. (Willow's appr.).
- 13. Viscosity of liquids by Oscillating Disc. (Meyer's Method).
- 14. Viscosity of liquids by Stoke's Law.
- 15. Viscosity of a gas by Rankine's Method.
- 16. Viscosity of a gas by Anderson's Method.
- 17. Variation of Viscosities of air with temperature and determination of Sutherland's Constant.
- 18. Specific Heat of a substance by Joly's Steam Calorimeter.
- 19. Specific heat of liquids by Callendar and Barne's Flow Method.
- 20. Determination of Specific Heat by Bunsen's Ice Calorimeter,
- 21. Latent Heat of vaporisation by Berthelot's Apparatus.
- 22. Heat of Solution of salts.
- 23. Use of Beckmann's thermometer in determining the rise of boiling point and the depression of freezing point of a solvent.
- 24. Vapour Density by Hofmann's Method.
- 25. Vapour Density by Dumas Bulb. (with correction).
- 26. Vapour Tension of water at various temperatures.
- 27. Thermal Conductivity of a metal bar (Angstrom's Method).
- 28. Thermal Conductivity of a bad conductor in the form of powder.
- 29. Total Emissivity of the surface of a wire at various temperatures.
- 30. Use of Platinum Thermometer.
- 31. Use of a thermo-couple as a thermometer.
- 32. Velocity of sound in different gases and deducing the value of Y.

- 33. Finding the value of the co-efficient of expansion of a gas by determining velocities of sound at two different temperatures (by Kundt's tube).
- 34. Frequency of a tuning fork by Stroboscopic Method.

Paper V.—Practical work in Optics.

- 1. Determination of the Focal Length and the positions of the Principal Planes of a thick lens and optical system by various methods.
- 2. Investigation of the Spherical Aberration of a thick lens.
- 3. Determination of the Refractive Index of a liquid by total reflection using a prism.
- 4. Determination of the thickness of a thin glass plate by interference method.
- 5. Measurement of the Wavelength of light by Fresnel's Biprism, using:—
 - (a) Optical Bench.
 - (b) Spectrometer.

and determination of "M" of the material of the Biprism.

- 6. Determination of the Wavelength of light by Fresnel's Double Mirror.
 - 7. Determination of the Wavelength of light by Billet's lens.
 - 8. Measurement of Wavelength by Diffraction. (various methods).
 - 9. Measurement of Wavelength by Diffraction Grating using oblique incidence.
- 10. Measurement of the Resolving Power of:-
 - (a) a Prism Spectroscope.
 - (b) a Diffraction Grating.
- 11. Calibration of a Spectroscope.
 - (a) by using lines of known wavelengths.
 - (b) by Interference fringes.
- 12. Polarisation by Reflection (verification of Brewster's law).
- 13. Measurement of Specific Rotatory Power of a substance.

Additional Experiments.

- 14. Determination of the Refractive Index of liquids and gases by means of Rayleigh's Interferometer.
- 15. Comparison of Refractive Indices of gases by Jamin's Interferometer.
- 16. Determination of Refractive Index of substances by Pulfrich Refractometer.
- 17. Determination of the difference of wavelengths for the Sodium D lines by means of Michelson's Interferometer.
- 18. Measurement of elm for an Electron by observing Zeeman Effect for Yellow Helium light, using:
 - (a) Lummer Gchrcke plate.
 (b) Fabry-Perot Etalon.
 (c) Michelson Echelon Grating.

 mounted on Constant Deviation
 Spectroscope.

(FINAL EXAMINATION)

Paper I.—Classical Electricity and Magnetism.

Determination of Dielectric Constants for solids, liquids and gases; Electrical Images; Electric Fields; Pyro and Piezo Electricity; Ferro, Para, Dia-Magnetism; Various methods of determining Susceptibility and Permeability of solids, liquids and gases, Theory of Magnetism; Theory of Electrical instruments; Theory and Measurement of Inductance and Capacity; Theory of Alternating Currents; Electromagnetic Waves; Their generation and application.

Paper II.—Modern Electricity.

Conduction of Electricity through gases; Ionisation currents; Ionisation by Collision; Mobility of lons; Diffusion of lons: Variation of the mass of electron with velocity; Determination of elm and e; Positive Ray analysis and Mass Spectrograph: Thermionic Currents; Photo-Electricity; X-Rays; Radioactivity: Atomic Structure.

Paper III.—Special subject as detailed above.

Students are expected to possess a detailed knowledge of the subjects chosen by them.

Paper IV.—Practical Work in Magnetism and Electricity.

- 1. Plotting B-H Curve and measurement of Permeability.
 - (a) Magnetometer Method.
 - (b) Ballistic Method.
- Measurement of Susceptibility of para and diamagnetic substances.
- 3. Adjustment and use of various types of Galvanometers.
- 4. Calibration of Meter Bridge wire by two methods.
- 5. Variation of the resistance of a wire with temperature.
- 6. Measurement of low resistances.
 - (a) Direct Deflection Method.
 - (b) Mathiessen and Hockin's Method (Potentiometer Method).
 - (c) Kelvin's Double Bridge.
- 7. Measurement of high Resistances.
 - (a) Direct Deflection Method.
 - (b) Leakage Method.
 - 8. Calibration of Callendar and Griffith's Bridge and use of Platinum Resistance Thermometer.
 - 9. Electrolytic resistances.
 - (a) Direct Current Method.
 - (b) Kohlrausch Bridge.
 - 10. Determination of the thermo-electromotive force.
 - 11. Measurement and comparison of Self Inductances. (various methods.)
 - 12. Measurement and comparison of Mutual Inductances. (various methods.)
 - 13. Measurement and comparison of Capacities (various methods.)
 - 14. Use of Grassot's Flux-meter.
- 15. Adjustment and use of Quadrant Electrometer (Comparison of E. M. F. and other expts.)
 - 16. Measurement of small capacity in E. M. and E. S. Units and deducing V.
 - 17. Determination of the velocity of Electric Waves (Lecher's Wire).

- 18. Determination of em (Thomson's Method).
- 19. X And B rays Electroscopes.
- 20. Characteristic Curves of the three-electrode valve.
- 21. Determination of electronic charge by Millikan's Method.
- 22. Determination of Saturation Voltage across an ionised chamber.

3. ZOOLOGY.

(Previous).

Practicals: --- Non-Chordata.

Amœba; Actinosphærium; Skeletons of Forminifera and Radiolaria; Badhamia; Euglena; Ceratium; Dendrocometes; Trypanosoma; Noctiluca; Paramoecium; Vorticella; Opalina; Monocystis; Malarial parasite; Sarcocystis; Leucosolenia; Sycon; Spongilla; a Hexactinellid; Geodia; Euspongia; Hydra; Tubularia: Syncoryne: Sertularia: Plumularia: Aglaophenia: Obelia: Millepora; Stylaster; Halistemma; Velella; Physalia; Porpita; Diphyes; Aurelia; Rhizostoma; Haliclystus; Sea-anemone: Aleyonium; Tubipora; Corallium; Gorgonia; Pennatula; Madrepora; Cestus; Beroe; Leptoplana; Temnocephala; Distomum; Polystomum: Taenia: Echinococcus: Lineus: Carinella: Ascaris; Oxyuris; a hookworm; Trichina; Filaria; Sagitta; Brachionus; Phoronis: Sipunculus: Pedicellina: Bugula; Flustra; Plumatella: Magellania: Terebratula: Lingula: Pheretima: Nereis: Leech; Arenicola; Serpulid; Chaetopterus; Terebella; Sabella; Polynoe; Tubifex: Phyllodoce; Aphrodite; Spirorbis; Syllis; Myzostoma; Bonellia: Echiurus or Thalassema: Polygordius; Asterias; Echinus; Holothuria; Synapta; Antedon; typical representatives of all the orders of Crustacea; Trilobita; Peripatus; Centipede and Millipede; typical representatives of each order of Insecta and Arachnida and Phylum Mollusca.

(Final).

Practical: Chordata Group.

(a) Acrania:-

Hemichordata— Balanoglossus.

Urochordata— Oikopleura; Rhabdocynthia (Herdmannia) or Ciona; Botryllus; Salpa, and

Doliolum.

Cephalochordata— Branchiostoma (Amphioxus).

(b) Craniata:—

Cyclostomata—

Lampreys (Petromyzon) and Hagfishes (Myxine and Bdellostoma).

Pisces-

Trygon, or any other fresh-water Elasmobranch; Carcharias or Scoliodon; Torpedo; Chimaera; Polypterus; Acipenser; Lepidosteus; Amia; Gadus; Pleuronectes; Sea-horse, a common bony-fish such as 'Murrel' (Ophiocephalidae) or 'Rohu' (Cyprinidae) and special features of Clarias, Saccobranchus, Anabas, and Amphipnous; Lung-fishes (External characters).

Amphibia—

The typical representatives of Urodela, Anura and Gymnophiona.

Reptilia--

The typical representatives of Rhyn chocephalia (External characters and skeleton only), Lacertilia, Ophidia, Chelonia and Crocodilia.

Aves-

Ratitæ: The typical representatives, their external characters and skeletons only. Carinatae: Pigeon, skeleton of fowl and comparative study of the four types of birds' skulls.

Mammalia-

Typical representatives of each order.

Microscopic mounts and other preparations bona-fide practical sketch-books (for which 10 marks are reserved for each practical paper) must be produced at the time of the examination. Microtomy (simple section-cutting methods).

4. BOTANY.

(Previous).

Bacteria; Gleocapsa; Oscillaria; Nostoc; Rivularia; Scytonema; Euglena; Diatoms; Chlamydomonas; Sphaerella; Pandorina; Eudorina; Volvox; Pleurococcus; Ulothrix; Oedogonium, Ulva; Enteromorpha; Coleochaete; Protococcus; Scenedesmus; Hydrodictyon; Cladophora; Vaucheria; Bryopsis; Caulerpa; Botrydium; Spirogyra; Zygnema; Desmids; Chara; Nitella;

Ectocarpus; Fucus; Dictyota; Laminaria; Nemalion; Batrachospermum; Callithamnion; Polysiphonia; Gracillaria; Corallina; Synchytrium endobioticum; Pythium; Phytophthora; infestans; Saprolegina; Peronospora parasitica; Cystopus; Eurotium; Brysiphel; Sphaerotheca Mors Uvae; Claviceps purpurea; Xylaria; Peziza; Pyronema; Polyporus; Agaricus; Lycoperdon; Phallus; Puccinia; Ustilago.

Bryophyta and Pteridophyta:-

Riccia; Plagiochasma; Marchantia; Fimbriaria; Aneura; Porella; Anthoceros, Sphagnum; Andraera; Funaria; Polytrichum Equisethum; Lycopodium, Selaginella; Psilotun; Isoetes; Fossils; (Lepidodendron; Sigillaria; Calamites, Sphenophyllum) Ophioglossaceae; Marattiaceae; Osmundaceae; Schizaeaceae; Gleicheniaceae, Cyathaceae; (General characters only); Aspidium; Pteris; Salvinia; Azolla; Marsilia; Fossils; Psaronius; Osmundites; Botryopteridaceae and Zygopteridaceae; (General account only).

Gymnosperms:--

Cycas: Ginkgo; Taxus; Gnetum; Ephedra.

Fossils :---

Cycado-filicales (Leginodendron; Bennettitales and Cordaitales (General account only).

Note:—Students are expected to show a thorough knowledge of:
Microscopical preparations, Microtome technique.

(FINAL).

Part II (Practical Course "A").

- (a). General Morphology.
- (b). The following families of Angiosperms with special reference to the Deccan Flora:—

Raunculaceae; Magnoliaceae; Anonaceae; Menispermaceae; Nymphaeaceae; Papaveraceae; Cruciferae; Fumaria-

ceae; Capparidaceae; Violaceae; Bixaceae; Polygalaceae; Caryophyllaceae; Portulacaceae; Guttiferae; Ternstroemiaceae; Malvaceae; Sterculiaceae; Tiliaceae; Linaceae; Malpighiaceae; Zygophyllaceae; Geraniaceae; Rutaceae; Simarubaceae: Ochnaceae: Burseraceae: Meliaceae: Olacaceae: Celastraceae: Rhammaceae: Ampelideae: Sapindaceae: Anacardiaceae: Moringeae; Leguminosae; Rosaceae; Crassulaceae; Combretaceae: Myrtaceae; Lythraceae; Onagraceae; Passifloraceae: Cucurbitaceae; Begoniaceae; Cactaceae; Umbelliferae; Araliaceae; Rubiaceae; Compositae; Plumbaginaceae; Asclepiadaceae: Loganiaceae, Gentianaceae; Hydrophyllaceae: Boraginaceae; Convolvulaceae; Solanaceae; Scrophulariaceae; Pedaliaceae; Acanthaceae; Verbenaceae; Labiatae; Nyctagineae; Amarantaceae; Chenopodiaceae; Phytolaccaceae; Polygonaceae: Aristolochiaceae; Lauraceae; Loranthaceae; Euphorbiaceae: Urticaceae: Hydrocharitaceae: Orchidaceae: Scitamineae: Amaryllidanceae; Liliaceae; Pontederiaceae; Commelinaceae; Pla-Pandanaceae; Aroideae; Lemnaceae; Cyperaceae; mae: Gramineae.

(C) Physiology:—The following experiments to be performed:—

- 1. Water-Culture experiments.
- 2. Osmosis.
- 4. Root Absorption.
- 5. Course of Absorbed Solutions.
- 6. Root-pressure.
- 7. Excretion of fluid water from leaves.
- 8. Transpiration.
- 9. To show dependence of withering upon loss of water.
- 10. To show the suction caused by Transpiration.
- 11. Estimation of the absorption of water by the roots, and the loss by evaporation from the leaves.
- 12. Photo-synthesis.
- 13. Properties and reactions of Chlorophyll.
- 14. Conditions necessary for the production of Chlorophyll.

557

- 15. To show that carbon dioxide is necessary for starch formation.
- 16. To demonstrate the effects of lights of different wave lengths on Photo-synthesis.
- 17. To show the exhalation of carbon dioxide by germinating seeds.
- 18. Intramolecular Respiration.
- 19. Plasmolysis.
- 20. Measurement of growth by auxanometers.
- 21. Distribution of growth in roots.

4

F. Ph.D. EXAMINATION.

STATUTES AND REGULATIONS CONCERNING THE DEGREE OF DOCTOR OF PHILOSOPHY.

- I. An examination for the Degree of Doctor of Philosophy shall be held annually in Hyderabad at such time and on such date as may be prescribed by the Syndicate on the recommendation of the Faculty.
- II. The Ph.D. Examination shall be conducted by means of dissertation, Viva Voce, and written papers. The question papers shall be set and answered in Urdu, except when intimation is given to the contrary.
- III. The examination shall be held for the present in the following subjects:—

(1) Theology.

- 1. Figah.
- 2. Tafsir.
- 3. Hadith
- 4. Kalam.

(2) Arts.

- 5. Arabic.
- 6. Persian.
- 7. Urdu.
- 8. History.
- 9. Economics. 10. Philosophy.
- 11 Mathematics.
 - (3) Science.
- 12. Chemistry.
- 13. Physics.
 - 14. Zoology.

Of Admission.

- IV. The examination shall be open only to candidates who have passed the M.A. or M.Sc.Final Examination in the first or second division of this or any other University the degrees of which are recognised by the Osmania University as equivalent to its degrees, and has pursued a course of research continuously and regularly for three years in this University.
- \mathbf{v} . A member of the teaching staff of Osmania University who has passed the M.A. or M.Sc. Examination in the first or second division may be admitted to the Ph.D. Examination, provided he has obtained permission from the Pro-Vice-Chancellor and the Research Board of a Faculty to work for the Ph.D. Degree, at least two years after he has joined the service, and has, since obtaining this permission, carried on research work for at least three years in a subject sanctioned by the Board and under the superintendence of a Supervisor or supervisors appointed by the Research Board. In this case, the Research Board, before giving the permission, will fully satisfy itself as to whether the applicant is able to avail himself of the facilities that exist in the University for completing his research.

Such a member of the staff, in accordance with the rule, shall be required to pay the examination fee.

VI. Every student who desires to work for the Ph.D. Degree shall submit, at the commencement of the session, an application stating the subject and nature of his proposed course of research, along with certificates of the

Examinations passed. The application, after the approval of the Pro-Vice-Chancellor shall be placed before the Research Board of the Faculty concerned which shall appoint a supervisor or supervisors to direct and superintend the work of the student. The decision of the Research Board in the matter shall be final, and will be communicated for information to the Faculty.

Of Altering the Sub- VII. ject of Dissertation.

VIII

If a candidate desires to alter the subject of his dissertation after he had started the work, may do so with the permission of the Research Board, but such permission shall not be granted six months after the work is started.

Of Attendance.

A student working for the Doctorate shall pursue his research in the University continuously for three years. In case the student feels the necessity of residing out of Hyderabad to complete the course of his special study, he may do so, provided the supervisor or supervisors recommend such a course and the Pro-Vice-Chancellor of the University approves of it; but the duration of absence shall not exceed six months, during the whole period of three years, not including the period covered by vacations.

XI. A student studying for the Ph.D. Degree shall attend the University at least once a week and also as many times as his supervisor or supervisors desire. The supervisor will be required to keep a record of the attendance and progress of the student and in case of irregularity he will report the matter to the Pro-Vice-Chancellor.

X. In the case of a student who has pursued research after having been admitted to the degrees of M.A. or M.Sc. in any University or a Research Institute regularly for not less than a year, the Research Board of the Faculty concerned may after examining the research of such student, reduce the period for submitting the dissertation from three years to two years.

Of Submitting Dis- XI. sertation.

At the end of three years, he shall submit a dissertation embodying the results of his research. He shall write the dissertation in Urdu but the submission of an English translation thereof is compulsory.

XII. If a student is unable to submit his dissertation within the prescribed period on any ground whatsoever, he shall submit an application for the extension of the period to the Research Board concerned before the commencement of the last term. The Research Board may on the recommendation of the supervisor and Head of the Department concerned, grant an extension for not more than two years.

XIII. A student preparing for the Dergee of Ph.D. is expected to discover by research and new fact which will contribute to the abvancement or application of knowledge or represent the existing knowledge in such a manner and discover such relationship between facts as would throw new light upon the subject concerned.

Of Submitting the XIV. Dissertation for examination.

The candidate shall submit six typed copies of his dissertation (three in Urdu and three in English) along

with an application in a printed form for admission to the examination and shall pay an examination fee of Rs. 100. Every copy of the dissertation shall be accompanied by a summary not exceeding eight pages.

- XV. The candidate, if he so desires, may in addition to his dissertation, submit any research work which he may have previously pursued independently or conjointly and which may have been published in any recognized academic journal.
- XVI. The candidate shall submit along with the dissertation a certificate from the supervisor stating that the candidate has pursued research in the University for at least three years, and that in his opinion the dissertation is of sufficient merit for submission for the Ph.D. Degree.
- XVII. On the recommendation of the Research Board the Faculty concerned shall appoint three examiners to consider the dissertation and to examine the candidate. Of these examiners not less than two, one of whom shall be a person not living in India, shall be appointed from outside the University. The supervisor may also be appointed examiner.
- XVIII. A copy of the dissertation shall be sent to each examiner with the request that he should send his report after considering it to the Registrar within a month, stating clearly whether in his opinion the dissertation submitted by the candidate qualifies him for the Ph.D. Degree or not. Before sending the report, the exami

ners may ask the supervisor for details about the subject of the dissertation.

- TXX. In case two of the three examiners recommend the dissertation submitted for acceptance, the report of the examiners with the opinion of the Research Board, shall be placed before the Faculty concerned. If the Faculty accepts the report, the candidate shall be required to present himself to be tested orally and by means of a written examination on matters relevant to the subject of his research. The oral examination shall be conducted by examiners appointed from insideIndia. The examiner from outside India shall set a paper of three hours' duration for the written examination and value the answers him-In case no examiner from out-India is appointed, both the written and oral examinations shall be conducted by examiners from inside India.
- XX. If the dissertation is rejected, or, the candidate fails in the written or the oral or both the examinations, the candidate may resubmit his dissertation in a revised form; but in this case he shall be required to pursue research in the University at least for one year more and pay an examination fee of Rs. 100|-. The candidate shall not be allowed to submit his dissertation on the same subject for the third time.
- XXI. Successful candidates shall in accordance with the rules receive the Degree of Doctor of Philosophy at a convocation of the University.

567

- XXII. The printed or manuscript copies of the approved dissertation shall be preserved in the library of the Faculty concerned.
- XXIII. On the title page of the printed dissertation the following words shall be inscribed:
 - "Dissertation approved by Osmania University for the Degree of Doctor of Philosophy".

The Research Board

- I. The Research Board of the Faculty concerned shall direct and control the general supervision of research in the University, and shall consist of the following members:—
 - (a) The Pro-Vice-Chancellor (Ex-Officio).
 - (b) The Dean of the Faculty (Ex-Officio).
 - (c) Four members of the Faculty selected for two years by the Faculty concerned.
- II. Each Research Board shall select its Secretary from among its members for two years.
- III. The Research Board shall perform the following duties:—
 - (a) Nomination of supervisors for the research work after M.A. and M.Sc.
 - (b) Appointing of examiners for the Ph.D. Degree.
 - (c) Sanction of Research Scholarships.
 - (d) Publication of the Research Journal of Osmania University and dissertations.
 - (e) Consideration of proposals for the advancement of research.
 - (f) Formulation of subsidiary rules.
- Note:—To consider the sections (e) and (f) a joint meeting of all the Research Boards will be necessary.

G. LL. B. EXAMINATION.

		•	

LL.B. EXAMINATION.

- 1. There shall be two examinations for the LL.B. Degree, the Previous and the Final. Each examination shall be held once a year in Hyderabad at such time and on such dates as the Syndicate may prescribe on the recommendation of the Faculty of Law.
- 2. The examinations will be conducted by means of printed papers and Urdu shall be the medium of examination in all subjects.
- 3. The LL.B. (Previous) Examination shall be open only to those students who have completed a "regular course of study" in the University School of law for not less than one academic year after passing the B.A., or B.Sc. Examination of the Osmania University or the B.A., B.Sc. or B. Com: Examination of any University in the British Empire, incorporated by Law, provided that such examination is recognised by that University as qualifying for admission to its LL.B. Examination or any examination equivalent thereto.
- 4. No candidate shall be considered to have completed a "regular course of study" for any of these examinations unless he has attended 70 per cent. of the lectures during the academic year. The Syndicate may however condone the defeciency in attendance not exceeding 5 per cent. on special reasons, especially ill-health when the application is supported by a certificate by an authorised medical officer, which can satisfy the Head of the institution.

A member of U.T.C. shall be permitted to count as attendance the periods spent on duty in connection with the University Training Corps camps.

Students attending Inter-University Tournaments for debates will be entitled to the same privilege.

- 5. A candidate for admission to the Previous Examination must forward his application to the Registrar five weeks before the examination, accompanied by a fee of Rs. 30. He shall produce a certificate in the form hereinafter prescribed to the effect that he has prosecuted a "regular course of study" in the University for not less than one academical year after having passed the B.A., B.Sc. or B. Com. Examination. He must also forward with his application satisfactory evidence of having taken a degree as laid down in Rule (3).
- 6. Every candidate shall present himself for the Previous Examination in the following subjects:—
 - (1) Roman Law.
 - (2) Constitutional Law.
 - (3) Contracts.
 - (4) Torts and Easements.
 - (5) Evidence.
 - (6) Criminal Law and Procedure.
 - N.B.—There shall be one paper of three hours' duration in each subject carrying 100 marks.
- 7. No candidate shall be admitted to the Final Examination of the Degree of Bachelor of Laws unless he has passed the Previous Examination in law of the Osmania University, and has since passing the Examination prosecuted a "regular course of study" for not less than one academical year in the University School of Law. Attendance certificates in the prescribed form shall be attached to the application.
- 8. A candidate for admission to the Final LLB. Examination must forward his application to the Registrar five weeks before the examination accompanied by a fee of Rs. 30. He should also forward along with his application a certificate of having passed the Previous Examination in Law of the Osmania University.
- 9. The following shall be the subjects for the Final LLB. Examination:—
 - (1) Muhammadan Law including Usul-i-Fiqah.
 - (2) Hindu Law.
 - (3) Trusts and Specific Relief.

- (4) Land Tenure (including 'Atiyat) and Transfer of Property.
- (5) Civil Procedure Code and the Law relating to Civil Courts in H.E.H. The Nizam's Dominions; Limitation (excluding Schedules).
- (6) Jurisprudence and International Law.
- N.B.—There shall be one paper of three hours' duration in each subject carrying 100 marks.
- 10. The Faculty of Law shall prescribe from year to year books to be studied for these subjects.
- 11. The Faculty shall not prescribe the total number of lectures, but it shall fix the minimum number of lectures to be delivered during each academic year, which shall not be less than 300.
- 12. Before the beginning of each term, the Principal shall submit for the approval of the Faculty a statement of the course of lectures and class examinations during each term.
- 13. The papers in any of the examinations may contain questions in Jurisprudence, arising out of the subject-matter of such examination. The questions will as far as possible, be set on all topics comprised in a paper and not confined to any particular topic alone.
- 14. To pass the previous and final examinations the candidates must obtain 40 per cent. of the full marks in each paper and 45 per cent. in aggregate. Those of the successful candidates who obtain not less than 60 per cent. of the total marks will be placed in the first division and those who obtain not less than 45 per cent. of the total marks will be placed in the second division.

The result of the Previous Examination will only be declared and will not be classified. The marks obtained by the candidates at the Previous Examination will be added to the marks gained by them at the Final Examination and the ranks secured by them will be determined accordingly.

15. As soon as practicable after the conclusion of the examinations the results will be arranged in order of merit.

- 16. A candidate who fails to pass or to present himself at the examination may be admitted to one or more subsequent examinations on his making a fresh application and on payment of a fresh fee.
- 17. Certificate signed by the Chancellor and the Registrar respectively, shall be given to candidates successful in the Final and Previous Examinations, setting forth the date of the examination, and the class in which he was placed.

H. LL. M. EXAMINATION.

LL. M. EXAMINATION.

- 1. The LL.M. Examination shall be held once a year in Hyderabad at such time and on such dates as the Syndicate may prescribe.
- 2. The LL.M. Examination will be conducted by means of printed papers and *Viva Voce*, if necessary. Papers will be set and answered in Urdu.
- 3. The Examination for the degree of LL.M. shall consist of two parts, the Previous Examination and the Final Examination. The course of study for each examination shall extend over a period of one academic year.
- 4. No candidate shall be admitted to the LL.M. Previous Examination unless he has passed the examination for the degree of Bachelor of Laws of this University or the degree of Bachelor of Laws or a Law degree of some other University accepted by this University as equivalent thereto and has prosecuted a regular course of study for not less than one academic year in the Law Faculty of Omania University.
- 5. No candidate shall be admitted to the LL.M. Final Examination unless he has passed the LL.M. Previous Examination of this University, and has since prosecuted a regular course of study in the Law Faculty of the University for not less than one academic year.
- 6. No candidate shall be considered to have completed a regular course of study unless he has attended not less than 70 per cent of the lectures during the academic year. The Syndicate may, however, condone deficiency in attendance not exceeding 5 per cent. for sufficient reasons such as sickness when the application is supported by the certificate of an authorised medical officer, which can satisfy the Head of the Faculty.
- 7. The following candidates will be allowed to appear at the LLM. Examination without pursuing a regular course of

study in the University provided they satisfy all the other conditions of admission:—

- (a) Practicing lawyers, who have practised for not less than three years.
- (b) Officers of the Judicial Department who have functioned as judges for not less than three years.
- (c) Teachers of the Law Faculty who have lectured on Law for not less than three years.

Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the Law Department of the University. They should therefore ascertain, from the Registrar, before applying for permission, whether regular students of the University are taking up those subjects.

- 8. A candidate for admission to the LL.M. Previous or Final Examination must forward his application to the Registrar five weeks before the examination accompanied by a fee of Rs. 30|-. Every candidate shall produce a certificate in the form hereinafter prescribed to the effect that he has prosecuted a regular course of study in the University for not less than one academic year after having passed the LL.M. Examination. He must also forward with his application satisfactory evidence of having taken a Law degree as laid down under rules 4 and 5.
- 9. Candidates for the Previous Examination shall be examined in the following subjects:—
 - Comparative Jurisprudence and Principles of Legislation.
 - 2. Comparative Constitution with particular reference to England, British India and Hyderabad.
 - 3 & 4. Any two of the following:-
 - (a) Muslim Law with its history and jurisprudence.
 - (b) Hindu Law with its history and jurisprudence.
 - (c) Land tenure being a comparative study of laws of Hyderabad and Provinces of British India.
 - (d) Law of Transfer of property.
 - (e) Conflict of Laws.
 - (f) Public International Law.

- (h) Law of Tort.
- (i) Law of Crime and Criminology.
- Note.—There shall be one paper of three hours' duration in each subject carrying 100 marks.
- 10. Candidates for the LL.M. Final Examination shall be examined in the following subjects:—
 - 1. A special topic of Hyderabad Law of any period, to be determined by the Board of Studies in Law.
 - 2. A special topic of any of the subjects studied in the Previous Examination, to be determined by the Board of Studies in Law.
 - Note.—There shall be one paper of three hours' duration in each subject carrying 100 marks.
 - 3. Thesis:—Subject to be approved by the Board of Studies in Law.
 - Note.—(1) The thesis will be of about 50 pages of foolscap size and will be written under the supervision and with the advice of a member of the Law Faculty.
 - (2) Every candidate shall submit three typed-written copies of his thesis at least one Fasli month before the day of the examination.
 - (3) The thesis shall be valued by two examiners, one of whom will be the supervisor of the candidate and the other an expert from out-side. The Examiners of the thesis may hold a Viva Voce Examination to satisfy themselves that the candidates has availed of original sources, on the subject.
- 11. In order to pass the examination the candidate must obtain 40 per cent. of the full marks in each paper. Those of the successful candidates who obtain not less than 65 per cent. of the total marks will be placed in the first division, and those who obtain not less than 50 per cent. of the total marks will be placed in the second division. There will be no third division.

The result of the Previous Examination will only be declared and will not be classified. The marks obtained by the candidates in the Previous Examination will be added to the marks obtained by them in the Final Examination, and the rank will be determined on the basis of the total marks of both the examinations.

12. A candidate who fails to pass or to present himself for the examination for whatever reason shall not be entitled to claim a refund of the fee but he may be admitted without further attendance at lectures to any subsequent examination on the payment of a like fee.

13. Each successful candidate at the Final Examination shall receive a certificate signed by the Chancellor setting forth the subjects in which he was examined and the class in which he was placed.

Books Recommended.

- I. Comparative Jurisprudence and Principles of Legislation.
 - (a). English Theories:-
 - (1). Allen, Law in the Making.
 - (2). Roscoe Pound, Philosophy of Law.
 - (b). Continental Theories:-
 - (1). Kurkunov, Theory of Law.
 - (2). Miraglia, Comparative Legal Philosophy.
 - (c). Islamic Theories:-
 - (1). Ostrorog, Roots of Law.
 - (2). Abdur Rahim, Muhammadan Jurisprudence, Relevent Chapters (ترحمهٔ جا معهٔ عثمانیه)
 - (3). Macdonald, Development of Muslim Theology, Jurisprudence and constitutional theory. (Relevent Chapters).
 - (d). Hindu Theories:-
 - (1). Beni Prasad—The State in Ancient India. (Relevant Chapters).
 - (e). Principles of Legislation:—
 - (1). Jethro-Brown, Underlying Principles of Modern Logislation.
 - (2). General Principles of Muslim and Hindu Legis lation, for which no particular book can be recommended at present.

II. Comparative Constitution.

- (a). English and General:-
 - (1). Finer, Working of Modern Governments.
 - (2). Ogg, Governments of Europe.
 - (3). Laski, Grammar of Politics.

(b). British India:—

 - تاریخ فقه اسلامی (مطبوعه دارالمصنفین اعظم گره) .(3)

- V. Hindu Law, its History and Jurisprudence.
 - (1). Mayne, Hindu Law and Usage.(ترجه جامعه علمانيه)
 - (2). Sen, Principles of Hindu Jurisprudence.

Lectures will be delivered in the LL.M. classes of the University on the History of Hindu Law and Hindu Jurisprudence and for the present no particular books can be recommended. The students will be required to study the whole range of Hindu Law and not merely the personal Law.

I. M.B.,B.S. EXAMINATION.

OSMANIA UNIVERSITY

FACILTY OF MEDICINE

- 1. The University confers the degree of Bachelor of Medicine and Bachelor of Surgery.
 - 2. Candidates for the degree shall be required:-
 - (i) to have passed the Intermediate Examination in Science of the University, with Physics, Chemistry (Organic and Inorganic), Botany and Zoology including an introduction to the study of Elements of Genetics or an examination considered by the University equivalent thereto.
 - (ii) to have been subsequently engaged in their professional studies in the College of Medicine of the University for period of not less than five years.

N.B.—No candidate shall be allowed to begin the medical curriculum proper until he has attained the age of 17 years or will attain that age during the first term of the curriculum.

- 3. The academic year shall consist of three terms.
 - (i) The monsoon term, commencing on the 16th of June and ending on the 18th of September.
 - (ii) The winter term, commencing on the 21st of September and ending on the 16th of December.
 - (iii) The spring term, commencing on the 6th of January and ending on the 31st of March.
- 4. There shall be three examinations, called the first, second and final M.B., B.S., examinations respectively.

Each of these three examinations shall be held once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe. A Supplementary Examination will also be held for the duration of the War for the failed candidates of these examinations in the month of December or earlier each year.

- 5. Applications for admission to each of the M.B., B.S., examinations must reach the Registrar not less than two weeks before the commencement of the examination accompanied by the prescribed fee and the certificates required under the rules.
- 6. The fee prescribed shall be O.S. Rs. 25 for each of the first two examination and O.S. Rs. 40 for the final M.B., B.S., examination.
- 7. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the fee. He will be admitted to any subsequent examination on his making a fresh application, on payment of fresh fee and on submitting the necessary certificates.
- 8. Urdu shall be the medium of instruction and examination.
- 9. In order to pass an examination, a candidate must obtain not less than 50 per cent of the marks in the written and not less than 50 per cent of the marks in practical and oral Examinations in each subject. Candidates obtaining 75 per cent of the marks shall be placed in the First Class. In assessing marks the examiners will take into account the attested records of the practical work done by the candidate during his courses of study in the subjects of the examination.
- 10. Candidates passing the first two M.B., B.S., examinations shall receive a certificate signed by the Registrar and those passing the final M.B., B.S. examination shall receive a diploma signed by the Chancellor of the University.
- 11. Candidates are required to pass in all the subjects at the same time in the first two examinations. The Final or Third M.B., B.S. examination consists of two groups and a candidate is required to pass in all subjects of any one group at the same time.
- 12. No student who has not satisfactorily performed the work of the class as shown by the attested records of his practical work and results of class examinations, and has not attended at least 75 per cent, of the class meetings and has not paid all college dues, will be granted term certificates required for the University Examinations.

13. (FORM OF CERTIFICATE).

OSMANIA UNIVERSITY.

	Medical College,
	Department.
I certify that	attended
my class of $\dots d$	uring
and that he duly performed the	e work of the class including
•••••	. as required by the University
Regulations.	
	Professor.
Dated	Lecturer.

14. A student who has failed to pass an examination will not be allowed to re-appear for that examination until he has again kept the terms and satisfactorily performed the work of the class.

FIRST M.B., B.S. EXAMINATION.

- 15. The First M.B., B.S. Examination shall be held in the following subjects:—
 - (i) Human Anatomy and Embryology.
 - (a) One paper of three hours duration carrying 100 marks.
 - (b) Practical and Oral test including dissections, carrying 100 marks.
 - (ii) Physiology including Bio-chemistry.
 - (a) One paper of three hours duration, carrying 100 marks.
 - (b) Practical and oral examination in Histology, Biochemistry and Experimental Physiology carrying a total of 100 marks.
- 16. Candidates shall be required to produce with their application for permission to appear at the examination, certificates in the prescribed form, of having been engaged in professional studies for at least 6 terms subsequent to passing the Intermediate Examination and of having attended courses of instruction

and practical work in the above subjects as shown in the schedule of requirements.

SECOND M.B., B.S. EXAMINATION.

- 17. The second M.B., B.S. Examination shall comprise the following subjects:—
 - (i) Materia Medica and Pharmacology.
 - (a) One paper of three hours' duration carrying 100 marks
 - (b) Practical and oral examination in Materia Medica, Pharmacology and Practical Pharmacy carrying 100 marks.
 - (ii) Hygiene.
 - (a) One paper of three hours' duration carrying 100 marks.
 - (b) A Practical and Oral test carrying 50 marks.
 - (iii) Forensic Medicine.
 - (a) One paper of three hours duration carring 100 marks.
 - (b) A Practical and Oral test carrying 50 marks.
- 18. Candidates shall be required to produce with their application for permission to appear at the examination, certificates in the prescribed form, of having been engaged in professional studies for at least three terms subsequent to passing the First M.B., B.S. Examination and of having attended course of instruction and practical work in the above subjects as shown in the schedule of requirements.

FINAL M.B., B.S. EXAMINATION.

19. The Final M.B., B.S. Examination shall comprise the following subjects in two separate Groups:—

GROUP-I.

- (i) Medicine and Clinical Medicine including Therpeutics and Special subjects.
 - (a) Two papers each of three hours duration carrying 100 marks each.
 - (b) A Clinical, Practical and Oral examination in Medicine carrying 200 marks.

It shall consist of:—

An examination of a patient and written report on the case for which not less than one hour will be allowed.

A short examination on one or more cases. Practical and Oral Examination.

- (ii) Pathology and Bacteriology.
 - (a) One paper of three hours duration carrying 100 marks.
 - (b) A Practical and Oral examination carrying a total of 100 marks.

GROUP-II.

- (i) Surgery and Clinical Surgery.
 - (a) One parer of three hours duration carrying 100 marks.
 - (b) A Clinical, practical and oral examination carrying 100 marks.

It shall consist of:—

An examination of a patient and written report on the case for which one hour will be allowed.

A short examination on one or more cases.

Practical and oral examination.

- (ii) Ophthalmology and Oto-rhino-laryngology.
 - (a) One paper of three hours duration, carrying 100 marks. (60 marks for Ophthalmology and 40 for Oto-rhinolaryngology.).
 - (b) A Clinical and Oral examination carrying 100 marks.
- (iii) Obstetrics, Gynaecology and Diseases of Infancy.
 - (a) One paper of three hours duration carrying 100 marks.
 - (b) A Clinical, Practical and Aral examination carrying 100 marks.
- 20. Candidates shall be required to produce with their application for permission to appear at the examination, certificates in the prescribed form, of having been engaged in professional studies for at least 6 terms subsequent to passing the Second M.B., B.S. Examination and of having attended courses of

instruction and practical work in the above subjects as shown in the schedule of requirements.

21. SCHEDULE OF REQUIREMENTS FOR THE EXAMINATIONS

FIRST M.B., B.S. EXAMINATION.

Human Anatomy including Embryology...

A course of 150 lectures and demonstrations. Dissection of the whole human body.

Physiology.

A course of 150 lectures and demonstrations.

A course of Practical Histology of not less than 40 meetings of 2 hours each.

A course of Bio-chemistry of not less than 30 meetings of 2 hours each.

A course of Experimental Physiology of not less than 20 meetings of 2 hours each.

SECOND M.B., B.S. EXAMINATION.

Materia Medica and Pharmacology.

A course of 80 lectures and demonstrations.

A course of 25 meetings of 2 hours each in Practical Pharmacology, Pharmacy and Dispensing.

Hygiene.

A course of 50 lectures (including practical demonstrations).

A course of 6 lectures in Vaccination and practical work.

Forensic Medicine.

A course of 50 lectures and demonstrations.

Attendance at 10 meetings for medico-legal postmortem examination.

FINAL M.B., B.S. EXAMINATION.

GROUP-I.

Medicine.

A course of 100 lectures and demonstrations, in Medicine and Therapeutics.

Medical Practice.

In-patient—6 months during which he shall be continously in charge of not less than 5 beds, and out of which at least one month shall have been spent as an intern clerk in residence in the hospital or close by.

Out-patient—3 months

Mental Diseases & Psychology	12	Lectures and De-
		monstrations.
Tuberculosis	15	,,
Infectious Diseases	20	"
Skin Diseases	15	,,
Leprosy	10	,,

(at the Leper Home and Hospital, Dichpalli).

Diseases of Children—courses of lectures and demonstrations with clinical work 15 meetings.

Applied Physiology 25 meetings.

Instruction in Therapeutics and prescribing including (i) pharmacological Therapeuties, (ii) the mothods of treatment by vaccines and sera (iii) physitherapy (iv) dietetics, and (v) the principles of nursing.

Pathology and Bacteriology.

A course of 150 lectures and demonstrations.

A course of Practical Pathology including Morbid Anatomy, Morbid Histology and Clinical Pathology of 60 meetings of two hours each.

A course of Practical Bacteriology and parasitology of 40 meetings of 2 hours each.

Attendance at not less than 12 postmortem examinations.

GROUP-II.

Surgery.

A course of 100 lectures and demonstrations.

Surgical Practice.

In-patient—6 months during which he shall be continously in charge of not less than 5 beds, and out of which he shall have spent at least one month as an internal clerk in residence in the hospital or close by.

Out-patient	3—months.
-------------	-----------

Operative Surgery	• •		30 meetings
Anæsthetics			10 "
Administration of A	næsthetics	••••	10 Cases.
Venereal Diseases	• •		20 meetings
Orthopædics	• •	• •	20 ,,
Radiology	• •	• •	10 "
Dentistry	• •	• •	10 "
Applied Anatomy			25 ,,

Obsterics, Gynecology, Diseases of Infancy and Infant Hygienc.

A course of 100 lectures and demonstrations.

Maternity cases witnessed—20

" ,, conducted—12; attested records of these cases including antinatal and postenatal observation if possible, are essential.

Obstetric practice and Gynæcology—6 months including one month's residence for Maternity work.

Ophthalmology.

A course of 30 lectures and demonstrations and hospital practice 3 months.

Oto-rhino-Laryngology.

A course of 30 lectures and demonstrations and hospital practice 2 months.

The Clinical work shall be carried out in the Wards, Outpatient and Special departments of the Osmania Hospital.

DETAILED SYLLABUS

ANATOMY.

This conists of 150 lectures and demonstrations in anatomy and embryology throughout the course, dealing with:—

Bones, their structure, description and ossification.

Fasciæ, muscles, their origin, insertion, action, innervation and relations.

Joints, classification, mechanism, movement, nerve and blood supply, relations.

Heart, fœtal circulation, arteries, veins, their relations.

Lymphatic glands and vessels.

Medulla spinalis, encephalon, meninges peripheral, spinal and cranial nerves, sympathetic system.

Organs of special senses, splanchnology.

Surface anatomy, ductless glands.

General embryology and development of organs.

Morphology of structures.

Practical Work.

Dissection of one complete human body.

Physiology.

Systematic Course.

This consists of a course of 150 lectures and demonstrations and deals with the microscopic structure and functions of the tissues and organs. It also deals with the physical phenomena exhibited by the living organism and the chemistry of the food and body.

Practical Course.

This course is divided into three sections:-

Section I. Biophysics.

The methods employed in the investigation of the functions of muscle, nerve, respiration, heart etc., are studied practically and the results recorded by graphic methods.

Section I. Biophysics.

The methods employed in the investigation of the functions of muscle, nerve, respiration, heart etc., are studied practically and the results recorded by graphic methods.

Section II. Bio-chemistry.

The methods employed in the investigation of the chemistry of food and body are studied practically.

Section III. Histology.

The microscopic structure of tissues and organs of the body is studied with the methods employed in its investigation.

MATERIA MEDICA AND PHARMACOLOGY.

Systematic Course.

This consists of 80 lectures including demonstrations, describing the distribution of drugs in the body, their fate and action on man and lower forms of life, and the manner in which the functions of the body in health and disease can be modified by therapeutic measures.

Important official and non-official drugs and their preparations are dealt with; work on Indian indigenous drugs is also briefly described. The physical and chemical characters of drugs are considered only in so far as they are of importance in medicine and pharmacy.

Practical course.

Twelve meetings of two hours each in practical pharmacology.

Thirteen meetings of two hours each in prescription writing and dispensing practice.

FORENSIC MEDICINE.

The course consists of 50 lectures and demonstrations dealing with:—

Part I

- 1. Procedure in the Courts and the rules of evidence for medical men.
- 2. Identification of the living and dead as race, age and sex.
 - 3. Autopsy for medico-legal purposes and exhumations.

About twelve medico-legal post-mortem examinations are demonstrated during the course.

- 4. Medico-legal aspects of death; modes of death and signs of death, causes of sudden death.
- 5. Asphyxial death, drowning, hanging, strangulation and suffocation.
 - 6. Examination of blood stains, seminal stains and hair.
- 7. Wounds and mechanical injuries, general and of special parts.
- 8. Miscellaneous causes of death, from heat, cold, electricity, starvation etc.
- 9. Sexual offences, dealing with impotence, sterility, rape and unnatural offences, signs of pregnancy and delivery, abortion, infanticide and legitimacy.
- 10. Insanity-different forms and their diagnosis, criminal responsibility of an insane, feigned insanity.

11. Legal and moral obligations of medical men, malpraxis professional secrecy, issue of death certificates etc.

Part II.

TOXICOLOGY.

- 1. Poisons, their classification, diagnosis, detection and treatment in general.
 - 2. Corrosive poisons, acids and alkalies.
 - 3. Irritant poisons, inorganic, organic and mechanical.
- 4. Poisons affecting special organs, as central nervous system, spinal cord, heart, lungs (asphyxiant gases) and peripheral nerves.

HYGIENE.

The course consists of.—

·1. 50 Lectures and demonstrations dealing with:-

Water.

Sources, collection, distribution, storage, impurities, purification including filtration, collection of samples for analysis, examinations.

Air.

Impurities, their sources and effects on general health, taking of samples and examination.

Ventilation.

Amount of air required, effects of O₂ deficiency and CO₂ = excess, effects of the amount of moisture in the air, air stagnation, practice of ventilation, heating and cooling of dwellings.

Climate and Meterology.

Causes and effects of climate, acclamatization, temperature, atmospheric pressure, movements of winds, thermometer, barometer, hygrometer, rainfal.

Occupational Diseases.

Offensive trades, industrial diseases, slaughter houses.

Soils.

Varieties, relation to climate and health, subsoil water.

Sites and Buildings.

Selection of sites for buildings, sanitary designing and construction, cow-sheds, stable and dairies.

Food.

Classification, relative values, quantity required.

Beverages and Condiments.

Cooking, vitamins; preservation of food, diseases connected with food, diet of India.

Refuse and Sewage.

Collection, removal, disposal, ditems of sewage disposal.

Disposal of the Dead.

Earth burial, cremation.

Personal Hygiene.

Infection and Carrier of Infection.

Animal Parasites.

Preventable Infectious Diseases.

Restraint of Infection.

Notification, isolation, quarantine, disinfection, immunity, vaccination.

Medical Inspection of Schools.

Scope, methods.

Maternity and Child Welfare.

Protection of motherhood, child welfare centres, health visitors, midwifery service.

Sanitation of Fairs and Relegious Festivals.

Rural Hygiene.

Education, selection of site, dwellings, drainage.

Sexual Hygiene.

Marriageable age, physiology in relation to normal limits, perversions, prostitution, contraceptives.

Vital Statistics.

Significance estimation of population, birth and death rates, infant mortality, causes, prevention, occupational mortality, special death rates, death certifiates.

Practical Demonstrations.

Filter beds, sewage works, observatory, isolation hospital, slaughter houses, dairies, malaria and plague departments.

II. Six lectures on vaccination with demonstrations and practical work.

MEDICINE.

The course in medicine consists of 100 lectures comprising the principles and practice of medicine during the 3rd and 4th year of study.

The systematic lectures deal with the aetiology, signs and symtoms, diagnosis, prognosis and treatment of: —

- 1. Disases of repiratory organs
- 2. Diseases of the circulatory system
- 3. Diseases of the alimentary canal.
- 4. Diseases of the blood and lymphatic glands
- 5. Diseases of the endocrine system and metabolis
- 6. Diseases of the urinary organs.
- 7. Diseases due to diet deficiencies.
- 8. Diseases of the Nervous system.
- 9. Infectious Diseases with special stress on diseaseses of the tropics.

CLINICAL MEDICINE.

The Clinical course consists of 50 lectures and demonstrations in the wards of the Osmania Hospital.

The Ward Assistants take part in giving instruction to students in case taking and side room work.

In addition to the course above described special instruction in the following subjects is given as follows:—

i	Tropical Medicine	 20	Lectures & d	emonstrations
ii	Children Diseases	 15	"	,,
iii	Lectures on Therapeutics	 16	"	,,
iv	Tuberculosis	 15	"	"
v	Psychology	 12	"	"
vi	Infectious Disease	 20	"	"
vii	Skin Diseases	 15	**	"
viii	Leprasy	 25	,,	**

PATHOLOGY AND BACTERIOLOGY.

The systematic course consists of 150 lectures and demonstrations dealing with:—

- (a) The nature of pathological processes and the naked eye and microscopic changes in the structure of the organs and tissues of the body in diseased conditions.
- (b) Study of the important bacteria and animal parasites pathogenic to man.

The practical course is divided into:-

- (a) The practical study of diseased organs and tissues, naked eye and microscopic.
- (b) Examination of diseased materials such as blood, urine, faeces, sputum and pathological fluids etc.

- (c) Practical work in Bacteriology and Parasitology.
- (d) Attendance at post-mortem examinations forms an essential part of the course.

STIRGERY.

The Systematic course consists of 100 lectures dealing with:—

Part I.—General Surgery.

- 1. Repair and conditions which interfere with repair.
- 2. Infection, Bacterial products and Immunity.
- 3. Inflamation and suppuration.
- 4. Results of suppuration.
- 5. Ulcers, Sinuses, Fistulas and Gangrenes.
- 6. Surgical fevers, Sapraemia, Septicaemia and Pyæmia.
- 7. Erysipelas, Diphtheria, Tetanus, Hydrophobia, Actinomycosis, Tubercle, Syphilis, Gonorrhoea and Leprosy.
- 8. Injuries and constitutional effects of injuries.
- 9. Tumors and Cysts.
- 10. Injuries of soft parts, of bones and joints and their treatment.
- 11. Diseases of bones and joints and their treatment.
- 12. Deformities.

Part II.—Regional Surgery.

- 1. Surgery of the Head—The scalp, the cranium. Surgery of the brain and meninges. Surgery of the face, orbit, lip, nose, and tongue.
- 2. Surgery of the Spinal Cord.
- 3. Surgery of the neck—The salivary glands, thyroid gland, esophagus, trachea.
- 4. Surgery of the chest-The breast, empyema.
- 5. Surgery of abdomen and pelvis—Hernia, the peritoneum, appendix, stomach, intestine and liver.
- 6. Surgery of the Rectum and Anuus.

- Surgery of male and female urogenital system— Kidney, bladder, ureter, urethra prostate and testes.
- 8. Surgical Diseases of skin—muscles, tendons, nerves, bursae, blood and arteries.

Part III.—Surgical Methods.

- 1. Surgical case taking.
- 2. Preparation of the patient, the theatre, surgical materials, and instruments for operation.
- 3. Sterlization.
- 4. Anaesthetics and various methods of anaesthesia.
- 5. Surgical technique and operations.
- 6. Principles of pre and post operative treatment.

Clinical Surgery.

Clinical instruction is given in the wards by the Surgeons of the Hospital.

Instruction in surgical case taking, bandaging etc., is also given by the Assistant Surgeons and the Ward Assistants.

Operative Surgery.

This consists of practical operative work on the cadaver by the students.

Besides the ward clinics, the Physicians and Surgeons deliver clinical lectures to the students of the 3rd, 4th and 5th year classes once a week.

MIDWIFERY AND GYNAECOLOGY.

The systematic consists of 100 lectures on:-

I. Midwifery.

- (a) The anatomy and physiology of the female organs of reproduction.
- (b) The physiology of pregnancy, parturition and the puerperal state.
- (c) The pathology of pregnancy, parturition and the puerperal state.

II. Gynaecology.

- (a) Methods of diagnosis.
- (b) Diseases of the female pelvic organs.
- (c) Treatment—non-operative and operative.

III. Diseases of the new born and of the period of infancy.

Practical Work.

Attendance in the midwifery and gynaecology wards—for six months.

The student is required to witness at least 20 cases of labour and to be in residence for at least one month in the Osmanīa Hospital during which period he is allowed to conduct under supervision not less than 12 cases of labour and has an opportunity of witnessing the treatment of abnormal cases admitted during that period.

OPHTHALMOLOGY.

The course consists of 30 lectures, demonstrations and practical work on:—

Examination of the Eye.

Objective examination, eyeballs, eyelids, lacrimal, passages, conjuctiva, cornea, oblique focal illumination, anterior chamber, aqueous humour, iris, lens, tension, opthalmoscope, keratometer.

Subjective Examination.

Visual acuity, the perimeter, scotoma, malingering. The anatomy and physiology of the following structures with their injuries and diseases:—

Eyelids, conjunctiva, lacrimal apparatus, cornea, sclera, retina. uveal tract, lens, vitreous, optic nerve, orbit, oculomotor system.

Refraction, amblyopia, glaucoma.

DISEASES OF EAR, NOSE AND THROAT.

The course consists of 30 lectures, demonstrations and practical work on:—

1. Diseases of the Ear.

Surgical anatomy and physiology of the ear. Clinical

examination of the auditory apparatus, and tests for hearing, functional tests or the labyrinth.

2. Diseases of the External Ear.

Acute and chronic diseases of the middle ear, including intracranial complications. Notes on aural operations vertigo, timitus, and associated syndromes, deaf mutism.

3. Discuses of the Nose and Nasal Sinuses.

Surgical anatomy of the nose and sinuses. Anterior and posterior rhinoscopy.

Diseases and deformities of the external nose and septum nasi.

Acute rhinitis, chronic rhinitis with special reference to chronic granulomata, nasal polypii, foreign bodies and malignant disease.

Sinusitis, diagnosis and treatment. Notes on operations of the nose and sinuses.

4. Diseases of the Throat.

Surgical anatomy of the pharynx, larynx, trachea, bronchii and oesophagus.

Acute and chronic pharyngitis.

Diseases of the tonsils. Diseases of the laryngopharynx and larynx.

5. Diseases of the trachea, bronchii, tracheotomy, indication and operative details.

Dysphagia and diseases of the oesphagus.

Foreign bodies in the upper respiratory tract and oesophagus with special reference to endoscopy.

MENTAL DISEASES.

The course consists of lectures and demonstrations in:

Elementary psychology, normal and abnormal. Laws of insanity and admission into mental hospitals, failure of mental development, idiocy, imbecility, weak mindedness, mania, depressive insanity, melancholia, stupor, alternating and circular conditions, delusional insanity, paranoia primary.

adolescent, consecutive, terminal, organic, parasyphilitic and senile dementia. Insanity due to drugs, alcohol, Indian hemp, opium and its derivatives, cocain, lead, epileptic insanity, hysteria, psychastheenia, exhaustion, psychosis, post febrile insanity, acute delirium, neurasthenia, insanity of puberty and adolescence, insanity of child bearing, climactric and old age, mental disorders associated with thyroid gland, policencephalitis, syphilis, tubercle, nephritis, diabetis and gout, medico-legal and social relations of insanity, general treatment.

OPPORTUNITIES FOR CLINICAL STUDY.

The Osmania Hospital (550 beds including 40 beds for maternity and gynaecological cases); and the isolation hospital (100 beds) under the Medical Department of H.E.H. the Nizam's Government are affiliated to the University for clinical teaching.

Instruction in leprosy is given in the leper home and hospital at Dichpalli accommodating 700 patients.

BOOKS RECOMMENDED.

An atomy.

- 1. Gray's Text-book of Anatomy.
- 2. Cunningham—Practical Anatomy.
- 3. H. Hyder Ali Khan-Elements of Embryology.

Physiology.

- 1. Halliburton-Hand book of Physiology.
- 2. Schafer—Essentials of Histology.
- 3. Halliburation—Essentials of Chemical Physiology.
- 4. Sharpey-Schafer-Experimental Physiology.

Materia Medica and Pharmacology.

- 1. Ghosh-Materia Medica and Therapeutics.
- 2. Cushny—Pharmacology and Therapeutics.
- 3. Clark-Applied Pharmacology

Pathology & Bacteriology.

- 1. Muir—Text-book of Pathology.
- 2. Muir & Ritchie-Manual of Bacteriology
- 3. Shennan-Post-mortem and Morbid Anatomy

Hygiene.

1. Ghosh-Hygiene and Public Health.

Forensic Medicine.

- 1. Dixon-Mann-Forensic Medicine &Toxicology.
- 2. Lyon's Medical Jurisprudence for India.

Medicine.

- 1. Taylor-Practice of Medicine
- 2. Manson's—Tropical Diseases
- 3. Hutchison & Hunter-Clinical Methods
- 4. Savill' Clinical Medicine

Surgery.

- 1. Rose & Carless—Manual of Surgery
- 2. Waring-Manual of Operative Surgery
- 3. Boyd's Surgical Pathology
- 4. Massie-Surgical Anatomy

Ophthalmology.

1. May & Worth-Diseases of the Eye. .

$Oto ext{-}Rhino ext{-}Laryngology.$

1. Turner-Ear, Nose and Throat

Midwifery and Gynaecology.

- 1. Ten Teachers-Midwifery
- 2. Eden & Lockyer-Gynaecology
 - 3. Ten Teachers—Diseases of Women.

J. B. E. EXAMINATION.

FACULTY OF ENGINEERING.

B. E. Examination

- 1. The Examination for the degree of Bachelor of Engineering shall be held once a year in Hyderabad at such time and on such dates as the Syndicate may prescribe.
- 2. The examination shall be open to students who after passing the Intermediate Examination of this University or of a recognised University with Mathematics, Physics and Chemistry as their optional subjects shall have prosecuted a regular course of study at the Engineering College at this University.

A registration fee of Rs. 10 shall be charged by the University for all students migrating to this University from any other University.

- 3. The course of instruction shall extend over four years, of which 3 years shall be spent in the college and the fourth year chiefly on works. University Examinations will be held at the end of the 1st, 2nd and the 3rd years and will be known as B.E. I, II and Final Examinations.
- 4. Applications for admission and certificates of attendence and progress in the prescribed form together with a fee of Rs. 20 for the B.E. I and B.E. II Examinations and of Rs. 30 for the B.E. Final examination shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

No student of the University will be allowed to appear at any examination of the University unless he has attended at least 70 per cent. of the lectures delivered in each of the subjects of his study; 70 per cent. attendance in practical Classes also will be required. The Syndicate may, however, condone a deficincy in attendance not exceeding 5 per cent. for special reasons, specially ill-health when the application is supported by a certificate from an authorised Medical Officer, which can satisfy the Principal.

A member of the U. T. C. shall be permitted to count as attendance the period spent on duty in connection with the University Training Corps Camp.

610 B.

Students taking part in Inter-University Tournaments and Debates will be entitled to the same privilege.

- 5. Upon the receipt of the application, the attendance certificates and the fees prescribed, the Registrar shall, at least a week before the examination, cause to be furnished to the candidate a receipt for each fee received which will also serve as a ticket of admission to the examination hall to be produced by the candidate in the hall, if called for.
- 6. The B.E. examinations shall be conducted by means of printed papers. The papers will be set and answered in Urdu.

7. The following is the scheme of examinations B. E. First Examination (Civil & Mechanical)

S. No candidate shall be deemed to have passed the B.E. Examinations unless he obtains a minimum of 33 per cent. of the marks in each of the written papers and in the practical examinations and 50 per cent. in the aggregate. Those who obtain not less than 70 per cent. of the marks in the aggregate shall be placed in the First Class and those obtaining not less than 50 per cent. in the Second Class.

Candidates failing at the B.E. I & II Examinations in one subject only but passing in the aggregate may be promoted to the higher class and allowed to appear at the next B.E. I & II Examinations respectively only in the subject in which they had failed. Such candidates will not be entitled to any class, prize, medal or scholarship.

- 9. A certificate setting forth the date of the examination, the subjects in which he was examined, the class in which he was placed shall be given to each successful candidate. The certificate of the B.E. I & II Examinations shall be signed by the Registrar and that of the B.E. Final Examination by the Chancellor.
- 10. Civil Engineering students who are successful at the Final Examination shall be attached for one year to a Public Works Division where large works are in progress and shall be regularly instructed in the preparation of materials, the practical details of contruction, the management of labour and in the system of accounts. Mechanical Engineering students shall spend the final year in a recognised Engineering Workshop.
- 11. The Degree of Bachelor of Engineering. (B.E.) will be awarded to those students who after passing their Degree Examination, have undergone one year's practical training as approved by the Faculty.
- 12. For detailed rules regarding 1. Admission. 2. Discipline. 3. Residence. 4. Fees. 5. Attendance. 6. Awards, see the prospectus of the Engineering College section B1. C1. C2. C3. C4 and C6. respectively.

1. Pure Mathematics.

I Year Civil and Mechanical.

Text Books:

- 1. Higher Algebra Part II (as per Urdu translation) by Hall & Knight.
- 2. Plane Trigonometry Part II by Loney.
- 3. Elementary treatise on Conic Sections by Smith.
- 4. Infinitesimal calculus by Lamb (Parts I & II as per Urdu translation).

Recommended for reference:

- 1. The elements of Coordinate Geometry by Loney.
- 2. Differential & Integral Calculus by Philips.
- 3. Elements of Differential and Integral Calculus by Granville.
- 4. Differential and Integral Calculus for beginners by Edwards.
- 1. Algebra:—Determinants, partial fractions, exponential and logarithmic series. Simple tests on convergence and divergence of series; elementary theory of equations. Approximate graphical solutions of numerical equations.
- 2. Piane Trigonometry:—De-moivre's Theorem, Circular and hyperbolic functions and their expansions.
- 3. Analytical Geometry:—Properties of and problems on the straight line, the circle, the ellipse, the parabola and the hyperbola by Cartesian and polar co-

ordinates. Reduction of the general equation of the second degree in two variables and tracing of the second degree curves.

- 4. Differential Calculus:—Fundamental notions: rules of differentiation. Geometrical and Mechanical applications. Tangents and Normals: successive differentiation. Theorems of Taylor and Mac Laurin, partial differentiation, Euler's Theorem. Maxima and minima of functions of a single variable.
- 5. Integral Calculus:—Integration of standard forms; Integral as the limit of a sum; Elementary definite Integrals.

II Year Civil and Mechanical.

Text Books:

- 1. Coordinate Geometry of three dimensions by Bell.
- 2. Infinitesimal Calculus (Parts II & III as per Urdu Translation) by Lamb.
- 3. Differential Equations by Piaggio.
- 4. Spherical Trigonometry by Todhunter and Leathem.

Recommended for reference:

- 1. Solid Geometry by Smith.
- 2. Differential Equations of Engineering Science by Barker, J. E. & Foster P.
- 3. Mathematics for Engineers Part II by W. N. Rose.
- 4. Applied Mathematics for Engineers by T. Hodgson (Volumes II & III).

- 1. Spherical Trigonometry:—Introduction to spherical trigonometry up to the solution of spherical triangles. Napier's Rules of circular parts for right angled triangles. Napier's and D'Alembert's analogies. Adaptation of formulae to logarithmic computations.
- 2. Analytical Geometry of three dimensions:—Different systems of co-ordinates of a point in space; direction cosines of a straight line and problems thereon. Planes, cylinders, spheres and standard forms of second degree surfaces.
- 3. Differential Calculus:—Asymptotes, curvature, tracing of curves from their Cartesian and polar equations. Determination of Laws by graphical methods. Envelopes, Involutes, Evolutes.
- 4 Integral Calculus:—Method of substitution. Integration by parts. Integration of rational algebraic functions. Simple reduction formulae. Definite integrals. Calculation of curve lengths and areas. Simpson's Rules. Planimeters. Approximate evaluation of definite integrals by numerical and graphical methods. Mean values by integration. Volumes and surfaces of solids of revolution. Double and triple integrals. Mass centres and moments of inertia.
- 5. Differential Equations.—Formation of differential equations ordinary and partial. Solutions of the standard forms of equations of the first order. Linear equations with constant or homogeneous coefficients. Linear simultaneous equations in two dependent variables only. Geometrical and mechanical applications. First order simultaneous equations. Standard forms of elementary partial differential

equations. (Lagrange's linear equation only). Approximate integration of differential equations by graphical and numerical methods.

2. A PPLIED MATHEMATICS.

I Year Civil and Mechanical.

Text Books:

- 1. Elements of Statics by S. L. Loney.
- 2. Elements of Dynamics by S. L. Loney.
- 3. Elements of Hydrostatics by S. L. Loney.

Recommended for reference.—

- 1. Intermediate Mechanics Parts I &II (Statics and Hydrostatics) by D. Humphrey.
- 2. Intermediate Mechanics Part III (Dynamics) by D. Humphrey.
- 3. Hydrostatics by Greaves.
- 1. Statics:—Concurrent and parallel forces, moments, couples, equilibrium of forces in a plane, (Graphical Statics, Theory of frames) centre of mass and friction. Work, simple machines, the pulley, the wheel and axle, the differential pully, the balance, the steel yard.
- 2. Hydrostatics:—Transmission of fluid pressure. Thrust on a plane area. Centres of pressure. Resultant thrust on any surface. Equilibrium of floating bodies, stability, meta centre. Hydrometers, Barometer. Atmospheric pressure and the determination of altitude by barometric observations. The general phenomena of capillarity, elevation and depression. The principles underlying the action of the suction pump, the force pump, the syphon, the hydraulic press.

II Year Civil and Mechanical.

Text Books:

- 1. Higher Statics by Loney.
- 2. Dynamics of a particle and rigid bodies by Loney.

Recommended for reference:

- 1. Statics by Ramsey.
- 2. Dynamics (Part I) by Ramsey.
- 3. Hydrostatics by Ramsey.
- 4. Applied Mathematics for Engineers by T. Hodgson (Vols. I & II).
- 1. Statics:—(a) Advanced treatment of the portions taught in the first year with the help of calculus.
- (b) Virtual work. Stable and unstable equilibrium. Strings and chains. The catenary. The parabolic chain. Forces in three dimensions. Compositiin and resolution and simple problems.
- 2. Hydrostatics: Advanced treatment of the portions taught in the first year with the help of calculus.
- 3. Dynamics: Vectors. Composition and resolution of velocities and accelerations. Relative velocity. Motion in a straight line with constant and variable accelerations. Newton's Laws of motion. Impulse, work, power, energy. Simple harmonic motion. Constrained motion. Simple pendulum.

Displacement in one plane, velocities and accelerations. Radial and transversal velocities and acce-

lerations. Tangential and normal accelerations. Angular velocity. Projectiles. Motion on a smooth plane curve.

Principles of conservation of linear and angular momentum and energy. Instantaneous impulses. Impact.

D'Alembert's principle. Moment of inertia. Rotation of a rigid body about a fixed axis. Compound pendulum. Reactions on a fixed axis. Elementary motion of a rigid body in two dimensions.

3. Drawing.

I Year Civil and Mechanical.

Text Book: Roorkee Series on Drawing Vol. I & II.

- 1. Plane Geometry. Use and care of drawing instruments. Proportional division of a line. Construction of plain and diagonal scales and scale of chords. Construction of and problems relating to triangles, quadrilaterals, circles, polygons; construction of ellipse, tangents and normals. Parabola, Hyperbola, cycloids, involute of a circle, spiral, loci.
- 2. Solid Geometry and Projections. Principles of Projection. Projection of points and lines. Sections of solids. Interpenetration of solids. Simple cases of intersection of plane and curved surfaces.
- 3. Machine Drawing. Drawings of simple machine parts such as (a) Bolts, Nuts and Screws. (b) Cranks. (c) Forms and proportions of pipes and cylinder flanges. (d) Pistons. (e) Stuffing boxes.
- 4. Free-hand and Model Drawing. Elementary instructions in careful observation and accurate

sketching in pencil from sketches and drawings and also from simple models and architectural details.

- 5. Isometric Projection. Isometric projections of simple objects.
- 6. Inking. Practice in tracing, inking and printing.

4. SURVEYING.

Text Book: Surveying—Roorkee Series.

I Year Civil and Mechanical.

- 1. Introduction: Definition and classification of surveys; general principles of Surveying.
- 2. Chain Survey: Principles of chain survey. Use and adjustment of the various instruments employed in chain survey including Optical Square and Abney's Level. Offsets and errors in offsets. Problems in chain survey, limits of errors; determination of areas by chain surveys. Use of Planimeter.
- 3. Compass Survey: Use and adjustment of various types of compasses. Methods of compass survey, Customary errors and limits of errors.
- 4. Minor Instruments: Use and adjustment of Box Sextant, Ghat Tracer, verschoyle transit and other minor instruments.
- 5. Levelling: Definitions and principles of construction of a levelling instrument and its various parts with special reference to the spirit bubble and the telescope. Principles of levelling. Use and adjustment of various types of levelling instruments. Various levelling staves. Different kinds of levelling operations. Different types of level books. Errors in

levelling due to curvature and refraction. Various other causes of errors in levelling. Elimination of such errors. Various methods of contouring. Uses of contours.

6. Theodolite: Various types of theodolites; principles of construction and adjustment of theodolites. Various methods of traversing with a theodolite. Gale's system of co-ordinates. Convergency correction. Errors in theodolite traversing. Determination of heights and distances by a theodolite.

II Year Civil.

- 1. Planetabling: Instruments employed in planetable survey. Use and adjustment of these instruments. Telescopic alidade. Various methods of planetable survey. Three point and two point problems. Contouring by planetabling. Error in planetabling.
- 2. Tacheometry: Theory and use of stadia wires. Use and adjustment of Jeffcott's direct reading tacheometer. Tacheometric surveys. Tacheometric reductions.
- 3. Curve Ranging: Theory of simple curves. Curves laid out with the aid of instruments for angular measurements. Curves laid out by linear measurements only, by chords and offsets, and by offsets inside the curve, by offsets outside the curve. Compound curves. Transition curves. Vertical curves. Problems in curve ranging.
- 4. Topographical Maps: Map reading. Preliminary reconnaissance with the aid of topographical maps. Determination of catchment areas.

- 5. Baseline Measurements: Instruments employed in baseline measurements. Various methods of corrections.
- 6. Minor Triangulation: Principles of minor triangulation. Reconnaissance. Methods of observasation. Computations. Three-point problem. Two-point problem.
- 7. Tunnel Alignment: Instruments used and methods employed. Errors in alignment.
- 8. Field Astronomy: Definitions. Celestial coordinates. Corrections to observed altitude. The sidereal, apparent and mean time. Equation of time. Theory concerning the determinition of time and azimuth by extrameridian observations of the sun and stars. Determination of latitude by circummeridional observations of the sun and stars.

FIELD WORK.

I Year Civil and Mechanical.

Practical work in all the items of the syllabus.

II Year Civil.

Practical work in all the items of the syllabus except Tunnel Alignment.

5. BUILDING MATERIALS.

I Year Civil and Mechanical.

Text Book: Building Materials—Roorkee Series.

1. Stones: Characteristics, varieties of stones and their suitability to engineering works. Methods of quarrying.

- 2. Bricks and Tiles: Different classes of bricks and their distinguishing qualities. Methods of manufacture of bricks and tiles. Uniformity of quality and size. Absorption of water. Terra Cotta. Stone ware pipes.
- 3. Cement, Lime and Mortar: Sources of supply. Manufacturing process. Varieties of lime and cement. Clay puddle: methods of making and placing.
- 4. Timber: Felling and seasoning. Varieties of timber used in construction. Preservation of timber against rot.
- 5. Metals: Iron and steel; varieties and suitability for use; copper, zinc, lead, tin and other alloys.

6. Construction.

I Year Civil and Mechanical.

Text Book: Roorkee Series on Building Construction.

- (1) Buildings: Foundation. Masonry Stone & Brick. Plastering. Roofing. Flooring. Carpentry. Painting etc.
- (2) Roads and Bridges: Earth work. Metalling. Culverts and Bridges (including retaining walls).
- (3) Irrigation Works: Masonry Dams. Earthen Dams. Canals.

7. GEOLOGY AND MINERALOGY.

I Year Civil and Mechanical.

Text Book: Engineering Geology by Fox.

- 1. Discussion of the geological agents at work on and beneath the surface of the earth; water; frost; snow; ice; the atmosphere; chemical, mechanical and organic actions, Phenomena of earthquakes, volcanoes, elevation and depression of land. Geological functions of plants and animals
- 2. The classification of the stratified crust of the earth; the primary, secondary, and tertiary rocks, fossils and minerals. Essential constituents of common rocks, such as limestone, gneiss, micacesus and chloritic schists; granite: syenite, trachtye, pumice; sandstone; slate, laterites, etc.
- 3. Description of beding and joints. inclination of rock; dip outcrop and strike, curvature; monocline. Syncline, Anticline. Nature and origin of faults, veins and dykes. Igneous rocks. Metamorphism. Ore deposits, unconformability.
- 4. Indian Geology.—Mountain rages, plains and Distribution of alluvium, trap, and crystal-Drift of Indian coasts. River drift of line rocks. the Narhada and Tapti. Alluvial plains of the Indus and the Ganges. Formation of the Laterite and Regur, and their relation to vegetation. Rocks of the Siwalik Hills, and the pliocene mammalia. Nummulitic rocks. Drift of Indian coasts. River drift of Distinctive fossi's; (1) marine, and (2) terrestrial of the Tertiary period. Marine cretaceous rocks their mineral character and fossils. Volcanic rocks of the Deccan, and their interbedded deposits. The Jurassic rocks of Cutch. The lower Gondwana rocks of India. The Talchir Scries. The coal-fields of the

Gondwana rocks and their fossil plants. The marine Trias of the North of India. Relations of secondary to primary strata in India. Carboniferous rocks of the Salt Range. Vindhiyan and older stratified deposits. The Charnockite series of crystalline rocks. The gneiss and schists of South and Central India. General structure of the Himalayas.

Mineralogy.—Crystal form and symmetry; division into systems; their principal characteristics; classification based upon (a) chemical composition, (b) physical properties, e.g., specific gravity, hardness, cleavage, fracture; phenomena relating to light; simple description and identification of rock forming minerals, ores, veinstones, salts and gems.

8. METALLURGY.

I Year Civil and Mechanical.

Text Book: Metallurgy by Dr. Rhead.

Recommended for reference: Metallurgy by Gregory.

- 1. Introduction. Relation to Engineering General principles of metallurgy and application to industries.
- 2. Metallurgical processes: Definitions and principles underlying the same.
- 3. Cast Iron: Manufacture, composition and uses. Effects of presence of foreign elements.
- 5. Wrought Iron: Manufacture, properties and uses.

- 6. Steel: Various methods of manufacture. Properties, composition and uses.
- 7. Special Steels: Effect of nickle, chromium, molybdenum, tungsten, silicon, carbon, etc. on the properties of steel.
- 8. Heat Treatment: Elementary knowledge about the importance of the same with respect to steel. Hardening, tempering, annealing, normalising.
- 9. Refractory Materials: Acid, basic, and nuetral: their composition, properties and uses, with reference to furnace practice.
- 10. Non-ferrous metals: Aluminium, copper, zinc, tin, nickel.

9. Fuels.

I Year Civil and Mechanical.

Text Book: Metallurgy by Dr. Rhead.

Recommended for reference: Fuels by Braeme.

- 1. Introduction: Importance of fuels for production of power.
- 2. Classification of fuels: Natural and artificial; solid, liquid and gaseous.
- 3. Solid fuels: Wood, charcoal, peat, lignite, coal, coke, briquette, industrial refuses, their composition, properties and uses.
- 4. Liquid Fuels: Crude petroleum, petroleum products, synthetic fuels, hydrogenation process, vegetable oils, their composition and uses.

- 5. Gaseous Fuels: Natural gas, gaseous fuel from charcoal, coal and oils. Their composition, properties and uses.
 - 10. DESCRIPTIVE CIVIL ENGINEERING.

I Year Civil and Mechanical

- 1. Roads: Alignment, instruments used in alignment, curves, moorum roads, tar roads, metal roads cement concrete roads, ghat roads, etc.
 - 2. Railways.
- 3. Bridges: Selection of site, water ways, culverts, and their positions, embankment, names of different parts and general description of construction.
- 4. Dams: Masonry dams, earthen dams, concrete dams, composite dam and the selection of site.
- 5. Canals: Alignment of canal, contours and distributaries, aqueduct, syphon etc.
- 6. Tunnels: Elementary alignment of tunnel, for roads and mines, etc.
- 7. Locks: The necessity and their position and construction.
- 8. Docks: Site, construction, materials used and their necessity.
- 9. Buildings: Selection of site, water supply and materials used, sanitation and lay out.
 - 11. DESCRIPTIVE MECHANICAL ENGINEERING.

I Year Civil and Mechanical

- Text Book:—Mechanical Engineering by R. S. Mc.-Laren.
- 1. Materials: Elementary properties of materials.

- 2. General: Definitions and units of force, work, pressure, torque, horse-power and speed. Units of heat and their relation to work, their relationships and measurement. Meaning of I.H.P., B.H.P., S.H.P., Mechanical Efficiency, Thermal Efficiency, and losses. Indicator cards and mean effective pressure.
- 3. Boilers: Important types of boilers: Lancashire, Cornish, water-tube and fire-tube boilers.
 - 4. Condensers: General description.
- 5. Steam Engines: General description and theory of operation of steam engines. Simple and compound engines. Single and double acting engines. Starting, running and stopping of steam engines.
- 6. Steam Turbines: General description and elementary theory.
- 7. Internal Combustion Engines: General description and theory of operation of gas, petrol and oil engines, Cycles of operation. Maintenance and running of above.
- 8. Hydraulic Mechinery: (a) Pumps. General description and principles of operation of centrifugal and reciprocating pumps. (b) General description and operation of water wheels and turbines. (c) Hydraulic machinery. Jack, crane, press, accumulator and intensifier.
 - 9. Lifting Machinery: Hoist, crane and winches.
- 10. Machine Parts: Bolts, nuts, keys, cotters, rivets, riveted and pipe joints. Various types of bearings.

12. DESCRIPTIVE ELECTRICAL ENGINEERING.

I Year Civil and Mechanical

Text Book: Technical Electricity by Davidge Hutchinson.

- 1. Electric Current: Meaning of an electric current. Sources of electric current. Properties of electric current. Unit of current. Heating, magnetic and chemical effects. Electrical pressure. Unit of pressure. Voltage and Energy.
- 2. Ohm's law and resistance. Specific resistance. Kirchhoff's laws.
- 3. Electro-magnetism. Fundamental laws. Work done in a magnetic field. Maxwell's rule. Lenz's law. Induced E.M.F. Faraday's laws of Induced E.M.F. Self and mutual induction.
- 4. D. C. Generators and motors: General principles. Principal parts. Types. Characteristics. Losses and efficiency. Speed control. Starters.
- 5. Alternating currents: General idea and definitions. Average and R.M.S. values. Power and power factor. Method of production.
- 6. Alternators:—Principle of working and construction.
- 7. Transformers: Principle and working. Care and maintenance.
 - 8. Induction motors: Elementary idea.
- 9. House wiring: Circuits, switches, fuses, insulation, possible defects. Care of house wiring. Heating apparatus. Household electric apparatus, kettles, electric irons, fans, bells, bulbs.

13. BOOK-KEEPING.

I Year Civil and Mechanical

Text Book:

Book-keeping:—General principles of book-keeping. Single and double entry book-keeping. Preparation of trial balances, trading, and profit and loss accounts. Balance sheets and adjustments. Elements of costs. Principles of cost accounting. Manufacturing and consignment accounts. Methods of depreciation.

14. English.

I Year Civil and Mechanical

Paraphrasing dictated passages Translation from Urdu into English. Essay and letter writing. Conversation practice.

II Year Civil and Mechanical

Writing in own words short passages read out. Essay and letter writing. Conversation practice.

III Year Civil and Mechanical

Precis writing. Writing technical reports. Conversation practice.

15. WORKSHOP PRACTICE.

I, II and III Year Civil and Mechanical.

- 1. Carpentry: The names, objects and methods of using and setting hand tools for:
 - i. The names, objects and methods of using and

- (a) Cutting:—(i) Axe (ii) Adze (iii) Chisel (iv) Gauge (v) Draw knife (bi) Spokeshave (vii) Jack plane (viii) Smoothing plane (ix) Moulding plane (x) Wood scraper (xi) Saws.
- (b) Boring:—(i)Brad awl (ii) Gimlet (iii) Auger (iv) Brace.
- (c) Wood working machines.—
- ii. Practice in: (a) Sawing (b) Chipping (c) Planing (d) Slotting.
- iii. Preparing model joints: (a) Mortice (b) Tennon (c) Dove tail (d) Halved joint (e) Rafter joint.
- iv. Preparing models such as rag bolt, foundation plate from drawing.

2. Smithy:

- i. General arrangement of smithy: (a) Stack and open fire (b) supply of blast.
- ii. Operation in forging: (a) upsetting (b) drawing down (c) cutting out (d) bending (e) punching (f) drifting.
- iii. Theory of welding: (a) Forms of welded joints(b) Butt-scarf splice (c) Stud and shaft welds.
- iv. The names, objects and methods of using and setting hand tools.
- v. Practice in: (a) Sledge hammer (b) Drawing taper (c) Bending at right angles (d) Making links (e) Forging: (i) Key (ii) Bolt (iii) Nut (f) Welding (i) Rods (b) Rings (iii) Plates (g) Soldering (h) Brazing.

3. Fitting:

- a. The names, objects and methods of using and setting hand tools:
- (a) Cold and hot chisel (b) Hammer and file (c) Scraper (d) Scribing blocks (e) Surface gauge (f) Square in marking out works (g) Flat files (h) Centre punch (i) Calipers (j) Dividers (k) Chisel and hack saw (1) Chain spanner or pipe wrench (m) pipe vice (n) Clamp (o) Screw jack vice.
- b. Practice in: (i) Chipping of cast iron (ii) Filing square and hexagonal prism (iii) Scraping (iv) Groove cutting and key (v) Fitting key (vi) Dieing and taping.

4. Masonry:

- a. The names, objects and methods of using and setting hand tools for
- i. Marking out: Mason's wooden square, Mason's line, Spirit level, Levelling, Theodolite, Tape.
- ii. Dressing: Hammers. Different kinds of chisels.
- iii. Construction: Two-foot rule, Mason's square, Mason's trowels, Pointing wooden templates, Bevel, Plumb-rule, Plumb bob, Straight edge, Set square & Spirit level.
- b. Practice in use of above tools.
- c. Construction of:—Brick masonry. Uncoursed rubble stone masonry. Coursed rubble masonry. Arch masonry.

d. Demonstration of:—Jack arch terrace, Madras terrace, Gable roofs: a. Country tiles b. Mangalore tiles c. Bengal terrace & Setting doors and windows.

16. U.T.C.

I, II and III Year Civil and Machanical.

University Syllabus.

17. Engineering Design and Drawing.

II Year Civil.

Loads. Working stresses, factors of safety, Riveted joints. Plate girder bridges. Roof Trusses. Retaining Walls. Water Reservoirs. Beams and Lintels. Jack arched Roofing. Various kinds of foundations.

DRAWINGS.

Building (one plate). Riveted joints (two plates). Plate or Built-up Girder (or Bridge) (one plate). Steel or Timber Roof Truss (three plates). Retaining wall or water reservoir (one plate). Grillage foundation or Jack arched roofing (one plate).

II Year Mechanical.

Principles of the strength of materials applied to the designs of parts of machines. Load. Stress and Strain. Effect of live loads. Factor of safety. Working stresses for various materials. Design of fastenings used in machine construction such as bolts, screws, keys, cotters, rivets and riveted joints. De-

sign of thin pipes and pipe joints. Shafts, axles and shaft couplings. Design of belts and friction gearing. Design of flywheels and pulleys. Design of pistons, piston rods, cylinders, cranks, eccentrics, crossheads, and connecting rods.

DRAWINGS.

Complete working drawings of some of the machine parts mentioned above to be made during the session.

18. STRENGTH OF MATERIALS.

Text Book:—Strength of Materials by A. Morley.

II Year Civil and Mechanical

Elastic stress and strain. Resilience. Theory of bending. Stresses in beams (bending and shear) Deflection of beams.

III Year Civil and Mechanical

Built-in and continuous beams. **DD**irect and bending stresses, (short and long columns).

Flat plates. Pipes and cylinders.

LABORATORY WORK.

II Year Civil and Mechanical.

(1) Testing bricks for resistance to cracking and crushing.

- (2) Testing cement for fineness and setting and cement and lime mortar for strength.
- (3) Testing metal bars for strength in tension, compression, bending and torsion and finding the various elastic costants.
 - (4) Testing metals for hardness.
 - (5) Use of extensometers.

19. Theory of Structures.

Text Book: Theory and Design of Structures by E. S. Andrews.

II Year Civil and Mechanical.

Riveted joints. Bending moments and shearing forces for rolling loads. Framed structures. Block work structures. Earth pressure. Foundations.

III Year Civil and Mechanical

Deflection of beams (graphical method). Deflection of framed structures. Moving loads on framed structures. Suspension Bridges. Metallic arches. Masonry arches. Retaining walls. Theories of earth pressure. Steel and masonry chimneys. Masonry dams.

20. HYDRAULICS.

II Year Civil and Mechanical.

Text Book: Hydraulic by Lea.

Recommended for reference:—Hydraulics by Lewitt.

Hydraulics by Love.

- 1. Introduction:—Significance of the subject in different branches of Hydraulic Engineering. Brief resume of the historic development of the hydraulic science. Scope and division of the subject.
- 2. *Hydrostatics*:—Principles of hydrostatic pressure and buovancy applied to hydraulic structures.
- 3. Fluids in Motion (General Principles): Ideal Fluid. Different kinds of motion: stream line and turbulent, steady and unsteady, uniform and non-uniform. Law of continuity. Bernoulli's theorem: Equation of energy. Practical applications in measuring water. Venturimeter and Pitot tube. Vortex motion: free and forced.
- 4. Flow through orifices and mouthpieces:—Small orifices: Discharge formula, coefficients of dischare, velocity and contraction. Standard orifice. Large orifices: discharge formula. Partially and fully drowned orifices. Velocity of approach. Flow under variable head: time of emptying vessels. Canal locks. Loss of head due to sudden enlargement, contraction and obstruction. Loss of head in convergence and divergence. Mouthpieces: internal and external: cylindrical and tapering: method of getting high coefficient of discharge.
- 5. Flow over Weirs:—Nature of flow: surface, crest and end contraction. Types: sharp and broadcrested: clear overfall and submerged. Discharge formula for sharpcrested rectangular weir. Discharge formulae and coefficients for triangular. trepezoidal and Cippoletti weirs. Broadcrested weirs: variation of coefficient with shape and size of

crest. Anicuts. Submerged weirs. Ogee weirs. Siphon weirs. Oblique weirs. Time for lowering level of reservoirs by means of weir.

6. Flow through pipes:—Fluid friction in stream line and turbulent flow. Flow in pipes: distribution of velocities, wetted perimeter, hydraulic mean depth. hydraulic gradient, energy gradient. Loss of head due to friction: coefficient of friction, critical velocity, Reynold's Number. Chezy's formula. Loss of head in bends, elbows, tees, valves. Losses in a pipe system: long pipe and short pipe.

Practical problems: design of pipes and branch pipes; parallel flow; time of emptying tank through pipe; pumping main; hydraulic transmission of power; nozzles; syphons. Water hammer.

- 7. Flow in open Channels (uniform):—Definition: difference between pipe flow and channel flow. Chezy's formula for mean velocity. Determination of C from Kutter's and Bazin's coefficients of roughness. Manning's exponential formula for mean velocity. Economical sections: in rectangular trapezoidal and circular channels. Depth for maximum velocity in circular channels. Ovoidal sewers. Permissible velocities: silting and scouring. Kennedy's theory of silt transportation and critical velocity in alluvial channels. Lacey's theory and formulae. Flow in bends: nature of flow; Raju's coefficients in relation to Reynold's numbers, ratio of curvature and width ratio, and depth and width ratio.
- 8. Flow in open channels (non-uniform):—General description. Flow in bridge openings. Afflux. Back-water. Critical velocity. Flow at critical depth. Hydraulic jump. Standing wave. Used as a dissipator of energy and as a measuring device.

9. Measurement of Flowing water:-

In Pipes:—Venturimeter, Diaphragms. Pitot tube. Water meters.

In Channels:—Distribution of velocities in the section of a channel. Velocity measurement by floats, velocity rods, Pitot tube and current meters and computation of discharge. Salt velocity method. Chemical gauging. Travelling screen method. Weirs. Venturi flume meter.

In Rivers:—Floats. Current meter. Observation of flood marks and computation of velocity and meter.

10. Dynamical similarity and model experiments:—Brief resume of the historic development of the solution of problems connected with hydraulic structures by means of experiments with scale models. Factors affecting hydraulic flow: viscosity, gravity, surface tension and elasticity. Dimensional homogeneity. Geometrical similarity. Dynamical similarity, between the model and the prototype. Criteria of Reynolds, Froude, Weber and Cauchy. Corresponding flow characteristics: length, time, velocity, discharge, etc. Typical examples of calculation.

LABORATORY WORK.

Determination of the coefficients of discharge of sharp edged orifices and various internal and external mouthpieces. Determination of the coefficients of discharge of sharp edged rectangular weir, Cipholetti weir, broad crested, oblique and syphon weirs.

Determination of the coefficients, and calibration or right angled V-notch, Venturi meter, Venturi and Standing wave flume meters.

Determination of coefficient of friction in pipes and losses in bends etc.

Gauging flow of streams by current meter, floats and velocity rods.

21. APPLIED THERMODYNAMICS

II Year Civil and Mechanical.

Text Book:—The Theory of Heat Engines by W. Inchley.

- 1. Laws of Thermodynamics:—Laws of permanent gases. The two thermodynamical laws. Internal energy and total heat of a gas.
- 2. Gaseous expansion and compression:—Isothermal and adiabatic expansion of gases assuming constant specific heats. Expansion under a general law and throttling. Work done in various cases. Heat exchanged and change of internal energ.
- 3. Cycles of operation:—Air standard efficiencies of Carnot, constant volume and constant pressure cycles. Carnot cycle and conditions for maximum efficiency. Carnot cycle and reversibility.
- 4. Entropy:—Changes of entropy of gas under various conditions. Temperature and entropy charts and their use.

- 5. Internal combustion engines:—Cycles of operation of internal combustion engines. Addition of heat at constant volume and constant pressure. Two and four stroke engines. Ideal, actual, thermal, relative and volumetric efficiencies.
- 6. Hot air engines:—Stirling, Joule and Ericsson cycles. Their theories and efficiencies.
- 7. Air compressors and motors:—Theory of air compressors and motors. Single and multi-stage compressors. Spray injection, intercoolers and after-coolers. Methods of reducing losses. Effect of clearance, leakage etc. on the efficiencies of air compressors and motors.
- 8. Properties of steam:—Properties of wet, dry and superheated steam. Total, latent and sensible heats of steam. Specific volumes. External work done and internal energy Throttling and dryness factor. Entropy of steam. Total heat-entropy (Mollier) and temperature-entropy charts and their uses.
- 9. Steam Engines:—Non-expansive and expansive working of steam. Carnot and Rankine cycles for steam. Effect of clearance and cushioning on efficiency. Effect of use of superheated steam. Sources of losses in actual engines and methods of reducing them. Indicator cards and diagram factor. Condensing and non-condensing engines.
- 10. Boilers:—Construction of boilers. Important types. Boiler efficiencies and heat balance charts. Combustion.
- 11. Condensers:—General description and elementary theory. Efficiencies of steam engines and turbines as affected by the degree of vacuum in the condensers.

- 12. Steam Turbines:—Flow of steam through orifices and nozzles. Heat drop. Design of nozzles, velocity of steam at throat and exit of the nozzles. DeLaval turbines. Multi-stage impulse turbines. Reaction turbines.
- 13. Refrigerators:—Theory and application of refrigerators. Coefficient of performance Carnot and Bell-Colman cycles.

LABORATORY WORK.

II Year (Civil & Mechanical).

(Numbers refer to experiments)

- 1. Determination of calorific value of solid.
- 2. " " liquid.
- 3. "gas."
- 4. "viscosity of lubricant
- 5. " calibration of pressure gauge.
- 6. Determination of I.H.P., B.H.P., F.H.P. & load mechanical efficiency curves of oil engine.
- 7. Determination of fuel consumption variation with load of an oil engine and thermal efficiencies.
- 8. I.H.P., B.H.P., F.H.P. & load-mechanical efficiency curves for a gas engine.
- 9. Variation of fuel consumption with load of a gas engine and thermal efficiencies.
- 10. Tests on a steam engine—Simple and noncondensing to determine I.H.P., B.H.P., F.H.P. & load-mechanical efficiency curves.
- 11. Steam consumption—load curves.

- 12. Same as 10 & 11 but engine running compound and non-condensing.
- 14. Tests on an air compressor to determine its volumetric and mechanical efficiencies and discharge per second.

III Year Mechanics.

- 1. Study of steam engine installation and its accessories.
- 2. (Determination of quality of steam by the use of throttling and separating calorimeter).
- 3. Experiments on a compound-condensing engine to determine expansion ratios.
- 4. Determination of M.E.P. of high and low pressure cylinders. M.E.P. referred to low pressure cylinder, assumed card M.E.P. and diagram factor.
- 5. Determination of mechanical, thermal, Rankine and overall efficiencies and efficiency ratio.
- 6. Load and steam consumption curves.
- 7. Determination of the coefficient of conductivity of a condenser.
- 8. Determination of air discharge from air pump.
- 9. Heat Balance Chart for a steam engine.
- 10. Performance of a boiler feed pump. Water and indicated horse power, mechanical ther-

mal and ideal efficiencies of a non-expansive cycle.

- 11. Boiler trial and preparation of heat balance chart.
- 12. Experiment on a D-slide valve and preparation of valve diagrams.
- 13. Tests on oil engine to study variation of fuel consumption with I.H.P. and B.H.P. and relation between mechanical, thermal, relative, overall efficiencies and B.H.P. or I.H.P.
- 14. Preparation of heat balance chart.
- 15. Study of governing of the engine and determination of valve events.
- 16. 7 17. Same as 13, 14 & 15 but on gas engine.

18. *J*

- 19. (Tests on steam turbines and determination of Willan's line).
- 20. (Effect of variation of vacuum on the efficiency of turbine).
- 21. (Determination of actual, ideal and relative coefficients of performance of a refrigerating plant).
- 22. (Effects of superheating and undercooling on performance of a refrigerating machine).

III Year (Mechanical).

The portion covered in the II Year together with the following:-

1. Internal combustion engine:—Ignition. Effect of advancing and retarding of ignition on effi-

ciencies. Effect of compression on fuel economy. Description of leading types manufactured. Semi-Diesel engines. Methods of injection. Detonation. Methods of governing. Supercharging. Effect on economy of quality of charge, speed and cylinder proportions.

- 2. Steam Engine:—Compounding and its advantages. Distribution of power and determination of cylinder dimensions. Mean effective pressure and steam consumption from indicator diagrams. Willan's Line. Application of the saturation curve to the indicator diagram. Missing quantity. Conversion of pressure-volume to temperature-entropy diagram. Steam-jacketing. Effect of speed, pressure, expansion ratio and vacuum on the consumption. Thermal efficiencies of the regenerative cycles. The binary vapour engines.
- 3. Boilers:—Draught. Heat transmission through plates and tubes. Lagging. Osborne Reynolds law of heat transmission. Feed water heaters. Economisers. Evaporators.
- 4. Condensers:—Construction and maintenance of several types of condensers such as jet, surface and barometric. Ejectors. Air pumps and vacuum augmenters.
- 5. Steam Turbines:—Velocity-compounded, pressure-compounded and cross-compounded turbines. Design of blades and drums. Strength of spinning discs. Effects of high pressure, temperature and superheat on the operation of turbines. Governing of steam turbines.
- 6. Refrigerators:—Types of vapour compression machines. Effect on coefficient of performance of

superheating and undercooling. Choice of a refrigerant. Use of Mollier's chart.

- 7. Advanced Physics of Gases and Vapours:— Vander Waal's and Callender's equations. Elementary treatment of variable specific heat theory and the effect of variable specific heats on the operation of internal combustion engines. Clapeyron's equation, and the specific volume of steam.
 - 22. THEORY OF MACHINES AND MACHINE DESIGN.

II Year Civil and Mechanical.

Text Book:—Theory of Machines by Toft and Kersey.

Mechanisms by Dunkerley.

- 1. General:—Definitions of a machine, mechanism, machine elements, pairs, links and chains. Higher and lower pairing. Constrained motion and degrees of freedom. Inversion. Motion of translation and rotation. Virtual motion in mechanisms. Instantaneous centres and centrodes.
- 2. Mechanisms:—Simple mechanisms and their instantaneous centres, velocity and acceleration diagrams. Relative velocities and acceleration.
 - 3. Cams:—Various types and their design.
- 4. Belts, Ropes and Chains:—Elementary theory and design.
- 5. Wheel Gearing:—Simple, compound and epicyclic trains. Elementary treatment of cycloidal and involute teeth.
 - 6. Governors:—Simple types and speed control.
- 7. Batoncing:—Primary balancing of rotating masses.

- 8. Friction:—Laws of friction. Friction of lubricated and unlubricated surfaces. Inclined plane. Screw and nut.
- 9. Construction of simple slide valve diagrams, Piston displacement, velocity and acceleration diagrams of the reciprocating engine mechanism. Klein's construction. Crank and piston effort diagrams. Correction for the inertia of reciprocating parts. Maximum fluctuation of energy and design of flywheel.

III Year Mechanical.

- 1. Valve Gears:—D-slide, piston and drop.
- 2. Radial Valve Gears:—Hackworth, Joy and Marshall valve gears.
 - 3. Link Motion: Stephenson, Gooch and Allan.
- 4. Straight line Mechanisms:—Derivations from four bar mechanism. Scott Russell and Watt's parellel motion. Coupling between non-axial shafts. Hooke's Joint.
- 5. Wheel Gearing (advanced):—Worm, screw, helical and bevel gearing. Differential and other gears.
- 6. Governors (advanced):—Inertia governors. Isochronism. Controlling force diagrams. Hunting.
- 7. Balancing (advanced). Secondary balancing of rotating and reciprocating masses.
- 8. Gyroscopic Theory and Steering Gears:— Elementary treatment of the above.

- 9. Whirling:—Design of high speed shafts. Ravleigh's principle.
- 10. Vibration:—Torsional and transverse vibrations of wires and beams. Forced vibrations and resonance. Effect of fluid friction.
- 11. Dynamometers:—Transmission and absorption types. Their operation and uses.
- 12. Value Diagrams:—Reuleaux, Zeuner, Bilgram and Oval.

23. ESTIMATING AND SPECIFICATIONS.

II Year Civil.

Text Book: Estimating—Roorkee Series.

Estimating:—a. Rules for taking out quantities in earth work, masonry, flooring, wood work, mouldings and steel work.

- b. Calculation of probable quantities of materials required to be furnished for a small masonry structure.
 - c. Common rates and their analysis.
- d. Detailed estimates of (i) a small building. (ii) a culvert (iii) a steel structure (iv) an R.C.C. structure (v) earthwork for a road.

Specifications:—Specifications of different kinds of stone and brick masonry, cement work and wood work.

24. ESTIMATING AND SPECIFICATIONS.

II Year Mechanical.

Text Book: Estimating for Mechanical Engineers by Bennett.

Recommended: Estimating by Hargrave.

General Principles.

Labour: Systems and Methods:—Simple rate fixing system. Capacity charts. Floor to floor times. Fixing rates on unprecedented work. Allowance for defective material, and defective labour. Payment of labour by day-work and piece work. Bonus system. Time and motion study.

Labour: Machine Shop:—Factors affecting feeds and speeds. Setting up allowance. Turning times. Choice of machines. Drilling, boring, planing, reamering and milling machines.

Labour in general:—For various processes in the factory.

Materials:—Test pieces. Allowance for cutting off, for machining, for waste ends for handling materials purchased outside. Estimation of total quantity of material required.

Establishment Charges:—On costs. The structure of establishment charges. Division of establishment charges. Graduated on costs. Machine rate method. Effect of overtime on the establishment charges. Drawing Office and Drafting costs.

Complete Estimate:—A simple estimating system. Checking the estimate. Comparative estimates.

General:—Analysis of actual cost, comparison of actual costs and estimates.

Specifications:—Of various materials required in the construction of machines.

25. ELECTRICAL ENGINEERING.

II Year Mechanical.

Text Book:—Electrical Technology by H. Cotton.

- 1. C.G.S. and practical electric units: Standards of current, electromotive force and resistance. Relation with mechanical units. Conversion of energy.
- 2. Electro-Magnetism:—Two fundamental law. Laplace's and Biot and Savart's laws. Their applications. Work done in moving a straight wire carrying current across a magnetic field. Maxwell's rule. Induced electromotive forces. Lenz's law.
- 3. Theory of the magnetic circuit:—Meaning of the term. Difference of magnetic potential. Magnetic analogue of Ohm's law. Source of magnetomotive force. The relation between the ampere turns and the magnetomotive force in the general case. Particular case of a toroidal coil. Measurement of magnetic

flux. The flux meter. Magnetic properties of materials other than air. Curves of flux density and ampere turns. Energy stored in a magnetic field. Energy loss represented by a hysteresis loop.

- 4. Direct current measurement:—Galvanometers. Use of a galvanometer as an ammeter or voltmeter. Moving coil voltmeter and ammeter. Standards of accuracy. Moving iron ammeters and voltmeters. Wattmeter. Deflection wattmeter. Supply meters. Watt hour meters. Standard of accuracy of supply meters. Resistance measurements. Ammeter voltmeter method. The megger. The bridge megger. Fault location.
- 5. Self and mutual Induction:—Nature of phenomena. Measure of magnitude of phenomena. The terms self and mutual induction. Units of inductance. Practical importance of inductance. The rise of a current in a circuit having self inductance. Energy stored up in an inductive circuit. Analogy of inductance with inertia.
- 6. Direct Curent Generator:—The field system. The armature. The Commutator. The brushes and brush arm. Modern forms of magnetic circuits. Multi polar machine. Magnetisation curve. Arran gement of winding on armature. Electro motive force in a winding. The current capacity of an armature. Resistance of armature. Energy conversion occuring in an amature. Different types of generators. Load curve of a separately excited generator. Series generator. Shunt generator. Self exciting property of a shunt generator. The effect of change of speed on a shunt generator. Losses in direct current generators. Simple lap and wave windings.

- 7. Direct current motors:—Principle of operation. Starting conditions Torque to overcome Wind. friction and iron losses. Types of motors. The shunt motor. Characteristics. Means of obtaining different speeds. Series motor characteristics. Speed of series motors. Compound motors.
- 8. Armature Reaction and Commutation:—The flux distribution on no load. Flux distribution due to armature currents. Effects of lack of uniformity in flux density. The origin of the tendency of D.C. machines to spark at the brushes and methods adopted to prevent sparking. Reduction of the effective self inductance of the coil.
- 9. Auxiliary fittings to D.C. machines:—Field regulators. Construction and principles. Protective resistance. Calculation of resistance steps for field regulators. Motor starters. The no-voltage and overload releases. Calculation of resistance for each step of motor starter. Direct current generators in parallel.
- 10. D.C. Power Transmission Systems:—Distribution systems. D.C. two wire system. D.C. three wire system. Means of maintaining division of voltage in three wire D.C. systems. The economics of power distribution. Kelvin's law.

III Year Mechanical.

1. Alternating current:—Preliminary. Introductory definitions. Sinusoidal wave forms. Mean value of sinusoidally varying quantity. Addition and subtraction of sinusoidal quantities of the same frequency. Vector methods of dealing with alternating quantities. Resistance and Inductance in alternat-

ing current circuits. Constant resistance and inductance in series. Problem of finding current when given applied voltage. The current voltage relationship in terms of root mean square values. Inductive circuits in parallel. Equivalent circuit. Reactors.

- 2. Condensers in alternating current circuits:—Pure capacity with sinusoidal applied voltage. Resistance in series with pure capacity carrying a sinusoidal alternating current. Sign convention for the angle. Equivalent capacity of any device taking leading current. Resistance, inductance in series with a pure capacity carrying a sinusoidal alternating current. Resistance and capacity in parallel. Inductance and condenser in parallel. Resonance.
- 3. Power in alternating current circuits: Polyphase system. Introductory definitions. Sinusoidal voltage and currents. Polyphase alternating current systems. Separate loading of the sources. Balanced load. Two phase three wrie system. Three phase four wire (star) system. Three phase three wire star. Relation between line current and load current with mesh and star connections.
- 4. Alternating current measurement:—Hot wire instruments. Advantages and disadvantages. Moving iron instruments in A.C. circuits. Dynamometer ammeter and voltmeter. Use of wattmeter in A.C. circuits. Errors in wattmeters due to self and mutual inductance and eddy currents. Measurement of power in two and three phase circuits. Instrument Transformers.
- 5. Alternating current generators:—Introductory.—Construction. Production of E.M.F. Losses and Regulation. Forces on armature winding on short

- circuit, Voltage regulation. Parallel running of alternators. Effect of variation of excitation and driving power. Single phase and multi phase alternators.
- 6. Transformers:—Functions. Core. Windings. Insulation. Cooling of transformers. Theory of action. Magnetising and no load currents. Action on load Regulation. Equivalent circuit. Short circuit test. Losses and efficiency. Copper loss. Efficiency and ratio of copper losses to iron losses.
- 7. Induction Motors:—Construction. Theory and action. Production of a rotating magnetic field. E.M.F. and current in motor. Torque characteristic. Starting of induction motors. Speed control. Single phase induction motors. The circle diagram. (Elementary idea).
- 8. Synchronous motor:—Introduction. Principle of action. Uniform torque in a three phase machine. Effect of excitation. Hunting of synchronous motors. Starting of synchronous motors. Use sycchronous motor for P.F. improvement. Application of synchronous motors.
- 9. Electrical power Transmission systems:—A.C. transmission systems—Comparision with D.C. Effect of capacity and inductance in alternating current lines. Limitation of voltage in high power lines. Protective devices. The use of reactors.

Laboratory Work.

1. Testing of insulation by meggar and study of meggar. 2. Calibration of ammeter. 3. Calibration volt meter. 4. Testing of fuse wires. 5. Open circuit test of a separately excited dynamo. 6. Load test of a separately enacted dynamo. 7. Determination of variation

in speed of a D.C. shunt motor, with its excitation and other test on shunt motor. §. To determine the magnetic flux leakage coefficient of a D.C. machine. 9. Study of induction motor and its different starters. 10. Non inductive load test of a transformer. 11. Determination of drop and hence regulation by methods of putting two equal transformers in opposition. 12. Open circuit test of an alternator. 13. Determination of angle of lags in A.C. circuit by 3 volts motors. 14. Measurement of power in A.C. circuit by 3 volts meters.

26. Reinforced Cement Concrete.

III Year Civil.

Text Book:—R.C.C. Theory and Practice by Faber & Bowie.

Nature uses, properties, advantages and disadvantage of Reinforced Concrete over other types of construction. Assumptions made in theory of stress in R.C. beams.

Theory and Design of simple beams, T-Beams, and slabs for different conditions of loading.

Shear, bond and Diagonal tension, its nature, evaluation and location of reinforcement.

Design of doubly reinforced beams and continuous beams.

Theory and Design of R.C. columns and piles.

Design of slab foundations.

Design of simple cantilever and counterfort retaining walls.

Design of R.C. Arches by simple empirical rules.

DRAWING

Any three of the following plates duly completed and finished with complete reports:—

- 1. Drawing of a beam
- 2. " " T-beam
- 3. ", " a slab
- 4. " " column
- 5. ,, ,, retaining wall
- 6. " " " Counterfort retaining wall
- 7. " " Circular or rectangular water tank
- 8. ,, ,, doubly reinforced beam
- 9. , beams, slabs etc., graphically representing L.C.C. regulations.

27. IRRIGATION AND WATER POWER.

III Year Civil.

Text Book:—Irrigation by Ellis.

- 1. Introduction:—Significance of irrigation. Brief resume of its development generally in the world and specially in India and Hyderabad.
- 2. Types:—Flow and lift irrigation. Perennial and inundation irrigation. Direct and tank irrigation.
- 3. Estimate of dependable water supply for Irrigation and Power Development:—Rainfall:—Catchment area. Standard Rainguage. Rainfall records. Mean rainfall. Deviation of short term records from the mean. Run-off:—Definition and factors affecting it. Run-off from daily rainfall with reference to saturation of catchment. Run-off from gaugings of

stream flow. Yield:—From monsoon rainfall. Strange's tables. Dependable supply:—Methods of estimating.

- 4. Maximum Flood Discharge:—Need in adequate provision of surplus works. Dependent upon size, shape, nature, slope and saturation of catchment. Estimate by formulae of Ryves, Dickens, Beale, Ali Nawaz Jung, Creager and Inglis. Estimate by observation of flood marks and calculation of velocity and cross section of stream.
- 5. Water requirements for Irrigation in the commanded area:—Crops:—their nature, seasons and water requirements and methods of expression. Duty:—definition, base and place of measurement. Values for important crops. Nature and extent of proposed irrigation in the commanded area. Water supply required on the field. Losses:—During transit in the canals. Evaporation and percolation in the tank. Total water requirements.
- 6. Water requirements for Power Development: Brief resume of water power resources and development in the world, India and Hyderbad. Compilation of projects for irrigation and water power. Water Power: basis and computation. Load curve and load factor of power plant. Estimate of capacity and annual output of plant and corresponding water supply requirements.
- 7. Head Works:—a. Diversion Works: components: anicut or weir, supply regulator, scouring sluice. Suitable sites. b. Storage Works: components: dam, surplus works and supply regulators. Suitable sites. Fixing capacity of reservoir.

- 8. Earthen Dams:—Types: Bunds with homogeneous material, with hearting and with core wall. Study of soils suitable for bunds. Causes of failure. Percolation and saturation gradients. Standard sections of earthen bunds.
- 9. Masonry and Concrete Dams:—Types: Nonoverflow and overflow solid gravity and arch. Brief resume of the development in the design of masonry dams. Non-overflow type: low and high dams. General considerations of design with typical examples. Overflow type: design of ogee profile. Design. of energy dissipator at toe. Typical examples.
- 10. Masonry Weirs:—On hard foundations: Design with examples. On sand foundations: Bligh's theory of creep in sub-soil. New theory of Khosla. Design.
- 11. Surplus Works:—Weirs: free overfall, submerged, flush and syphon spillways. Design with examples. Automatic gates: principles of design with examples. Flood absorptive capacity of reservoirs and allowance for its effect.
- 12. Sluices:—Head Sluices: plugs, reservoirs gates and their design. Scouring Sluices: purpose and design.
- 13. Irrigation Canals:—Types of alignment: contour, bridge and side slope. Standard sections. Balancing depth. Permissible velocities Transit losses. Waterlogging. Lining. Falls. Bends. Regulators. Escapes. Bridges. Roads. Distributories and minors. Measuring devices: standing wave flumemeters, Ventruri flume meters, modules. Silt probelms. theories of Kennedy and lecey. Prevention of excessive deposition.

- 14. Power Canals:—Design with minimum loss of head. Lining. Capacity for peak load discharge. Forebay.
- 15. Protective Works:—Under overflow dams, weirs and canal falls. Aprons, steps, energy dissipators, water cushions, hydraulic jump, baffies, dentated sills.
- 16. Cross Drainage Works:—Inlets. Level crossings. Aqueducts. Superpassages Syphonague ducts, Syphons.

Design and Drawing:—Designing from given data and drawing of:—a profile etc. of an earthen bund, a tank surplus weir, a tank sluice, an irrigation canal, a cross drainage work.

28. WATER SUPPLY.

III Year Civil.

Text Book: Water Supply, Roorkee Series.

- 1. Introduction: Necessity of scheme, general lay out and the examination of sources of supply available.
- 2. Estimating of quantity of water:—Quantity of water required by community, average daily supply for drinking, drainage, gardening and sundry works.
- 3. Sources of supply:—Wells (in detail), rivers, lakes, springs, etc.
- 4. Purification of water:—Mineral impurities, organic impurities, settling tanks, filters, chlorination, clear water reservoirs.

- 5. Distribution of Water:—Intermittent and constant system, pipe fittings, house connections, mains, sluice valve, air valve, reflux valve and relief valve.
- 6. Measurement of water and prevention of waste:
 —Positive meters and Inferential meters. Venturi
 meter and recorder.

29. Santtary Engineering.

III Year Civil.

Text Book: Sewage and Drainage Works—Roorkee Series.

- 1. Introduction:—Preliminary requirement for the scheme and its working.
- 2. Collection and aisposal of Sewaye:—Comparison of new and old sewage collection and disposal system with their pros and cons.
- 3. Drains:—Alignment, slope, junction and cleaning.
- 4. Sewers:—Atignments, separation of sewers with drains, materials used, section of sewers, drops, manholes, ventilation, storm over flows, flushing tanks, gulleys.
- 5. House connections:—Water closets, baths, latrines, urinals, house drainage, grease traps, sinks and junctions with main sewers.
- 6. Elevators:—Shone's Ejetors, Adam's sewage lift, hydraulic system and automatic sewage lift.
 - 7. Public necessities:—Public urinals, latrines, etc.
- 8. Disposal works:—Selection of site for disposal. Septic tanks, percolating filters, contact beds, activated sludge and chemical treatment.

30. Architecture.

III Year Civil.

General principles of modern, classic, and Indo-Saracenic architecture of civic, religious and bussiness premises, theatres, museums, colleges and universities and other public buildings.

31. Town Planning.

Town Planning.—General principles of town planning. Suitability of an area. Boundries Adoption of design to natural features. Allocation of area for several classes of buildings, park and open space. Advantages and disadvantages of private open spaces. Improvement of existing conditions of cities. Design and construction of streets, side walks and kerbs, markets, parks, cemeteries, and shade trees. Ornamenting and beautifying of towns.

32. Roads.

III Year Civil.

Text Books: Roads—Roorkee Series.

General principles. Gradients and curves. Metalled roads. Surveying and Estimating. Hill Roads. Construction. Maintenance. Earth Roads. Dust prevention and modern roads.

DESIGN AND DRAWING.

Alignment on the index map. Survey plan. longitudinal section and cross section of a short road section.

33. RAILWAY ENGINEERING. III Year Civil.

Text Book: Railway, Roorkee Series.

- 1. a. History of the Railways and the evolution of Permanent-Way. b. Various kinds of Permanent-Way and their constructional details. Coning of the wheels and tilting of the rails. c. The requirements of a good track. d. The three different types of rails and their design. Fish plates and joints. The requirements of a good sleeper. e. Various types of sleepers. Their merits and demerits. Ballast, and its functions. f. The question of the Gauge. Different track gauges of the world. Standard crossing-sections of the broad and metre gauges. g. Level crossings, fencing, mile and gradient posts.
 - 2. a. Points and Crossings (Practice). b. Facing and trailing points. Diamond crossings. Constructional details of points and crossings. c. Points and Crossings (Theory). The First and the Second Method of turn-outs. d. To find the curve lead and radius of crossing by the First Method. e. To find the curve lead, switch lead and crossing lead and radius of crossing by the Second Method. f. Turn-outs from Curved track. To find curve lead and switch lead in cases of curves of contrary and similar flexures. g. Turn-outs and cross-overs. To find the distance between the noses of the crossings. h. To determine the crossing in terms of the radii and gauge in cases of turn-outs from straight and curved tracks. i. Lay-out of station yards. Platforms. j. Standard dimensions. k. Organisation for the maintenance of the track. l. Tools and methods of maintenance. m. Defects usually found in the Permanent-Way and how they are removed. Reballasting. Creep. n. Watering arrangements.

and Water Columns. Necessary hydraulic calculations to determine the head.

Curves. Theory and practice of points and crossings. Station Yards. Level crossings, fencing and gradient posts. Train watering arrangements and the necessary hydraulic calculation. Signalling and Interlocking. Standard Dimensions. Tractive Power.

34. Bridges.

III Year Civil.

Text Book: Bridges-Roorkee Series.

Culverts and bridges. Site waterway and design. Foundations, piers and abutments. Arched bridges. Design and drawing a complete design with drawings of a major bridge of stone masonery.

35. Project (Civil Engineering). III Year Civil.

- 1. The project to be prepared by the Civil Engineering students will be specified from among the following types of work:
 - a. Irrigation
 - b. Roads and Bridges
 - c. Water Supply
 - d. Drainage
 - e. Railways
 - f. Town Planning
- 2. All the Survey work for the Project may be carried out fully by each party or it may be divided into sections and each party entrusted with one section as circumstances may require. In the later case the data collected by each party would be made available to the members of the other parties.

- 3. Each B.E. I Year student will be required to prepare drawings from the survey data. This work will be examined as part of the paper on "Surveying: Field work and Drawing" in the B.E. I Examination.
- 4. Each II Year student will be required to prepare drawings from the survey data. This work will be examined as part of the paper on Surveying: Field Work and Drawing of the B.E. II Examination.
- 5. Each III Year student will be required to prepare drawings from the survey data and design and prepare a project which will include
 - a. an index map showing the whole project
 - b. a clear concise report with cross references to all drawings.
 - c. a dimensioned plan which can be checked with ease.
 - d. drawings from which the work and working drawings can be produced and from which an estimate can be prepared.
 - e. an estimate of quantities, rates and cost of the various items of works.
 - f. an abstract of the cost of the various items showing the total cost of the project.
 - g. a note on the labour and materials required for the work. This work will be examined as the paper on "Project" of the B.E. Civil Final Examination.

36 PROJECT (Mechanical Engineering).

III Year Mechanical

1. The project to be prepared by the Mechanical Students will be specified from among the following types of machines.—

- a. Boiler
- b. Steam Engine
- c. Steam Locomotive
- d. Steam Roller
- e. Steam Turbine
- f. Internal Cumbustion Engine.
- 2. All the Second and Third Year Mechanical students will together dismantle the selected machine and each will make dimensioned sketches of all its parts.
- 3. Each Second Year student will prepare detailed drawings to scale from the sketches, the work will be examined as part of the paper on Engineering Design and Drawing of the B.E. (Mechanical) II Examination.
- 4. The Third Year Mechanical Students will prepare a complete design and drawings for some other specified performances for the type of machine selected for the project and work out quantities and draw up a schedule of specifications for the materials of the various kinds required for the manufacture of the machine. This work will be examined as the paper on "Project" of the B.E. (Mechanical Final Examination).

37. AERONAUTICS.

III Year Mechanical.

Text Book:—Aircraft Design Vols. I & II by Lattimer & Needham.

Air flow and stream lines. Aero foils. Attainment of lift. Forces in steady flight. Stability. Manoeuvres

and dynamic loads. Air screw. Performance neral lay out. Air Craft materials. Wing str loads. Wing design. Power unit.

38. HYDRAULIC MACHINERY.

III Year Mechanical.

Text Book:—Hydraulic by Lea.

Reference Book:—Hydraulies by Lewitt.

Hydraulic Power Generation:—Impact of on vanes, straight and curved, with directions of tion of jet and vane parellel and inclined. done on a series of vanes on a wheel. Ship p sion by jets.

Water turbines:—Theory of reaction tur Axial, radial and mixed flow turbines. Fourne Francis and Kaplan types. Draft Tubes. The impulse turbines. Pelton wheel. Specific s and characteristic curves of turbines. Eleme theory of similarity applied to turbines. Speed lation and governing. Pressure regulation. nary and differential surge tanks. Closed stand Water hammer.

Hydraulic Pumps:—Theory of centri pumps. Single and multi-stage. Worthington duty pump. Theory of reciprocating pumps. I pump and Injector hydrant. Specific speeds and feed pump. Humphrey gas pump. Air lift p Hydraulic ram. Hydraulic air compressor. pump and Injector hydrant. Specific speeds and racteristics curves for pumps.

Hydraulic accumulator and intensifier. Hydraulic engines. Hydraulic valves. Joints and packings used in hydraulic work.

LABORATORY WORK.

III Year Mechanical.

Testing of Pelton wheel, Francis turbine, centrifugal pump, reciprocating pump, hydraulic ram etc. for efficiency and characteristics.

39. Economics.

III Year Civil and Mechanical

Text Book: Engineering Economics by T. H. Burnhall.

The data of political economy and methods by which they are studied. Relation of economic science to practice. The meaning of economic law. Demand and supply. Law of diminishing utility. Factors in production and their combination. Labour and natural agents. Increasing and decreasing returns. Capital, its influence and conditions of its accumulation. Value in relation to riches. Price, utility, and cost of production. Determinants of ratios of exchange. Element of cost. Complex problems of value. The theory of international and internal trade and its relation to home trade. The law of rent. Interest and profits. Theory of the value of money. The value of foreign bills.

40. Business Organisation and Works Management.

II Year Civil and Mechanical.

Types of Organisation. Organisation charts. La lization of industry. Horizontal and vertical connation. Trusts, combines and joint stock compan Company floatation.

Scientific methods in management. Layout works and choice of site. Purchasing and stock c trol. Production control. Determination of eco mic batch sizes. Storage. Stock-taking. Sup and distribution of small tools. Transport in Factor Use of charts. Elementary knowledge of of management.

Selection of workers. Intelligence tests. Ind trial legislation as affecting engineering industry.

Specifications for inviting tenders, informat to be given to tenderers on preliminary enquiry, ε on placing orders. Contracts for supply, erecti guarantees and acceptance.

Model forms of specifications for machine such as:—

Steam boiler, engine and turbine. Condensi plant and accessories. Gas, petrol and oil engin Water turbines and centrifugal pumps. Compresso

41. PRACTICAL TRAINING.

IV Year Civil.

1. The students are to be attached to the followi types of work:—

- a. Sub Divisional Officer's Office
- b. Divisional Engineer's Office
- c. Irrigation Works
- d. Road and Bridge Works (Mason, R.C.C. and Iron)
- e. Drainage and Sewage disposal Works
- f. Water Supply Works
- g. Building works including their electric, water supply and sanitary installations
- h. Railways
- 2. The students must study the methods of
 - a. Office routine, correspondence and accounting
 - b. Routine of obtaining sanction for works
 - c. Construction and maintenance of works
 - d. Measurement and making payment for works
- 3. Regarding office routine and accounting, the students must study
 - a. The circular orders governing the conduct of business in the office
 - b. The circular orders giving departmental instructions regarding professional design and construction of works
 - c. Organisation of the staff and their duties
- 4. Regarding obtaining sanction for works, the students must study.
 - a. The data required for preparing estimates ports
 - c. The schedule of rates of the principle items of works.

- d. The form and data of reports and estimates
- e. Heads and Sub-heads of provision to be ma in the estimates
- 5. Regarding construction and maintenance of wor the students must study
 - a. Methods of quarrying matterials. 1. Task, da and wages of labour ii. Methods of transpo of materials and earth, capacity of conveya ces, and their cost.
 - b. Tasks of different kinds of labour or gangs en ployed on contruction of works and maint nance of roads and their wages.
 - c. Rates of various materials required in constrution of various types of works
 - d. Preparation of materials for construction
 - e. Marking out works and preparing working pla
 - f. Methods of shoring and scaffolding and precations to be taken during construction for taleaty of labour and work
 - g. Details of method of assembling materials f the component parts of structures.
- 6. Regarding payment for work, the students mustudy.
 - a. Form and procedure of calling for tenders ar leiting out works on contract.
 - b. The form of contract agreement bond and i important clauses
 - c. The form of measurement book and the rules for
 - d. Methods of measuring different items of work
 - e. The form of contract certificates and the pr paration of the same from the measurement book.

42. Practical Training.

IV Year (Mechanical).

- 1. The students will be attached to the following works to study details of the various machines in use, their setting and operation:
 - a. Railway Workship
 - b. Azamjahi Mills
 - c. A Power Station
 - d. Administrative Office
- 2. When attached to the Railway Workshop the students must study:
 - a. In the Machine shop: i. Lathe ii. Drilling Machine iii. Shearing Machine iv. Milling Machine v. Shaping Machine vi. Slotting Machine vii. Tasks and cost of operations and method of recording them.
 - b. In the Erection Shop: i. Lifting Gear ii. Cranes iii. Revitting Machines iv. Tasks and cost of operations and method of recording them.
 - c. In the Fitting Shop: i. Marking out ii. Filing iii. Chipping iv. Tasks and cost of operations and method of recording them.
 - d. In the Smithy: i. General arrangement of smithy ii. Stack and open fire iii. Supply blast iv. Forging v. Welding vi. Tasks and cost of operations and method of reording them.
- 3. When attached to the Azamjahi Mills the students must study:
 - a. In the Mechanical Department: i. Turbine ii. Boiler iii. Water System iv. Candy Fil-

- ters v. Pumps and Wells etc. vi. Tesks a cost of operations and method of recordi them.
- b. In the Electrical Department: i. Generat Motor ii. Transformers and Switch Boa iii. Tasks and cost of operations and meth
- c. In the Mill Department: i. Blow Room a Cards ii. Split Frames and Spins iii. Win ing iv. Warping v. Sizing vi. Weaving v. Wear-housing viii. Dyeing and Bleachi ix. Tasks and cost of operations and meth of recording them.
- 4. When attached to a District Power Station t students must study:
 - a. In the Mechanical Department: i. Diesel I gine ii. Cooling system iii. Pumps iv. Tas and cost of operations and method of recoing them.
 - b. In the Electrical Department: i. General ii. Motor iii. Transformer iv. Switch Gov. Meters vi. Bus-bars vii. High and l tension mains viii. Sub-stations ix. Tas and cost of operations and method of recoing them.
- 5. When attached to an Administrative Office students must study:
 - a. Office routine: i. Receiving letters ii. Inward Outward Diary iii. Recording iv. (obtaining orders.
 - b. Correspondence: i. Current forms ii. Draing Notes iii. Drafting Letters iv. Filing
 - c. Accounting: i. Receiving cash ii. Rou cash book iii. Imprest cash book iv. Cabook v. Compiling accounts.

d. Methods	of obta	aining sa	nction	to we	orks: i.
Standing	g orders	(Circula	ars) ii.	Sche	dule of
rates iii	. Estim	ating iv.	Prepa	ring 1	reports.

6.	When attached to Hyderabad Electricity D	epart-
	ment the students must study the	_

		10 0 0 0 0 0 0 0		
a.	Engine Room			3 days
b.	Switch Board			$2~{ m days}$
c.	Boiler House		10.0	2 days
d.	Meter Testing	• •		2 days
e.	Winding Shop		• •	$2 \mathrm{\ days}$
f.	Electrical Testing			3 days
g.	Overhead Lines		,• •	3 days
h.	Underground Cables	s		$2 ext{ days}$
i.	Sub-stations			$2 ext{ days}$
j.	Departmental Office	& Ac	counts	
_	$ar{ ext{form}}$	• •	• •	3 days

Diploma in Education.

- 1. Candidates for the Diploma in Education must be graduates in Arts or Science of the Osmania University or of any other University recognised by it.
- 2. The course of study and training for the Diploma in Education shall extend over one academic year of three terms with the necessary attendance of 75 per cent. at the Osmania Training College of the University at Hyderabad Deccan.
- 3. The examination shall be a written examination conducted by means of printed papers. Besides the written examination there will be a practical examination in the teaching of one of the two subjects selected under section IV to test the candidates' skill in teaching. In determining the standard due regard will be paid to the college record in practical lessons.

Every candidate shall be required to give at least one lesson in the presence of a Board of two Examiners—one internal and one external.

4. The course will consist of lectures, select readings and discussions in conference, besides practice in the handling of classes and the giving of instruction followed by discussions.

Every candidate will be required to give not less than 20 lessons under supervision during the year.

- 5. Candidates shall be required to undergo a course of instruction and be examined in:—
 - (i) Principles of Education and Psychology.
 - (a) Principles of Education.
 - (b) Elementary Educational Psychology.
 - (ii) School Management and Hygiene.
 - (iii) History of Educational Ideas and select Classics in Education.
 - (vi) Methods of Teaching of any two of the following subjects:—
 - Physical or Biological Sciences, History, Geography, Mathematics, English, Urdu, Marathi, Kanarese, Telugu and Indian Classical Languages.
 - N.B.—Grouping of subjects and their teaching are conditional on the provision at the College.
 - (v) Special Subjects—One of the following:—
 - (a) Modern Educational Systems and Problems.
 - (b) Advanced Educational Psychology.
 - (c) Child Education.

Instruction will also be imparted in the following additional subjects, but no examination will be held therein:—

- (a) Blackboard Illustration.
- (b) Manual Training and Hand work, or Nature Study and Gardening.

(c) Physical Training.

The allotment of marks shall be as follows:—

- (i) Principles of Education and Psychology— 100 marks of which 50 marks shall be assigned to Principles and 50 to Elementary Educational Phychology.
- (ii) School Management and Hygiene—100 marks of which 30 marks shall be assigned to school Hygiene.
- (iii) History of Educational Ideas and select Classics in Education—100 marks of which 30 marks shall be assigned to Classics.
- (iv) Methods of Teaching—100 marks of which 25 marks shall be assigned to each of the two subjects.
 - (v) Special subjects—100 marks of which 25 marks shall be assigned to the College record.

All papers shall be of 3 hours' duration each.

(iv) Practical Examination—200 marks of which 100 marks shall be assigned to the College record.

Candidates who obtain not less than 30 per cent. of the marks in papers 1 to 5, and 33 per cent. in the aggregate of the written examination, and 35 per cent. in the practical examination shall be declared to be eligible to receive the Diploma in Education. All other candidates shall be deemed to have failed. Of the successful candidates those who obtain not less than 60 per cent. of the total marks shall be placed in the First Division, and those who obtain not less than

45 per cent. of the total marks shall be placed in the Second Division. The remaining successful candidates shall be considered to have passed in the Third Division. Successful candidates who obtain not less than 65 per cent. of the marks in the paper relating to the methods of Teaching (iv) shall be declared to have obtained distinction in that subject. In practical examination candidates who obtain 50 per cent. of the marks shall be placed in the Second Division and those who secure 65 per cent. shall be placed in the First Division.

Principles of Education & Elementary Educational Psychology.

(a) Ideas and Aims in Education. The Elemental Educational Values. The question of Formal Training. Principles of the Curriculum. Correlation in Teaching. The Logical and Psychological order of Studies.

Factors and Methods in the training of Thought.

Definition and Language in Education.

(b) Psychology and its relation to Education. Nervous System and its functions. Heredity and Environment. Instincts. Sensation, Perception, Imagination, Memory, Conception, Reasoning, Emotions. Volition. Habit formation.

Attention. Interest. Fatigue:

Play. Imitation and Suggestion.

Laws of Learning.

Formation of Character.

Books Recommended.

Betts.—Mind and its Education. (Appleton).

Gates.—Psychology for Students of Education. (Macmillan).

Ruediger.—The Principles of Education. (Harrap).

Klapper.—Contemporary Education. (Appleton).

Nunn T. P.—Education—Its Data and First Principles. (Arnold).

Dewey.—How We Think. (Heath & Co.).

Dewey.—School and Society. (Chicago N. P.).

School Management and Hygiene.

SCHOOL MANAGEMENT.

Types of Schools.

Classification of Pupils.

Head Master and Staff. Distribution of work. Timetables. Home-work. Examinations. Records. Hostels.

Order and Discipline.

Extra-curricular activities.

Parental Co-operation.

Books Recommended.

Bray.—School Organisation. (Tutorial Press).

Wren.—Indian School Organisation. (Longmans).

West.—Indian School Management and Inspection. (K. & J. Cooper).

HYGIENE.

Broad Outlines of Anatomy and Physiology.
Medical Inspection.
Defects and Diseases.
Infectious Diseases.
Conditions of healthy physical life.
Hygienic conditions of the school.
First aid in minor injuries and ailments.

Books Recommended.

Kerr.—Schools Hygiene. (Allen & Co.).

Ross.—Hygiene for Indian Schools.

Drummond.—School Hygiene. (E. Arnold & Co.)

Lyster.—Hygiene of the school (Tutorial Press).

Shaw.—School Hygiene. (Macmillan).

Maryaret Avery.—Test Book of Hygiene for Training Colleges. (Methuen) (Translated).

History of Educational Ideas and Select Classics in Education.

A period will be prescribed from time to time along with a set book or two. There will further be prescribed a book or two under Educational Classics.

The scope of the work is indicated in the books mentioned below:—

Monroe.—A Text Book in the History of Education. (Macmillan).

Boyd.—History of Western Education. (Black).

Adamson.—A Short History of Education. (C. U. Press).

Graves.—Great Educators of Three Centuries. (Macmillan).

Graves.—A Student's History of Education. (Macmillan).

Quick.—Educational Reformers. (Longmans).

Educational Classics.

Rousseau.—Emile. (Dutton & Co.).

Plato.—Republic. (Camb U. P.).

Locke.—On Education. (Macmillan).

Spencer.—Education. (Watts & Co.).

Dewey.—Democracy and Education. (Macmillan).

Methods of Teaching.

A. General. Technique in Teaching: Deductive and Inductive Development lessons, Narration, Description, Explanation, Observation, Expression. Exposition and Illustration, Questioning and Discussion.

B. In teaching the special subjects the following points will be dealt with:—

Aims and Values of the subject.

Content and its organisation.

Various methods of teaching the subject.

Schemes and Notes of lessons.

Correlation with other subjects.

Books Recommended.

PHYSICAL SCIENCE.

Brown.—Teaching Science. (London University).

Westaway.—Science Teaching. (Blackie & Son).

Smith and Hall.—Teaching of Chemistry and Physics. (Longmans).

BIOLOGICAL SCIENCE.

To be prescribed later.

HISTORY.

Klapper.—Teaching of History. (Appleton),

Johnson.—Teaching of History. (Macmillan).

Jarvis.—Teaching of History. (C. U. Press).

Keatings.—Studies in the Teaching of History (Black).

Findlay.—History and Its Place in Education. (University of London Press).

Allan.—Place of History in Education. (Blackwoods).

GEOGRAPHY.

F. L. Holtz.—The Principles and Methods of Teaching Geography. (F. L. Holtz, A.M.).

- Wallis. B. C.—The Teaching of Geography. (Cambridge University Press).
- Fairgreive. J.—Geography in School. (London University Press).
- Tamaskar.—The Principles and Methods of Teaching Geography. (Jubbulpore Press).
- Welpton., W. P.—The Teaching of Geography. (University Tutorial Press).
- Fairgrieve., J.—Class-book of Practical Geography. (G. Philips).
- Steers.—Map's and Map-making.
- Wallis., B. C.—Essentials of Practical Geography. (Macmillan & Co.). (Translated).

MATHEMATICS.

- Monteith.—Arithematic Teaching in the Infant Junior Schools. (Harrap.).
- Young.—Teaching of Mathematics. (Longman's Green & Co.).
- Schultz.—The Teaching of Mathematics in the Secondary Schools. (Macmillan Company).

ENGLISH.

- Mackenzie.—Instruction in Indian Secondary Schools. (Oxford University Press).
- Jesperson.—How to teach a Foreign Language. (Allen.).

Findly.—Modern Language Learning. (Gregg.)

Batcheldor.—Notes on the Teaching of English. (Macmillan).

Roberts and Barter.—The Teaching of English. (Blackie.)

Carpenter.—The Teaching of English. (Longmans.)

Ida Ward.—The Phonetics of English. (Heffer.)

Kitson.—Theory and Practice of Modern Language. (O.U.P.)

VERNACULARS AND CLASSICAL LANGUAGES.

Urdu, Marathi, Telugu, Canarese, and Indian Classical Languages.

- 4. Chubb.—Teaching of English (Macmillan).
- 5. Klapper.—Teaching of English (Appleton).
- 6. West M.—Language in Education (Longmans).
- 7. Ryburn R. W.—Suggestions for the teaching of the Mother Tongue in India.
- 8. Fakhrul Hassan, Mulla.—Tariqa-e-Talim Urdu. (İn preparation).

The Syllabus for Urdu and the books prescribed for it indicate the ground to be covered in other languages.

Modern Educational Systems and Problems.

A comparative study of the modern educational systems of the leading countries of the world. Indian Education shall form the centre of the study, and along with this the systems of two or three leading countries shall be prescribed from time to time. The following will be the lines of study:—

Introductory—dealing with the historical aspects and general features of the system.

Administrative control of Education.

Elementary Education. Secondary Education. Higher Education. Industrial and Technical Education. Professional Education, relating chiefly to the training of teachers.

Education of Women.

Conclusion and Outlook.

Books Recommended.

Sandiford. P.—Comparative Education (Dent.).

Monroe. P.—Articles in the Cyclopedia of Education. (Macmillan).

Ziauddin. Dr.—Systems of Education. Longmans).

Hearnshaw. F. C. J.—Educational Advancement Abroad. (Harrap).

Newton. A. P.—Universities of the Empire. (Collins and Sons).

Roman. F. W.—The New Education in Europe. (Routledge).

Thwing. C. F.—Universities of the World. (Macmillan).

Meyhew.—Education of India. (Macmillan).

ADVANCED EDUCATIONAL PSYCHOLOGY.

Psychology of Individual Differences.

Mental Testing.

Psychology of Learning.

Psychology of the fundamental school subjects.

Statistics in Education.

Books Recommended.

- Ellis.—Psychology of Individual Differences. (Appleton) pp. 74 to 128.
- Spearmen.—Abilities of Man. (Macmillan).
- Terman.—Measurement of Intelligence. (Harrap).
- Psychological Tests of Educable Capacity (Board of Education).
- Report of Consultative Committee. (Board of Education).
- Sandiford.—Educational Ssychology. (Longmans).
- Fox.—Educational Psychology. (Kegan Paul).
- Starch.—Educational Psychology. (Macmillan).
 - Statistical Methods in Education. (Houghten Mifflin).
- Holzinger.—Statistical Methods in Education. (Ginn).
- Freeman.—Experimental Education. (Harrap).
- Valentine.—Experimental Psychology and Education. (Tutorial Press). (Paul).

CHILD EDUCATION.

- Nature, Scope and Methods of Child Study.
- History of Child Education with special reference to Rousseau, Pestalozzi, Froebel and Montessorie.
- Observation and study of children. Study of exceptional children and the methods of dealing with them. Intelligence Tests.
- The stages of child development.
- Play—Theories of play and play methods. Importance of play in the development of the child. Free and organised play.
- The Child under 5 and how to deal with him.
- Fatigue.—Mental and Physical.
- The Child above 5 and how to deal with him.

Books Recommended.

- Kirkpatrick.—Fundamentals of Child Study. (Macmillan).
- Plaisted.—The Early Education of Children. (Oxford University Press).
- Waddle.—Introduction to child Psychology. (Harrap)
- Terman. L. M.—The Intelligence of School Children. (Harrap.).
- Drummond.—The Child. His Nature and Nature. (Berford Lond.).
- Picket and Boren.—Early childhood Education. (Harrap).

L. M. Ed. EXAMINATION.

			* * * * * * * * * * * * * * * * * * *

Master of Education.

- 1. A course for the degree of Master of Education shall extend over one academic year of three terms with the necessary attendance of 75 per cent. at the Osmania Training College, Hyderabad Deccan. Only 1st and 2nd class B.T.'s and Dip-in-Ed's of the Osmania University or of any other University recognised by it shall be eligible for admission to the course.
 - 2. The course of study shall consist of:
 - i. Theory of Education.
 - ii. Methodology of one of the following:--

English, Mathematics, Sciences, History and Civics, Geography, Urdu, Vernaculars, Classical languages.

- iii. Special Subject—one of the following:—
 - (a) Educational Psychology with tests and Measurements (b) History of Educational Ideas (c) Early Education of children.

3. Dissertation.

A dissertation on any educational topic, selected by the candidate and approved by the college authorities. The candidate will be attached to a member of the staff under whose direction he will carry out his work of an independent or critical nature. The dissertation will comply with the following conditions:—

- 1. It must be satisfactory in respect of literary presentation as well as in other respects.
- 2. It must be of a reasonable length and submitted a month before the date fixed for the Final Examination in a form suitable for publication. A copy of the dissertatation, if accepted, will be deposited in the College Library.
- 4. The examination shall consist of two parts, namely:—

Part I.—A written examination consisting of the following papers:—

	hours	marks.
i. Theory of Education	3	100
i. Methodology of one subject	3	100
iii. Special subject.		
a. Educational Psychology with tests and measurements	3	100
b. History of Educational Ideas	3	100
c. Early Education of Children	3	100
Part II.—The dissertation.		200

The dissertation will be examined by a Board of Examiners consisting of at least two examiners, one of whom must be the supervisor of the candidate. The candidate may be subjected to a *viva voce* examination on the dissertation. The examiners shall be at liberty to reject a dissertation without *viva voce* examination.

5. Candidates who obtain not less than 35 per cent. marks in each of the papers, and 37 per cent. marks in the dissertation and 37 per cent. in the aggregate shall be declared to be eligible to receive the degree of Master of Education.

Names of successful candidates shall be arranged in three classes as under:—

60 per cent. out of the total marks II Class 50 per cent. out of the total marks III Class 37 per cent. out of the total marks III Class

Successful candidates who obtain not less than 65 per cent. marks in the dissertation shall be declared to have attained distinction in that subject.

- 6. Candidates who fail in one part, will be allowed to complete the other, without attending the college, provided they do so within three years of leaving the college.
 - 7. The following is the scale of fees.

Examination Fee. Both parts Rs. 50|- part I Rs. 30|- part II Rs. 30|- Tuition Fee Rs. 100|-.

THEORY OF EDUCATION.

(a) Philosophy.

The function of education in the biological record. Aims and conceptions of education.

Factors of education and the function of the School.

The problem of the curriculum; Formal discipline and the transfer of training; the logical and psychological order of studies.

Training of Thought;—Analysis of a complete act of thought. Various factors and obstacles; Methods of thought: Discovery, Verification and Proof.

Functions of definitions and language in Education

(b) Sociology.

The sociological basis of Education. The meaning and scope of Educational Sociology. The basis and nature of Society. Factors of Socialization. Education as a socializing factor. Social progress and the problem of Education. Education and individuality. Education and the State; Education and Population; Education and Industry. Education and School organisation. Adult Education. Extra Curricular activities. Discipline and self Government in schools. Co-operation between school and the other social agencies.

Books Recommended.

- (a) Henderson—A Text book in the Principles of Education. (Macmillan).
 - Adamson—The Individual and the Environment. (Longmans).

THE TEACHING OF MATHEMATICS.

1. The course will consist of select readings, discussions and occasional lectures. Students will write essays on selected topics, based on the study of the books recommended, take active part in discussions, write reports thereof and attend lectures.

The following syllabus indicates the nature of the topics to be treated in the course:—

- (i) Principles of Mathematical Education.
- (ii) The Educational value of the different mathematical subjects of high school course.
- (iii) Experiments in the teaching of Mathematics.
- (iv) The treatment of the special topics of the different branches of Mathematics.

- (v) Drill in Mathematics.
- (vi) Mathematics in relation with other school subjects.
- (vii) The future of the teaching of Mathematics.

II. Books recommended.

- 1. Carson—Mathematical Education.
 (Ginn & Co. London & New York).
- 2. Branford—A study of Mathematical Education. (Clarendon Press, Oxford).
- 3. Eugene Smith.—The teaching of Elementary Mathematics (Mac.).
- 4. Thorndike.—The Psychology of Arithematic. Chapters I, V, VII & IX (Mac.).
- 5. Thorndike.—The Psychology of Algebra, Chapters II, V, X, IX. (Mac.).
- 6. Nunn. T. P.—The teaching of Algebra. .
- 7. —The Report on the Teaching of Geometry (Mathematical Association, London).

THE TEACHING OF SCIENCE.

The class will be conducted as a reading and discussion circle. Students will study the books recommended and will write essays on topics studied individually. The following syllabus represents the nature of the topics for discussion or study.

Syllabus.

Aims of Science teaching.

Methods in Science teaching.

Everyday Science.

Laboratory and its Management.

General vs. Specialised Science.

Science and Industry.

Correlation of Science with other school subjects.

Humanism in Science.

Books recommended.

- 1. Westaway F.—Science Teaching. (Blackie & Son.).
 - 2. Cawthorne.—Science in Education. (O. U. P.).
 - 3. Board of Education Report.—Natural Science in Education.
- 4. Smith & Hall.—Teaching of Physics and Chemistry. (Longmans).
 - 5. Parsons.—Everyday Science. (Mac.).

TEACHING OF HISTORY AND CIVICS.

History.

Process involved in the learning of History:—

*Imagination, memory and judgment; their cultivation.

Sources and their examination.

Measurement of attainment in *History; tests and testing.

Types of errors in History and their suggested remedies.

Standards for the improvement of teachers.

Dalton plan and laboratory methods in History.

Civics.

Relation between History and Civics.

Historical and Civic sense—how to develop.

Aims and objectives

Types of courses in Civics.

Methods and special problems.

Equipment and materials.

Tests in civics and methods of conducting them.

Books recommended.

Judd.—Psychology of High Schools Subjects. (Ginn).

Reed.—Psychology of Elementary School subjects. (Ginn).

Starch.—Educational Psychology. (Mac.).

Freeman.—Psychology of the Common Branches. (Harrap).

Burton.—The supervision of elementary subjects. (Appleton).

Schmidt.—Teaching and Learning the Common Branches. (Appleton).

Klapper.—Teaching of History. (Appleton). (*Related chapters).

Clarke.—Foundations of History Teaching (O.U.P.)

Bourne.—Teaching of History and Civics. (Longmans).

GEOGRAPHY

The following syllabus shows the nature of the topics for discussion and study.

- 1. Geography as a human science.
- 2. Regional study of Geography.
- 3. Methods and special problems.
- 4. Correlation.
- 5. The Geographical Laboratory and Library and their Equipment.
- 6. Collateral Reading.
- 7. Outdoor work in Geography.
- 8. Practical Geography.
- 9. Examinations and Tests.

Books Recommended.

Skeat.—The Principles of Geography. (O.U.P.).

Semple.—Influence of Geographical Environment. (Constable).

Holtz. F. L.—Principles and methods of teaching Geography. (F. L. Holtz, A.M.).

Fairgrieve. J.—Geography in School. (L.U.P.).

Fairgrieve and Young.—Practical Geography. (G. Phillip).

Garmelt.—The study of Map.

Steers.—Maps and Map-Making.

Wallis. B. C.—The Teaching of Geography. (C. U. P.).

Herbert Hatch.—Outdoor Geography (Blackie).

Barnard.—Principles and Practice of Geography Teaching (U.T.P.).

Herbert Hatch.—Out door Geography (Blackie).

EDUCATIONAL PSYCHOLOGY WITH TESTS AND MEASUREMENTS.

(a) The nature and scope of Educational Psychology.

Mental heredity and Individual differences.

The behaviour of organisms. Instincts. habit and inteligence in animals.

Instincts.

Emotions. Development of sentiments. Organization of character.

Intelligence. Development of Intelligence.

Mental testing.

Conditioned reactions.

Learning and Habit formation, Animal and Human Learning.

The Practice curve. Economy and technique of memorizing.

Association. Imagery and Imagination.

Memory. Economy in memorising.

Muscular and mental work. Fatigue.

Mental Hygiene of a school life.

Transfer of training.

Education Tests. Examination, orthodox and new.

Elements of vocational testing and guidance.

Child guidance and Clinic.

B. Practical Work.

A course of laboratory work must also be attended. Records must be kept of the laboratory work and practical exercises. The following is an outline of the nature of such practical work.

Simple exercises on psychological methods.

Mental work. The economy and technique of learning.

Mental tests. Practical examination of individual cases.

Scholastic tests and Measurements.

Elements of education and vocational guidance.

Elementary statistical methods and computations.

Books recommended.

Sandiford. P.—Educational Psychology. (Longmans).

Books recommended for reference.

- 1. McDougall. W.—An Outline of Psychology. (Mathews).
- 2. Thomson, Godfery.—Instinct, Intelligence & Character. (Allen & Unwin).
- 3. Spearman. C.—The Abilities of Man. (Mac.).
- 4. Board of Education—Psychological Tests of Educable Capacity.
